This extraordinary growth seems to illustrate the acceleration of a new drink trend with great potential. With the over 60 varieties, peach being the most popular, schnapps drinkers have a tremendous selection to choose from. Furthermore, the low alcohol content, approximately 45%, not only appeals to those who are health-conscious, young and female, but also provides a compromise to the deadly mixture of drinking and driving. We feel that this type of drink not only has more o[illegible] aspects which attract consun[illegible]s to wine coolers, but can appeal to an even greater audience on the basis of its variety and versatility. We believe that while the wine cooler trend wll continue, the impact of schnapps will minimize future wine cooler growth while accelerating the trend toward lower-proof, "healthier" alcoholic drinks.

Another area trend that has shown continued good growth is imported vodka. Despite the decline of total vodka, about in line with the industry, imported vodkas are up approximately 36%. As mentioned earlier, Absolut increased 47.1%, while Stolichnaya increased 17% and Finlandia increased 12%. It appears that drinking vodka on the rocks is becoming more popular, explaining the increased demand for higher quality imports. Ths growth appears to be occurring at the expense of domestic vodkas and possibly scotch.

One new product which does not follow the general trend is Elijah Craig, introduced in September 1986 by Heaven Hill. In the face of a declining bourbon category, Elijah Craig is a 12-year-old, 94-proof bourbon positioned to compete against fine wines, scotches and cognacs. As this is such a recent introduction, we cannot yet determine the outcome of this new entry.

For the first nine months of 1986, advertising expenditures were down approximately 10% from the year earlier. This is a continuation of the decline that has occurred over the past few years. Increasingly the industry has tried to assuage its opponents' criticisms; for instance, one company solicited an advertising campaign promoting the "designated driver" idea. Aside from having its altruistic tones, the ad is a good selling campaign in that it reminds drinkers that as long as they have a designated driver they can stop worrying about driving and drink as much as they like. This appears to have been well-received by consumers.

Overall, it appears as though alcohol consumption will continue to decline with greater consumer health consciousness and the desire to lower alcohol intake. Excluding any new tax increases, we expect the liquor industry to decline in the area of 2% to 3% per year in unit volume.#

Mr. Maxwell is with Furman Selz Mager Dietz & Birney, New York.

Top-selling liquor brands

Brands selling more than one million cases. *Estimate. *Source: John C. Maxwell Jr., Laidlaw Ansbacher, New York.*

Food industry feast

Spending up 17%; new lines promised

By NANCY GIGES and JULIE FRANZ

WESLEY CHAPEL, FLA.—The country's major food marketers plan to boost their advertising and marketing expenditures an average 17% this year.

Confidence in the strength of their basic businesses will fuel new-product introductions—mostly line extensions—after a surprisingly successful 1986, according to top executives from 16 companies making presentations to the Consumer Analysts Group of New York, meeting here.

These companies spent about $5.1 billion last year and expect to spend $6 billion this year.

Quaker Oats Co. Chairman-ceo William Smithburg voiced a common theme by saying 1987 is "marked with the beginnings of renewed growth."

And marketing spending is expected to continue growing through the decade, industry analysts say, as food companies reinvest dollars saved from lower taxes. Overall, the more favorable tax law should reduce the industry's tax liabilities by about one-fifth, analysts report.

Much of the increase in marketing support is going into building existing brand franchises, many acquired in the recent flurry of mergers and acquisitions.

For example, Chicago-based Quaker said it will put particular emphasis on its new Golden Grain brands (rice and pasta side dishes), which came last year with the Golden Grain Macaroni Co. buyout.

New packaging and fresh advertising for Rice-A-Roni and Noodle-Roni is planned for June. Quaker Senior VP Hedric "Pete" Rhodes also said to expect Golden Grain entries in additional categories by summer.

Quaker's marketing budget is expected to rise 15% to $812 million, Mr. Smithburg said. Of that, $203 million is earmarked for adver-

Zeltzer with a twist of Riney

"Elliott's dog decides he prefers Zeltzer Seltzer" says the voiceover in this offbeat TV spot from Hal Riney & Partners, Chicago, for the introduction of Anheuser-Busch Cos.' new soft-drink line. The product should begin appearing on retail shelves this week in about half the country, with advertising starting in April. TV commercials will run only on MTV:Music Television; radio spots will air on major-market stations targeted to 12-to-24-year-olds *(see story on Page 90)*.

Chevy, P&G join in promo for free cars

By MICHELLE KREBS
Crain News Service

DETROIT—Chevrolet will put keys to its new Corsica and Beretta models in boxes of Procter & Gamble Co. products in a merchandising program the automaker believes is the largest cross-promotional effort ever.

Cincinnati-based P&G will commit nearly $40 million to support the promotion, and Chevrolet will give away 750 vehicles, worth about $10 million.

The promotion, which also includes Chevy's new full-size pickup truck, kicks off April 25, the day after the pickup's formal introduction.

Plastic keys will be placed inside packages of seven P&G products—Bounty paper towels, Charmin toilet paper, Crest toothpaste, Downy fabric softener, Folgers coffee, Pampers disposable diapers and Tide laundry detergent.

Consumers can take the keys to a local Chevy

Last Minute News

Defense questions Y&R contact

WASHINGTON—The Defense Department is reviewing whether a former chief of staff of the Army Recruiting Command had improper contacts with Young & Rubicam as that agency prepared its ultimately successful bid for the $100 million Army recruitment account. Col. Bob Phillips retired from the military Sept. 1 and "shortly thereafter" became a consultant to Y&R, the Army said last week. Col. Phillips' conduct before his retirement is the subject of the review, an Army spokesman said. The Army said the award of the contract to Y&R is unlikely to be affected. Y&R had no comment on the review.

Time Inc. to keep SAMI/Burke

NEW YORK—Time Inc., reacting to disappointingly low bids from only two prospective buyers, has decided not to divest its SAMI/Burke marketing research subsidiary, sources say. It is believed Carlyle Daniel, 56, former chairman of SAMI/Burke, will announce his retirement from Time Inc. in the near future. Insiders speculate that Time Inc., due to financial concerns, may back off from its commitment to finance half of the development costs of ScanAmerica, a national

JWT's woes

Pepsi, Kellogg shifts overseas hurt agency

By LAUREL WENTZ

While J. Walter Thompson Co. attempts to present a "business as usual" front in the wake of its management shakeup, the agency is finding international assignments from key clients PepsiCo and Kellogg Co. under siege.

And wherever JWT's bonds are breaking, Leo Burnett Co. appears ready and eager to pick up the pieces.

Burnett, which handles the Seven-Up International business acquired last year by PepsiCo and which shares Kellogg's global account with JWT, appears to be making a calculated push to gain additional assignments from both clients.

That spells more bad news for JWT Group chairman-ceo Don Johnston, who reinstated himself as the agency's chairman after dismissing Joseph O'Donnell. The group reported disappointing fourth-quarter financial results, partly due to international *(see story, Page 96)*.

The latest blow to JWT's overseas network came last week when it was abruptly fired from the $9 million Pepsi-Cola account in the U.K., the third piece of Pepsi business the agency has lost in the past month. Additionally, unofficial reviews of JWT's Pepsi assignments in Brazil and Argentina are under

(Continued on Page 96)

Highlights

Feast year for food marketers 1
The country's major food marketers plan to boost their advertising and marketing expenditures an average of 17% this year. Confidence in the strength of their basic businesses will fuel new-product introductions after a surprisingly successful 1986, according to top executives from 16 companies making presentations to the Consumer Analysts of New York.

Penney for your needs 3
J.C. Penney Co. last week turned television home-shopping into an interactive videotex grocery store, automobile dealer, travel agent, ticket agent and department store.

Bad news for Dallas paper 4
Texas Attorney General Jim Mattox is expected to file suit against the *Dallas Morning News* in the city's continuing newspaper circulation war.

Print ads get results 6
McDonald's Corp. last month launched its first major print effort in many years. Barely a month into what is projected to be a yearlong campaign, McDonald's advertising awareness rating already is significantly fatter.

Rinse cycle for mouthwashes 24
Market share positions in the $500 million mouthwash category have remained stable despite the introductions of several heavily touted plaque-fighting oral rinses coupled with category ad spending of $56 million.

Is pregnant woman unsightly? 32
Alfin Fragrances' use of a partially nude pregnant woman to sell skin cream is causing a bit of a flap. Birthright by Irma Shorell, Alfin's skincare line that claims to minimize stretch marks and cracked nipples during pregnancy, was introduced to consumers this month in a $2 million print campaign.

Burnett charts growth 82
The new top executives at Leo Burnett Co. here have begun their reign with an increased commitment to growth from direct marketing, in-house TV commercial production and international expansion through acquisitions.

FEATURES

Stark contrast to New York 72
Saatchi & Saatchi's London agency is exporting a top creative in the U.K. ad industry to New York. Jeff Stark, currently joint creative director of Saatchi & Saatchi Compton Worldwide and one of a handful of creatives who helped to build the first Saatchi office from a creative hot shop into a London mega-agency, is joining Saatchi & Saatchi Compton in New York.

INTERNATIONAL

Ad growth continues abroad 60
Foreign ad spending increases will continue to beat U.S. growth, but by a smaller margin than last year, according to the latest Advertising Age survey of ad executives.

Brewers trim sports sponsorships 61
Australia's two largest brewers, Bond Brewing (Swan, Tooheys and Castlemaine XXXX) and Carlton & United (Fosters) will cut back sponsorship of Australian sporting events following a study that questions the promotions' value.

OTHER NEWS

Ford Motor Co., which surpassed General Motors Corp. in 1986 profits, closed the gap in ad spending as well. Ad budgets are closely held secrets in the auto industry, but the most recent available numbers from tracking services indicate No. 2-ranked Ford and industry leader GM running close on total corporate ad outlays last year. Page 3.

Tobacco advertising opponents plunged ahead last week with a House bill to ban tobacco advertising and promotion. Page 12.

Specialty meat producers are having a tough time selling precooked roasts, super-trimmed steaks and "light" and "natural" beef because most consumers remain unaware of the new products. Some grocers are even questioning the validity of the products' "natural" claims. Page 76.

Frank Mingo has watched scores of black-owned agencies fail in the past 10 years. And four months ago he suffered the defection of his longtime partner. Yet Mr. Mingo's namesake agency, Mingo-Jones, recently purchased stakes in four hispanic and Asian agencies in California to broaden its ethnic reach. And the agency has picked up three prestigious accounts this year. Page 89.

Anheuser-Busch is relying on two uncharacteristic marketing tools to introduce its Zeltzer Seltzer soft drink: animation and word-of-mouth. Page 90.

SPECIAL REPORT

Consumer demand for quality products and services is changing the way the automobile industry does business. Manufacturers push quality in their advertising; dealers stress it in personnel training.

Paramount, Coke drop out of LBS talks

By WAYNE WALLEY

Los Angeles—The on-again, off-again talks concerning a joint purchase of Grey Advertising's share of LBS Communications by Coca-Cola Co. and Paramount Pictures Corp. are off.

Sources said negotiations have ended, but a Coca-Cola Telecommunications spokeswoman would not rule out a future liaison between the three companies.

Other observers, however, believe a new deal now would be impossible.

"One rumor is the price was too high," a source said, "but another says the powers-that-be at Coca-Cola simply do not want to deal with LBS."

LBS Chairman Henry Siegel could not be reached for comment, and Herman Rush, chairman-ceo at Coca-Cola Telecommunications, would not acknowledge an interest or disinterest in LBS.

Mr. Rush did say that Paramount and Coca-Cola are moving ahead with forming a new barter sales joint venture (AA, Jan. 19) and are "looking at all options, including purchasing or merging with an existing barter company."

That move, which originally was to include LBS as a third partner, instead is creating a schism between Coca-Cola and New York-based LBS, the nation's largest barter sales company.

Both Mr. Rush and Lucie Salhany, Paramount's president of domestic TV and video programming, were in New York last week, reportedly on a personnel search to staff the new company.

Ms. Salhany, reached at Paramount's New York office, said the trip concerned other business. She added that a purchase of Grey's share of LBS had not, at any time, been imminent. "We've spent too much time denying this," she said. "LBS was never part of the deal."

But other sources said negotiations heated up in January and soured before last month's convention of the National Association of Television Production Executives.

There are reports that all this spells trouble for Colex, the joint distribution and marketing arm of Coca-Cola Telecommunications and LBS.

> "We've spent too much time denying this. LBS was never part of the deal."
>
> *—Lucie Salhany, Paramount's president of domestic TV and video programming*

Neither Coca-Cola nor LBS would comment, but sources said the companies have told Colex employees confidentially that their company could be phased out within six to eight months.

But both Coca-Cola and LBS contend Colex is thriving.

"But if you look closely," one source said, "Colex doesn't really have any new product; the expansion has stopped. That should tell you something."#

Rainier National turns to McCann

Seattle—Citing "creative differences over strategy," Rainier National Bank moved its $4 million account to McCann-Erickson, ending a 1½-year relationship with Young & Rubicam, San Francisco.

The bank, with about 140 branches, made the account change without a review.

When Rainier conducted a full-scale review less than two years ago, it contacted major Seattle and San Francisco shops, eventually narrowing the competition to Elgin/Syferd and DFS/Dorland, San Francisco (AA, Aug. 12, 1985). McCann didn't compete, because it held the Peoples National Bank account, which it has since lost.

Under the direction of Y&R, Rainier has presented itself in advertising as a complete supplier of financial services. The strategy is designed to give it an advantage when competition intensifies with bank deregulation.

Effective July 1, out-of-state banks will be allowed to open branches in Washington and change the name of acquired banks. Financial analysts have long pointed to Rainier as a likely acquisition candidate.

* * *

DDB Needham promoted San Francisco Chairman Martin Michael to vice chairman of the agency's western operations, a new position. Mr. Michael will evaluate agency acquisition candidates in Arizona, California and the Pacific Northwest. He reports to DDB Needham West President Alan Pando.

West Coast News

Microrim, Redmond, Wash., hired Livingston & Co., Seattle, to handle its $1.5 million computer-peripherals account, formerly at DMB&B, San Francisco, following a review.

Key Tronic, Spokane, Wash., selected Tycer Fultz Bellack/-Davis, Seattle, to handle its $1 million account previously at Elgee Co. Dahlin Smith White, Salt Lake City, also competed for the business.#

WE'RE OLD ENOUGH TO CHANGE OUR NAME.

On March 1, DUN'S BUSINESS MONTH gets a new name, a bright new outlook and a solid link with INC. Magazine, our new owner.

For advertisers, our continued dedication to serving top management of America's largest corporations is the perfect complement to INC. Magazine's unique concentration on top management at small and mid-sized entrepreneurial enterprises.

Look for us on March 1!

ADWATCH

Print pays for Big Mac

Heavy ad spending scores with consumers

By SCOTT HUME

Even when you're spending $300 million annually on TV advertising, it's amazing what impact $12 million worth of print advertising can have.

McDonald's Corp. last month launched its first major print effort in many years with a series of ads addressing such subjects as ingredients used in its menu items and how those foods fit with a well-balanced diet. Those ads, created by Leo Burnett USA, Chicago, are running in a wide variety of vehicles, from Sunday supplements to major-market dailies and consumer magazines such as *Better Homes & Gardens*, *People* and *Time*, to professional journals such as the *New England Journal of Medicine* (AA, Jan. 19).

Barely a month into what is projected to be a yearlong campaign, McDonald's advertising awareness rating already is significantly fatter.

When the 1,000 respondents to Advertising Age's January adWatch survey of advertising awareness were asked to name the first fast-food advertiser that came to mind, 49.6% named McDonald's. That boosted Big Mac's traditionally high awareness level 4.2 percentage points, giving it its highest share of top-of-mind awareness since it captured 50.3% of responses in the August 1984 survey.

Left even farther behind by McDonald's surge were second-place Burger King, with 13.5% of first mentions last month, and Wendy's, whose ads came to mind first for only 5.7% of the sample. With McDonald's preparing to capture consumers' attention even more with its Monopoly-themed scratch-card promotion (AA, Feb. 9), BK and Wendy's are under increased pressure to present compelling advertising messages.

AdWatch is a joint project of Advertising Age and SRI Research Center, Lincoln, Neb.

Ad awareness is measured by asking a nationally projectable sample of consumers to name the advertising that first comes to mind of all seen, heard or read in the last 30 days. Consumers are queried on the first ad they remember overall as well as in a variety of product areas. During January, 1,000 consumers were polled by telephone.

Those changes in advertising awareness that are deemed statistically significant by adWatch researchers can be attributed to more than sample variation.

It should be noted that the January sample was contacted *before* last month's Super Bowl telecast, during which several new advertising campaigns were launched.

What consumers did *not* respond to in January, as they faced a holiday's worth of bills, was advertising for credit cards.

Awareness of Visa's advertising —which pointedly profiles various companies that do not accept rival American Express' card—was down 4.4 percentage points to 25.2% of first mentions in the credit-card category. Visa remained the category leader, how-

(Continued on Page 93)

"Thousands of affluent Washingtonians read one newspaper every day. And it isn't The Washington Post."

–Arnaud de Borchgrave, Editor-in-Chief, The Washington Times

"I've got news for you—the days of Washington as a one-paper town are over.

The Washington Times is here to stay.

Every weekday, The Times reaches more than 200,000 of Washington's affluent readers. That's a big chunk of the market. Especially when you consider that more than half of our readers don't read The Washington Post on any given day.

Now, I'm not suggesting that you take The Post out of your buy. That wouldn't make sense. But if you want to reach more of the right people in Washington, you need more than The Post.

You need The Washington Times.

Call our Advertising Director, O. T. Watkins, at 1-800-233-5513 today. And get with The Times in Washington."

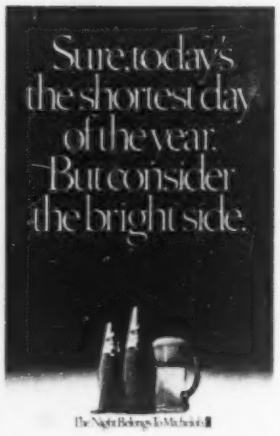
The Washington Times

We hit what The Post misses.

CORRECTIONS & CLARIFICATIONS

- The owner of Reliance Capital Group, New York, is Saul Steinberg. An article appearing in the "Marketing to Hispanics" Special Report misidentified him (AA, Feb. 9, P. S-8).
- The 1986-85 ad linage totals for *Crain's New York Business* were reversed (AA, Jan. 19). The correct totals: 422.5 pages for 1986; 265.6 for 1985.
- In the Ad Age Quarterly Best, the agency that prepared the outdoor board for Kamchatka vodka should have been identified as Evans/Weinberg Inc., Los Angeles (AA, Jan. 19, P. 48).
- In the Newspapers Special Report (AA, Jan. 26, P. S-20), cable's fifth-largest U.S. multiple system operator should nave been identified as Cox Enterprises. That name was adopted following the 1986 merger of Cox Communications and Cox Enterprises.
- In Global Gallery (AA, Feb. 9, P. 46), the caption for a South African Avis print ad erroneously stated that Avis was owned by Beatrice Cos. The present owner is Wesray Capital Corp., New York. Beatrice Cos. no longer has any South African holdings.#

BEST OF PRESS

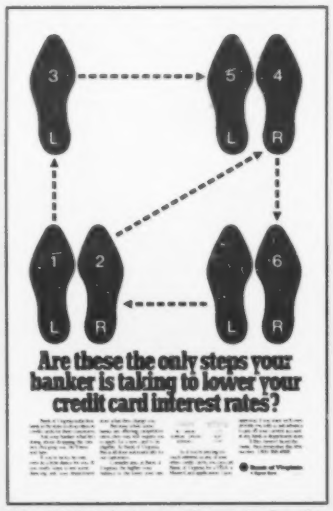


A clever combination of headline and art make this ad for Anheuser-Busch's Michelob an attention-grabber. DDB Needham Worldwide in Chicago is the agency. Creative director, Susan Gillette; copywriter, Peter McHugh; art director, Gary Alfredson.

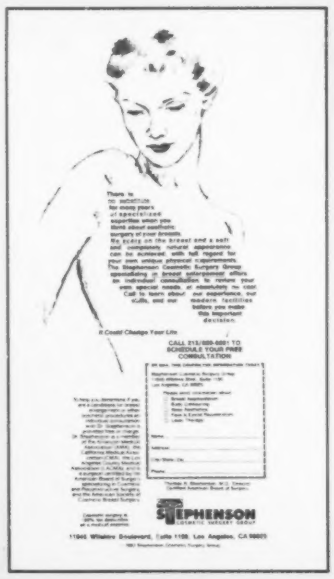
Volkswagen of America had a problem. Its Audi was the subject of a massive recall suggested by the federal government. It used this ad, via DDB Needham Worldwide in Detroit, to put the recall in the best possible light. Creative director and copywriter, Bill Klimas; art director, Joe Gallo.

This print ad for the Beef Industry Council, via Ketchum Communications/San Francisco, uses a good combination of illustration and color to whet readers' appetite for beef. Creative director, Millie Olson; copywriter, Lynda Pearson; art director, John Donaghue; illustrator, Mike Bull; photographer, Diane Padys.

A great illustration coupled with a good headline makes this ad for Zell Bros in Portland, Ore., via Borders, Perrin & Norrander, also in Portland, especially effective. Creative director, Bill Borders; copywriter, Greg Eiden; art director, Terry Schneider; photographer, C.B. Harding.



We think this is a schematic for the foxtrot, but we're not sure. We *do* know that it is an excellent way to drive home the point in this advertisement for the Bank of Virginia, via the Martin Agency, Richmond. Art director, Wayne Gibson; copywriter, Danile Russ; illustrator, Kent Lovelace.



There is no substitute for many years of specialized expertise when you think about aesthetic surgery of your breasts.

This Flash Report of newspaper advertiser investments, compiled for Advertising Age by Media Records, is derived from tabulations that cover 29 dailies and 23 Sunday editions in 15 cities: Atlanta, Baltimore, Boston, Cincinnati, Chicago, Cleveland, Dallas, Denver, Detroit, Los Angeles, New York, Philadelphia, San Francisco, Washington and Youngstown.#

Source: Media Records Inc.

Nov. ad spending jumps 14%

New York—Advertiser spending in daily newspapers in 15 major markets rose 14.3% last November compared with the same month in 1985, according to the Advertising Age Flash Report prepared by Media Records Inc. here.

November spending in the 16 Flash Report categories was $398.1 million, up from $348.2 million in November 1985. Department stores lead all gainers with a 19.9% rise, to $136.4 million. General-merchandise stores followed closely with a 37.2% gain, to $76.4 million, and food stores posted a 26.7% increase, to $34 million.

Among other gainers were amusements, up 15.8% to $33.6 million; computer stores and supplies, up 3.2% to $6.8 million; radio-TV-phonograph-records retailers, up 8.6% to $29.4 million; cameras, photo supplies and services retailers, up 16% to $899,919; airlines, up 4.9% to $15 million; new cars, up 12.5% to $20.6 million, and banks and trust companies, up 15.9% to $9 million.

Among the losing categories: Alcoholic beverages were off 19.8% to $3.3 million; computers, equipment and services, down 50.8% to $2.7 million; public-service utilities and commissions, off 12.5% to $7.2 million; publishing and media down 10.3% to $16.9 million; cigarettes down 61.7% to $3.5 million, and stock, bond and investment houses off 1.6% to $2.2 million. The Flash Report is based on SAU inch measurements in 27 daily and 23 Sunday newspapers in 15 top markets.#

Best of Press selections are made by a committee of three: Hank Simons, VP-creative director of the Newspaper Advertising Bureau; James Dunaway, VP-information at the bureau, and William F. Gloede, Advertising Age's newspaper industry reporter. National System Inc., St. Louis, provides tear sheets to the Newspaper Advertising Bureau for much of this work. Agencies, clients and newspapers are invited to submit ads for review. Submissions should be sent to Mr. Gloede in AA's New York bureau.

Industry gears up to meet consumer demands

By Kevin Brown

Keeping the customer satisfied with quality products and services is the challenge changing the face of the automotive industry.

"The consumer today is much wiser," says Gad Hitchcock, VP-general manager of Los Angeles-based Hitchcock Automotive Resources, which owns five dealerships representing 10 franchises. "He's demanding more in product quality and service work."

Consumer demands—many of which are reflected in consumer satisfaction indexes provided by companies such as Westlake Village, Calif.-based J.D. Power & Associates—lead dealers to increase personnel training and store hours, Mr. Hitchcock says. Manufacturers are pushing quality in advertising, and sales personnel are being trained to discuss quality with potential customers, he adds.

Perhaps the most dramatic change in the $104 billion parts and service market is occurring in specialty repair shops. Where there were once 226,000 service stations, there are now 115,000, of which about 90,000 can handle significant repairs, beyond oil changes and lube jobs. The decrease left a gap that specialty repair companies were eager to fill. Exhaust specialists, for example, put major emphasis on other under-the-car repairs, such as brake work.

Similarly, parts outlets are adding service bays and promoting consumer education programs to build store patronage. Contrary to some opinions, the do-it-yourselfer is alive and kicking. Some 507,300 outlets carry automotive products; all of them are competing for the more than $28 million spent by 84.5 million people, or 72% of American car owners who engage in some form of do-it-yourselfing.

Meanwhile, as manufacturers become less willing to offer low interest rates and new tax laws abolish car loan interest deductions, consumers will be looking for creative financing, and demanding better quality and service.

Service and parts market growth

New model introductions spring up year-round

By Patricia Strnad

It used to be that during the first week of October two things would happen: All the leaves would fall off the trees and automakers would introduce a flurry of new cars."

That's how Jim Fuller, VP in charge of Volkswagen United States, Troy, Mich., characterizes the traditional start of new model introductions, which begins in mid-September and runs through November. And although autumn continues to mark the official model-year changeover, automakers are turning more frequently to spring and summer to launch new vehicles, reserving the fall for modified or restyled versions of existing models.

"Automakers now are setting introduction dates for new products when they're ready, rather than trying to force them toward some contrived date of traditional announcement," says Thomas Staudt, Warren, Mich.-based Chevrolet general marketing manager.

He hastens to add that this isn't an altogether new concept: The Ford Mustang was introduced in April 1965. Back then, automakers sometimes would launch "minor" models during what was called Spring Specials, he says.

However, midyear introductions—especially those of benchmark vehicles (cars the marketers consider vital to their marketing efforts), such as Corsica and Beretta and AMC's Medallion—were the exception rather than the norm. Now automakers feel a need to get new products in the market more quickly to meet changing consumer demands, Mr. Staudt says.

Chevrolet chose to bring out its Corsica and Beretta compact cars in March because slow production prevented the company from providing dealers with enough cars, and dealers won't push low-inventory vehicles. Chevrolet projects first-year sales of the new models, which have base prices of $8,995 and $9,555, respectively, at 500,000 units.

Years ago, the new model year coincided with the calendar year, Mr. Staudt says. But snow and cold weather resulted in lukewarm new car launches, and automakers moved the model year back to the fall.

"People don't want to buy new cars in the winter," says Bill Heugh, business manager of market and product planning for Pontiac. "Why expose a new car to a winter when you can wait two months and buy in the spring?"

In recent years, March has begun what is considered the biggest selling period of the year.

But, overall, the market "is becoming less and less seasonal," says Martin Levine, general manager-marketing, American Motors Corp., Southfield, Mich. AMC is banking on the Renault Medallion to help turn the ailing automaker into a profitable one. "With the establishment of incentive programs, I don't know how anyone could do a study of seasonality," he says.

Automakers say another advantage to bringing out new models in the spring is the ability to meet head-on new entries from Japanese and other import companies, which continue to abide by the calendar year for the most part. It also helps automakers avoid the clutter and alleviate some of the competitive pressures of the typical new model-announcement period.

AMC's Mr. Levine says launching Medallion as a 1988 model in the spring presents a marketing advantage. Pontiac, which is introducing its subcompact LeMans as a 1988 model, is following the same course, according to Mr. Heugh.

"People don't want to buy a brand-new car that's going to be a year old in five months," Mr. Heugh says. "By the time we bring out the '89 models, the LeMans will have been out for 18 months, but it will be considered a 1-year-old car. That improves the resale value."

In addition, a manufacturer can keep plants running straight through the year without having to shut down production for model changeovers, Mr. Staudt says. And it "gives the selling organization a shot in the arm with something new that generates additional floor traffic," Mr. Staudt says.

But there are some drawbacks to midyear introductions: It is much harder to train dealers and to continually create new product information, and it is disruptive to operations, Mr. Staudt says. On the consumer side, there's more natural consumer interest in products in the fall, Mr. Heugh says, making it more difficult to snag first-time buyers in the spring because they are trained to come into the market in September.

VW's Mr. Fuller says there are also advertising-media implications that make it more difficult to launch a car in midyear. VW is planning to introduce its entry-level (a car aimed at a first-time buyer) Fox, which retails for $5,690, on March 20 with a first-year ad budget estimated at more than $20 million, via DDB Needham Worldwide, Troy, Mich.

"Before, you introduced all your new cars in the fall and planned all your marketing budgets accordingly," Mr. Fuller says. "Now you have to be more opportunistic. You sell what you have and reserve marketing resources to those products you have to introduce later."

Another disadvantage is that auto companies don't have as much time to promote and capitalize on a new vehicle's marketing plusses, and virtually all automakers agree that getting off to a good start with a new vehicle is essential.

"It's slightly less important than winning the Super Bowl or acquiring all the assets of Fort Knox," Mr. Fuller quips. "Seriously, sometimes if you have a bad introduction, you can recover a little bit. But you just miss that window and it's so difficult to come back. It really is the crown jewels to launch [a car] successfully."

A product's image is very significantly cast in the early stages, Mr. Staudt adds. To help a new vehicle start with a bang, many companies resort to teaser ad campaigns or special marketing promotions. For example, Chevrolet made 10,000 Corsicas and Berettas available to car rental agencies to expose the product and to arouse public curiosity.

"Every Corsica and Beretta on the road is a rolling billboard," Mr. Staudt says.

Both cars were included in a 2½-minute teaser spot that broke in 4,500 movie theaters during the Christmas holidays. The Chevrolet Division will break new ads for the models under the award-winning "Heartbeat of America" ad campaign, via Campbell-Ewald Co., Warren, this month or early in March.

But Mr. Fuller criticizes Chevrolet's marketing ploy. "I recognize why they did that, but they have a very angry dealer organization as a result. It's expensive for GM to do that in terms of actual costs and dealer attitude."

Dealers would like to be selling these models to consumers, Mr. Fuller says.

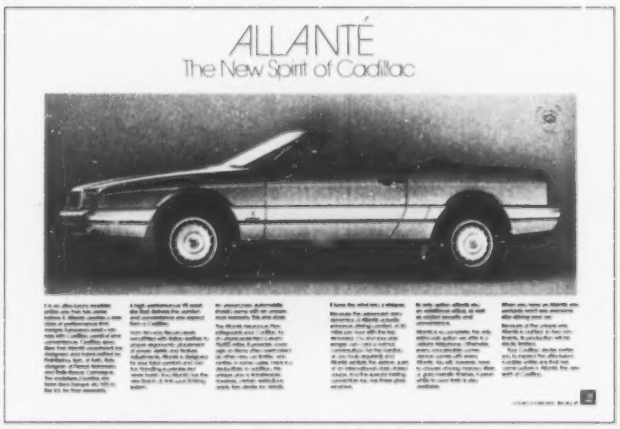
VW says it doesn't believe in pre-launch teaser ads. For the Fox introduction, VW is relying on product exposure at auto shows and on good pr.

"People are always looking for third party endorsements," Mr. Fuller says. "Advertising a car is all well and good, but consumers psychologically discount advertising as mere puffery. But good press is worth its weight in gold."

But other automakers are in favor of more direct marketing tactics. AMC broke two direct mail programs this month to precede its launch of the Medallion. One, aimed at owners of Renault products, offered a trade-in inducement. The other targeted compact-car owners and told consumers that the Medallion is a 1988 model that will be priced lower than comparable 1987 models.

AMC also set up a toll-free 800 telephone line in the fall of 1986 and invited consumers to call for information about Medallion. The company received more than 1,000 responses and forwarded the names to local dealers. Saatchi & Saatchi Compton Worldwide, Southfield, handles.

Cadillac Division began rolling out the Allante, its ultraluxury, two-seat, sports convertible that retails for $54,700, on a market-by-market basis Feb. 7. Cadillac's buildup for the Allante has included a staging of media events that began more than a year before the car's official launch date, March 30.



Cadillac began staging media events for the Allante more than a year before its official launch date, March 30.

In December 1985, the division brought in more than 200 journalists from more than two dozen nations and held a press conference inside a Boeing 747. The press conference focused on the air transport system that would bring Allante bodies, which were designed in Italy, to Detroit.

In late 1986, Cadillac threw a black tie optional dinner at the assembly plant where the Allante is being built. There, Aretha Franklin sang "Freeway," with its line about a "pink Cadillac." The division now is breaking an estimated $20 million ad campaign in spot markets via D'Arcy Masius Benton & Bowles, Bloomfield Hills, Mich., with network TV ads breaking March 30.

Chrysler Motors Corp. hasn't touted its new front-wheel-drive Dodge Daytona, nor the Chrysler LeBaron coupe and convertible models prior to their February introductions. But the company broke an eight-page insert last October showcasing new-for-1987 vehicles that included these models. Bozell, Jacobs, Kenyon & Eckhardt, Birmingham, Mich., handles Chrysler and Plymouth advertising; BBDO Worldwide, Southfield, handles Dodge.

Ford Division has been silent about marketing plans for its imported 1988 Festiva minicar. But Ford and Lincoln-Mercury Divisions of Ford Motor Co., Dearborn, Mich., used teaser ads with their biggest-ever product launches during Christmas of 1985.

Production problems delayed the Taurus-Sable launch to Dec. 26. Ford and Mercury broke teaser ads in early December with a massive blitz between Christmas Day and New Year's Eve.

Dealer groups found that between-holiday TV campaigns avoided pre-yule clutter at a time when TV viewership is very high. Young & Rubicam, Detroit, handles L-M Division; J. Walter Thompson USA, Detroit, handles Ford.

Perhaps the following activity illustrates how the spring and early summer have replaced the fall as the new model introduction window. In the upcoming months, automakers will launch a host of new products, some of which include: Chevrolet's 1988 Corsica and Beretta compact cars on March 12 and a pickup truck April 23; Pontiac's subcompact LeMans, May or June; Ford division's minicar 1988 Festiva, this spring; Lincoln-Mercury's Tracer subcompact from Mexico in mid-May; Chrysler Motors Corp.'s LeBaron coupe/convertible models this spring; American Motors Corp.'s Renault Medallion compact car, March 1; and Volkswagen's subcompact 1987 Fox, March 20.

American Motors told compact-car owners that the Medallion would be priced $1,000 less than comparable models.

Have cheap incentive rates worked too well?

By Michelle Krebs

In late August 1986, General Motors executives found themselves faced with a major dilemma. The new model year was only a month away and a million leftover 1986 models still populated dealer lots across the country.

A solution was obvious: A low-interest rate financing program. Financing incentives had ensured success in moving cars since the recession and had moved a million cars only a year earlier when the Big Three offered 7.5% and 7.7% financing while banks offered car loans at 10% to 11%.

The 7.7% and 7.5% programs had come in response to a nationwide strike by car haulers, which left 1985 models piled up in dealerships just before the 1986 new-model introduction.

Michelle Krebs is financial editor of Automotive News, *a Crain Communications Inc. publication.*

The incentives, the lowest ever to that point, caused sales to soar, cleaned out inventory and won back the three percentage points of market share that GM had lost during the first 11 months of the 1985 model year.

Domestic cars sales for September 1985 set new records with 839,382, a 59% increase over September 1984. GM sold 462,879 vehicles, up 52% from 1984; Ford sold 229,403 cars, up 46%; and Chrysler sold 108,906 cars, up 46%.

It worked so well that automakers used the same gimmick throughout the rest of 1985 and early 1986. GM instituted a 7.9% program to open calendar 1986 when its inventory again reached the 1 million mark. Ford and Chrysler were forced, as always, to follow GM's lead.

Reluctance to offer a similar financing program in the fall of 1986 existed, however. GM Chairman Roger B. Smith acknowledged the 7.7% and 7.5% programs of the previous fall had stolen sales from 1985, though he didn't know just how many. But he further acknowledged that GM had to do something because nearly a half-million cars had been dumped onto dealerships during the slowest sales month of the year. "We just had to do it," he said.

Domestic automakers' inventories plunged to a 14-year low following the 2.9% and 2.5% programs.

Auto industry observers warned that consumers had become accustomed to incentives, and it would become impossible to wean them away. The roller coaster pattern of vehicle buying during the year and consumer studies proved that, throughout late 1985 and into 1986, buyers had postponed purchases until the next round of incentives started. The automakers estimated that 60% to 65% of the cars sold during the year were being sold on the cut-rate financing programs.

Further, incentives had taken their toll on GM profits. GM blamed the August-September 7.7% program, in part, for a third-quarter operating loss. Ford and Chrysler also said the incentives cost them.

Nevertheless, GM executives decided to charge ahead in September 1986. Slumping market share may have been the deciding factor. Despite GM's on-again, off-again offerings of low-interest financing, the automaker's market share had slid again by three percentage points.

Once incentives won the go-ahead, the question then became how low to go. The 7.9%, 7.7% and even 5.9% used throughout the year had been effective, but surely weren't low enough to clear out a million vehicles in a month this time.

No, they decided, the new rate had to be more aggressive. GM's Mr. Smith later acknowledged that 3.9% may have been enough, but the automaker wanted to be sure, so it settled on 2.9%.

The blitz for what GM dubbed "The Big One" was on. The morning after GM's announcement, Chrysler announced a 2.4% program. Ford reluctantly offered a similar program, even though its inventories were slim. American Motors Corp. followed with 0% financing.

"The Big One" and its imitators worked—maybe too well, as Mr. Smith later confessed. American consumers were hooked—like addicts, dealers reported.

Nevertheless, the programs worked. The domestic automakers' inventories plunged to a 14-year low following the 2.9% and 2.5% programs. GM sold more than a half-million cars in September, Chrysler's unit sales climbed 29% to 140,451. Only Ford's sales dropped 4% to 216,609.

James G. Vorhes, then GM VP in charge of the Customer Sales and Service Staff, called the results "electrifying," triggering overflow crowds in GM showrooms. Dealers at GM and other domestic makes reported twice the normal sales.

The automakers won't reveal exactly how much incentives cost them or how much they spend to market incentive programs, the costs of which are shared with its dealers. Depending on the interest rate offered, auto analysts estimate the programs cost an automaker a minimum of $500 a car. Nevertheless, as Chrysler Chairman Lee Iacocca said following the 2.9% and 2.5% frenzy, it is impossible to estimate how much sales volume was gained that the car companies would not have enjoyed otherwise.

Today, industry executives face another dilemma: How do they get consumers off the low-interest loan drug.

At the September 1986 start of the 1987 model year, GM's Mr. Smith and President F. James McDonald vowed publicly and repeatedly that consumers would no longer see the likes of the 2.9% program. They promised they would cut production of vehicles to keep inventories in check rather than offer incentives.

Consumers don't believe it; nor do many of GM's own dealers, even though GM has made massive cuts in production of slow-selling cars.

Consumers apparently didn't believe domestic automakers would end incentives, even though GM had made massive cuts in production of slow-selling cars. January car sales, void of incentives for most of the month, fell 33% below the year-earlier sales which had the benefit of incentives. It was the worst year-to-year drop since May 1980, and may have beaten the May 1980 slump had the automakers not come through with some incentives near the end of the month.

Industry observers expect GM will continue to cut production, but the automaker will certainly be forced to offer incentives to achieve its 42% of market, another promise GM officials have made, even though GM's market share in January was 37%.

However, incentives aren't likely to be the 2.9% variety of last fall.

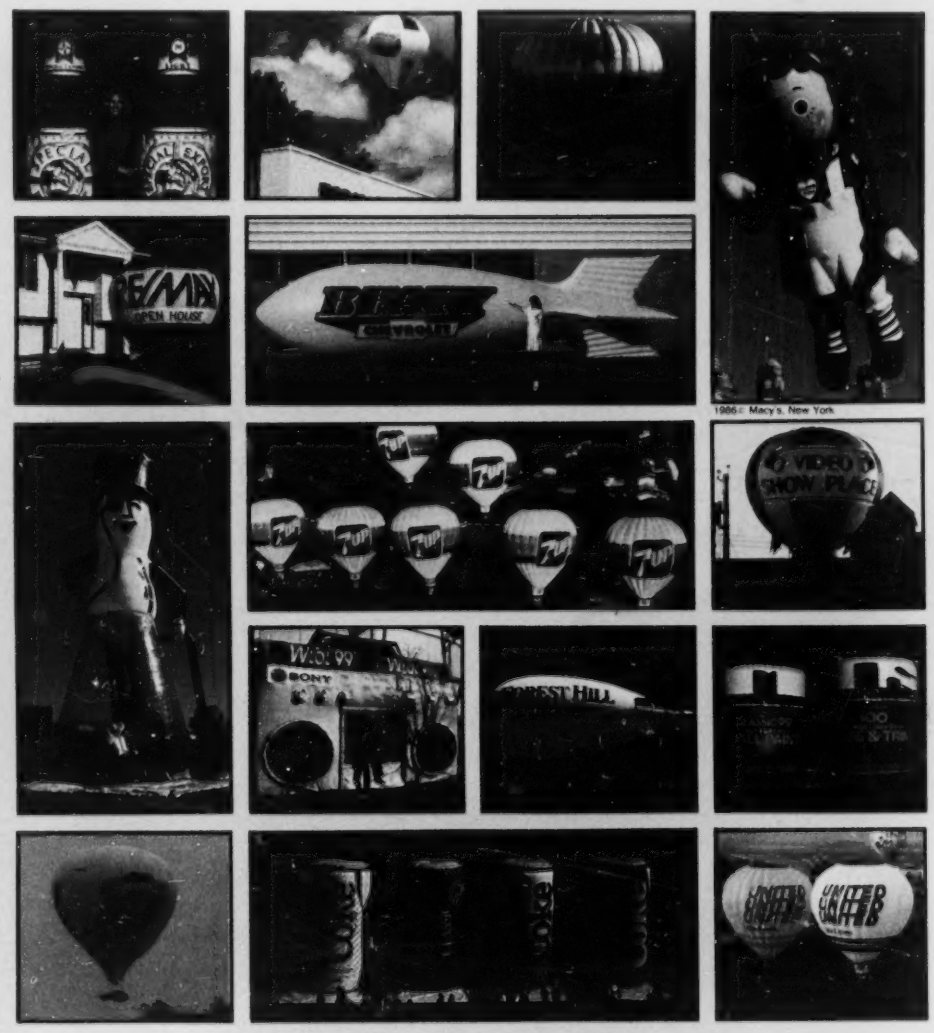
Lloyd Reuss, GM exec VP in charge of North American Passenger Car Groups, says nothing like last summer's 2.9% financing program is in the cards. "We'll do some aggressive marketing and merchandising," he said in January.

Yearend 1986 offered a glimpse of the kind of incentives GM is likely to offer during 1987.

In December, GM included free air conditioning on a number of cars and attractive lease rates on selected models. Buick gave away a free trip to buyers of GM's slowest seller, the Riviera. Many incentives will focus on specific models.

The kinds of incentives to be offered will be left up to the individual GM divisions to decide with the corporate stamp of approval. The divisions may decide to focus on a particularly strong model in its lineup in hopes of spreading a halo effect to other models in the line; or a division may decide to offer an incentive to boost a slow-selling model.

GM divisions had been asked in December to decide what would work best to meet their objectives. The options suggested included price roll-backs on selected models, dealer cash-incentive programs and special equipment packages like the free air-conditioning offer.



Blow up your ideas

Over the years, we've had the opportunity to work with some very creative people and bring their ideas to life. Our willingness to innovate and our attention to detail will compliment your creative ideas. From complete hot air balloon programs to cold air and helium inflatables, let Aerostar International help you create excitement, traffic and brand awareness.

Dealer and association ads pull their weight

By Van Wallach

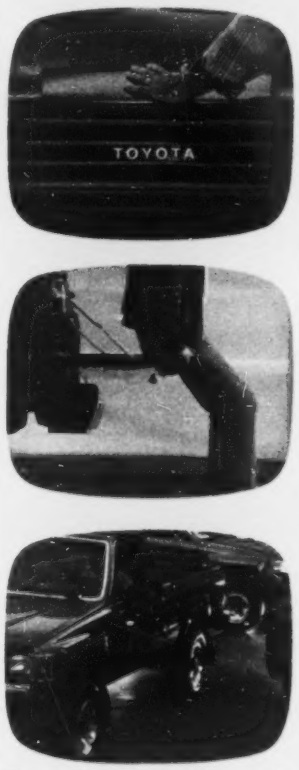
Manufacturers dish up the glitz in auto advertising. You know, the "Heartbeat of America," "Quality is Job One," "Oh, What a Feeling"—the image executions. But the nitty-gritty task of pulling consumers into showrooms via promotions and service falls to the dealers and their associations.

Dealers and associations can react quickly to market conditions and gear campaigns to local interests because they are on the scene.

"You attempt to keep your thumb on the pulse of the marketplace," says Harvey Kauffman, senior VP-management supervisor at Davis, Johnson, Mogul & Colombatto, Los Angeles, for 10 years the agency for the Southern California Toyota Dealers Advertising Association. "We can pump out a commercial in a week if we have to."

Each part of the manufacturer-association-dealer triangle has a function. "Factory" advertising supports the products and announces big themes, such as a financing program. Associations tout events, while dealers typically discuss prices and payments, according to Fritz Hitchcock, president of Hitchcock Automotive Resources, Los Angeles, owner of five dealerships, which represent 10 franchises.

Van Wallach is a Long Island City, N.Y.-based free-lance writer and frequent contributor to Special Report.



The 78-member Southern California Toyota Dealers spent $1.6 million on TV in December and sold 16,000 vehicles.

Mr. Hitchcock figures the average dealer puts 70% of his budget into newspapers. Associations, on the other hand, stress TV. The associations typically pay for their spots by assessing their members a fee on a vehicle ordered from the factory.

Not all individual dealers can afford that exposure, nor can all the associations afford to hire local agencies. Smaller groups often use manufacturers' ads with a tag line at the end. Mr. Hitchcock had been president of a Suzuki group with a $1.3 million budget. Spots came from Suzuki's national agency, Keye/Donna/Pearlstein, Los Angeles. Associations that work well with their own agency rather than the manufacturers' agency do better in sales and market penetration, he says.

The number and scope of associations have expanded rapidly in the past five years, says Christopher Cedergren, senior analyst at J.D. Power & Associates, Westlake Village, Calif., an auto research company. He puts the total number of associations at about 1,000. Associations for Japanese autos have especially become more active in reaction to the yen's strength against the dollar. With the yen up 18%, they now must solicit sales rather than wait for orders to roll in.

Over the past decade, agencies working with associations have gone through the whole roller-coaster ride of the American auto industry. Currently, these are fat times, with fees of up to $150 per car boosting association war chests. Hill, Holliday, Connors, Cosmopulos, Boston, won the New England Ford Dealers Association account 7 years ago, during the second energy crisis. The budget then was $3 million, predominantly placed in radio. In 1987 it will top $11 million, mostly in TV.

Association advertising often ties in to national sales events. Close communication between factory and association is needed to avoid embarrassing miscues. "God forbid you have a meeting without the factory rep there and plan a push for March and the ships with the cars don't come until April," Mr. Hitchcock says.

Sometimes dealers promote their own programs. For example, in January the Buick Value Team, a group representing 42

(Continued on Page S-10)

Agency convinces dealer to change 'hideous' spots

Friends don't let friends do bad advertising. At least, that's the situation between David Brown, president of Gate City Motor Co., and Mike Cecil, president of the agency Cecil Tury Cecil, both of Greensboro, N.C.

In fall 1985, Mr. Cecil decided he could no longer stomach Gate City's TV-station produced advertising with simple shots of cars and superimposed prices. "It was so hideous I called and said I was embarrassed for him. He's not a screamer and yeller. He agreed his advertising was horrible and wanted to go toward service and image."

Along with Karen Tury Cecil, VP, Mr. Cecil proposed creating "the sparkplug lady," a character who would talk directly to TV viewers about service, sometimes even spoofing the hard sell of a local competitor. "Dealer ads all do the same thing," Mr. Cecil says. "The average person is not an idiot. Viewers can perceive quality. Most dealers still yell on TV. We have a spot on that: 'Do you ever wonder why they scream at you?' "

Since Mr. Cecil's proposal, Atlanta actress Randi Martin has done more than 20 spots now for Gate City, a dealer for Chrysler-Plymouth, Lincoln/Mercury, Subaru and Peugeot. She appears as an upscale, somewhat sarcastic woman.

Mr. Cecil redirected the media from a "shotgun" buy of 70 to 80 monthly spots "most at 3 in the morning" to 20 per month on programs with high female viewership. The sparkplug lady became a huge hit. (High production costs prevented Mr. Cecil from creating point-of-sale pieces and cutout posters using Ms. Martin.)

Gate City continued the upscale angle with ads in programs for a local opera company and a symphony company. Because the Greensboro Opera Co. was performing Puccini's "Madame Butterfly," Mr. Cecil created an ad proclaiming "Bravo" in Japanese, supporting the production of "Madame Butterfly."

Gate City said "Bravo" in Japanese in support of the local opera's "Madame Butterfly."

Evidently, the strategy touched a nerve. After one spot won a Television Bureau of Advertising award, Mr. Cecil received 50 phone calls from agencies and dealers eager to borrow the concept.

Finance companies downshift around tax laws

By Michelle Krebs

The captive finance companies of the domestic automakers are likely to shift their marketing emphasis to forms of automotive financing other than low-interest rate loans and conventional loans this year as a result of a change in tax laws.

Under the tax reform act, some alternate forms of automotive financing, including leasing and home equity loans, are more attractive than they were before.

The new tax law phases out during the next four years the consumer's ability to deduct interest on consumer loans, including conventional car loans, but retains it on mortgages and home equity loans.

William Odom, exec VP of Ford Motor Credit Co., Ford's finance subsidiary, says a segment of the population that wants to own the vehicle will continue to opt for conventional loans. However, one barrier—the barrier of tax benefit—has been cleared to make leasing easier to sell, he says.

Individual leasing has grown steadily in recent years, but the ownership issue and the inability to write off interest on the lease have been major obstacles to higher growth. Mr. Odom predicts leasing under tax reform will surpass the pre-incentive high of one out of every four cars acquired on a lease.

"Leasing eventually will become an every day way of life," says Mr. Odom. He didn't estimate what percentage he thought it ultimately would be.

Lease rates will increase somewhat because of some tax benefits taken away from leasing companies. However, leasing experts say the monthly payment still will be as much as 10% to 20% lower than a monthly payment on a conventional car loan, and the buyer makes little or no down payment.

Leasing companies intend to capitalize on the tax law changes to market their lease programs.

Mr. Odom says Ford Credit intends to espouse the virtues of the lower monthly payment and small down payment to promote its Red Carpet lease more than the tax angle. Ford Credit will emphasize that the lower payment of a lease allows a car buyer to buy more of a car.

Ford Credit also may offer attractive rates or special leasing packages from time to time in 1987, Mr. Odom says. The finance subsidiary offered a special lease value package called Holiday Bonus from mid-November 1986 through Jan. 31, 1987 which, Mr. Odom says, boosted Ford Credit's lease business by one-third.

Similarly, General Motors Acceptance Corp., GM's finance subsidiary, offered a lease program during the holidays that advertised monthly lease payments of $169 to $199.

Home equity loans also gain an edge under the new tax law. A consumer is allowed to write off the interest on a home equity loan which, in turn, can be used to buy a car. Financial institutions are scrambling to develop and market home equity programs including lines of credit based on home equity.

While home equity loans are more attractive under tax reform, no one predicts a rush of consumers to take second mortgages to buy cars.

Recently retired GMAC Chairman Robert F. Murphy says he doubts many consumers will use a home equity loan to buy a car—an act that is often impulsive. Acquiring a home equity loan requires the same process of paper work, appraisals and closing as a mortgage.

Nevertheless, the automakers' finance companies and other financial institutions in the automotive finance business plan to have home equity loans available in their menu of offerings. Some already have begun to market them heavily.

Mr. Odom doesn't expect a big boom in home equity loans. The kind of people who would have enough equity built up in a home are not the kind of people who are likely to use that equity to buy a car, Mr. Odom says.

In addition, there is the difficulty of tying the financing to the point of sale at the dealership, which is complicated in some states where the customer is allowed a three-day cooling off period to rescind a decision to refinance the home.

Chrysler Credit, however, thinks it may have that challenge licked. The finance company will pilot a program whereby a consumer can buy a car and obtain a conventional car loan at the dealership. The loan then can be converted to a home equity loan through Chrysler First, Chrysler's consumer finance operation. The conversion will not let the impulsive car buyer leave the showroom because the financing is not arranged.

Dealer-association ads

(Continued from Page S-8)

Buick dealers in Philadelphia, southern New Jersey and Delaware, began a TV and radio promotion for the Skyhawk. The creative emphasized the price—less than $10,000—and the fact that dealers were providing the $490 automatic transmission at no extra cost.

Creative executions must be careful to not offend any association members. The footage for the Buick spot was shot in the Philadelphia area, says Kathy Gillin, account executive for the association's agency, Competitive Edge, Philadelphia. The agency was careful to make the spot generic enough so dealers outside the metro area were not alienated.

"We can't just promote cars parked in front of the Liberty Bell or the fringe dealers would get rightfully upset," she says. "The residual effect wouldn't benefit them."

Not all association creative is broadcast, however. Print is a valuable method for making sure all dealers get a mention in a message. Mentioning 42 dealers would require 28 seconds of a 30-second spot, Ms. Gillin says. Print sidesteps that obstacle and allows even more details, such as addresses and telephone numbers, to be included.

A Thanksgiving Day double-truck color ad by the Philadelphia/southern N.J. Buick association touted the full Buick line with a spotlight on the Century and LeSabre. Its headline was "Lease for Less," reinforcing a national Buick campaign.

The Buick value team represents 60% of the sales in the Philadelphia zone, including four dealer associations, according to Fred Tower, assistant zone manager for Philadelphia Buick. "This was the second best December in 10 years for the zone," he says.

"The dealers were visible at all times in the media," he says. The zone was one of only two in the Buick organization to enjoy a sales increase in 1986 over 1985. Ad spending was more than $2 million, apart from Buick's contributions, Mr. Tower says.

One new association has had strong results from print only. The Acura Advertising Association of Southern California was formed by a dozen dealers to promote the Acura, an upscale division of American Honda. Acura's two models, the $12,000 Integra and $21,000 Legend, had their debut last year with a national advertising budget of $20 million. Honda dealers who build separate showrooms for the Acura found that campaign, in California at least, sparked little attention.

"The dealers were frustrated with the sales and awareness levels and the amount of money spent on a national basis," says Richard Zien, president of Mendelsohn/Zien Advertising, Los Angeles. The dealers thought $60 million was needed to introduce an Acura that would compete against other introductions like Hyundai, he says.

The association's first effort, produced with help from the *Los Angeles Times*, had a "retail" look. Later, the association hired Mendelsohn/Zien because it had automotive expertise.

Mr. Zien says bluntly that a price campaign for a product with low awareness and image—"consumers couldn't even pronounce the name"—would never work. His strategy was to position Acura's Legend, priced at $21,000 and up, against more expensive vehicles for upscale consumers.

The first Mendelsohn/Zien ad last August in newspapers and local magazines addressed the issue head-on, asking: "Who on earth would trade in a BMW or a Mercedes for a car that's virtually unknown?" Another favorably compared the Legend's residual value after 60 months with that of a $104,000 Rolls-Royce Silver Spirit.

The manufacturer likes the campaign, although it has yet to provide co-op funds. The results of 1986's $2.5 million campaign indicate Mr. Zien has the right idea.

Monthly sales nearly tripled, to almost 1,500, from August to January. Dealers are especially happy because the campaign avoids a let's-make-a-deal price approach and buyers come in prepared for a hefty price tag.

"Instead of looking for deals, buyers come in ready to pay," Mr. Zien says. "It makes the cars easier to sell and at higher prices."

Acura dealers plan to spend $3 million this year, retaining the same attitude and tonality in their print ads. "We wanted our advertising to be quite arrogant because this is a hell of a car for the money," Mr. Zien says. "U.S. companies still do schlock, nonmotivating stuff. If price is the only reason to buy a car, you're in trouble."

Auto makers stress consumer satisfaction

By Raymond Serafin

Auto marketers once determined how well a division or a dealer was doing by just tallying the number of cars sold.

The arithmetic isn't as simple now that consumers have more than 30 choices of car makes, many of them available in numerous models. Instead of just counting units sold, the industry is turning more to indices that indicate the number of customers satisfied.

The so-called Customer Setisfaction Index (CSI) has had a dramatic effect on nearly everyone in the industry, from product designers to the service desks at dealerships.

Automakers use it to argue in their advertising that one survey or another proves their product superior. New dealer-franchise success may hinge on a CSI standing, and a support industry is springing up to help individual dealers raise their scores.

The CSI reflects the fundamental changes in the industry over the past decade. Instead of a manufacturing-driven business that attempted to sell what it made, it has become a consumer-driven industry that attempts products and services that match the perceived needs of customers.

"Advertising may sell the first car, but service sells the second one," says James Fuller, VP in charge of Volkswagen U.S., the marketing arm of Volkswagen of America, Troy, Mich.

And customer satisfaction, or dissatisfaction, affects more than just the odds that a customer will buy the same brand next time, says Jack Robbins, assistant general sales manager for General Motors Corp.'s Buick Division, Flint, Mich. Buick, which operates several programs aimed at improving customer relations from pre-sale to post-delivery, estimates that a satisfied customer will positively influence eight others and spur at least one more sale, while a soured customer will negatively affect 25 people, he says.

A number of auto marketers survey their own customers, or hire a research company to do so, in order to rank dealer performance.

But the most widely quoted CSI in the industry is the annual survey published since 1981 by J.D. Power & Associates, Westlake Village, Calif. Power surveys 30,000 new-car buyers 12 to 14 months after their purchase to determine their satisfaction with technical aspects of the car and, separately, with dealer performance. The overall CSI averages how each make scores on both technical and dealer aspects.

The most recent Power survey, released in August 1986 and based on 1985 model-year cars, showed that U.S.-based companies lagged behind importers in customer satisfaction. Of the top 10 makes according to this system of grading, five are Japanese and four are European, with only No. 5 Lincoln breaking the pattern. Honda ranked first in the Power CSI, followed by Mercedes-Benz.

J. David Power III, president of the research group, acknowledges that the survey results are controversial. But, he says, "Our client satisfaction index pretty much parallels the CSI."

He is careful to point out that the CSI is not an evaluation of the cars themselves. "We measure the differences between what a customer expects and what he gets," says Mr. Power.

Tom Gauer, senior project director for the Power group, says that U.S. manufacturers have made strides in narrowing the product-quality gap. In 1981-1982, 65% to 70% of customers reported problems with their domestic cars at delivery. That number is down to 40% to 50%, but the Japanese are holding their delivery problems to 20% to 25%, Mr. Gauer says.

In general, Japanese makers score high on the technical side but only average on the dealer portion of the Power CSI, says Mr. Gauer. European makers tend to score high on the dealership scale but low on the technical side.

Auto analyst Thomas O'Grady, president of Automotive Integrated Resources, Wayne, Pa., says that Honda "progressively strives for quality in their vehicle. Honda is not all that innovative in its design—the Accord is a fairly mundane vehicle, but made with extremely high quality."

New product introductions usually drag down a manufacturer's CSI score on the technical side because all the glitches haven't been worked out of production, says Mr. Gauer.

"Mercedes-Benz slipped with the introduction of the 190 series, which represented 35% of its volume. And before the last survey, Subaru had come in second because it hadn't changed product for five years," he says.

A decline to seventh, following its first new product introductions in years, forced Subaru of America, Pennsauken, N.J., to drop an ad line that touted its customer satisfaction, "Of all cars sold in America, Subaru is second only to Mercedes." Levine, Huntley, Schmidt & Beaver, New York, handles.

Subaru hopes to climb back up with the help of a comprehensive new program that will include 18 mailings to owners over a four-year period, including at least six customer-satisfaction related questionnaires.

American Honda Motor Co., Gardena, Calif., touted its first-place finish in the Power index in trade ads, but didn't change its consumer advertising. Rubin, Postaer & Associates, Los Angeles, handles Honda.

Chrysler Corp., Highland Park, Mich., and Ford Motor Co., Dearborn, Mich., conducted an ad campaign quarrel in 1986 when each cited different surveys claiming the best quality of any U.S.-built products. "Best-built, best-backed American cars and trucks," claimed Chrysler ads via Bozell, Jacobs, Kenyon & Eckhardt, Birmingham, Mich. "Best-built American cars and trucks," said the Ford corporate ads by Wells, Rich, Greene and Ford Division ads via J. Walter Thompson USA, both Detroit.

Some automakers say that giving a customer a forum keeps dissatisfaction to a minimum.

"Our goal is to get customers to complain," says Buick's Mr. Robbins. "If we can get them to open up to us, they realize we want to help." Buick operates a 60-employee Customer Assistance Center, in Flint, Mich., that can be reached with a toll-free number and a corresponding Technical Assistance Center that provides toll-free help to dealer technicians.

Toyota Motor Sales, Torrance, Calif., is taking the commitment to customer satisfaction a step further. If a customer cannot resolve a conflict with a dealer, a new program allows complaining customers to go before a third-party arbitrator selected by the American Automobile Association where a resolution will be devised.

The program is currently available in 13 states and will be national by the end of 1987.

Manufacturers also are trying various incentives to improve dealerships' contribution to customer satisfaction. Most manufacturers now use either an independent research group or conduct their own survey to rank their dealerships.

"The big issue for retailers, aside from volume, is to retain a respectable CSI. It controls them," says Jayne Hamilton, president of Market Development Associates, Bloomfield Hills, Mich., a consultancy that works with dealers to improve customer relations.

Chrysler inaugurated a $20 million "America's Team" program last fall to "provide motivation via financial recognition to all service personnel in a dealership for the quality of service they provide to their customers," says E. Thomas Pappert, group VP-sales.

Chrysler also has set a minimum CSI score as one requirement in determining which 365 dealers will get the new $30,000 Maserati-built luxury coupe that will be sold under the Chrysler brand name as a 1988 model.

And the sales agreement with those dealers will for the first time spell out a minimum CSI needed to retain the franchise, says Mr. Pappert.

Similarly, American Motors Corp., Southfield, Mich., will base its decisions this summer on which dealers will get its $30,000 sporty two-seater, the Renault Alpine, partially on CSI scores. The philosophy behind this is that people who pay this much for a car expect excellent service, according to Martin Levine, marketing manager.

AMC has been making a concerted effort to upgrade its dealers' relations with customers after scoring 29th out of 30 makes on the Power ranking of customers' satisfaction with dealers.

(American Isuzu Motors, Whittier, Calif., which satirizes dealers in its "Liar" TV spots via Della Femina, Travisano & Partners, Los Angeles and New York, finished 30th.)

"We were a little late in getting a tool to quantify [customer satisfaction with individual dealers]," says AMC's Mr. Levine. AMC now uses a survey administered by Power.

Half of AMC's dealerships have changed ownership over four years, partly as the result of a concerted effort to weed out dealers that wouldn't spend adequate money on service areas and training. "No dealer gets signed up now without a commitment to specific dealer training requirements," says Bill Carroll, general manager-North American sales.

Doug Mazza, VP-sales and marketing for Suzuki of America Automotive Corp., Brea, Calif., says that the company tries "not to penalize our dealers." Suzuki will have built a 250-dealer network by 1989 to market its subcompact Samurai sport-utility vehicle, a second 4-wheel-drive vehicle and a minicar, all to debut in 1988.

"We review each dealer CSI and make tailored recommendations," says Mr. Mazza. "So far we have a 100% profitable dealer network. We find that the dealer is much more willing to give attention to CSI and good facilities and all those other things in a profitable retail business."

Mr. Power admits to some concern that the indexes lead dealers "to beat the scores rather than satisfy the customer."

That desire to improve scores has spawned a number of CSI consultants who promise to raise a dealer's CSI through a variety of means, from sending gifts—such as flowers or a tin of cookies—to new-car buyers to conducting in-depth interviews with customers to pinpoint problems.

"Anything a dealer does to show he's concerned with the customer helps," says Mr. Gauer of the Power group. He says follow-up is a key to the success of CSI-improvement strategies. "It's not enough to call a customer and ask if he's satisfied with service if you don't have in place a system to deal with complaints."

Mr. Gauer says that the painstaking efforts to improve each dealer's customer relations do pay off. "We've tracked manufacturers who deal with customer satisfaction on a dealer-by-dealer basis, and the overall scores for the manufacturer do go up," he says.

Keeping an eye on who's keeping the customer satisfied

Indexes force dealers and manufacturers to look at quality and service

Hot performance cars muscle their way upscale

By Kenneth Wylie

Power. Lots of people want it, and one of the best places to get it is behind the wheel of an automobile—a certain kind of automobile. In the 1960s they were called "muscle cars"; today's subtler title is "performance."

More European "exotic cars," with prices ranging from $110,000 to $137,000, sold last year than in 1985.

The auto insurance companies provide some hard definitions of the performance genre. Earlier muscle cars were those with 10 horsepower or more per pound of curb weight—what the car weighs when it is ready to be driven. The Lamborghini Countach, which rockets out of Bologna, Italy, at 3,450 pounds and 420 horsepower, is outrageously muscular. The sporty Pontiac Sunbird coupe out of Pontiac, Mich., at 2,353 pounds and 90 horsepower, is not.

State Farm Insurance Co., Bloomington, Ill., the nation's largest auto insurer, now defines a performance car as an automobile the ratio of whose shipping weight to its SAE (Warrendale, Pa.-based Society of Automotive Engineers) net horsepower is less than 13.5.

Insurance companies keep close tabs on performance cars, because, basically, they would rather people walk than drive them. "There are about 3,000 auto insurance firms in the U.S.," says Harvey Seymour, spokesman for the Insurance Information Institute in Washington. "Only about 20 of them will insure performance cars." The insurance industry avoids these cars because they are built for speed, he says.

Performance car buyers "must really shop around, and may have to pay a surcharge of $100 to $200," Mr. Seymour says. State Farm levies a 25% surcharge on liability, collision and medical coverage for such autos.

In some states, Nationwide Insurance, Columbus, Ohio, the fourth-largest auto insurer, will not write any insurance on Ferrari, Lamborghini, Mercedes-Benz, Maserati or Alfa Romeo. In other states where it will insure some of the performance makes, Nationwide groups them under two headings, "undesirable" and "ineligible."

Aetna Insurance, Hartford, Conn., the fifth-largest auto insurer, "does not pursue performance car owners," according to Micaela Woodbridge, an Aetna spokeswoman. However, the company does "accommodate them," she says.

But they are accommodated at a cost. A 50-year-old, married man with a good driving record who owns a Porsche 944 Turbo in New York's suburbs will pay a six-month premium of $828. Without a seat belt, alarm system and defensive driving credits, however, the figure would have hit $1,028, Ms. Woodbridge says.

Although insurance companies can decide whether or not to write coverage on a performance car, they can't arbitrate their purchase. Automakers know that people buy highly powered, low-slung, cars for varying reasons, probably all of them closely identified with their self-image.

Because the 1987 performance car-buyer has a carnival-like variety of makes, models, styles and prices to choose from, the automakers find that a wide cast of characters are buying their products.

At one end of the spectrum is a range of extremely expensive European motor cars, generally known as "exotic cars." For example, last year 1,150 Ferraris costing $110,000 apiece were sold in the U.S. compared with 771 in 1985. Seventy-five Lamborghini Countaches and 70 Aston Martin Volantes sold at sticker prices of $125,850 and $137,000, respectively. In 1985, 62 Aston Martin Volantes were sold.

For those drivers who want something hot at a lower cost, there are some modestly priced models. A Dodge Daytona or Chevrolet Camaro each costs about $10,000. For about $12,800, Dodge offers the Daytona Turbo Z and Chevrolet sells the Chevrolet Camaro IROC-Z. Ford's Mustang GT is a bit less expensive at $12,500.

Because the performance car market's demographics span as wide a range as the cars' price tags, marketers increasingly are using psychographics to define and attract their targets. Those who have enough money to buy an exotic car are not pinching

Exotic cars

(Continued from Page S-25)
pennies, and those who buy at the lower end are looking for a rub-off effect based on looks, styling and performance—all lifestyle, and not economic, factors.

"About one million people in the U.S. have the financial capability in net worth or income to afford a Lotus, and about 20 million people would like a Lotus or a car like it," says Wes Fredericks, chairman of Lotus Performance Cars, Norwood, N.J. There are about 20,000 potential customers for Lotus, he says, "meaning that our marketing task is finding a way to reach them and creating the climate to buy a Lotus."

All of the car marketers work out the demographics of their buyers, showing gender percentage, median age, family income etc. But psychographics count most, not demographics, says a spokesman for Mercedes-Benz of North America. "Psychographics are significant to us because a plumber who can afford our auto is not nearly as likely to buy it as a physician."

Porsche also looks at the psychographics, says Gerhard Blendstrup, VP-marketing, Porsche Cars of North America, Reno, Nev.

"There are 2 million millionaires in the U.S.," he says. "Porsche wants to sell 30,000 cars here. So to reach our buyers, we don't seek out demographics. We look for the right psychographics, which leads us to our four target audiences."

About 35% to 40% of Porsche's targets are "performance enthusiasts," a to technology enthusiasts, he says. Some 25% buy on style; 20% purchase a Porsche because it is the car of choice among their professional/social group, and about 15% buy for the comfort expensive cars offer, Mr. Blendstrup says.

Even after picking up the tab, exotic-car owners face an almost certain trail of cash-register tape. Although car-cost researchers Runzheimer International, Rochester, Wis., do not compute ownership and operating costs for performance cars, their higher operating and repair costs are well-known.

One garage owner, who asked not to be identified, says, "We may charge twice as much for a repair on the rare ones just to cover our liabilities. One of those exotic cars may start and run out of here fine on Monday but not at all on Wednesday."

John Cinque, owner of Highwood, Ill.-based John's Auto Repair, which specializes in work on performance cars, says, "We're not really being paid for our knowledge, not paid enough, considering the product we're working on." A Lamborghini owner, he says: "These cars require service more often to keep them running properly, and parts are hard to get."

But price is not pertinent. In fact, some automakers are attempting to give a high performance patina to more mainstream lines. Chevrolet puts it in writing in spread ads for its subcompact Cavalier Z24: "Performance: You Don't Just Paint It On, You Build It In ... Lift the lid. There sits the ... engine ... borrowed from the technology of the Camaro IROC .... Below deck you'll find handling inspired by Corvette."

Performance cars always have been test beds for the design advances that migrate down to the masses. About 2 years ago, Chrysler Corp. put more space between its three divisions to differentiate products, ordaining Dodge its Performance Division.

One example of the new Dodge mission is the Daytona series, making performance available at a medium price. These cars' technology is expected to influence the whole corporation, as is Chrysler's association with performance innovator Carroll Shelby, who has been transplanting muscular personas into Dodge products, such as Omni and Charger, for several years.

The performance car rub-off also is under way in other shops. "The design effects of Camaro and Corvette show through in Chevrolet's new Beretta and Corsica," says Jerry Palmer, former chief designer for Camaro and Corvette, now director of Advanced Design for the GM Design Staff. "This is the next '55 Chevy—the Beretta 2-door and Corsica 4-door."

Pontiac says the technology of its Firebird series of four performance models has influenced the design of the new midsize Bonneville sedan.

"Usually performance cars get the novel things," says Paul Preuss, manager of public affairs of Ford's Product and Technology Office, Dearborn, Mich. "So frequently they do apply to models down the line. An example is the anti-lock brake system (ABS) used now on the Lincoln Mark VII and Thunderbird Turbo Coupe. We're looking to apply ABS to all models in coming years."

And while performance car attributes might pull customers toward more mainstream models, the performance lines themselves must continuously be updated to attract new drivers who want only the latest in design and technology. Ford's 1987 Mustang features new front and rear-end treatments, new aerodynamic headlamps, interior remodeling and a 5-liter, fuel-injected, 225-horsepower, V-8 engine.

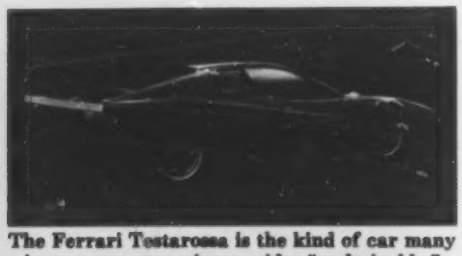
This car already is being dated by a 1988-1989 model developed jointly by Ford and Mazda that will have front-wheel drive. "Front-wheel drive is the choice because of better power delivery and better fuel economy," says Ford's Mr. Preuss.

New to the U.S. for 1987, after a celebrated 1986 introduction in Europe, is the Merkur Scorpio. This Ford of Germany product comes as a welcome marketing companion to its forerunner by two years, the Merkur XR4Ti, which reportedly missed its sales goals in 1986 by several thousand.

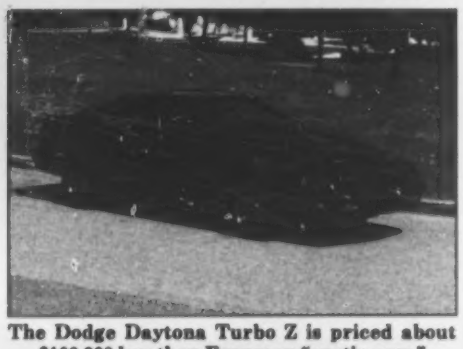
"In calendar 1986 we sold about 11,000 of the XR4Ti," states Randy Barr, Merkur marketing manager, Lincoln-Mercury Division, Ford Motor Co. "The trend now is upward. We think we'll see a stronger franchise when Scorpio is in the market, getting some synergy, further credibility, long-term commitment. Starting a new brand is extremely hard, so we're stengthening this effort by adding a brand name."

Such evolutionary change is more typical of the performance car field than annual, or even frequent, revolutions in design and mechanics. "Corvette began in 1953," says Jerry Palmer, former chief Corvette designer. "But the current Corvette is different even from the 1982 model. Everything is brand-new in the 1987 model—very contemporaneous. But you never wipe the slate completely clean. We want to keep the heritage of these cars clear, to make sure the lifelines come through very clearly. You don't change design every year, so you don't get too trendy."

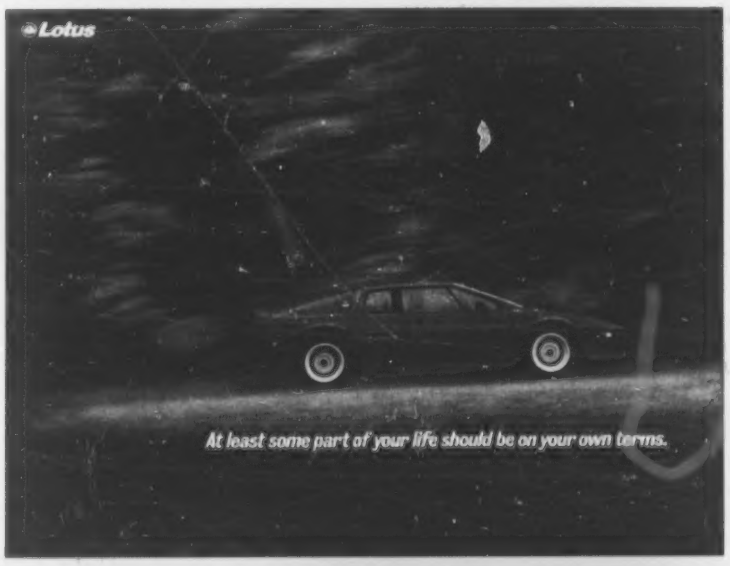
Maserati is promoting the power of its V-6 engine and twin turbos found on race cars.



The Ferrari Testarossa is the kind of car many insurance companies consider "undesirable."



The Dodge Daytona Turbo Z is priced about $100,000 less than European "exotic cars."



Potential Lotus customers number about 20,000 in the U.S., Lotus Chairman Wes Fredericks estimates.

The Lamborghini Countach weighs 3,450 pounds and is rated at 420 horsepower.

In 1986, 70 Aston Martins Volantes were sold at a sticker price reaching $137,000.

Parts stores building do-it-yourselfer loyalty

By Cathy Curtis

Not very long ago, the idea of a yuppie shopping in an auto parts store would have been someone's idea of a joke. As traditional auto aftermarket wisdom had it, the typical parts customer was male, blue-collar, under 30 (some say 18-to-34), earning less than $30,000 and with the time and inclination to turn grease monkey on Saturday mornings.

Although this profile of the do-it-yourselfer is still valid, the market is getting older (34% are between 35 and 54), richer (19% make more than $40,000 a year), better educated (54% have attended some college) and less overwhelmingly male (30% are women), according to *Automotive Marketing's* 1986 Consumer Automotive Repair Study.

And, whether they install their own shock absorbers, buy motor oil, pick out a seat cover or an air freshener, these are the 84.5 million people, the 72% of American car owners, everyone wants to woo.

These days, "everyone" includes variety, drug, discount, grocery, convenience, department, hardware, auto supply and other stores as well as service stations, specialty repair shops and the mom-and-pop jobber.

Auto parts stores rank only fourth in number of outlets after service stations, independent repair stores and grocery stores among 507,300 outlets carrying automotive products, according to the 1986 Retail Automotive Distribution of Parts Study by the Foundation for Aftermarket Industry Research.

Retailers are all lining up for a slice of the roughly $28 billion over-the-counter parts and accessories market, according to Ed Kaufman, a marketing consultant with Tenafly, N.J.-based Lindsey-Kaufman.

Although some of the big retailers have been around for more than 75 years—Western Auto was founded in 1909, R&S Strauss in 1919, Pep Boys in 1921—it took the oil crisis of the '70s to turn the do-it-yourselfer into a retailer's hero. The traditional stores, lampooned by the mass marketers as "greasy parts counters," had concerned themselves almost exclusively with servicing the professional mechanic.

But with the closing of 100,000 gas stations and other repair outlets, a new group of do-it-yourselfers entered the market. Their needs were attended to by increasing numbers of non-automotive stores that saw the promise of high profit margins in homely cans of motor oil. Conglomerates, aware of the decentralized nature of the market, gobbled up parts stores like peanuts.

When Dallas-based Southland Corp., of 7-Eleven fame, bought what was then the 119-store Cerritos, Calif.-based Chief Auto chain in 1978, it seemed to start a trend. Since then, Southland has acquired and combined with Chief the Texas-based Checker Stores—formerly under the wing of Lucky Stores Automotive Division—and 2002 Auto Parts stores, as well as Honey's stores in Tennessee and nearby states. The current Chief store tally is a hefty 475.

Other major acquisitions in recent years include Shiremanstown, Pa.-based Rite Aid Corp.'s takeover of the Avon, Mass.-based ADAP , which now has 59 stores in Boston, New York and New Jersey, and Seattle-based Pay 'n Save's purchase of Schucks Auto Supply chain in Tukwila, Wash. Pontiac, Mich.-based Perry Drug has been one of the most aggressive players, snapping up the 50-store Fleenor's chain in Indianapolis; Corvairs' 47 stores in Columbus, Ohio; Lampert/Singer and Pappy's Discount stores in southern Illinois and—just last summer—Trio Auto Parts in Michigan for a total of 192 stores.

The competition has forced auto parts stores to spruce up their act. Chains are trying to create a supermarket atmosphere, with store sizes ranging from 1,800 to 20,000 square feet. The basic ingredients are bright lighting, snappy, color-keyed graphics and, as Mike O'Hara, Los Angeles based-Pep Boys' national director-marketing puts it, "gondola after gondola of access."

Yet, even here there are some variations on the theme. Chief eliminated the parts counter. Bill Wooton, VP-specialty retail and head of Southland's Chief division, was quoted in *Automotive Marketing*: "It's ludicrous to take 4,000 square feet and cut it in half with a counter. The counter . . . is ancient history. Everybody's behind the counter because they don't have to get out and get close to the customer."

Crown Auto, Minneapolis, on the other hand, is putting a new emphasis on counter service. "It's a better move for technical application products like water pumps and spark plugs," argues advertising manager Glenna Dibrell. "It was deemed that those products needed to be behind parts counters where you can talk with someone . . . so people don't pick up a box and hope they have what they need."

Stores also are trying to woo customers with specialized services. Chief, which pioneered a 1-year warranty when 90 days was standard, introduced a 5-year, 50,000-mile warranty on hard parts in May 1985. Since then, Trak Auto has come out with a 7-year, 70,000-mile offer, and Western Auto has joined the 5-year bandwagon.

But Chief's advertising manager, Kenny Cason, insists that when you're the first to come out with such a deal, "consumers usually perceive you as the leader." Chief rolled out a TV campaign in 1985 in all its markets, while touting the warranty in newspaper ads, external store banners and point of sale materials.

Crown Auto is emphasizing counter service despite a feeling within the auto parts industry that it reduces customer access.

Crazy Joe's Auto Parts, Kannapolis, N.C., offers Snappy Fax, cards programmed with do-it-yourselfers' personalized car data that can be fed into a computerized system offering information on appropriate car parts. "Parts look-up has become a nightmare," says John Hill, VP-advertising. "[The card] enables the customer to come in and immediately wait on himself. It really replaces the confusing and timely task of looking in numerous catalogs."

Crazy Joe's advertises Snappy Fax on TV with Ernest T. Worrell (actor Jim Varney) telling his unseen friend Vern how easily the card allows him to look up all the information he needs. Weekly newspaper ads, which usually are tied to discounts on high volume products like oil filters, offer an additional discount to card holders. More than 40,000 do-it-yourselfers in the Carolinas now have the card, but whether it has increased sales is not known.

Champion has had success with its in-store videodiscs explaining product applications. The company is about to introduce a home videotape teaching series. The tapes will be rented to customers and syndicated to cable TV in the nine Midwestern states where Champion's 123 stores are.

"The major thing that keeps people from servicing their cars is lack of knowledge," says Dean Billbe, VP, Champion sales and marketing. The first 30-minute tape deals with brake repair.

Pep Boys has eight to 10 service bays in all its new stores. R&S Strauss has service bays in 34 of its 52 stores in New York, New Jersey and other mid-Atlantic states. All but three of Crown's 53 stores offer service, usually with four bays.

As Ms. Dibrell points out, "Even the do-it-yourselfer is interested in having someone do it for him if the job is too complicated, if it's too cold outside or the discretionary time isn't there." Previously known for its parts business, Crown is increasingly gearing promotional efforts to service. While service specials used to appear at the bottom of ROP ads, they now have pride of place in preprinted inserts. Service was a major feature in six of seven tab inserts Crown prepared in 1986, Ms. Dibrell says. She reports double digit increases in Crown's service business as a result.

So far, neither generous square footage nor service has much to do with the secrets of success in the auto parts field, according to a survey in *Automotive Marketing's* 1986 "Auto Aftermarket Retailers' Guide." The key to this consumer-driven market, according to this source, is an absence of competition, a commitment to advertising, longer store hours and professional management.

This is indeed the era of a belated plunge into centralized advertising and marketing, point-of-purchase systems operations, up-to-date accounting and plan-ogramming methods and an effort to provide better personnel training.

Advertising, however, atill tends to stick with the tried and true. Champion has an advertising budget "well over $3.5 million," according to Mr. Billbe. In April the company, which had previously used line-drawings in its advertising, plans to use "real four-color, photography-type" ads for the first time, in hopes that consumers will better perceive the "value and beauty" of such accessories as car compasses, mirrors, seat covers and litter bags, he says. The ads will target consumers who are becoming more discerning about the appearance of their cars.

Seemingly typical advertising strategy comes from R&J Strauss' twice-weekly ROP ads, printing 8-page insert tabs eight times a year and getting a taste of radio and TV.

Not at all typical is Chief's $10 million to $14 million ad budget. It goes largely into print, which troubles Mr. Cason. "The auto aftermarket is probably some of the worst advertisers in the retail business," he says. "It's very difficult to get auto retailers out of the newspaper. I think broadcast is an excellent way to go—you reach a hell of a lot more people. In the papers you reach the same people week after week."

One nagging question is whether the do-it-yourselfer tide has peaked. The parts manufacturers tend to think it has, while the retailers are more sanguine.

An aging automobile population and the increasing electronic and mechanical complexity of new cars points to a hands-off attitude by once gung-ho do-it-yourselfers. Parts themselves are lasting longer and in some cases are not required in the same numbers, as, for example, the trend from eight to four-cylinder cars bears out.

The aftermarket is primarily concerned with cars between 3 and 10 years old (under 3 years, a vehicle is covered by warranty; more than 10 years—some say 7 or 8—it becomes an old clunker). In recent years, the age of the average car on the road has remained an aftermarket-healthy 7.5 years.

On the other hand, longtime do-it-yourselfers aren't about to give up a favorite activity. "People just adjust to the new technology, that's all," says Burt Falbaum, VP-corporate communications, Pontiac., Mich.-based Perry Auto Works. He points out that progress can sometimes involve an easier task; for example, disc brakes are easier to install than drum brakes. "In any case, there are other things people can do that don't require technical knowledge—changing the oil or the air filter," he adds.

The do-it-yourselfer remains a hardy breed. The 1986 *Automotive Marketing* Consumer Automotive Repair Study has some figures that must brighten even the gloomiest forecast: 39% of the do-it-yourselfers report they are increasing their involvement. And some 8.6 million say they spend more than 10 hours a week working on their cars.

Quick-lube outlets striking oil in aftermarket

By Len Strazewski

The last bastions of the automotive aftermarket entrepreneur —specialty service centers offering quick oil changes, lube jobs and tune-ups —grew like wild wheat during the early 1980s.

Their growth potential was enormous then, according to specialty-company executives, because American consumers needed fast service to fill the gap left by gasoline dealers who had converted to self-service during the energy crisis of the 1970s.

Just as the entrepreneurs geared up to fight for their share of the growing market, two big automotive-allied companies announced they had come to sow some seeds of their own.

In late 1985, Quaker State Oil Co. acquired Salt Lake City, Utah-based Minit-Lube, the third largest of the fast-lube companies, and late last year, Avis Rent-A-Car announced plans to build its own network, Avis-Lube.

Did these announcements spell the end of the more than 40 independent companies already in business? Not at all, executives say. If anything, the entry of the big guys is making their marketing job easier.

"We're not discouraged," says a spokeswoman for Jiffy Lube International, Baltimore, Md., the largest of the independent quick-lube companies. "Far from it. The market is far from saturated, and in fact the biggest marketing problem we face is generating recognition for our services. The more quick lube companies that enter the business, the better the awareness of the value of the fast-lube business. Jiffy Lube sees this as a new opportunity."

Len Strazewski is a Chicago-based free-lance writer and frequent contributor to Special Report.

According to statistics compiled by the Convenient Automotive Services Institute, a Baltimore-based trade group representing the fast-lube industry, Jiffy Lube dominates the category with more than 400 active stores—57% of the U.S. total among association members—in 36 states as of December 1986. Other industry sources estimate the number of facilities offering quick lubes and other services is approximately 2,000, with Jiffy Lube still having the largest single share of the market.

Jiffy Lube also has the biggest ad budget, approximately $5.2 million in spot TV and an undisclosed amount for print advertising handled by Lois, Pitts, Gershon, Pon/GGK, New York.

Despite the increased competition, Jiffy Lube expects to have 1,500 franchises sold by 1992, the spokeswoman says.

Denver, Colo.-based Grease Monkey International, the second largest of the quick-lube companies with about 80 stores in operation and 350 franchises sold, also sees the benefit of more competition.

"It all adds to our credibility," says Dave McDonald, VP-marketing for Grease Monkey. "And it actually improves our market position. Back in the 1970s, the oil companies got out of the service business and left it to us. Now they see that there's money in it so they're back.

"But as Quaker State and others get involved with the business again, they'll see the aggravation of running a business from afar again. They'll get impatient and we will benefit."

Relief from aggravation is exactly what Grease Monkey promotes in its consumer advertising. The Grease Monkey campaign, created in-house and produced by Fred Arthur Productions in Denver, emphasizes the speed of service and the economy of no add-on service, Mr. McDonald says.

Mr. McDonald would not reveal the company's annual ad budget, but did say that franchise agreements call for ad budget contributions of 4% to 6% of the network's undisclosed sales.

So far, Quaker State's ownership of Minit-Lube has done nothing but improve business, says William Gee, the company's founder, president and chief operating officer. Mr. Gee founded Minit-Lube in 1977, modeling it on his successful fast-food franchise, Arctic Circle. By the end of last year, the franchise chain had more than 870 units and with the additional marketing and financial support, business is practically doubling, he says.

"In January we opened 20 new stores and by the end of 1987, I expect to have 200 units around the country. This growth is due in no small part to Quaker State. They are putting an awful lot of money in us."

Mr. Gee says Quaker State's goal is to control market share for the company's petroleum products, but the Minit-Lube franchises gain a lot, too.

"I think it lends something to the credibility of the concept," he says, agreeing with his competitors. "The need for this kind of service has been around for years and years. The concept is fairly simple, and if operated properly, the stores can be terribly profitable."

Unlike its larger competitors, Minit-Lube offers a broader range of services, servicing all fluid needs of automobiles. And Mr. Gee's service philosophy still dominates, despite the bigger company ownership.

"All customers are personally greeted within 30 seconds of arrival. Doors are held for every customer—man, woman or child. Windows are washed," Mr. Gee says. "We want to be as far from the traditional service station concept as possible. Our concrete floors are scrubbed and waxed, and I dare say that our facilities are as clean as many restaurants."

In fact, the marketing model for the Minit-Lubes are derived much more from the fast-food chains than from service stations. Store and logo designs feature bright yellow and orange colors, and the company has trademarked its "Look for the Stripes" slogan. Minit-Lube franchisees spend about 10% of their total sales in advertising, about $5 million last year. The campaign, approximately 80% of which is in radio and spot TV, is managed by Evans Communications, Salt Lake City.

The newcomer to the quick lube scene, however, is Avis and its new division, Avis Service. Its entry is somewhat more threatening than Quaker State's because the company comes from completely outside the automobile service industry.

"They scare the heck out of me," says Minit-Lube's Mr. Gee, only half-facetiously. "But we are just going to keep going on the way we have been and see how they develop."

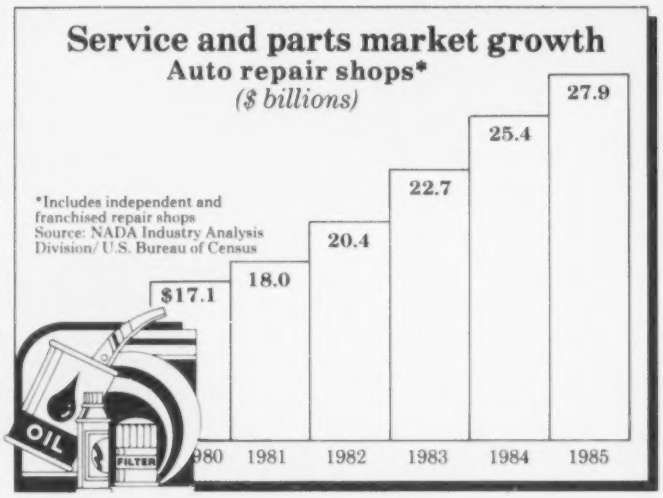
Avis has ambitious plans, according to VP-general manager Vincent A. Russo, culminating with a 1,700-unit network by the early 1990s in a market of 6,000 to 8,000. The Avis-Lubes will be separate from the company's rental car network, though some franchisees may choose to have both in adjacent locations, Mr. Russo says, adding that interest is already strong.

"Since we made our announcement [in late 1986], we have had 600 inquiries from 46 states—and we haven't even started marketing yet," he says. "There is a tremendous opportunity in this field and despite some of our larger competitors, the market is nowhere near saturated. In fact, some of the densest population centers of the country, such as New York City and Long Island, have some of the fewest centers. This area alone has tremendous growth potential."

Avis expects 400 units by the end of 1987, 600 by the end of the following year and a steady growth rate of 150 franchises annually through the 1980s. Some of the franchise purchases will come from small existing operations looking to merge with a bigger company, but most will be new operations, Mr. Russo says. Avis also is likely to retain ownership of a few stores for research and development purposes, he adds.

Avis' ad budget is undisclosed, but media will involve a mix of TV, print and direct mail. Ted Bates, New York, is preparing a traditional media campaign and Kobs & Brady, Chicago, is working on direct mail.

Who will be the next major company to enter the quick-lube business? Industry executives have no predictions, but say that more such entries are inevitable as more and more allied companies realize that when they abandoned the concept of service stations in the 1970s, they left behind fertile soil that really has yet to be exploited.



Proving that broken windshields can be fixed

There's a secret to salvaging a broken $300 windshield for $50, and the secret is tired of being a mystery.

Novus, a Minneapolis-based company franchising a patented system for repairing glass and removing scratches, is trying to crack the competitive automotive aftermarket by emphasizing regional advertising and using pr to tell its story.

But the company, which has been serving the automotive fleets of Avis Inc., Budget Rent a Car Corp., Eastman Kodak Co., General Mills, Hertz Corp., Ryder System and U-Haul International, among others—some repairs are done in-house, others are made through service centers and body shops—is finding that consumers may be slow to recognize a good thing.

"We're very well-known in the commercial end of the business. The lion's share of our business is industrial. However, we are just beginning to crack the consumer market," says David R. Schuh, manager of sales and marketing. "And the consumer market is a tough one to crack. The advertising costs are incredible and the market is extremely difficult to segment. We are used to dealing with a vary narrowly defined market."

Founded in 1972, the company's service is supplied through more than 1,200 automotive centers that sell Novus (among other services) in the U.S. and 23 countries. The company is converting its dealers into franchisees, 600 of which have been sold as of the end of 1987. Gross revenues for 1986 topped $30 million.

The dealer network was built on marketing tactics that reached trade clients efficiently and economically: Direct mail and cold sales calls to auto dealers and insurance companies and some trade magazine advertising in publications that focus on automobile insurance and corporate fleet management.

The same tactics, however, won't work with the consumer market, Mr. Schuh says. "It takes broad media to tell our story."

Novus has allocated a consumer ad budget of $250,000 to Minneapolis agency Clarity, Coverdale & Rueff for print ads in general interest magazines and regional newspapers and magazines. The ads are designed to be dealer support; they promote a toll-free telephone number for dealer referral.

"Some individual dealers are doing much more, using spot television, radio and billboards, but that kind of marketing is not something we can expect from all our franchisees. When you're a small company, it's hard to manage that kind of effort nationally. We're just going to have to wait until we grow."

Public relations, however, can be done on a limited budget, Mr. Schuh says, and Novus has assigned those duties to S&S Public Relations in Skokie, Ill. The pr campaign has already yielded some national coverage, including a January story in *USA Today*.

"Most people don't think of glass as something that can be repaired instead of being replaced," Mr. Schuh says. "They don't realize that they don't have to spend $300 for a new windshield, and they don't realize that many insurance companies will waive deductibles for using our repair service over glass replacement. We are also trying to remind consumers that a repaired automobile is more valuable than a damaged automobile at trade-in.

"We think this is quite a story to tell and our public relations campaign is helping tell it. As our recognition grows and our franchises grow, we can spend more on advertising the service," Mr. Schuh says.

And by that time, the secret will be out.

Tire dealers forced to pump fresh air into soft market

By Chris Slaybaugh

In an industry where fortunes were once made by changing customers' flats, tire dealers are now trying to inflate their own flat sales.

Several factors, including the popularity of long-lasting, steel-belted radials and a decrease in miles driven, have taken the air out of tire sales.

Smaller cars represent a double-whammy: Light and easy on tire rubber, they use smaller, cheaper tires that bring smaller profits to dealers.

And while sales lag, tire sellers are getting more plentiful. Jerry White, who owns Beaumont, Texas-based White Tire Supply, has witnessed the recent growth of warehouse clubs, which offer cut-rate prices.

"Over a long period of time we've seen the oil companies come and go with their programs, and the company stores rise and fall, and we've even seen a few so-called discount hot dogs rise and fall," he says. "But the only people that ever struck fear into my heart are the warehouse clubs, because there is such an enormous disparity in price."

By taking small markups and relying on volume, discount warehouses offer drastic price cuts. "In the past, the other people would undercut me 10% or 15% on a good day, and these people are far below that," Mr. White says.

Industrywide competition has made matters worse by bringing prices down. Retail tire prices have dropped 12% over the last year, estimates Tom Brawley, VP-marketing and distribution for Englewood, Colo.-based Big O Tire chain. "But wholesale costs haven't come down by that margin, so dealers are working on reduced margins, and profitability and staying open become a challenge," he says.

Even so, Big O, the nation's largest independent tire dealership, according to *Tire Business*, has met the challenge. The company added 27 of its 252 outlets in 1986, at the same time boosting sales 8.4% to $181 million, according to Mr. Brawley. Big O targets quality-conscious customers by providing them with "fast, efficient and clean service," he says.

Upscale consumers "don't want to drive to Billy Bob's gas station and have the interior spotted with grease, a ding put on the bumper accidentally and the $100-apiece wheels gouged due to inadequate care," Mr. Brawley says.

Mr. Brawley says he believes that an effective way of appealing to these consumers is "the silent advertising supplied by a clean, well-maintained facility." Citing the company's in-store surveys and follow-up mailers, he says: "The No. 1 reason for coming into the store is drive-by appearance and awareness."

He also says the company devotes 15% of its $7.2 million ad budget to TV ads that showcase its facilities. Of Big O's remaining ad dollars, 15% go to radio, and 70% to newspapers.

Like other tire dealers, Big O has gone heavily into ancillary automotive services to make up for declining tire profits. Its Extra Care program includes tune-ups and front-end repairs,

Detailers master fine points

By Cleveland Horton

How many times has it been said that Americans have love affairs with their cars? Probably too many, but sharp entrepreneurs rarely lose money banking on that fact.

The latest effort to tug at the heartstrings and wallets of car lovers comes in the form of auto detailing: The practice of restoring that "new car look, feel and smell" to the family wheels. More and more upscale car owners are turning to these cleaning specialists who charge up to $400 to go over a vehicle with a fine-toothed comb, a toothbrush and Q-Tips.

Until recently, most auto detailers were small, one-garage operations usually supported by a few bread-and-butter contracts with car dealers. Dealers would send their new cars to the detailers prior to delivery to ensure that the new car indeed looked like a new car. In addition, used car trade-ins often received a royal cleaning to help pump up sticker prices.

But now, the auto detailers are setting their sights on the car owners themselves, reminding them that only careful—albeit expensive—care can protect their investment. Optimistic market analysts predict the auto detailing industry could grow from $200 million in sales this year to $2.5 billion by the middle of the next decade.

One company already is thinking national. Steve's Detailing, which began as a one-garage, one-man operation headquartered in Newport Beach, Calif., already has sold 100 franchises nationally at $45,000 a pop, 26 of which are open.

The typical detailing job at Steve's includes a hand wash, engine degreasing and cleaning, exterior polish and wax and complete interior cleaning. The four-hour job costs an average of $135—the price varies, depending on the condition of the car. The outlets also offer the hand wash alone for $15. A typical outlet can complete 20 details and 40 hand washes per day, with an average yearly gross income of about $125,000.

The man behind Steve's Detailing is Stephen Marchese, 35, who began detailing in 1971 on weekends as a way to supplement his income as a manager for an electronics company. When business boomed, he started detailing full time and even managed to open a second outlet in Orange County. Those two locations now serve a customer base of 6,000 car owners who take their cars in to be pampered an average of three times a year.

The success of the first licensed shop—matching the volume of the more established Orange County outlets in just three weeks—encouraged Mr. Marchese to establish Steve's Detailing Management Corp. in Costa Mesa, Calif., as a franchising agent.

He hired his wife, Joni, as corporate secretary, and recruited Charles Milden as president and Jeffrey Parks as VP-marketing. Messrs. Milden and Parks were early customers of Steve's Detailing, although neither had any experience in franchising.

Mr. Milden gave up his position as president of State of the Art, a software development company, while Mr. Parks resigned as regional VP of Human Synergistics, a management consultancy, to join Steve's. Both men's experience in computer systems helped SDMC to create a "goof-proof" software program for franchisees.

The company's computer system handles accounting, scheduling and even reminds the store operator when to call customers to tell them it is time to have their cars detailed.

The primary customers of Steve's Detailing are owners of foreign—mostly German-built—cars. Before selling a franchise, SDMC will analyze car registrations for a particular region and crunch the numbers into a "vehicle potential system." On that list of prospects are owners of Mercedes, BMWs, Porsches and Audis. High-end Japanese cars also make the list, as do domestic 4-wheel-drives.

Mr. Parks cites three factors that bode well for car detailers. The price of cars is rising—the average car now costs about $12,000; there are more interesting cars on the road and manufacturers make substantial changes in models less frequently. "The only difference between an '86 and an '84 Mer-

as well as brake, alignment and suspension work. In 1986 the company devoted about 25% of its ad space to promote Extra Care, typically offering specials in services, such as brakes or wheel alignment, and free safety inspections, says Mr. Brawley.

These services form a growing part of Big O's sales picture: In 1985 tires provided 85% of sales. In 1986 other services accounted for 22%, with sales projections for 1987 reaching 30%.

The movement of tire dealers into automotive service is widespread. According to Tony Hylton, director of communication services for Washington-based National Tire Dealers and Retreaders Association, automotive services are of growing importance to members: "It used to be that maybe 15% or 20% of their gross sales were services. Now they're finding that trend to be 25% and 30%, with many planning, in the next few years, to be at 50-50 gross sales."

A look at dealers' profit pictures explains why. A study conducted last fall by Akron, Ohio-based *Tire Business*, a Crain Communcations publication, found that dealers average 26.7% gross profit on tires, while earning 35.6% profit on service parts and 64.8% on labor. Dealers surveyed reported that while automotive services made up only 25% of sales, they provided a whopping 44% of profits.

Goodyear Tire & Rubber Co. and Firestone Tire & Rubber Co., both Akron, Ohio-based tire manufacturers that maintain dealerships, are emphasizing services. "We are going to be devoting more and more attention to services," says Goodyear's VP-worldwide advertising, James K. DeVoe. "Service is a major portion of our industry, and that's what we are going to take care of."

Firestone's commitment to service has included the installation of a $25,000 computer diagnostic machine in each of its 1,400 company-owned stores. Non-tire services offered by Firestone include under-the-car, engine and suspension work, brakes, air conditioning and batteries.

In addition to service, Firestone is becoming more active in high-performance car tires. According to company figures, the total performance market is worth $2 billion, with 10% annual growth expected until 1990.

Accordingly, Firestone introduced a performance line called Firehawk, promoted by sponsoring the Firehawk Endurance Championship, a race series run on Firestone's performance line, the "Firehawk." And to attract true performance mavens, Firestone has installed specialty shops called "Performance Proshops," in 100 of its existing stores.

"We offer the performance enthusiast someone who has the special training to converse with him," says Jerry Kerr, director-advertising at Firestone. In these shops customers can buy not only Firehawks, but performance tires made by other makers, including Pirelli and Yokohama, in addition to performance spark plugs, wheels and other parts. Firestone hopes the Proshops will produce a total $4 million to $5 million in incremental sales in the coming year.

Where market performance is concerned, one of the front-running dealers is 4day Tire Stores, an Irvine, Calif.-based chain. The company takes its name from its work week. Partners Phil Lansdale and Don Carr discovered that most tires are sold at the end of the week, and so they decided to be open for only the 43 most productive hours, allowing them to cut overhead by hiring only one shift and avoiding overtime.

Advertising appears in 25 newspapers each week, reaching an estimated 20 million readers. In 1987, 4day expects to spend $2.5 million on newspaper ads, along with $1.25 million each for radio and TV.

Founded in 1969 with five outlets, the company now owns 52 stores, with sales of $63.4 million in 1985.

Although the tire game may be difficult, the players are confident. Jerry White, in the same breath he used to discuss the difficulties of the industry, added: "That sounds like whining, and I don't need to whine. I'm getting excited about the industry all over again."

cedes is how shiny it is," he says.

The only way for Steve's to develop a national brand identity, according to Mr. Parks, is to maintain strict control over the quality of the service and the public image.

Following McDonald's lead in the fast-food franchising business, SDMC set up "Detail University." Franchised shop managers are required to complete a two-week course at DU before they can operate an outlet.

In addition, SDMC relies on Corcoran & Associates, Newport Beach, Calif., to develop a national advertising plan as well as local efforts. Franchisees pay a percentage of their gross income into a national advertising fund. Gelman & Grey Communications, Los Angeles, handles pr.

To date, SDMC has run ads in business publications, including the *Wall Street Journal*, in an effort to both establish the Steve's Detailing name and to sell franchises. As more outlets open, SDMC will adopt a larger ad push with eventual plans to break national consumer print, TV and radio ads.

With the franchise operation well under way, Mr. Marchese's next plan is to market a line of auto care products first through his outlets and eventually through retailers. If sales of these products mirror his franchise operation's growth, he probably will clean up.

Presenting the eight best routes to Michigan's money.

If you're interested in locating a great money market, look no further than Booth, Michigan. We're America's 10th largest metro market. Booth is also the 10th largest homeowners market. And the 10th largest market of households with children. It's easy to get to Booth, too. Just pick up the phone and place an order with Booth Newspapers at (313) 540-5600. You'll get the eight best routes to Michigan's money at a 15% discount with just one call. One order. One bill. Represented nationally by Newhouse Newspapers.

Muffler specialists make noise under the car

By Julie Candler

Business is noisily roaring along among the companies that specialize in silencing cars by replacing their noisy and worn mufflers. Major muffler chains expect the good times to continue well into the 1990s, even though the demand for their most important product is flattening.

To compensate, the companies are becoming under-the-car specialists whose technicians also repair brakes, shocks and suspension systems.

The muffler market began to flatten in the 1970s. A typical 1960s car needed a new muffler and, possibly, exhaust pipes every 10,000 to 15,000 miles.

The interval between muffler replacements began stretching when 1975 model cars came equipped with catalytic converters to meet federal emission standards. When manufacturers upgraded exhaust system quality to withstand the converters' intense heat, six to eight months were added to the average muffler's life. Today, most cars can log 20,000 to 25,000 miles before leaky exhaust systems begin roaring for replacement.

The market may flatten even further as automakers move increasingly to corrosion-resistant stainless steel that can stretch an exhaust system's life another 30%. Ford says it started the trend toward stainless steel in December 1985 with the Ford Taurus and Mercury Sable. They are on several other 1987 Ford models and all 1987 cars from Chrysler Division of Chrysler Motors.

Stainless steel exhaust systems, depending on usage, will last up to 32,500 miles, or nearly four years, estimates Ford's Charles Gumushian, assistant manager for product and technology public affairs.

The use of unleaded gas, which is less corrosive than leaded, has also quieted muffler sales, says John R. (Ron) Moore, president and ceo, Midas International, Chicago.

Mr. Moore cites another factor: The drop in registrations of new cars from 1980 to 1983. The primary candidates for muffler replacement are 4-to-8-year-old cars, he says. The car slump that started in 1980 reduced the number of mufflers rusting out in 1984 through 1987.

Because of recent near-record car sales, "we predict an increase in potential exhaust sales from 1988 to 1990," says Mr. Moore. "After that, maybe stainless will have some impact."

Today, annual retail sales of exhaust systems by all service outlets, excluding do-it-yourselfers, are expected to continue at their present rate of $1.3 billion to $1.4 billion. An estimated 40% to 50% of the business now belongs to the muffler specialists, who expect their share of the market to keep on growing.

Mr. Moore estimates that Midas captures 24% of the total muffler market, excluding sales to do-it-yourselfers. "Probably our next largest competitor after Sears is the Tenneco stores, Speedy and Car-X," Mr. Moore says.

After diversification into other under-the-car services, major muffler specialists are increasing total volume and opening hundreds of new shops. Midas alone added 92 in the U.S. in 1986, bringing its total to about 1,700 nationwide, 2,000 worldwide.

Midas' "Take it to someone you trust," campaign promotes mufflers, brakes and other services.

Charlotte, N.C.-based Meineke Discount Mufflers has opened 605 shops—mostly east of the Rockies—since the company was organized in 1972. Another 170 franchises are sold and should be operating within the next 18 months, according to Ron Smythe, president.

Toronto-based Tenneco Automotive Retail's two muffler chains, 330-unit Speedy Muffler King, Morristown, N.J., and 120-unit Car-X, Chicago, plan to open at least 50 units this year. Tenneco announced plans for the two specialists to grow to 800 worldwide by 1990.

The expansion is the result of a lucrative market for replacement brakes, a chunk of the $104 billion service and parts market that is growing faster than exhaust work. A major reason for the growth in brake repairs is that brakes wear out faster on the smaller surfaces of today's down-sized cars.

Mr. Moore and other top muffler company executives see the brake and other work filling a gap created when service stations, most of them with repair bays, decreased from a peak of 226,000 just before the Arab oil embargo to about 115,000 in 1987. Franchised specialists in every phase of car repair are stepping into the gap.

Midas was the first to offer brake repairs nationwide in 1978. In 1984 Speedy followed Midas into the brake market and was joined by Meineke in 1985. Mr. Smythe says the growth potential of the brake business compared with that of the muffler's was the main reason for starting up a brake operation.

"Mufflers and brakes go together like ham and eggs," says Meineke's Mr. Smythe. He points out that brake repairs are also under-the-car work and can be handled in the same service bays used for exhaust replacements.

Midas has added other under-the-car repairs. The company began replacing shocks in 1960. Suspension work, including shocks and the lucrative replacement of expensive MacPherson struts in most front-wheel drive cars, plus wheel alignment, account for 15% of total $755 million volume in 1986. Brakes account for 30%, while mufflers and exhausts make up 55%.

Midas' total 1986 ad budget was $65 million, Mr. Moore says. He estimates that $38 million went to TV, $9 million to local radio, $2 million to print and $16 million to Yellow Pages.

"The minute you diversify," Mr. Moore says, "you have segmented your advertising funds. You have to split your message to let consumers know that you are in the brake and suspension business. But we don't want to lose our image as a specialist. We don't want to be thought of as general repairs. That's why we only have three specialties."

To reflect the expansion to more stores and increased total sales volume, Midas allocated an increase of about 8% to its ad budget in 1986, approximately $5 million more than the previous year, Mr. Moore says. A new Midas campaign will be unveiled in March, says Larry Singer, president of the Chicago office of Wells, Rich, Greene, replacing the 2-year-old "Take it to Midas. Take it to someone you trust."

When brake work first became a Midas service, advertising funds were diverted according to forecasts of retail sales. Midas' advertising is segmented according to service mix and geography.

Mufflers, for example, are advertised more heavily in the Snow Belt, where road salts speed deterioration.

Brake advertising is more effective than muffler ads in newspapers, Mr. Moore notes, because it tends to reinforce TV campaigns. Brake work can involve many associated services such as bearings and rotors, which can be covered in more detail in print, he says.

Speedy's ads stress quality and good customer relations. "When consumers recognize they can get brake work from a chain with which they have rapport and trust, they will use it," says Fred L. Karp, Tenneco's senior VP and general manager. He did not estimate, however, the percentage of Tenneco shops' business going to brake work.

At Meineke, total 1986 sales reached an estimated $155 million—8% of which was in brake services—up 30% from 1985. For 1987 Mr. Smythe anticipates a volume of $190 million to $200 million. The company, with 100 shops in New York City, is expanding westward. With a policy of one center for every 50,000 motor vehicles registered, few openings remain in areas such as New England, according to Mr. Smythe.

He labels Meineke "the largest discounter in the United States," and its ads emphasize price. "We bang away at that on TV," Mr. Smythe says. "We try to appeal to the guy who is price-sensitive." Meineke's ad budget of $15 million in 1986 is being bumped up to about $20 million in 1987, he says.

Because the typical muffler customer is any car owner, 18 to 60 years old, according to Meineke's Mr. Smythe, general media are favored in placements. More women are in the customer mix recently, but no special marketing is directed toward them. The specialists are heaviest in local TV, followed by newspapers and then local radio and Yellow Pages.

And the overriding message of those ads is essentially the same as most aftermarket service businesses: Quality and convenience. "What the consumer is looking for is reliable service and to be able to get the car fixed when he requires it," says Tenneco's Mr. Karp.

Julie Candler is a Birmingham, Mich.-based free-lance writer.

Service outlets crowd exhaust market

Along with longer-lasting exhaust systems, another problem for exhaust-system specialists is competition from the proliferation of muffler shops, the many service stations still doing repair work, independent garages, tire, battery and accessory stores, new car dealers and mass merchandisers.

The muffler specialists, however, see trends in the auto service industry working to their advantage. "We have seen a shift away from car dealers and service stations," says Mr. Moore. "So the exhaust specialists are taking up the slack. With 100,000 service stations closed since 1972, you are taking out two to three service bays in each so you have really closed up to 300,000 service bays."

But a spokesman for independent repair facilities disagrees. George W. Merwin III, exec VP of the Automotive Service Association, Dallas, says, "Most of the properties owned by the service station operator are being turned into independent garages, or operators are opening independent stations of their own. These guys are skilled mechanics. They have a whole list of neighborhood customers they have taken care of for two generations. They're not going to sell bread and milk because any idiot can do that."

About 115,000 service stations are now in operation, down from a 1972 peak of 226,000, according to Don Smith, senior editor of Des Plaines, Ill.-based *National Petroleum News*. He estimates that about 50,000 of the remaining stations are "gas-and-go pumpers" with no service offered. But many of those remaining are convenience stores and repair shops with less than 50% of their volume from gas sales. Therefore, they are not counted in the official figures published by the U.S. Department of Commerce.

Charles Boyd, editor emeritus of Lincolnwood, Ill.-based *Super Service Station* magazine, estimates that 90,000 service stations continue to handle significant repair work, beyond oil changes. "Profit from gas doesn't bring enough of a return, so the service stations now are doing a good many of the full repairs," he says. "The average station has probably tripled its repair business in dollar volume, just to take up slack from the other stations."

Despite service stations shifting their emphasis to repairs, it is quite possible the specialists will dominate the automotive aftermarket.

The muffler specialists are confident they can handle all the competition in their marketplace. "The trend is away from the general repair area," says John R. (Ron) Moore, president and ceo of Chicago-based Midas International. "There is no shortage of muffler specialists in major metropolitan areas. But I quarrel with local chains that claim to have a worldwide guarantee. I think it will shake out and competition will begin waning."

Foreign ad growth

Spending increases beat U.S. gains

An Advertising Age roundup

Foreign ad spending increases will continue to beat U.S. growth but by a smaller margin than last year, according to the latest Advertising Age survey of ad executives in major markets worldwide.

In the face of a soft U.S. ad market, foreign growth is vital to U.S.-based agencies, some of which derive 50% of billings abroad.

The survey results mirror recent predictions by Robert Coen, senior VP-director of forecasting, McCann-Erickson. Mr. Coen predicts a 13% increase in overseas ad spending in 1987, compared with 26.1% during 1986. He also forecasts 7.6% growth for the U.S., compared with 7.7% last year.

(Mr. Coen's figures allow for inflation and have been converted to dollars, while Ad Age's reports do not include inflation and are expressed in the local currency.)

Willi Schalk, BBDO Worldwide president-chief operating officer, agrees with the forecasts.

"In 1987, I think that the industry will have a better year internationally than it will domestically. It was that way last year and it will continue," he said.

Other U.S. agency executives are more bearish. Norman Vale, Grey International senior VP-managing director, said he expects overseas expenditures to grow by "about half" what Mr. Coen predicts.

Increased TV time

More TV offerings will push up 1987 advertising expenditures in France and Italy.

France, where private TV is beginning, is the only European country expected to top its 1986 growth performance of 9.5%.

Sources say the increase will be small, only 0.5%, in part because advertisers are expected to shift funds from other media to test private TV. If successful, advertisers are expected to add more funds to TV permanently.

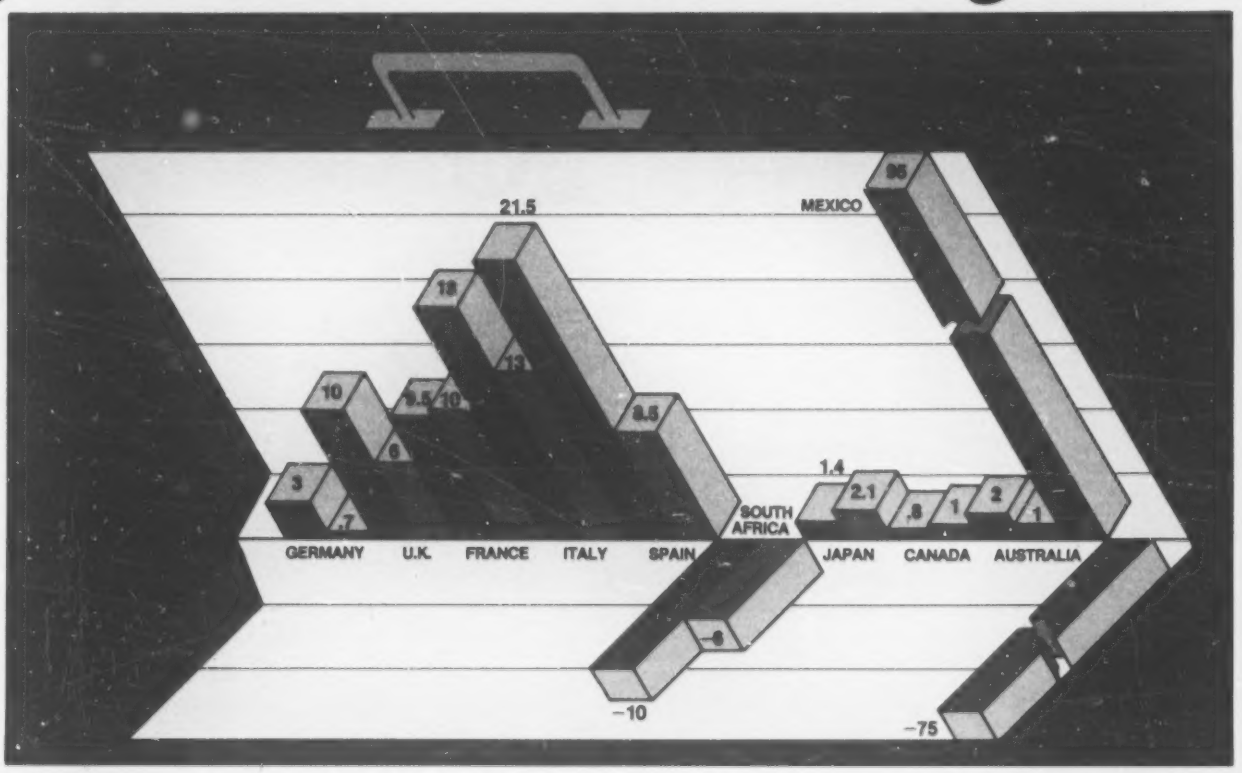
The Italian ad community expects a 13% increase, the highest in the survey, after 18% growth in 1986.

Bill Tragos, TBWA Advertising's ceo, said, "Italy is going to be tremendous this year, with the growing amount of TV time."

Angelo Usai, McCann-Erickson Italiana chairman, attributed the predicted growth to changing attitudes in Italy toward advertising. "Take, for example, the full-page holiday-greeting ad by the Communist Labor Union," he said. "That's a sign of incredible change."

Cautious estimates

Spanish ad executives expect an 8.5% increase in ad spending this year. But U.S. sources consider that figure too low, saying U.S. companies with new Spanish subsidiaries and Spain's entry into the European Economic Community will provide a bigger boost.



Hikes seen in France, Japan, Canada

A survey of industry experts worldwide indicates ad spending growth rates will increase in France, Japan and Canada this year. The other surveyed countries' spending will not grow as quickly as in 1986. *Source:* Advertising Age.

In 1986, Spain's ad expenditures jumped 21.5%, pushed by two elections and a 48% increase in the government's ad budget.

The U.K. had 10% growth in 1986, thanks to an increase in TV ad rates and advertising for one-time events, such as the denationalization of British Gas and the deregulation of the London stock exchange.

A more conservative 6% increase is expected in 1987.

Mike Waterson, U.K. Advertising Association's research director, said forecasters are exercising caution because "there could be an election which would bring a left-wing Labour government to power."

Growth in Sweden is expected to slow to 5%, after a 10% gain last year, despite the country's first consumer-spending boom in a decade.

Gunnar Anderson, Grey Svenska managing director, said, "If companies can move merchandise without advertising, then why do it?"

Falling dollar

The falling dollar and low inflation are spoiling chances of strong growth in Germany and Japan.

Germany anticipates only 0.7% ad growth this year. Bright spots are anticipated budget increases in auto, office equipment and service sectors, sources say.

Japan expects 2.1% ad growth, and budget increases are expected in the entertainment, financial and travel sectors.

"The strong yen has put Japan in a difficult position. For the first time, they are hurting," said Murray Smith, president-international operations, Bozell, Jacobs, Kenyon & Eckhardt.

Some U.S. sources predict long-term improvement for the German and Japanese economies.

McCann's Mr. Coen said, "Things are gradually getting stronger. They are still growing, but it's very slow."

Though the strong dollar may hurt local ad spending, it helps U.S.-based agencies when converting profits into dollars.

Economies, politics

Latin America's two strongest ad markets, Brazil and Mexico, are plagued by inflation and plummeting currencies.

In Brazil, 1986 was the year of the inflation-fighting Cruzado Plan. The price and wage freeze held down inflation but created product shortages and forced big advertisers to cancel ad spending. As a result, said Roberto Duailibi, partner in Duailibi Petit Zaragoza Propaganda, ad spending grew only 4%.

Now that the Cruzado Plan has expired, inflation could be as high as 50% to 250% in 1987, creating ad growth estimates from zero to 20%.

Ad spending in Mexico climbed 95% last year. The jump resulted from World Cup-related ads and giant TV consortium Televisa's 170% rate increase.

This year, with the peso expected to fall further and inflation predicted to hit 150%, ad expenditures are expected to drop 75%.

BBDO's Mr. Schalk has confidence Brazil and Mexico will control skyrocketing inflation. "One of the plans one day will work. It will have to work," he said.

In South Africa, continuing political and economic woes will cause ad spending to fall an estimated 6% this year, the country's fourth consecutive decline. Ad spending levels fell 10% in 1986.

Major advertisers, including General Motors Corp. and IBM Corp., left the country last year. With smaller budgets and fewer advertisers, more agencies and newspapers may collapse or merge this year.

Australia's soft economy was reflected in its 2% ad expenditure growth in 1986.

Malcolm Spry, group managing director of Mojo MDA, said, "It seems 1987 is going to look very like 1986. We cannot see any major cutbacks, but I can only see modest growth—just a fraction better than inflation." This year's ad growth in Australia is expected to be only 1%.

Like Australia, Canada expects 1% ad growth in 1987, compared with 0.8% growth in 1986.

Hugh Dow, MacLaren Advertising's national media director, said, "We're looking at the same sort of picture for '87: minimal or neglible increases in spending for the majority of accounts."

Sources say Canada's performance can be tied to the lack of growth in the U.S. Grey's Mr. Vale said, "There is a tremendous affinity between the two countries. It's very difficult to separate the two's [performance]."#

World News Roundup

(Continued from Page 3)

two-year campaign to promote its free trade initiative with the U.S.

London—The Independent daily newspaper is seeking an agency after Saatchi & Saatchi resigned the $4 million account to prevent a conflict with Rupert Murdoch's News International newspapers.

Montreal—J. Walter Thompson Co. is closing its 18-month-old Enterprise Advertising Associates here Feb. 27.

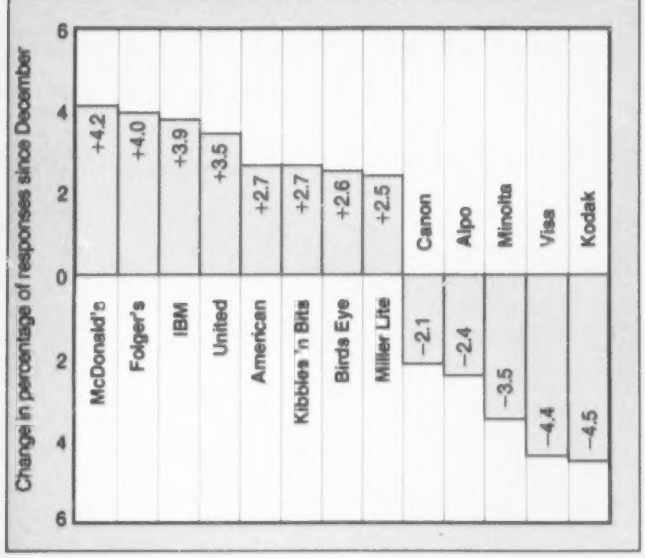
Sydney—Amatil mineral water is seeking an agency after Leo Burnett Co. resigned the $1.3 million account. Burnett stepped aside to avoid a possible future conflict with PepsiCo. PepsiCo recently dropped J. Walter Thompson Co. from its German and Mexican accounts.

Milan—Movie director Martin Scorcese filmed a TV spot for designer Giorgio Armani's Emporio Armani clothing line, handled in-house. It will break March 1.

On the move: Jeremy Bullmore, chairman, J. Walter Thompson Co., London, will retire in about a year after 33 years with the agency. Designated to succeed him is **Allen Thomas**, deputy chairman-executive creative director.

January winners and losers

Question: Of all the advertising for (product category) you have seen, heard or read in the past 30 days, which ad first comes to mind? *Source: SRI Research Center Inc., Lincoln, Neb.*



Print

(Continued from Page 6)

ever, as awareness of MasterCard's "Master the possibilities" advertising dropped to 18.9% of first mentions last month from 21.2% in December.

Bucking the trend and posting an increase in top-of-mind awaress was American Express, which extended advertising of its Buyer's Assurance warranty program beyond its originally planned Dec. 31 end date. Its share of first mentions moved up to 12.2% from 10.9% in December.

Among other significant changes in awareness shares in January:

- When the 1,000 January respondents were asked to name the advertisement from any category that first came to mind, their **top 10** were, in descending order, McDonald's; Coke, Miller/Miller Lite, Budweiser/Bud Light; California Raisins; Chevrolet; Pepsi; Chrysler; Procter & Gamble's Pampers disposable diapers; and E. & J. Gallo's Bartles & Jaymes wine cooler.
- IBM closed the gap between its awareness score and that of traditional category leader Apple. Big Blue's advertising came to mind first for 21.2% of the sample in January, up 3.9 points from 17.3% in December. Apple still led the **computer** category with 22.3% of first mentions. Tandy Corp.'s Radio Shack was third with 2.3%.
- The **coffee** market lately has displayed as much bitterness as a reheated cup of its own product. Companies have charged competitors with scare tactics, misleading advertising and worse.

One advertiser stirring controversy has been Procter & Gamble Co., whose advertising for Folgers Crystals, making a taste comparison with a leading decaffeinated brand, reportedly drew an official protest from rival General Foods (AA, Jan. 12). Controversial or not, consumers have noticed and remembered Folgers', advertising. Its share of first mentions last month rose 4 points to 27.1%. Maxwell House was second with 20.8%; Hills Bros. third with 4.2%.

New advertising for General Foods' Sanka brand and Nestle's Taster's Choice, which broke too late to significantly affect January responses, should make this a category to watch in coming months.

- Another especially active and fluid market has been the **airline** industry, and the post-holidays blitz of fare-reduction advertising had on effect on the January ad-Watch numbers.

United Airlines' "I need a vacation" message apparently struck a responsive chord, as its advertising came to mind first for 18.2% of the sample, up 3.5 points from December. American Airlines' awareness score was up 2.7 points to 11.5%, strong enough for second place, while TWA was third with 7.6% of first mentions.

- Consumers apparently had had their fill of snapshot-taking during the holidays, and thus weren't as interested in advertising for **cameras** during January. Longtime category leader Kodak retained the No. 1 spot, but its share of first mentions tumbled to 15.3% last month from 19.8% in December. Advertising for Canon came to mind first for 9.7%, compared with 11.8% a month earlier, and No. 3 Minolta's share dropped to 6.7% from 10.2% in December.#

'Calif.' sets up ad pact

Los Angeles—*California* has signed a combination-buy agreement with *San Diego Home & Garden. California* also will represent *SDH&G* on the East Coast.

Saatchi forms 4-person unit to run outposts

By LAUREL WENTZ

London—Saatchi & Saatchi Compton Worldwide is setting up a new four-person unit to run the agency network outside the U.S.

The new operation, named Saatchi & Saatchi Compton International, is designed to bring other agencies in the network up to the creative standard of Saatchi's London shop.

SSCW operates in 53 countries through 45 wholly owned and 47 affiliate agencies. Its billings, which exceeded $3 billion in 1985, are split almost 50-50 between the U.S. and the rest of the world.

T. Bannister

A. Lloyd

"Saatchi in the U.K. has always been the light that illuminated the rest of the network," said Terry Bannister, who is moving from joint managing director of Saatchi in London to joint chief executive international of the new unit. "It's the center of creative excellence and dynamism. For some time we've been beginning the process of spreading what we think Saatchi has [in London] throughout the network."

Two of the four men who will be in charge of the non-U.S. operations were among the original founders with Charles and Maurice Saatchi of the London agency in 1970.

Jeremy Sinclair, 40, a top British copywriter who was given his first job by Charles Saatchi and rose to become creative director and chairman of the London agency, will have the title of joint chairman international. The other joint chairman will be Alban Lloyd. The 50-ish Mr. Lloyd joined Saatchi two years ago from McCann-Erickson to become chairman for Europe.

Joining Mr. Bannister as joint chief executive international is Roy Warman, 38, who also is moving from joint managing director at the London agency. Mr. Bannister, 40, joined Saatchi in 1973 as an account handler. Mr. Warman has been with Saatchi from the start in various roles, including media director and commercial director.

All four will continue to be based in the London agency. They will report to SSCW Chairman Milt Gossett. Ed Wax, ceo of the U.S. operation, also reports to Mr. Gossett. The new positions, which were announced to Saatchi staff last week, take effect immediately.

The new team will bring international creatives to the London office frequently and also will look for acquisitions, which are expected to continue in Europe. The Saatchi executives said they plan to do an "audit" of Latin America, where Saatchi has mostly non-equity affiliate arrangements rather than equity in agencies.

Market analysts said the new structure would be ideal to handle the absorption of Ted Bates Advertising. Many outsiders believe Saatchi will combine the Bates and Saatchi agencies in markets where both exist.

"They are trying to bring to the handling of multinational clients a more cohesive manner, and it could be the precursor to a move of some Bates units into Saatchi," said an industry analyst at a London stockbroker. "They could put some Bates units around the world into DFS Dorland where there is a duplicity of offices and the remainder could move into Saatchi."

Although SSCW handles business for more than 40 clients in at least five markets each, according to the Saatchi annual report published this month, the development of more global clients like British Airways is hampered by the uneven quality of the network.

"Most of the clients of the network have expressed a desire for more uniformity of standards and delivery," Mr. Warman said.

"The objective is to get more new business from existing and new clients by improving creative standards around the world," Mr. Bannister said.#

SSC&B:Lintas leads Unilever pack

McCann-Erickson a surprise loser; JWT also failed to gain

By PAT SLOAN

NEW YORK—Ogilvy & Mather may have won big in Unilever's $70 million account shuffle this month (AA, Feb. 16), but SSC&B:Lintas Worldwide remains entrenched as the international marketer's lead agency.

Also, McCann-Erickson is perceived as having come out on the short end.

That assessment of the Unilever shake-up of Chesebrough-Pond's agencies emerged after the elevation of Unilever director Morris Tabaksblat to chairman of the Westport, Conn.-based marketer, succeeding Ralph Ward.

Agency sources estimated Unilever's worldwide ad spending now stands at $1.6 billion, with SSC&B:Lintas, which did not figure in the realignment, holding 50%.

The major agencies trailing Lintas are O&M and J. Walter Thompson Co., tied for second place, followed by McCann and BBDO Worldwide.

Although McCann picked up the Vaseline brand worldwide, the bulk of Chesebrough's international billings was not consolidated at McCann as Chesebrough had intended before the Unilever deal (AA, Sept. 1).

Sources declined to speculate whether JWT's financial problems were a factor in its failure to gain more business.

William Esty Co., part of the Saatchi & Saatchi agency network, lost more than $20

NEWS ANALYSIS

million in Chesebrough billings as Unilever yanked Vaseline brand products and Prince Matchabelli division fragrances.

Agency sources said Esty's dismissal was unrelated to the fact that Saatchi & Saatchi works for Unilever rival Procter & Gamble Co. (AA, Dec. 8).

One source explained that "even before P&G got a chance to stomp its foot" Unilever initiated the move out of Esty to focus on agencies with worldwide capabilities.

Unilever also wanted to start reorganizing Chesebrough's personal products with an eye toward combining them with compatible business at New York-based Lever Bros. (AA, Dec. 8).

Even if Chesebrough had remained independent, Esty most likely would have lost out, insiders said.

"Chesebrough's international review was a prelude to going worldwide on all fronts," one source said. "Under that plan, McCann would have first picked up Vaseline and Pond's internationally and then worldwide."

Waring & LaRosa lost more than $13 million in billings as it parted with Aziza makeup and Cutex nailcare and makeup, but two other Chesebrough brands, Ragu and Adolph's food products, remain at W&L.

As Unilever assimilates Chesebrough, the W&L status may change, because Mr. Tabaksblat is said to be considering moving responsibility for Ragu and other food products into Unilever's Thomas J. Lipton Inc. unit. But that presumably would occur after he merges Chesebrough's U.S. toiletries and beauty aids with Lever's. The unified operation would retain the Chesebrough name.

Under this plan, international operations might be merged country by country.

The head of the new unit is not expected to be announced before March.

Wayne Nelson, president of Lever Bros.' personal-products operation, is considered the top contender for the post, followed by Chesebrough President Robert Phillips and George Goebler, president of Chesebrough's consumer products unit.

Based on O&M's score in the Chesebrough review, where it gained an estimated $55 million in domestic billings alone, the agency is being tagged as Unilever's favorite new personal-products shop. This despite the fact that SSC&B:Lintas handles an estimated 70% of all Unilever personal-care products.

However, SSC&B:Lintas has limited its own expansion in this area. As an agency for both Noxell Corp. and Johnson & Johnson, it could not take on any of the prime Chesebrough business because of conflicts. And the agency has let Unilever know it will not resign business to take on new business.

Because the Lintas part of the agency was a Unilever-owned house shop before its acquisition by Interpublic Group of Cos. and merger with SSC&B, executives at rival agencies say it can afford to take that stance and also rest assured that it will remain Unilever's top shop for some time to come.#

Food

(Continued from Page 1)

tising while another $609 million will go toward consumer promotion and merchandising activities.

Kraft Inc., which reported it will spend an additional 13% on advertising this year, also will "take off its conservative hat and concentrate on line extension," according to Chairman-ceo John Richman. The company had feared line extensions would cannibalize existing brand share, Mr. Richman explained. But with the recent success of several new Velveeta items, Kraft is ready to move full steam ahead in this area, he said.

Mr. Richman noted that Kraft expects lower media costs to give its $471 million ad budget "a bigger bang for our buck."

At General Foods, marketing spending is expected to increase 16%, said President-ceo Philip Smith. GF's "most ambitious" new-product thrust is in the convenience meal area, he said; as previously disclosed, the company is testing four separate food lines under the Fresh Creations, Culinova, Impromptu and Ronzoni brands. With the exception of Ronzoni, all are new brand names.

Support behind food, restaurants and retailing at Minneapolis-based General Mills will increase about 16%, to $367.7 million, this year, after a similar increase last year.

Its Minneapolis neighbor and rival, Pillsbury Co., said its advertising and promotional spending will increase about 8%, to $540 million. About 40% ($215 million) of that budget will go toward advertising while 60% ($325 million) is earmarked for trade and consumer promotion.

U.S. foods division Chairman Thomas McBurney said the company relies heavily on promotional activities because Pillsbury's product mix is heavily skewed toward commodities (flour, vegetables, etc.). He noted, however, that the emphasis on promotion is less this year; last year's ad-to-promotion ratio was closer to 35% to 65%.

Executives of RJR Nabisco said the company's marketing expenditures will continue at "high levels." Total marketing dollars on the food side were up 13% in 1986, while advertising and promotion rose 15%. The company made no specific disclosures about '87 spending for its food businesses.

The company said that spending for its tobacco business will remain at the same level in the U.S., while international marketing investments will increase 30%, on top of a 22% increase in '86.

E.A. Horrigan Jr., chairman-ceo of R.J. Reynolds Tobacco, noted that 23% of his unit's budget went into merchandising, up from 17% the year earlier. That money primarily came out of media advertising, he said.

Hershey Foods expects to boost its spending by 12%, to $244.3 million, with about 60% of that going to advertising, according to Chairman Richard Zimmerman. Borden, meanwhile, said its advertising and promotion spending will increase about 8% this year, to more than $300 million.

The largest percentage increase is coming from Gerber Products, Fremont, Mich., which boosted its ad budget last year 50%—to $15 million—in an effort to recover from negative publicity surrounding reports of product contamination (they turned out to be false). This year, the company plans another 30% increase, to $20 million.

Anheuser-Busch Cos. plans to increase ad spending 7% to 8% this year. Among A-B's new-product activities is the expansion into the East of its Saratoga and a Sante bottled waters as well as the introduction of Zeltzer Seltzer *(see separate story, Page 90)*. The company also plans to roll out El Charrito frozen Mexican foods and expand its Eagle non-nut snacks.

Other new-product plans:

- **Quaker** has added two new items to its Aunt Jemima breakfast-food line—Toaster Browns hash browns, rolling into national distribution this month, and Homestyle Breakfasts, now testing. More new products are expected from Aunt Jemima "in the coming months" given strong sales trends across the breakfast categories, according to Quaker's Mr. Rhodes.
- **Kraft** Light Natural Cheese, an extension of its regular Natural Cheese, rolls national later this month, along with a light version of Philadelphia brand cream cheese. Bull's Eye barbecue sauce, a superpremium extension of Kraft's No. 1-selling regular barbecue sauce, is going into half the country now and should be fully national by the end of the year.

Kraft also is testing a line of Cajun sauces and ingredients called Makin' Cajun in two markets, and a new line of four chicken-based packaged dinners called Applause!

It also is taking another shot at the frozen prepared-dinner market, with Kraft Blue Box dinners. Kraft San Francisco Sourdough frozen bread, a joint venture with a San Francisco-based bakery, is rolling national this spring.

- **General Mills'** new Oatmeal Raisin Crisp cereal will hit shelves in the spring. Retail sources estimate total spending for the ready-to-eat cereal to be between $18 million and $23 million.

Betty Crocker Suddenly Salad prepared salad mixes, testing in three markets since late last year (AA, June 30), goes national this month. The company's Gorton's frozen seafood unit is adding Microwave Gorton's Crunch Filets and Sticks.

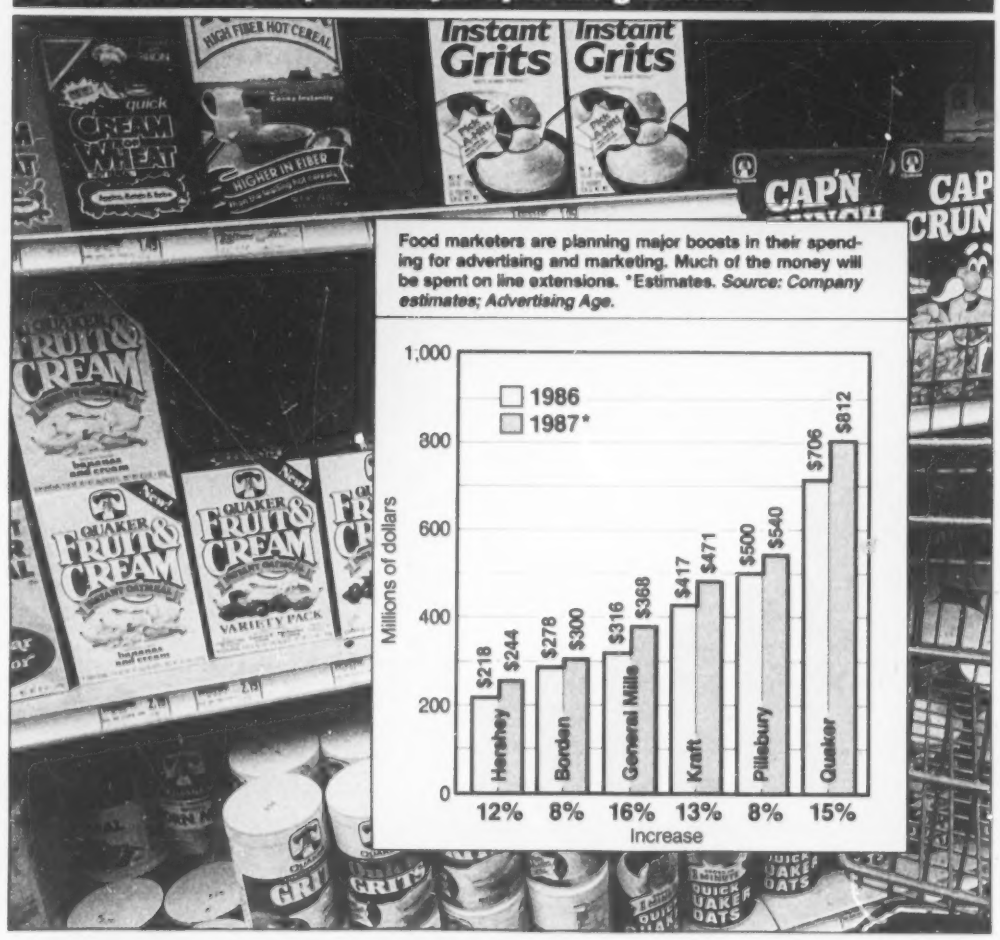
Big G also continues to expand its fruit-snack business, with Fruit Swirl bars, a combination of dried fruit and cream in bar form. Another new item high on its agenda is Yoplait soft frozen yogurt, which is rolling national.

- **General Foods** hopes to help its beverage business with an aseptic-package version of Kool-Aid and Tang. The company also plans to introduce two new cereals into test this year.
- **Hershey's** Bar None, a chocolate bar now testing, is expected to be in national distribution by yearend, while Grand Slam (a bar combining chocolate and caramel) is being reformulated after disappointing test-market results. The company's New Trail granola bar is being revamped, with packaging to emphasize the Hershey name.

The company also said it would consider adding a frozen Italian entree line under its acquired American Beauty pasta label.

- **Borden** will add another ice cream novelty to its stable this summer, carrying the Cracker Jack label.#

Food marketers plan major spending boosts



Food marketers are planning major boosts in their spending for advertising and marketing. Much of the money will be spent on line extensions. *Estimates. *Source: Company estimates; Advertising Age.*

Jacoby mulls buying stock in JWT Group

By STEWART ALTER

Robert Jacoby would like to re-enter the advertising business in a big way—by taking a 35% stake in JWT Group.

The former chairman of Ted Bates Worldwide, now exiled from the ad world because of his contract dispute with Saatchi & Saatchi Co., told ADVERTISING AGE he is thinking about leading a group of investors in purchasing the JWT Group stock on a friendly basis. He would then serve as a consultant to help JWT boost its lagging profit margins.

Such a move would unite one of the advertising industry's biggest newsmakers of 1986 with the agency that so far has captured the headlines in '87.

Although Mr. Jacoby's ideas reflect only his interest and nothing more at this point, they take on significance for several reasons.

First, though no Wall Street takeover or buyout actions have emerged since the JWT Group first seemed to go "in play" a month ago, JWT is still being closely watched by investors.

Second, while various anonymous investor groups reportedly have considered a JWT bid in recent weeks, Mr. Jacoby brings a new credibility to the topic. He is widely recognized as one of the industry's star performers in squeezing profits from a worldwide agency.

Despite JWT's first-rate professional reputation, its inability to bring more to the bottom line has irritated Wall Street.

One crucial hurdle facing Mr. Jacoby's potential bid for JWT is whether a three-person arbitration committee's ruling, due in mid-April, will allow Mr. Jacoby to compete against his former employer, Saatchi & Saatchi, which ousted him last fall (AA, Sept. 22, *et seq.*).

Asked in a phone interview what his plans would be if the ruling is in his favor, Mr. Jacoby replied, "I'd like to buy J. Walter Thompson."

In the disarmingly frank style that is his characteristic in interviews, Mr. Jacoby explained that he is thinking of 35% of JWT's

Hagler-Leonard sponsorship deal is a knockout for A-B

By BRIAN MORAN

Anheuser-Busch has locked up a sponsorship deal for the Marvelous Marvin Hagler-Sugar Ray Leonard middlewight championship fight that should pay big dividends long after the April 6 event.

For less than $1 million plus the cost of TV ad time, A-B's tie-in package will include a network TV commercial featuring appearances by Messrs. Hagler and Leonard; title sponsorship of a barter syndicated fight-preview special; opening and closing "billboards" and between-rounds positions on the closed-circuit telecast; the appearance of the Budweiser logo on the ring mat and posts; the official program cover; and the fight poster.

That combination, plus Bud's ring-signature exposure on news media coverage and on an expected Home Box Office tape-delay telecast, will be worth millions to A-B, at a marginal cost.

The St. Louis-based brewer paid fight promoter Bob Arum of Top Rank Inc. a "high six-figure sum" for sponsorship rights.

A-B last week completed filming a TV commercial featuring Mr. Hagler and Mr. Leonard that heralds Budweiser's association with the bout. The spot combines locker-room shots of the fighters with the building of a boxing ring featuring the Bud logo.

A microphone drops into the center of the ring as a voice-over says: "Once in a lifetime, two legends meet in the ring. Budweiser is proud to be the official sponsor of the SuperFight."

Using the fighters in advertising without paying a hefty endorsement fee is a major coup for A-B. Messrs. Hagler and Leonard both have received tremendous exposure in previous bouts on network and cable TV (Mr. Leonard is an HBO boxing announcer), and their presence in

Castle & Cooke may put Dole on the block

By JENNIFER PENDLETON

LOS ANGELES—A premier brand name may be up for grabs as rumors circulate that Castle & Cooke has placed its Dole Food Co. unit on the block.

A C&C spokeswoman declined to comment on reports from food industry sources that it has been in contact with several major companies regarding a possible sale of all or part of Dole.

Among the possible suitors most frequently mentioned are General Foods Corp., Quaker Oats Co. and RJR Nabisco, the parent of Dole rival Del Monte Corp. *(see related item on Page 67).*

None of these companies would comment on the subject.

As financier David Murdock's Flexi-Van Corp. completed its 1985 acquisition of C&C, speculation arose that Dole might be resold. Sources said Mr. Murdock bought the company to acquire its extensive Hawaiian real estate holdings, not to run a consumer-products company.

"Mr. Murdock is a property speculator, not a developer of brand names," said one former Castle & Cooke executive.

"He is a seller of assets, and clearly Dole is the biggest asset that company has," said another source.

Wall Street analysts estimate that Dole could fetch between $500 million and $900 million.

Although Mr. Murdock last year said he intended to hold onto Dole, his background supports the speculation about a sell-off. In 1982, the self-made millionaire bought Cannon Mills Co., a New York-based textile company. He invested millions of dollars modernizing its antiquated mills and increased the home-fashion brand's market share by introducing new designs and running ads featuring celebrities.

But Cannon Mills continued to lose money,

Last Minute News

Davis, LBS mull NFL bid

NEW YORK—Billionaire Marvin Davis is in discussions with Grey Advertising's LBS Communications to make a joint bid for the TV rights to some National Football League games, sources say. The deal with Marvin Davis Co., Beverly Hills, Calif., would supersede an earlier proposal from LBS to represent a consortium of advertisers who would bid for the rights (AA, Nov. 24, *et seq.*). LBS and Mr. Davis would bid for "Monday Night Football" if ABC Sports does not renew with the NFL. If ABC signs a

Highlights

A-B's fight fete 1
Anheuser-Busch has locked up a sponsorship deal for the Marvelous Marvin Hagler-Sugar Ray Leonard middlewight championship fight that should pay big dividends long after the April 6 event.

Nestle ponders fee setup 3
Nestle S.A., moving to shed a staid marketing image, is developing long-range strategic plans that will affect its relationships with its ad agencies. A key proposal is to drop the commission system worldwide in favor of a fee setup.

Wendy's execs prepare pep rally 3
Next week Wendy's International Chairman-ceo Robert Barney and other top company executives will outline marketing, promotion and new-product plans for the coming year and play cheerleader to whip operators of Wendy's 2,400 franchised restaurants into an excited, optimistic and cooperative mood. Critics —both among its franchisees and on Wall Street—say Wendy's badly needs a major overhaul.

Too new to be true 4
Some package-goods marketers and ad agencies are taking a cautious and skeptical approach on new-product introductions, despite recent bullish forecasts.

K mart's big plan 58
K mart Corp. has high hopes that a new line of Jordache clothing for bigger women will help it overtake No. 1 retailer Sears, Roebuck & Co. The line, representing the first joint venture between the New York-based apparel designer and the No. 2 retailer, is part of K mart's overall $2 billion effort to upgrade its image by refurbishing stores and adding brand-name merchandise.

CORPORATE CLOSEUP

Chiquita slips into new arena 66
United Brands once again is trying to move its Chiquita brand out of the grocery produce section and into the mainstream of consumer foods marketing. It is banking on the well-recognized brand name, associated with fresh produce for 88 years, to make it a top banana in a number of new categories.

FEATURES

Will Orange County bear fruit? 35
As population and enterprise soared in the past 20 years, forecasters predicted Orange County, Calif., would emerge as a dynamic business market and corporations would relocate to its 26 communities. And they believed fat times would follow for the ad agencies serving those companies. Despite early agency failures, the promise of Orange County is very much alive.

INTERNATIONAL

Japanese smokes filter into U.S. 44
Japan Tobacco, facing stronger competition at home from imported cigarettes, is trying to expand its U.S. presence, mainly for its Mild Seven Lights brand.

U.S. marks spot for U.K. retailer 46
Britain's biggest department store chain, Marks & Spencer, is on the verge of making its first move into the U.S. under its own name. Last year M&S announced plans to open four stores in New York state under the name of D'Allaird's.

OTHER NEWS

Cadillac is turning to soft-sell approaches—such as sponsoring concerts held in rich and famous people's homes—to reach the super-affluent market for Allante, the carmaker's new two-seater convertible. Page 24.

Piedmont Airlines is mounting a new marketing defense of its successful small-town-hub strategy as it confronts an expected takeover. Winston-Salem, N.C.-based Piedmont recently broke a new network TV commercial touting the efficiency of its flight operations and strength as an independent carrier, just as Norfolk Southern Corp. and USAir Group ignited a bidding war for the airline. Page 50.

Southwest Airlines last week started selling tickets through automated teller machines in Texas 7-Eleven convenience stores, becoming the first airline to use such machines outside airport locations. Page 59.

TV Guide has won the battle with *Reader's Digest* over the right to be called the largest-circulation U.S. magazine, according to the Audit Bureau of Circulations' FAS-FAX report for the six months ended Dec. 31. *Reader's Digest* had retained the top spot for at least five years. Page 66.

Procter & Gamble Co., which continues to fight the pernicious and persistent rumor that it is in cahoots with the devil, now is the target of legal action by one person it sued for spreading that rumor. Page 69.

Renewed

Coke's NBC buy launches brand's 'new feeling' ads

By NANCY GIGES

ORLANDO, FLA.—New Coke is new Coke again.

Coca-Cola USA's 1987 advertising, shown to company bottlers here last week, revives and strengthens the "megabrand" concept for its flagship line and brings back the modifier "new" to describe the cola formula introduced in 1985, with initially disastrous results.

With the entire $90 million sugar cola business now handled by one agency, McCann-Erickson, the Coke campaigns are coordinated to work with the new umbrella theme, "When Coca-Cola is part of your life, you can't beat the feeling."

The Atlanta-based soft-drink marketer is expected to spend close to $200 million in measured media this year to support three key trademarks: Coca-Cola, including diet and Cherry; Sprite; and Minute Maid orange soda.

Heavy spending in advertising and promotion also is set for the youth and ethnic markets—triple what the company traditionally has invested in these areas, according to executives.

While the company said its budget is up from last year, executives declined to give a percentage increase.

The first airing will come March 5, when Coca-Cola airs five of its new commercials in a "vertical roadblock" on NBC-TV's top-rated Thursday lineup. The five spots, totaling three minutes, are scheduled to run on a one-per-show basis on "The Cosby Show," "Family Ties," "Cheers," "Night Court" and "L.A. Law" from 8 p.m. to 11 p.m. (ET).

Coca-Cola USA President Edwin R. Mellett said the vertical buy was a first (roadblock usually refers to a commercial being shown on all three networks at the same time—or horizontally).

Coca-Cola showed more than a dozen new commercials for its key brands at a three-day bottler meeting here, which included colorful song-and-dance routines, a trip to the company's co-sponsored American Adventure pavilion at nearby Epcot Center and concerts by The Pointer Sisters and Manhattan Transfer, two singing groups the company uses in TV spots. (Sources estimated the event cost at least $2 million.)

The 1,400 bottlers in attendance responded well to the new creative, designed to maintain the momentum Coca-Cola gained last year when it regained the No. 1 cola position, became the leading lemon-lime marketer with Sprite (overtaking 7UP) and attained a record 39% corporate market share in soft drinks.

Although most Coca-Cola soft

L.A. 'Examiner' replaces Doner with Ketchum

LOS ANGELES—*The Los Angeles Herald Examiner* has hired Ketchum Advertising for its estimated $2 million account, after working with W.B. Doner & Co. for only a few weeks.

The *Herald Examiner*, the city's second-largest daily, had not signed a contract with Doner.

Doner gained the business after acquiring Wexler & Shalek soon after the latter successfully pitched the business. Advertising previously had been handled in-house.

Following the decision to hire W&S, *Herald Examiner* Director of Marketing Services Sally Gevirtz moved to Doner as an account supervisor. Circulation Marketing Manager Jane Neville Dudik replaced Ms. Gevirtz as promotion manager.

The account is the first new business for Ketchum's local office since it opened with American Honda Motor Co.'s Acura division account in 1985.

* * *

Plantronics, Santa Cruz, Calif., is reviewing BBDO, Chiat/Day and Woolward & Co., both San Francisco, for its $2 million account. The marketer of telephone headsets split with Peter Johns & Partners, San Francisco, in early January. Plantronics is expected to introduce several consumer electronics products soon.

* * *

Marriott Corp.'s seven southern California hotels are contacting agencies concerning a newly established account, estimated at $800,000. The association, yet to be named, will select an agency March 20 and is coordinating the review from Anaheim.

* * *

Diet Center, Rexburg, Idaho, this week will name an agency for its estimated $6 million account. The finalists are Cole & Weber, Seattle; Eisaman, Johns & Laws, Los Angeles; DFS/Dorland, San Francisco; Levine, Huntley, Schmidt & Beaver, New York; 2½-year incumbent J. Walter Thompson/West, San Francisco; WFC Advertising, Phoenix; and Weiden & Kennedy, Portland, Ore.

This data has been provided by Media Records for exclusive publication in Advertising Age and may not be reprinted or published in any form without explicit permission from Media Records. All newspapers represented are subscribers to Media Records. For those newspapers that subscribe to Media Records National Advertising Reporting Service, Total Advertising data shown has been supplied by the publisher to Media Records and included in this compilation. All publisher supplied figures are converted to MRCS SAU inches by Media Records. These newspapers are indicated with an asterisk (*).

REPORTING METHODOLOGY

Media Records continues to measure in linage but due to the introduction of the SAU 6 column format Media Records has designed and developed a methodology with the approval of our subscribers, the INAME Measurements Committee, The ANPA NAB Working Committee, The AAAA Newspaper Committee, and other industry groups.

The approved methodology is titled The Media Records Conversion System (MRCS) and is based upon the printed page area of each product of the newspaper and is a five step approach as follows:

1. Measure Printed Page
   Width and Depth in Inches
2. Determine Square Inches of Page
   Multiply Width by Depth Inches
3. Determine the Number of SAU Inches of Page
   Divide the Square Inches by 2.0625 (SAU Inches)
4. Measure the Total Lines of the Page
   Multiply Column Depth Agate Lines by the Number of Columns on the Page
5. Determine the Factor for Converting Measured Lines to Reported SAU Inches
   Divide the Total Lines of Page by the Number of MRCS SAU Inches of the Page

Ethnic haircare marketers battling for share

By Phyllis Furman

Tension underscores the struggle between black-owned cosmetics companies and general marketers for control of the ethnic haircare segment.

A series of controversies surrounds the market segment, including allegations from black companies that white marketers are deceiving consumers with packaging similar to that used by black companies. Chicago-based Soft Sheen Products, for example, is currently suing Revlon Inc., New York, charging that the cosmetics giant copied its package design to confuse customers.

Other black-owned companies are accusing Melrose Park, Ill.-based Alberto-Culver Co. of leading black consumers to believe that its TCB (Taking Care of Business) line—with its signature Afra logo—is manufactured by a black company.

Recently, a full-scale ethnic battle erupted when Irving J. Bottner, president of Revlon's professional products division, made statements in the Oct. 13, 1986, issue of *Newsweek* that questioned the future of black-owned companies. Mr. Bottner stated: "In the next couple of years, the black-owned businesses will disappear. They'll all be sold to white companies." Both Revlon and Mr. Bottner have since apologized for the remark, saying that the comment was taken out of context.

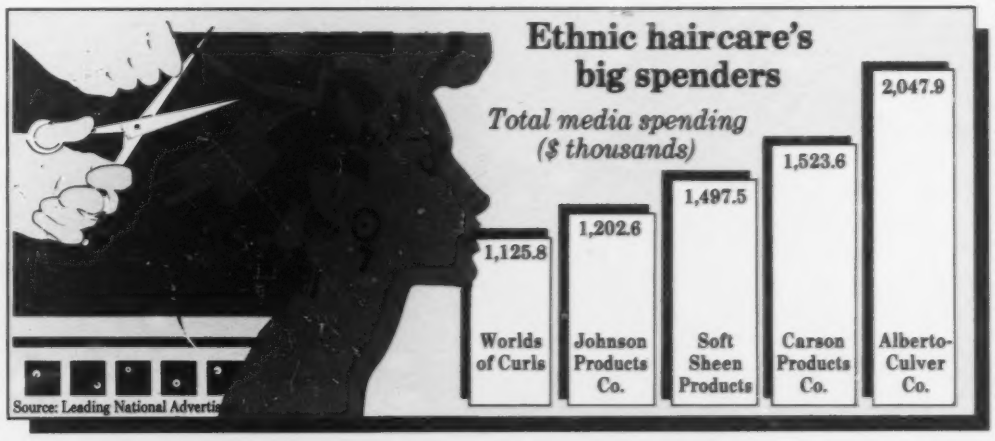
A national boycott of Revlon products ensued, led by Jesse Jackson's Operation PUSH. It culminated when Revlon, faced with the consumer boycott, sold its operation in South Africa.

And late in January, Essence Communications, publisher of *Essence*, a magazine targeted to black women, joined *Ebony*, *Jet* and *Impact* in banning future advertising by Revlon in its magazine because of Mr. Bottner's statement.

At stake in this battle is the ethnic hair-care segment—one of the fastest growing in the health and beauty aids category, according to Business Trends Analysts, a research company based in Commack, N.Y. Sales of all toiletries and cosmetics to black consumers topped $2.7 billion last year, with hair-care preparations making up approximately 40% of those sales, according to BTA.

Growth in dollar volume of ethnic personal care products has averaged in excess of 12% during the past five years, and BTA predicts that increased brand awareness, product-line expansions, rising demand due to demographic shifts and the development of more extensive distribution networks will help to underwrite continued growth.

The strength of ethnic haircare sales has not been lost on general market beauty companies which, in light of less than spectacular growth in the overall toiletries and cosmetics industry, have been looking into diversifying their product lines.



Several years ago, the general market giants began escalating their efforts to target the black consumer by extending ethnic product lines, studying black purchasing habits and increasing black media spending.

General market companies now account for 50% of the ethnic hair-care market, according to BTA and the American Health & Beauty Aids Institute (AHBAI), a Chicago-based trade organization of black-owned health and beauty aids companies.

Mainstream marketers, including Alberto-Culver, New York-based Clairol, Revlon and Boston-based Gillette Co., market a host of black haircare products—from relaxers to curl activators—under existing product divisions or recently acquired black companies.

Of particular interest to general market beauty companies are black consumers' buying habits. Blacks spend up to five times more on personal care products than the average consumer, according to AHBAI.

Further supplementing this segment's growth is the variety of black hair types needing different styling aids. "Just as blacks come in all colors, our hair comes in different types and requires more care because it's dry and brittle," explains Barbara Ingram, director-corporate communications and creative services for Atlanta-based M&M products.

Finally, black women are fashion conscious, and, like most other women, hair is their No. 1 beauty concern. As a result, they are especially receptive to new product introductions, according to industry analyst Nancy Hall, VP, research division, Smith Barney, Harris Upham & Co., New York.

"The large companies have a lot more advertising and promotion muscle," says Eugene Morris, who worked on the Johnson Products account at Burrell Advertising, Chicago. Chicago-based Johnson Products Co. is handled by Burrell and The Randall Group, Chicago.

More significantly, mainstream marketers have access to distribution channels and retail outlets that elude some black companies. "Gillette, for instance, has an in-house sales force and a solid relationship with retailers because of its other product categories. It can easily piggyback ethnic products on its existing distribution channels," says Ms. Hall.

"Retailers simply don't allot enough shelf space for our [black-owned companies] products," says Lafayette Jones, executive director of AHBAI, noting the retailers' reluctance to stock black lines in full because of a lack of information about the products and little knowledge about black buying habits.

"The general market uses all the clout it has. I've seen general marketers come in and manhandle our marketplace, keeping products on the shelves for nine months before they turned a profit," says George Johnson, president and founder of Johnson Products. He says retailers do not have enough inventory to support his product line, and because of this "[retailers] out of stocks have pulled our market share down."

Johnson Products sales have dropped from $37.8 million in 1985 to $34.5 million in 1986.

But mainstream marketers are quick to contend that they face their own obstacles in targeting black dollars. "The Revlon name gives us an advantage with the consumer," says one Revlon executive, who requested anonymity, "but many aggressive smaller companies have more flexibilty than we do—they can make immediate decisions where we can't."

Attempting to regain market share, black companies have returned to a strategy that industry analysts predict may no longer be viable: Appealing to the good will of the black consumer. AHBAI recently launched a $2 million campaign encouraging black consumers to buy black-manufactured beauty aids, increasing its budget to $3 million after Mr. Bottner's statements appeared in *Newsweek*.

Indeed, some black manufacturers perceived Mr. Bottner's statements as their opportunity to tug at black consumers' heartstrings. "We see Bottner's remarks as a chance to create awareness of the advantages of doing business with black-owned companies," says Comer Cottrell, president of Pro-Line Products, Dallas, and chairman of AHBAI. "The outrage overwhelmed the community, and it was a little self-serving."

Black consumers are more aware of their "social responsibilities," says AHBAI's Mr. Jones. "Politics is connected to business."

Still, black consumers, like anyone else, base many of their purchase decisions on product performance and label cachet, making appeals to ethnic allegiance an undependable means of targeting black dollars. "Black women are looking for performance—that's the bottom line," says Ms. Hall.

"If a black consumer thinks a product is a good one, he'll buy it—it doesn't have anything to do with pride," says Margaret Carroll, a BTA industry analyst.

Black companies also are trying to price their products more competitively. Historically, their prices have been higher because they lack general marketers' economies of scale.

Via AHBAI's efforts, they are attempting to gain more shelf space in stores. Mr. Jones meets with heads of retail chains and attempts to convince them that carrying entire lines of black products will bring more black consumers into their stores.

Faced with slackening U.S. sales, black companies also are targeting international markets. For example, in 1979 M&M introduced its products to Great Britain and has since expanded to other areas including Africa and the Caribbean. According to a spokesman at M&M, company international sales have grown 5% annually over the past seven years.

Nevertheless, industry analysts predict black-owned companies will continue to lose market share unless they price products more competitively, beef up their advertising budgets and garner more shelf space.

For some, regaining black consumer dollars will be a matter of survival because black companies can't target both whites and blacks, says Mr. Johnson. "Black consumers are our only market."

Phyllis Furman is an Advertising Age stringer covering New York and New Jersey.

New face

(Continued from Page S-2)

by consumer goods.

"It made financial sense for companies to make acquisitions when valuations were so low," Mr. Salzman says. "Companies could bid in excess of stock prices because those prices didn't really reflect asset value."

When corporations like P&G and Unilever add companies such as Richardson-Vicks or Chesebrough-Pond's to their lineups, he says, the moves may well signal industry expansion, not consolidation. He calls those acquisitions "classic add-ons."

Mr. Salzman says industry sales moved upward in the second half of 1986, and he foresees more growth ahead because costs have stabilized, pricing is modestly higher and consumers are more receptive to line extensions.

"Consumer products couldn't ask for a better environment. The outlook for gross profits is good, as it should be in a long-term, low-inflation environment," he says. "That's what's attracting the takeover people."

However, not everyone shares Mr. Salzman's optimism.

"Cosmetics is a hard business," says industry consultant Allan Mottus, president, Allan Mottus & Associates, New York. "The consumer is getting shrewder, and more value-driven."

He says that skin care, which is "the only category with any vitality," has grown at an annual rate of about 5% in unit sales on a dollar gain of 10% to 11%. Women's fragrances dropped slightly, about 3%, in 1986 and unit sales of makeup added only 3% on a dollar gain of 6%, Mr. Mottus says.

He predicts industry consolidation will leave the customer with fewer choices in the future.

"Some lines will be cut back," he says, and as the big companies gain even more leverage, "the little [companies] will have less maneuverability."

However, Mr. Mottus sees new opportunities emerging for entrepreneurs who have the know-how to carve a niche in the market. "The problem with size is that the bigger a company gets, the more conservative and ingrained it becomes," he says.

"In this industry, where the cost of manufacturing is relatively low, a little guy can mount the challenge. And if he's right—if his fashion sense is correct—he can run with it."

Specialty retailers spice up their product lines

By Faye Brookman

Retailers are stamping their names on fragrances, hoping their stores' ambiences can be captured, bottled and sold.

Benetton, Bijan, Royal Silk and Tiffany & Co., head the list of retailers with branded fragrance entries. And industry experts say it will not be surprising to see debuts from companies ranging from The Limited's Victoria's Secret to Banana Republic. Tiffany & Co., New York, recently announced a joint venture with Chanel to produce Tiffany's first fragrance. Chanel will handle the manufacture and distribution of the product, which should appear in Tiffany's eight stores by September 1987 and will be launched into department and specialty stores in spring 1988.

Annette Green, executive director of New York-based Fragrance Foundation, confirms retailer interest in fragrances. "If the number of inquiries we've received recently is any indication, there will continue to be many more non-traditional techniques in selling fragrances."

According to Leslie Grunberg, president of Benetton Cosmetics Corp., New York, which will launch Colors de Benetton in August 1987, the trend is not new, but is gaining favor because of the growing interest in specialty stores.

"Chanel and Hermes have had fragrance in their boutiques for years," says Mr. Grunberg. "It is the easiest and the least expensive way to get your product into a consumer's hand. It is such a fragmented market, anyone has a shot . . . Look at Giorgio."

The sweet success of Giorgio has undoubtedly inspired other retailers to enter the fray. Giorgio, Beverly Hills, rolled out its fragrance two years ago via a heavy direct mail campaign followed by a splashy exclusive launch at Bloomingdale's. Giorgio, now sold through most major outlets, is a $60 million to $65 million brand at retail, controlling a 4.5% share of the market, according to industry consultant Allan G. Mottus, president, Allan Mottus & Associates, New York.

Total fragrance volume rose a paltry 5% to $2.3 billion in 1986, excluding direct mail sales, says Mr. Mottus. The market is saturated, and it takes a behemoth budget to make a dent in it. Successful launches, such as Calvin Klein's Obsession or Christian Dior's Poison, were backed with ad budgets of at least $10 million. Why, then, would retailers want to tangle with the category?

"They have a built-in audience, and they have the key ingredient—distribution," says Diana Temple, VP and financial analyst, Salomon Brothers, New York.

Donna Italiano, editor/special projects director of *Product Marketing*, a New York-based trade publication covering the beauty industry, agrees. "We're finding heightened competition, and the high cost of competition has led retailers to fragrances because they already have a channel of distribution. A retailer who has created a niche in the market can probably create a demand for a fragrance."

Because distribution channels are in place, retailers hope to avert the exorbitant promotional costs associated with fragrance debuts. "The dollars being spent are totally out of control," says Mr. Grunberg. "A great deal of the money is being spent just to get the products into the store."

The Benetton fragrance line won't have that problem. Colors de Benetton will retail between $25 and $60 and will be sold in 600 Benetton units across the country. Mr. Grunberg expects the scent could capture as much as 10% of sales volume. In fact, if each store sold only two bottles a day, the fragrance could soar to a $10 million business.

Although Italy-based Benetton is a recognized label to most Americans, the company is supporting the fragrance with an estimated $4 million in promotional spending. The effort is tied into $6 million of Benetton clothing ads, which will include scent strips. Placement will range from Harper's Bazaar to *Rolling Stone*. Eldorado, Paris, handles the creative; J. Walter Thompson in New York is in charge of media placement.

Mr. Mottus says it is not unusual for cosmetics and fragrance to produce as much as 10% to 12% of total store sales. Benetton is planning its own line of cosmetics, too.

Bijan, the chic men's clothing store with showrooms in New York and Beverly Hills, Calif., already has a men's scent and has plans for a women's offering. Although Virgit Kelley, licensing director for Esprit de Corp., San Francisco, says that no decision has been finalized, retailers expect an Esprit fragrance shortly.

But some companies may find it difficult to get the consumer to identify the fragrance with the image of the retailer, according to Wendy Banks, VP-marketing for Liz Claiborne Cosmetics, New York. "If The Limited came out with a fragrance, would it mean anything to the consumer?" Moreover, industry watchers wonder what will happen when retailers want counter space at the department store.

Benetton's Mr. Grunberg says department and drug stores may be leery of adding retailers' fragrance offerings because it may lead consumers away from their stores into the specialty shops to buy the fragrances. Still, specialty shops are planning to enter drug store chains and fill their shelves with new scents.

A representative of New York-based Bloomingdale's says, "We strive to get what is exclusive and if something is sold a few blocks away, it isn't as important for us." But if there is consumer demand, most retailers would not turn the scent away.

Some merchants think the demand exists. Clifton, N.J.-based Royal Silk, for example, is rolling national with Royal Silk Parfum. Royal Silk—a direct marketer of silk clothing with $50 million in sales in 1985—has sold 15,000 bottles of all its offerings to date via its catalog, which has a distribution of more than 26 million, according to Gerry Pike, VP of the 8-year-old company.

Royal Silk is banking on retailer acceptance based on its brisk catalog sales. The fragrance will continue to be featured as an insert in the catalog. Spending will be minimal, probably under $2 million, industry analysts estimate; advertising is handled in-house.

The trend toward established retailers adding fragrances to standard offerings probably will continue. A small counter display of fragrance takes up little space, yet produces impressive sales. The dollars generated are incremental and the profits—fragrance gross margins, which are over 30%—are attractive.

But, marketers note, this move could significantly alter the complexion of fragrance selling. "Specialty stores are obviously where the customer wants to shop," says Mr. Mottus.

The days of mammoth budgets for fragrance ads could be over if cosmetics and fragrances continue to be sold in specialty store outlets because the identification factor is already in place, says Jack Salzman, VP and senior analyst of Goldman Sachs, New York.

And it is not expected major vendors will team up to create the fragrances. Mr. Grunberg,

Cosmetic beauty is in the eye of the computer

By Sandra Lee Breisch

Elizabeth is the envy of the cosmetics counter. There's no doubt she's good at what she does.

She scans a client's skin to define color and tone. Without applying a touch of makeup, Elizabeth experiments with three different beauty make-overs. She even takes into consideration variables like lighting effects, clothing and jewelry. Elizabeth also is an expert at hair styling.

Elizabeth will do all of the above for $25, which will be refunded if the customer buys what she is selling. And she has been in the business only since August 1984, when she showed up at Macy's cosmetics counter in New York.

But Elizabeth is not an average employee. She's a computer designed for Elizabeth Arden, New York. And as the technology becomes increasingly accessible, more cosmetics companies are introducing similar microchip marvels to compete for counter space.

"The primary objective is to improve the quality of the customer's experience with cosmetics and hair care products," says Fred Scott, Arden's VP-marketing.

Although he would not reveal sales figures, Mr. Scott says: "If you compare its productivity with a lot of other more traditional clinics, makeup artists, promotions—we're looking at four to five times the productivity in total dollars," and purchases that are four to seven times higher than normal.

A dozen units currently touring department stores are given the credit for these increases. Mr. Scott indicates some permanent installations—one in Marshall Field & Co., Chicago—are pending. The cost of the unit is estimated to be $1 million.

Mr. Scott says that the promotional costs are divided between the stores and Arden. "The stores definitely participate in the promotional costs because they regard it as an extremely productive promotional opportunity," he says.

One month after Elizabeth debuted, Arden introduced the Skin Imaging Computer. This machine analyzes the texture and condition of a customer's skin for $15.

Arden tops off its high-tech sales staff with the Hair Analysis Computer, which was created in September 1985 to complement Philip Kingsley's line of hair care products. Both Elizabeth Arden and Philip Kingsley are subsidiaries of Indianapolis-based Eli Lilly & Co.

"We have eight computers," says Mr. Kingsley, and permanent installations are being constructed at Saks Fifth Avenue and Bloomingdale's in New York, Neiman Marcus in Dallas and Nordstrom in Los Angeles. "To produce them now, excluding the [research costs,] it would cost between $12,000 and $15,000," he says.

Mr. Kingsley says the costs are worth it. "The percentage increase is rather extraordinary. I think this year, in many stores, we are up 100%—but on the average we're up 60%. The cost of our products has not increased because of the computer."

Shiseido Cosmetics, a Tokyo-based cosmetics company, is joining the fray with the Makeup Simulator. The simulator is able to give the customer an on-screen make-over, change hair styles from long to short, alter hair texture, and add henna or highlights without physical application of the products to the customer.

Clairol's Color Visions allows a customer to preview four color shades and experiment with complementary makeup.

The $35 cost—applicable toward purchase—includes a facial and make-over. Shiseido also gives the client a before-and-after video printout, which is not available with Elizabeth.

"The average unit sale is $100 or more," says Lorraine Amadeo, Shiseido's national promotions manager. "It's a good service because when you take a product home with you, you know how to use it and why to use it."

The $100,000 simulator was introduced in September 1984, and Shiseido plans to add one more to the three currently in existence. "The company wishes to keep it as a very special event," says Ms. Amadeo. "If you put them all over the place, it becomes old hat."

The modest number of simulators, however, has not hindered sales increases. "During two 10-day promotions Shiseido's sales were in the $50,000 range," says Mari Chihaya, director-pr. The average unit sale during a promotion is about $100 per customer per promotion, according to Ms. Amadeo.

In 1984, Shiseido also created a Replica Skin Diagnosis System. An analyst evaluates a computerized printout and suggests optimal skin care.

"It is impossible to indicate the actual increase of sales on the days when Replica is in the stores," Ms. Chihaya says. "Some stores reported a 40% to 50% increase in sales of makeup and skin care products."

Shiseido, she says, is not providing these services simply to boost sales. "We consider ourselves extending quality products and service. We want to familiarize women with makeup techniques and what it does to their psyche."

A quick way to alter a consumer's psyche is to change her hair color, which Clairol's Color Visions can do in seconds via video. At no cost, a client can preview four color shades and experiment with complementary makeup. "We find the one-on-one consultation is just as important to the consumer as seeing her image on the screen," says Phyllis Klein, Clairol's publicity director. "The consultants are hair-color experts first."

Intermark Corp., a New York-based consulting unit of Howard Marlboro Group, worked closely with Clairol in developing Color Visions and Christy, a touch-screen salon computer. Intermark also devised computers for Pantene and Clarion, Noxell's new line of makeup. Although industry sources wouldn't reveal sales figures, Lili Mahlab, VP-marketing and sales for Intermark, says, "Clairol has not merchandized this system. They weren't really getting hard-core sales statistics."

"We are tracking incidence of use," says Maude Simard, Clairol's group director. "The conversion rate for non-hair coloring users who have gone through the system is approximately 75%."

Pantene's line of haircare products also has a touch-screen interface computer, which Intermark developed. Procter & Gamble, which acquired Pantene in November 1985, did not wish to release any statistics.A promotion for Clarion, Noxell's new makeup line, includes a touch-screen computer, which analyzes the customer's skin, hair and eye color and suggests products. "Our research found the key benefits of the unit were that it attracts attention at retail," says a Noxell executive.

"The No. 1 priority is raising the level of visibility [for the company]," says Dennis Smith, regional sales director, Shiseido, New York. He says that Shiseido doesn't advertise the promotion, but that it is usually advertised by the store, which pays 100% of the costs.

The retailer is also responsible for the in-store promotion, the cost of which "is a negotiable subject, depending on a number of factors [such as ad rates for the market the promo is running in]. We like to share everything [with the stores] on a 50/50 basis," he says.

"The machines cost $200,000, so it's very expensive. We do have three [computers] in the company," says Mr. Smith. "But, if we make the promotion too large, on a national scale, we create some animosity with other stores because some stores will never get a chance to see it. We just can't hit all the markets."

Hector the computer plays the key role in Guerlain's in-store promotion, "Theater Guerlain." The in-store computer promotion was created by Godfrey Rayner, Guerlain's special events and training director, and introduced in April 1986 at Macy's in San Francisco.

Hector, who interviews the customer and then determines the Guerlain scent that fits her personality, has been quite a hit. According to Mr. Rayner, "For a particular week that we do a promotion, we probably do sales increases of about 300%," or about a typical month's worth of sales. And, Mr. Rayner claims, is that after the promotion, "We create sales for the future. It seems that every store we have been in for the last year, there is a 25% to 37% increase in sales."

Mr. Rayner, however, refuses to run a promotion longer than two weeks. "We're talking about [extending the promotion] now, because it has been so successful. But then there's a case of flogging a dead horse."

who left Wayne, N.J.-based American Cyanamid's Jacqueline Cochran Division to assume the post at Benetton, says Benetton preferred to develop its own product rather than approach a company like Cosmair Inc., New York, or Estee Lauder, New York, to be the licenser. He says this way Benetton can maintain control of its product.

Industry watchers do not expect major department store retailers to enter the fray. Bloomingdale's, Saks Fifth Avenue and Neiman-Marcus have sprayed their own concoctions on consumers for years with limited success.

With specialty stores there is a greater interest to promote their fragrance, and they are more willing to hire people to promote their product, according to Mr. Mottus. For example, Benetton hired Mr. Grunberg away from Jacqueline Cochran to help develop Benetton's cosmetics division. "[Retailers] just are not manufacturers and can't try to be," says Mr. Mottus.

Florida ad tax scare

Out-of-state media would pay

By STEVEN W. COLFORD

Florida state officials are planning to tax all advertising coming into the state—including commercials on network TV and ads in national print media.

Such a step, if ultimately approved by the Florida Legislature, would be unprecedented, industry observers say.

Several states, including Illinois and Texas, are considering or expected to consider ad taxes, and Florida's bid to tax ads originating out of state could be copied elsewhere.

"It's frightening," said John O'Toole, exec VP of the American Association of Advertising Agencies. "It clearly would be an onerous burden with one state, but what if this fever spreads to the other 50 states? Then everything will grind to a halt."

The Florida plan would apply the state's proposed 5% sales tax on advertising to ads placed outside the state in such national media as the major broadcast networks and publications such as *Time* and *USA Today*.

The Florida ad-tax fight had been a top-priority item for national ad industry associations even when it was viewed as affecting only advertising placed through Florida-based media and agencies. Now the attempt to apply the tax to national media dramatically raises the stakes.

Jim Francis, Florida's director of tax research, disclosed the broader tax strategy last week. "States that have taxed advertising generally have tried only to tax local media," he said, "because of fear they'd run afoul of federal limitations on ... interstate commerce.

"That is a silly and unsophisticated approach. Just because there's an interstate element shouldn't mean it can't be taxed. All local advertising is fully tax-

Chevy compacts carry full-size media backing

By RAYMOND SERAFIN

WARREN, MICH.—Chevrolet is spending an estimated $35 million in a six-week media blitz for its new Corsica and Beretta compact cars as part of the General Motors division's biggest launch ever.

The media plan highlights include running spots on every NBC prime-time program during the seven days of March 13 to 19, and double gatefolds (front and back cover) in issues of *Car & Driver, Newsweek, Sports Illustrated* and *Time*.

Chevy's schedule on NBC resembles a "vertical roadblock" of spots that Coca-Cola USA ran last week during the network's Thursday prime-time lineup (AA, March 2).

The new compact cars are the first from-the-ground-up products to be produced by General Motors following its massive 1984 reorganization designed to make the No. 1 automaker more market-driven, especially at the division level.

GM sorely needs a product winner, and to get one it will spend big on the

(Continued on Page 98)

Chevrolet's TV spots for its new Beretta feature dissolves between a shark and a Beretta, drawing parallels with the car's sporty, sleek lines. "Discover a new species" the voice-over says as the car emerges from the water. Campbell-Ewald Co. is handling the estimated $35 million campaign.

Last Minute News

Plapler decides agency's future this week

NEW YORK—Larry Plapler, chairman of former People Express Airlines agency Plapler & Associates, says he expects to decide this week on the shop's future. Mr. Plapler, whose former partner, John Russo, left the agency (AA, Feb. 9), said he was trying to link up with one of several agencies, but he would not name them. Plapler's only remaining client is Berkey Marketing Corp., Woodside, N.Y.-based marketer for several photo accessories companies.

Beatrice to sell stock in int'l unit

CHICAGO—Beatrice is planning a public stock offering for its international foods unit by June after having second thoughts about such a move late last year, a company insider said.

Orbis may enter Coke-Paramount venture

LOS ANGELES—Coca-Cola Co. and Paramount this week are expected to add New York-based Orbis Communications to their barter-sales joint venture. A spokesman for Coca-Cola Telecommunications said an agreement hasn't been signed, but sources said the three companies have agreed in principle to join forces and Coca-Cola has scheduled a New York press conference for March 11. Coca-Cola and Paramount originally planned to buy Grey Adver-

PLO coupon clip

Millions of dollars reportedly diverted

By MAUREEN GLABMAN

MIAMI—A coupon misredemption operation being investigated by the U.S. Postal Service allegedly funneled millions of dollars to the Palestine Liberation Organization.

"I doubt that anyone with any information will verify the PLO connection because of an ongoing investigation into that aspect of the case," said Julian Mack, a Dade County assistant state's attorney who helped to prosecute more than 70 local defendants in the coupon scheme.

However, a spokesman for the Hollywood, Fla., police department said many of those involved in the misredemption attended PLO meetings where they waved PLO flags, where PLO flyers were passed out and where PLO letterheads were available.

The misredemption ring's activities were first made public in a U.S. Postal Service "sting" operation in 1986, when coupons for a nonexistent product—Broach insecticide—ran in three Florida newspapers (AA, March 31, 1986). That sting was part of an ongoing national Postal Service investigation called "Operation Clip."

The Hollywood police department became involved through another case it was investigating.

"The letters PLO were chiseled into the floor of a building in Hollywood where a meeting was taking place," said Paul Dungan, a Hollywood police spokesman.

"We weren't able to follow the actual funds, but there is a strong indication that money from illegal operations was going to the PLO."

Mr. Mack said one of the principal figures in the case, Adnan "Tommy" Bahhur, is expected to

Ad, media group starts hard-hitting war on drugs

By STEWART ALTER

NEW YORK—The TV commercial from McCann-Erickson's Detroit office shows a rat dying. As the animal jerks its way to a cruel conclusion, a voiceover says: "Only one drug is so addictive [that] nine out of 10 laboratory rats will use it and use it and use it until dead. It's called cocaine and it can do the same thing to you."

The Media-Advertising Partnership for a Drug-Free America's war on drugs is officially on, and the first ads invoke hard-hitting images of death, dependency, mental and physical destruction and wasted lives.

The much-delayed anti-drug campaign was hailed by the new partnership as the "biggest pro bono advertising drive since the war bond campaign of World War II." It is unlike any other public service effort, the group said, both in scope and approach.

While a typical ad campaign is focused in its message and its target audience, this effort "will be aimed at a variety of demographically and psychographically different groups, and it will have no traditionally single theme, but rather a multiplicity of messages, each hopefully motivating to the group it is intended to reach," said Allen Rosenshine, chairman of Omnicom Group, speaking as chairman of the Partnership's Creative Review Committee.

Beyond the need for the "multiple audience, multiple message requirement," Mr. Rosenshine said, "I believe this is the right approach because 'denormalization' cannot be accomplished by a surgical strike of a single great commercial or even a campaign in the classic sense. 'Denormalization' of attitude and behavior in actual or potential drug usage demands an incessant bombardment from every direction against every stratum of society, every month, every week, every day."

Mr. Rosenshine said that the advertising has been seen by various focus groups to ensure it is relevant and uses the right vernacular. Mr. Rosenshine said this was important because the advertising could have a "counterproductive" effect of reinforcing the value of drugs if the creative did not understand the situation. "We tried not to preach or in any way be arrogant," he said.

Lloyd Johnston, program director of the Institute for Social Research at the University of Michigan, Ann Arbor, and a drug research specialist, observed that marijuana was "portrayed in unrealistic ways" in campaigns in the

(Continued on Page 96)

Scali's creative director departs

SANTA MONICA, CALIF.—Scali, McCabe, Sloves/West's Creative Director Chuck Silverman left the agency last week, following a dispute over the direction of the year-old shop.

Mr. Silverman and President Richard Kelly declined to give specific reasons for the break, but a Scali statement said the split was "by mutual agreement following irreconcilable differences." Bob Needleman, senior VP-associate creative director at Scali in New York, becomes acting creative director.

Mr. Silverman would not disclose future plans, but hinted he may open his own shop. Mr. Silverman's departure follows a similar pattern to his 1985 departure from the now-defunct Fountain Valley office of Cunningham & Walsh. Mr. Silverman left C&W following a dispute with Bill Vogel, then general manager.

With the closure here of fellow Ogilvy Group unit Cole & Weber (AA, Feb. 23), Scali is receiving $9 million in additional billings from Cole clients. The agency also is moving from Santa Monica to Century City's former Cole & Weber offices.

* * *

N W Ayer will merge its Los Angeles office and its Reiser Williams deYong unit under the Ayer umbrella, reliable sources say. John Littlewood, Ayer/Los Angeles president-ceo, acknowledged discussions of a West Coast reorganization were under way, but said he couldn't give specifics. Ayer/L.A. Chairman Bart Stoner will retire, but continue as a consultant to the agency. The move comes on the heels of Reiser Chairman Dick Reiser's departure on March 15 (AA, Mar. 2).

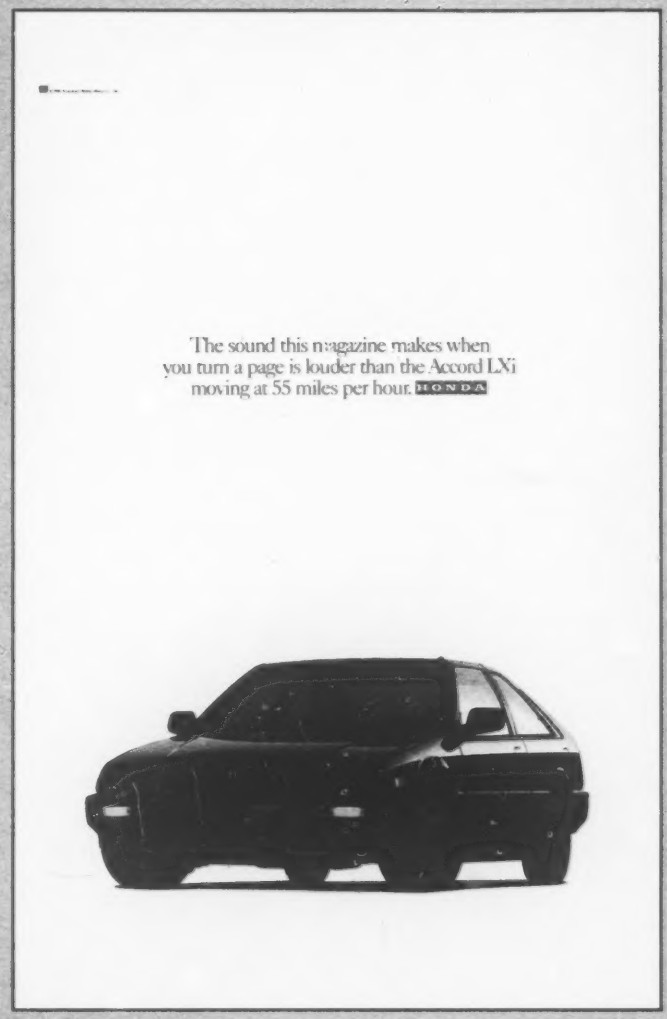
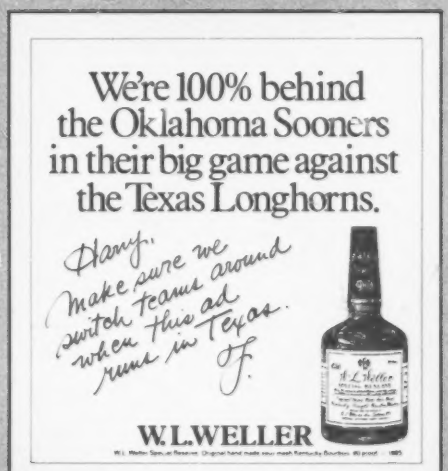
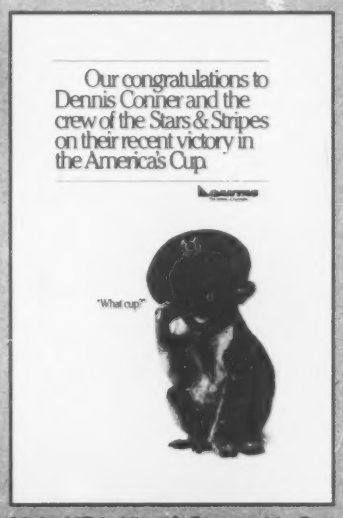
This ad for American Honda Motor Co., via Rubin Postaer & Associates, Los Angeles, borrows a bit from the classic Ogilvy & Mather Rolls-Royce ad from 1958 that stated, "At 60 miles an hour the loudest noise in this new Rolls-Royce comes from the electric clock." The idea also works well now. Creative director: Larry Postaer; art director: Gary Yoshida; copywriter: Bob Coburn; photographer: Lamb & Hall.



You have to read the scribble to get the point of this ad for W.L. Weller Special Reserve Bourbon via Smith/-Greenland Advertising, New York, which pokes fun at sports event tie-in advertising. Creative director and copywriter: Murray Klein; art director: Ared Spendjian.



This ad for Warner-Lambert Co.'s Schick division, via J. Walter Thompson USA, New York, uses a good mix of color, headline and graphic to push a product not normally seen in newspapers. Creative directors: Lee Kovel, Len Fink; art director: John Butler; copywriter: Randi Glatzer; photography: Callor-Resnick Studio.



Mojo MDA-Allen & Dorward in San Francisco informs us that a stock photo was used to put together this ad, which, while backhandedly saluting the crew of Stars & Stripes for winning the America's Cup, gets the message across for client Qantas Airlines. Creative director: Bob Hoffman; art director: John Coll; copywriter: Guy Bommarito.

Best of Press selections are made by a committee of three: Hank Simons, vp-creative director of the Newspaper Advertising Bureau; James Dunaway, vp-information at NAB, and William F. Gloede, Ad Age newspaper industry reporter. National System Inc., St. Louis, provides tear sheets to the Newspaper Advertising Bureau for much of this work.

FLASH REPORT: Newspaper advertising investment for December

December 1986	IN 100 THOUSANDS IN MILLIONS	DOLLARS		CHANGE	
CATEGORIES	YEAR	1986	1985	ACTUAL $ G OR L	% G OR L
Amusements	1986 / 1985	$35,261,655	$33,726,570	+1,535,085	+4.6

This Flash Report of newspaper advertiser investments, compiled for ADVERTISING AGE by Media Records, is derived from tabulations that cover 29 dailies and 23 Sunday editions in 15 cities: Atlanta, Baltimore, Boston, Cincinnati, Chicago, Cleveland, Dallas, Denver, Detroit, Los Angeles, New York, Philadelphia, San Francisco, Washington and Youngstown. #

Source: Media Records Inc.

Ad spending slides 3.7%

NEW YORK—Advertiser spending in major-market daily newspapers fell 3.7% to $380.5 million in December 1986 from year-before levels, according to the Flash Report of newspaper advertising Investments prepared by Media Records Inc. here.

Department stores led the falloff with an 8.5% cutback of more than $12.4 million to $132.8 million. General-merchandise stores also cut spending by 7.5% to $65.6 million. The computer categories were off, with the retail category, computer stores and supplies, off 2.7% to $8.6 million, and the national category, computers, equipment and services, off 54.3% to roughly $3 million. Cigarette spending, which had declines through most of 1986, was off 77.5% to $1.9 million.

The losses were partially offset by big gains in spending by food stores, which pumped 17.2% more into the measured dailies this December than they did a year ago for a total of $37.6 million. New passenger-car spending was up 29.5% to $21.8 million; airlines were up 21.9% to $9.8 million; amusements were up 4.6% to $35.3 million; and public service utilities and commissions were up 36.3% to $9 million.

The FLASH REPORT is based on SAU inch measurements in 29 daily and 23 Sunday newspapers in 15 major markets.#

Special Report

Mary Flack

Industry racks up new ideas to build circulation

By Julie Liesse Erickson

Mailboxes are filled with cut-rate subscription offers. Daytime television is riddled with ads offering cameras and keychains with paid subscriptions. Newsstands are showcases for celebrities, placed on magazine covers to catch the eye of the fickle browser.

With ad revenues flat, ad pages down and traditional advertiser categories grappling with problems of their own, it's no surprise that circulation has become a focal point for the magazine industry.

In the past five years, circulation has risen from 45% to 50% of magazine revenues, which rose 3.3% to $5.12 billion in 1986, according to the Publishers Information Bureau, New York.

But this increasingly important revenue source suffers from continuing declines in single-copy sales.

Thirty years ago, the U.S. was a nation of newsstand shoppers. In 1956 single-copy sales accounted for 40% of total magazine circulation. Last year, however, single-copy sales contributed only 23.5% of the 325.5 million circulation of Audit Bureau of Circulations' 481 audited magazines.

The volume of newsstand circulation also has declined every year since 1980, when it totaled 93.9 million for 406 ABC-audited titles. In 1986 the number stood at 76.5 million.

Ruth Shields, magazine group circulation director for Time Inc., New York, says three factors are primarily responsible for the newsstand sales slump. First, the average consumer is making fewer trips to the supermarket. There he is confronted by a huge choice of magazines, a selection from 2,500 active U.S. titles, according to

(Continued on Page S-20)

Unless noted, all circulation figures listed in this report are total circulation averages for the six months ended Dec. 31, 1986, as reported in Audit Bureau of Circulations' FAS-FAX.

Single-copy slice gets slimmer

Single-copy magazine sales vs. subscriptions

Circulation

(Continued from Page S-1)
the Periodicals Institute, Fairfield, N.J., an association funded by the magazine and paperback book industries.

Finally, Ms. Shields says, "Magazines have priced themselves on the newsstand aggressively [high]. We need to let other grocery store products catch up with us."

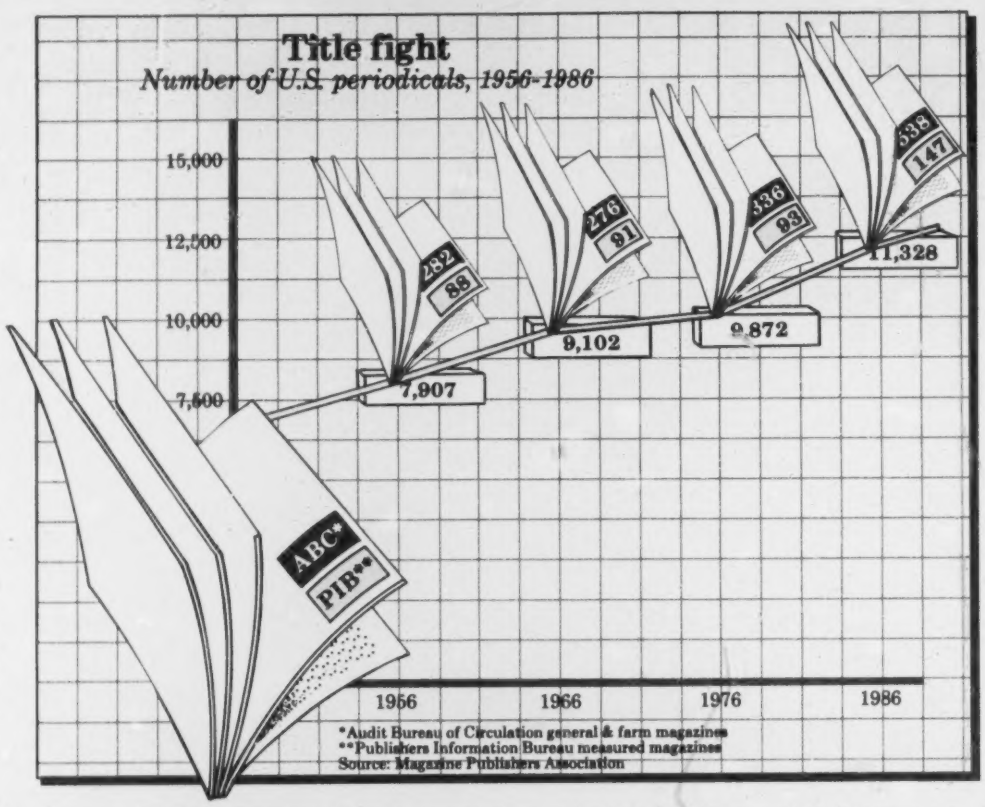
High cover prices make subscription packages, which often include extra gifts, attractive by comparison. "People realize that it's a better deal to subscribe," says Dan Pipp, newsstand circulation manager for Meredith Corp., Des Moines, Iowa. "That's become a sore point among wholesalers. They object to deals that almost mock people who buy magazines at relatively high newsstand prices."

Although newsstand sales have declined, total magazine circulation has risen regularly for the past 10 years—meaning that publishers have become increasingly dependent upon expensively maintained subscriber lists.

According to the Magazine Publishers Association, New York, circulation expenses accounted for 26.8% of a magazine's total costs in 1985, and subscription expenses—postage, direct mail, TV advertising and other promotions—consume the lion's share of that budget.

Some magazines have made only a minimal effort to sign up subscribers. At CBS Magazines' *Woman's Day*, New York, being circulated primarily on newsstands gives the publication an advantage with advertisers, says Publisher Anne Sutherland Fuchs.

"Instead of an annual purchasing decision, which allows the reader to get the magazine every month whether or not she reads it, we are asking her to make that decision every month," she says. "Plus, subscriptions don't make money until the renewal of the renewal."



But even for those magazines sold mostly by subscription, Ms. Shields says, "The newsstand is a good place to bring in new customers and to get feedback on what consumers are interested in in terms of covers and stories."

To generate newsstand interest, publishers are appealing not only to consumers—through TV ads, eye-catching covers, provocative cover language—but also to retailers.

"We desperately need better promotion and merchandising at the retail level," says Jack Fitzmaurice, president of the Periodicals Institute. "Every title is battling for space; there's no way that 2,500 magazines all are getting on the grocery store racks," he says.

Mr. Fitzmaurice believes magazines need to provide retailers with available data that will help them decide how much space to devote to magazines and which titles to carry.

The MPA also is completing a $600,000 study designed to demonstrate magazines' profitability to retailers in terms they understand. A hot acronym in the supermarket business is DPP, or direct product profit. It measures retailer profit after all costs, including transportation, warehousing and in-store labor, are subtracted. The new MPA study compares magazines' DPP with that of other grocery items.

Although the MPA is waiting for final results, the preliminary numbers are "wonderful for magazines," says Jerry Ward, chairman of the association's magazine retail task force and publisher of the *Better Homes and Gardens* special-interest publications at Meredith Corp. At supermarkets, he says, magazines rank among the most profitable products, along with cigarettes, in both DPP and DPP per square foot of shelf space—largely because retailers pay no warehousing or transportation costs.

The MPA committee is preparing to present the study results to retailers around the country. "The study puts us in a great position to improve our retail presence," says Mr. Ward, who supervises 20 newsstand-only titles at Meredith. "It's been frustrating—and very scary—to a lot of us in the industry to see so much space devoted to, for example, videocassette rentals and greeting cards."

Circulation executives also are examining retail promotions designed to increase single-copy sales. Late last year, Meredith's *Better Homes and Gardens*, in conjunction with the Periodicals Institute and Select Magazines, a New York-based national distributor, conducted a buy-one, get-one-free test in 17 supermarkets serviced by Valley Distributors, Norristown, Pa. Consumers were offered a free copy of the November issue of *Better Homes and Gardens* when purchasing the December issue.

Sales in control stores were up 33% over the chain's average *Better Homes* sales for the rest of the year. In stores using only a sign to promote the offer, sales rose 68%, while in supermarkets featuring the magazines in a separate cardboard display, sales were up 186%.

Aside from boosting purchases, this offer allows publishers to salvage expired issues. The industry's rule of thumb is that 50% of all newsstand copies are returned to wholesalers and eventually shredded.

But Mr. Pipp says he has reservations about the test. First, the current setup would have to be changed to allow issues to move back and forth through the wholesale system. Second, although it approved the research, the ABC has not indicated whether it would count these sales as paid circulation. "But the big question," Mr. Pipp says, "is whether the retailer would be willing to commit this kind of space."

Still, Mr. Fitzmaurice is delighted with the test's results. The Periodicals Institute is working on other promotions, including an in-store coupon, tested successfully in 1986, offering a 20% discount on any magazine. He also would like to research the value of advertising contained in magazines; his hypothesis is that each magazine, through ads and coupons contained in it, helps to sell at least one other product.

Magazine executives say these efforts are overdue. "We're working closely on the MPA's study, and trying more conventional promotions, such as couponing, that traditionally are associated with package goods," Ms. Shields says. "I think we can do a lot more in that area."

Premium use

(Continued from Page S-6)
culation through premium offers rather than "enjoying natural levels of circulation through healthy promotions"—reduced-rate subscriptions, for example. He says the spreading use of premiums with renewals moves publishers into "a vicious spiral" of additional use.

Mr. Hall sees circulation expenses rising as more subscriptions include premiums.

He argues that this makes magazines more dependent on boosting advertising revenues in a flat ad market. "You're mortgaging yourself," he warns.

What do the advertisers think? Bernard Stolbof, VP at House of Seagram Media, New York, prefers that readers buy publications for quality rather than "artificial" inducements, although he does consider editorial premiums "more natural." House of Seagram spent $29.7 million in magazine buys in 1985, according to Leading National Advertisers.

Magazine executives divide into two camps when predicting the future of premium use.

Dick Leventer, director of circulation promotion for Hearst Magazines, New York, foresees less of it.

"In premiums, your first four ideas get better, then you run out of easy things to do and have trouble getting a good one," he observes. "People will discover premiums can give you more trouble than they're worth; their costs, and their unpredictable response detract from creativity and renewability."

Changes in publishers' and advertisers' attitudes toward circulation also could lessen premium use. Mr. Drexler believes publishers in the future will accept lower, but more profitable, circulation levels. "We don't see reduction as a sign of weakness," he says.

For publishers that eschew premiums, the purity of their circulation already has become a sales point. Stephen Nicoll, ad director of New York-based *Forbes*, says, "We're not concerned about what others do. They can have the non-influential readers.

"The readers we want aren't going to fall for a radio or a clock," he says.

Time Inc. puts video premiums on cutting edge

After joining *Sports Illustrated* as circulation director in 1985, Lindsay Valk witnessed a continuing evolution in the magazine's premiums and direct-response TV advertising. "We've gotten more sophisticated in our approach, in what sells on TV and the use of premiums," says Mr. Valk, recently named circulation director of *People*.

Like other Time Inc. magazines, *Sports Illustrated*, New York, first promoted some of its special annual issues as editorial premiums available with subscription offers.

After that first batch of editorial premiums, *SI* moved to what Mr. Valk terms second and now third-generation premiums. The second wave included soft goods like T-shirts and windbreakers, then hard goods: cameras, radios, binoculars. Direct mail marketing for the first half of 1987 offers the *SI* football telephone, a football-shaped device that rests on a tee.

The latest wrinkle combines editorial and non-editorial features. With the debut of "Football Follies" in the second half of 1986, videocassettes on sports themes became the magazine's main, or "control," premium. The videocassette theme continues for the first half of this year with "NFL Crunch Course," featuring top defensive plays and players.

Mr. Valk considers videocassettes the cutting edge of premium use at Time Inc., a leader in the field. He likes them because they pull together benefits other premiums lack. For one thing, vcr ownership usually connotes attractive demographics. Also, the topics tie into the magazine's editorial. Finally, the cassettes are "renewable"; that is, different sports topics can be covered within the same type of premium. When one cassette loses its pulling power, *SI* can simply switch subjects.

Sidelights

MAGAZINES

Welcome to the premiums bizarre

Premiums come and premiums go. Dick Leventer has seen 'em all. "Steak knives used to be the world's best premium," recalls the former merchandise-by-mail maven, who now works as Hearst Magazines' director of circulation promotion. But knives didn't last, he says, and neither did watchbands or shower radios.

Although bizarre premiums rarely click as well as standards—telephones or cameras, for instance—because they lack broad appeal, magazines occasionally conduct small experiments with expensive or offbeat items. Several years ago, *U.S News & World Report*, Washington, tested a TV set offer in a mailing of 125. An official was reluctant to discuss the matter except to describe the test as "minuscule."

Special-interest magazines *can* offer focused, specialized premiums. Rodale Press, Emmaus, Pa., for example, finds that tomato seeds yield a stronger renewal rate among *Rodale's Organic Gardening* subscribers. Readers also have been offered soil test kits and gardener's kneeling pads, albeit with less success. Bob Kaslik, Rodale's corporate circulation director, laments, "I thought the kneeling pad would work better than it did. It was my idea."

Mother Jones, San Francisco, kicked up quite a stir—and response—with its trademarked Official Ronald Reagan Door Mat. The left-wing magazine, which previously had used only editorial premiums, wanted an unusual offer for its 10th anniversary sweepstakes, says David Assmann, circulation director.

Mother Jones tested the doormat twice, in mailings to 10,000 and then 100,000 consumers. Promotional materials declared, "Transform wiping your feet into a political statement—and a cathartic experience—with this indispensable household accessory."

Since December 1985, the premium has attracted 60,000 new subscribers and led to 20,000 renewals, according to Mr. Assmann; the magazine has a total circulation of 176,342, more than 90% of which are subscription copies. Given the big response, *Mother Jones* probably will continue the offer through the rest of President Reagan's term.

—Van Wallach

'TV Guide' aims for sharper image

There's Judy, the operator for *Time* magazine, and Woody Allen's friend Tony Roberts, pitching for *U.S. News & World Report*. But a recent star among the familiar faces appearing in TV ads for magazines never shows his face.

Mal Sharpe is the man behind the microphone for *TV Guide*. His series of nine variable-length spots, featuring unrehearsed, man-on-the-street interviews with *TV Guide* readers, do exactly what the magazine wants. "Everyone knows *TV Guide*," says Fred Jervis, promotion director. "We wanted to demonstrate what the magazine means to its readers."

Man on the Street Productions, Berkeley, Calif., specializes in exactly that kind of approach, says Mr. Sharpe, a comedian who has been conducting interview commercials for about 15 years. On radio currently in spots for AT&T's long distance service and Hilton Hotel Corp., Mr. Sharpe found his approach surprisingly transferable to television.

"TV has always been uptight," he says. "And radio has always been totally loose. That's why I tend to work more in radio. But what *TV Guide* wanted was to show people being warm, relaxed, funny and saying nice things about the magazine. It was designed to be a departure from the traditional scripted, stiff testimonial."

Mr. Sharpe took his microphone, a single camera and a small crew to local shopping centers, and stopped customers who had been spotted buying *TV Guide*. During a two-day shoot, he interviewed more than 80 customers of the weekly magazine.

"Frankly, I was surprised by the people who bought the publication. I was expecting, well, you know . . . people who looked like they sat in front of their TV all day. What we got was a wide cross section of people, including attorneys, executives and yuppies of all sorts, talking about their relationship with *TV Guide*. They said all sorts of positive things about the magazine that no copywriter would ever write."

Mal Sharpe and the tools of his trade.

The ads feature a man who says he takes the magazine into the bathtub with him, another reader who claims it's the best magazine in America and still another who counts reading *TV Guide* as part of the Bill of Rights.

"All I'm trying to do," Mr. Sharpe says, "is evoke some humor and some honesty from people."

—Len Strazewski

Mailer looks inside new 'Soviet Life'

A window on the envelope displays a "special savings token" for new subscribers. Included is a punchy letter, with the obligatory "handwitten" P.S.: "If you subscribe now you'll also receive free our big 30th Anniversary Special Issue!" But this is not a typical Madison Ave. mailer.

The letter is signed by Yuri B. Savenkov. The letterhead reads, "*Soviet Life*, 4 Zubovsky Blvd., Moscow, USSR."

Is this *Soviet Life* circulation drive the latest move by the newly marketing-conscious Soviet government? "Oh Lord no, we've worked on and off for them since 1966," says Tony Arau, president of A&R Group, Wayne, N.J., *Soviet Life's* marketing consultant until early this year.

The current mailer first was used in 1983. *Soviet Life's* publisher, the Soviet Embassy in Washington, periodically mounts campaigns to keep circulation at the legal limit of 62,000—52,000 subscriptions and 10,000 single-copy sales.

Mr. Arau looks for subscribers among "serious readers, interested in world affairs and politics, and foreign travel . . . not necessarily left-wingers."

The mailer itself is apolitical—no Lenin's tomb and only one picture of tractors. Mr. Arau says response rates rise during crises.

With the help of the U.S. Information Agency, Soviet Life has upgraded and added color to its look. Although Mr. Arau boasts of "a less heavy-handed, less propagandistic" tone, a recent issue offered "Excerpts from Mikhail Gorbachev's Report at the Plenary Meeting of the CPSU Central Committee."

—Van Wallach

In ego battle, 'GQ' plays trump card

Celebrity egos occasionally work to a magazine's fiscal advantage. According to *Gentlemen's Quarterly* Editor Art Cooper, real-estate magnate Donald Trump despised his *GQ* cover story, so he bought all the issues in the lobby of Manhattan's Trump Tower.

Immediately, the Conde Nast Publications monthly gleefully replenished the supply. Mr. Trump responded by snapping up the second batch. The game lasted several rounds, with *GQ* capitalizing on Mr. Trump's disdain all the while.

"I thought, 'Hey, we really have something going here,' " Mr. Cooper recalls. "I figured we could have had our all-time best-selling issue if he kept it up."

—Debra Kent

Associate editor Julie Liesse Erickson coordinated this report on Magazines.

Coming

Next week Advertising Age's Special Report will focus on **Marketing to the Affluent.**

"To raise your rate base and sell subscriptions with premiums is detrimental to the reliability of what we're selling to advertisers. We should be selling a subscriber who is interested in what's printed in our pages. I think that it totally diminishes our value and credibility when we sell with anything other than our publication."

FSIs favored by marketers as product coupons multiply

By LAURIE FREEMAN

Package-goods marketers increased their coupon usage 18.5% in 1986 and relied more heavily on free standing inserts to deliver those coupons. But the percentage of coupons redeemed remained flat.

More than 208 billion coupons were distributed last year through inserts, print advertising and direct mail, according to Summary Scan, a Chicago-based division of the Advertising Checking Bureau. Of that total, 8.75 billion coupons (4.2%) were redeemed at a cost (face value plus 10¢ handling fee) to package-goods manufacturers of $4.2 billion.

The number of coupons misredeemed by consumers purchasing the wrong product, or by syndicated coupon rings, remained fairly constant. Coupon industry sources say 10% to 15% of all coupons distributed in 1985 and 1986 were misredeemed.

Free standing coupon insert companies, like Quad Graphics and Product Movers, are continuing efforts to block coupon fraud by placing FSIs in subscription-only copies of Sunday newspapers.

The 1986 numbers represent an 18.5% increase over the 175.5 billion coupons distributed the previous year, and a slight increase over 1985's 3.9% redemption rate (at a cost of $3.01 billion).

Comparable data from A.C. Nielsen Co.'s Manufacturers Coupon Control Center in Clinton, Iowa, show a lower but still substantial growth rate. MCCC puts the 1986 coupon total at 202.6 billion, up 12.6% from 179.8 billion coupons in 1985. Redemption rate for both years was 3.6%.

Different tracking methods account for the discrepancies. Summary Scan uses numbers from 22 measured markets to make national projections. MCCC gets its data directly from manufacturers that use its clearinghouse services.

Beyond increases in the sheer number of coupons, the greatest changes have come in the form of distribution.

According to Summary Scan data, FSIs carried 80% of the coupons distributed in 1986, compared with a 53.1% share the previous year.

The increase in FSI usage came at the expense of every other delivery medium. Hurt most, according to Summary Scan data, were magazines, whose share of total coupons delivered dropped to 5% in 1986 from 26.1% the previous year. Daily newspapers' "Best Food Day" sections' share dipped to 10% from 12.1%; newspapers' Sunday magazines and comics sections dropped to 1% from 4.6%.

The least affected was direct mail, which accounted for 4% of coupons in 1986, compared with 4.1% the previous year.

MCCC's numbers show similar, if less dramatic, changes.

Its data have FSIs' share at 68.8% in 1986, compared with 59.9% the previous year. Magazines' share dipped to 6.5% from 8.6% in 1985; newspaper run-of-press dropped to 7.4% from 12.2%; newspaper co-op advertising carried 7.1%, down from 8%; Sunday supplements carried 1.2%, down from 2.1%; and direct mail was down slightly to 4% from 4.4%.

MCCC numbers also include on-pack/in-pack coupons, which it shows increasing to 5.8% of coupons delivered from 4.8% in 1985.

An MCCC spokesman said FSI use has increased because "it's the most economical way for manufacturers to get their coupons to consumers. Until a few years ago, FSIs were only eight pages in length. Now they can be 30 or more pages, and more manufacturers are taking advantage of the expanded format."

A spokeswoman for the Magazine Publishers Association, New York, said a decline in use of magazines for coupon delivery does not necessarily mean a decline in ad pages. Coupon inserts are counted as regular ad pages, she said.

Several major package-goods marketers, including Bristol-Myers, Colgate-Palmolive Co. and General Foods Corp., have expressed their determination to stabilize, if not decrease, their usage of coupons. But Summary Scan director Kermit Myers expects continued growth.

"All the manufacturers claim they're cutting back, but I think it's wishful thinking for the most part," said Mr. Myers. "If the pace continues like [1986], we may see as much as a 20% increase this year. But if they adhere to their desire to cut back, there may be only a 5%-to-10% increase."

However, consumers' perception that manufacturers raise prices to cover the companies' rising promotional costs is one reason redemption rates are fairly low and flat, Mr. Myers said.

According to Summary Scan's data, health & beauty aids marketers surpassed the 17 other major product categories by dropping 38.8 billion coupons and spending $823 million on redemptions.

"This is an extremely competitive category, with a lot of brands that don't have many significant differences between them," one industry source said in explaining the numbers.

The prepared-foods category came in second, accounting for 20.7 billion coupons last year. Close behind were marketers of frozen/refrigerated products, which distributed 19.6 billion coupons in 1986. These three categories issued more coupons in 1986 than were distributed by all marketers 10 years ago, Mr. Myers said.

"No one anticipated this phenomenal and seemingly uncontrollable growth," he said. "As recently as four years ago, there might have been 500 products in a store with coupons, rebates, contests or other special offers. Now, there are 2,000. Virtually every single product has some kind of special offer during the year."#

Coupon usage

Americans were showered with 208 billion coupons in 1986, 18.5% more than during the previous year. Yet only 4.2% of those coupons actually were redeemed. Health and beauty aid marketers continue to be the most active users of coupons.

Magazine ads better received

By VERNE GAY

New York—About one-fourth of the population finds magazine advertising more believable than TV advertising, according to a new study from the Magazine Publishers Association.

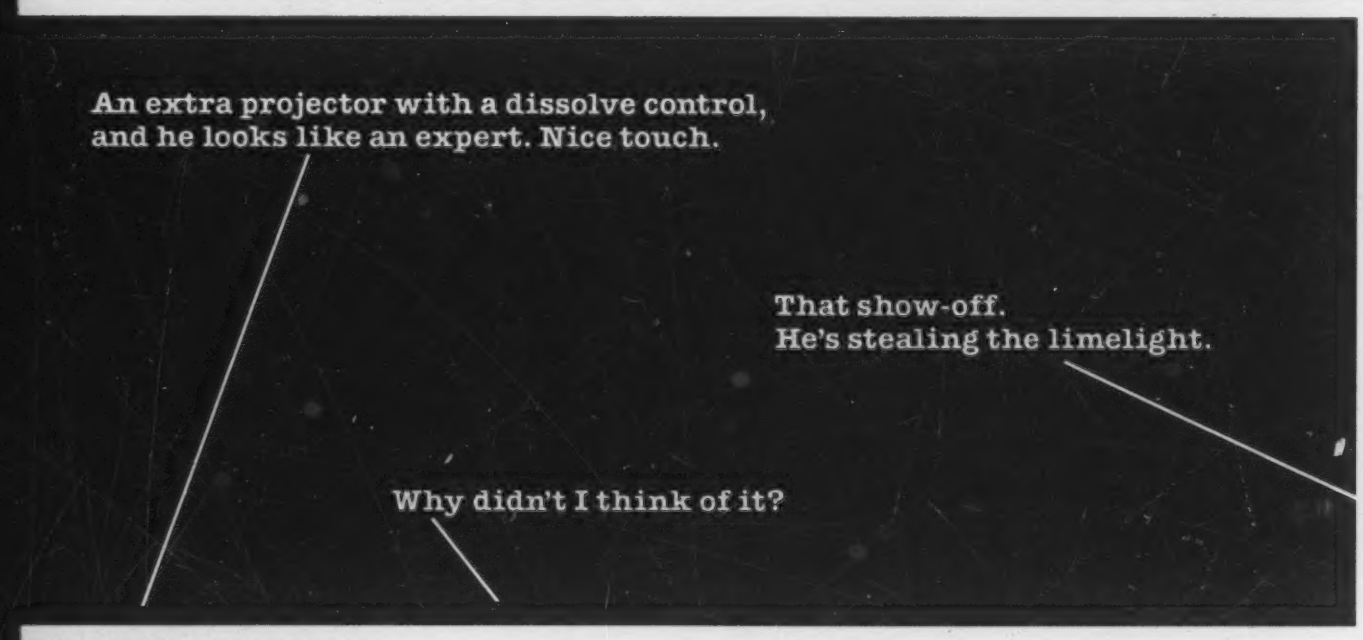
The study of 2,000 adults, conducted last November by Audits & Surveys, reported 21% of men and 26% of women rated magazine advertising more "appealing," "informative" and "believable" than TV advertising.

It also found that 75% of the men and 96% of the women considered TV advertising usually more "annoying," "irritating," "misleading," "silly," "boring," "monotonous," "confusing," "juvenile," "in bad taste" and "offensive" than magazine ads.

When informed of the study, Roger Rice, president of the Television Bureau of Advertising, said the results conflict with a study conducted by R.H. Bruskin & Associates last year. In the Bruskin survey, 57% of the respondents found TV "more authoritative," and 9% found magazines more so, Mr. Rice said.

The MPA study, the fifth in a series, also concluded:

- Magazines contribute most to consumers' personal knowledge about subjects including automobiles, beauty and grooming, careers, culture, entertaining, food, health, hobbies and self-improvement.
- When asked which medium best fits personal needs, 46% of the men and 50% of the women said magazines, with TV a distant runner-up.
- Working women were 30% more likely than women not employed outside the home to turn to magazines for information on finance, 29% more likely for health information and 16% more likely for automobile information.#



An extra projector with a dissolve control,
and he looks like an expert. Nice touch.
That show-off.
He's stealing the limelight.
Why didn't I think of it?

Diller's dream to debut on April 5

By CRAIG REISS and WAYNE WALLEY

Barry Diller has been obsessed with the idea of running a fourth TV network for more than a decade. On April 5, the waiting ends for Mr. Diller, and an odyssey begins that could change the nature of the TV business.

Mr. Diller, 44, is chairman-ceo of Fox Inc., the U.S. entertainment subsidiary of Rupert Murdoch's News Corp. And in three weeks Mr. Diller's Fox Broadcasting unit begins the gradual rollout of a two-nights-a-week schedule of original prime-time programming.

The shows it will serve to its own and its affiliated independent TV stations will be produced by the same top creative talent that supplies the Big 3 networks, and Fox will be paying network-level prices for them.

More than 100 stations have signed with Fox. And a long list of blue-chip advertisers have lined up for time on the Fox "network": American Motors Corp.; Anheuser-Busch Cos.; Bristol-Myers Co.; Clorox Co.; Colgate-Palmolive Co.; E. & J. Gallo Winery; General Foods Corp.; General Mills; Helene Curtis Industries; Johnson & Johnson; Kentucky Fried Chicken; Kraft Inc.; Levi Strauss & Co.; International Playtex; Sears, Roebuck & Co.; Stroh

Credit-card war looms

MasterCard, Visa face Optima threat

By PATRICIA WINTERS

MasterCard and Visa plan to defend themselves vigorously against American Express Co.'s new Optima card, despite AmEx's claim that it won't be competing with the bank cards.

"If you believe [AmEx], I've got a nice bridge with a toll booth that I'd like to sell you," Visa International President Charles Russell said in a prepared statement issued by his San Francisco office.

New York-based AmEx last week disclosed its long-rumored new credit card, which will be offered only to the holders of its green and platinum charge cards.

Optima will charge interest rates based on a multiple of the prime rate, which means initially around 13.5%. That is about five percentage points lower than the average interest rate for Visa and MasterCard.

Visa intends to send letters to all

Last Minute News

Ketchum to buy Mandabach agency

PITTSBURGH—Ketchum Communications has agreed to acquire Chicago-based Mandabach & Simms, sources say. M&S' billings are estimated at $50 million. Ketchum earlier said it was negotiating acquisitions in Chicago and New York (AA, Feb. 23).

Helene Curtis plans $40M introduction

CHICAGO—Helene Curtis will spend $40 million on introductory marketing for its Salon Selectives haircare line (AA, Dec. 8). A $14 million media budget includes network TV and print ads in women's fashion and beauty magazines, breaking in May. The first of six planned promotional events uses $1-off coupons. DFS Dorland Worldwide, New York, is believed to handle the account.

Mrs. Fields' to buy PepsiCo unit

MILL VALLEY, CALIF.—PepsiCo has reached a preliminary agreement to sell its La Petite Boulangerie bakery chain to Mrs. Fields'

Wary NBC mulls upfront limit

People meters breed caution

By VERNE GAY

NEW YORK—NBC-TV is considering limiting by hundreds of millions of dollars its advance—or upfront—commercial inventory for the 1987-88 season, according to top-level industry sources.

By limiting early sales, the No. 1-rated network could reduce advertiser pay-backs, or makegoods, anticipated under the new people-meter audience measurement system.

In tests, people-meter audience levels for critical viewer demographics have been lower than levels reported by the traditional A.C. Nielsen Co. diaries.

If network TV advertisers secure upfront buys with guarantees based on the people-meter results, each of the Big 3 TV networks could face huge pay-backs to them next year. With an upfront limit, NBC could avoid the problem, say sources, and then wait for the "scatter"—or short-term—sales market to sell the balance of its advertising time.

Unlike upfront deals, scatter sales do not carry audience guarantees.

Restricting the amount of upfront inventory, especially at highly rated NBC, also could mean demand would outstrip supply, thus firming up network prices.

An NBC source who declined to be identified confirmed this was one of several strategies under consideration. He said the network had not set a policy, however.

NBC booked more than $1 billion of the $2.4 billion upfront market last year.

Another network executive said, "Everyone's doing a model that shows if we write more business our vulnerability will be 'X' and if we write less it will be 'Y.' You've got to pick your poison: Either hold out for scatter or guarantee on a big upfront. But scatter has been pretty friendly lately."

Any strategy to hold back upfront sales would have profound implications for the networks. Victory in the upfront selling period has become a tradition almost as sacred as winning the ratings crown—but far more important financially. A strong upfront also sends signals to senior management and Wall Street about the network's strength in the coming year.

CBS limited upfront sales four years ago, hoping a strong scatter market would materialize. But it did not.

Some agency TV buyers doubt that NBC or any network would limit sales. "Let's say next year they limit sales to $700 million," said one major buyer. "They'd have to have a hell of a lot of data and a hell of a rationale to show [parent] General Electric that they could make [in scatter] in excess of the missing $300 million."

Another buyer agreed: "There is strong

(Continued on Page 86)

Highlights

Diller's network 1
Barry Diller has been obsessed with the idea of running a fourth TV network for more than a decade. On April 5, his waiting ends, and an odyssey begins that could change the nature of the TV business. Mr. Diller's Fox Broadcasting unit gradually will roll out two-nights-a-week of original prime-time programming.

Chrysler bids for AMC 3
Chrysler Corp.'s bid to acquire American Motors Corp. would give Chrysler a global presence less than a decade after the company sold most of its international assets. But it also raises the question of whether Chrysler will continue employing AMC's ad agency, Saatchi & Saatchi Compton.

Cascading novelties 3
Frozen-novelty marketers are readying an avalanche of new products that will mean dramatic increases in category ad spending and headaches for retailers with already overstuffed freezers.

All-Star ballot sponsors 4
Chevrolet, Rawlings Sporting Goods and Gannett Co.'s *USA Today* are ready to play ball. As part of Major League Baseball's corporate sponsorship strategy for the 1987 season, these companies are linking up for a major sweepstakes promotion of fan balloting for the All-Star Game.

Jake's ads draw criticism 6
The Juvenile Diabetes Association has joined Coca-Cola USA in complaining about Jake's diet cola advertising running in three test markets. The group's concern centers on the cola's description as a diet product, because it contains sugar and 30 calories per 12-ounce can.

Reebok's stepping-stone 12
Reebok and Nike, the country's leading athletic-shoe marketers, are stepping up the pace. Reebok, the No. 1 sports-shoe marketer, last week paid $180 million to purchase fast-growing rival Avia Group International. Meanwhile, No. 2 Nike kicked off an estimated $7 million, yearlong campaign built around the original Beatles recording of "Revolution."

Black & Decker retools 34
Black & Decker has decided to refocus its attention on what were once its best-known products—power tools. The company has hired Leo Burnett USA, Chicago, to handle the $10 million job of getting consumers buzzing again about its drills, cordless power tools and lawncare products.

Gerber's reinforcements 36
Gerber Products Co. has hired an agency to target black consumers and is taking other steps to maintain its sales leadership in the baby-food market, despite an anticipated drop in births in the 1990s. These actions come at a good time, because Europe's leading baby-foot marketer, Milupa AG of West Germany, is entering the market long dominated by Gerber.

INTERNATIONAL

Canada's version of Campbell 56
Unlike Campbell Soup Co.'s other subsidiaries, its Canadian operation is 30% owned by local shareholders. The results have been so positive the company may start using the same ownership formula in other countries if the conditions are right.

Looking at U.S. media 56
In editorials, Canadian media are calling for protection from U.S. publications, which they look upon as predators hungry for their advertising revenues. But that hasn't stopped the Canadians from moving south of the border, signing deals to buy the media properties they claim threaten their existence.

OTHER NEWS

John Koehler, who was asked to resign as White House communications director after serving two weeks, had planned to revive the ailing Reagan presidency with TV and print ads starring the Great Communicator. Page 3.

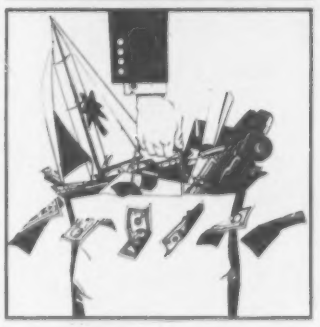
Norelco's first assignment for its new agency, D'Arcy Masius Benton & Bowles, will be to shore up its beleaguered electric-shaver brands. Long the leader with more than 50% of the estimated $280 million electric razor market, Norelco faces increasingly strong challenges from Gillette Co.'s Braun division and Victor Kiam's Remington Products, among others. Page 39.

Bags of money are being spent to promote Dino De Laurentiis' new movie "Million Dollar Mystery"—trash bags, that is. First Brands' Glad Bags division agreed to spend $15 million on advertising, including $1 million in cash, for the film, starring Glad spokesman Tom Bosley, which is scheduled for release June 10. Page 40.

Christopher Skase, 38, an upstart Australian media baron, has acquired the Hal Roach name and film library as the foundation for what he hopes will become a $1 billion U.S. broadcasting and TV production empire. Page 72.

Stan Freberg, the veteran adman who wrote the book on humorous advertising, has turned his satiric sights on a different set of books—Encyclopaedia Britannica—in a new campaign that mocks the client's own direct-response format. Page 87.

SPECIAL REPORT



Marketing to Affluents—*Selling quality to the affluent generally demands a subtle, personalized approach and a lot of special service. But for those who know the formula, flamboyant sales promotion/special events attract the affluent with great success.*

CBS adds 3½ minutes of ad time

By VERNE GAY

New York—CBS-TV Network next fall will add 3½ national commercial minutes per week to its prime-time schedule, a move that advertisers claim will add to commercial clutter but could help hold the line on network pricing.

The move could bring CBS as much as $14 million in new ad revenue in its fourth quarter alone.

CBS will insert some of the new units in its most lucrative programs. Other new units will replace CBS promotional time.

"I'm obviously concerned about increased commercialization. The increase in units is going to add to the clutter. However, we recognize the position of the networks in terms of maintaining their cost-per-thousands and in increasing revenues," said Richard Kostyra, exec VP-U.S. director of media services at J. Walter Thompson USA. "The prime concern with us is with the TV networks taking further action to offset increased clutter. Specifically, the last commercial pod in a program should be moved into the program."

CBS said the increased inventory would give it roughly the same number of prime-time units for national sale as NBC.

The move was part of a recent agreement between CBS and affiliates on network compensation.

CBS tried to restructure its $174 million annual compensation to affiliates to increase clearances of morning and late-night programming. The net currently compensates affiliates by paying 32% of the local station's prime-time ad rate and 10% of its late-night rate. It had proposed cutting prime-time compensation to 30% and raising late-night to 40%.

The affiliates vigorously resisted any change in the current structure. CBS came back with the proposal to increase network prime-time commercial time and to give affiliates 1½ additional minutes per week of local ad time.

CBS tried to change the payment system so that stations would clear programming in troubled dayparts, including late-night, said Tony Malara, senior VP-distribution.

Affiliates are loath to cancel the profitable barter-syndicated shows already running in the late-night time periods.

East/West Net may close its L.A. operation

Los Angeles—East/West Network, a publisher of in-flight magazines, is considering closing its office here and consolidating its operation in New York, said Hershel Sinay, publisher/VP-western operations.

Western business has been adversely affected by the numerous airline mergers, and the local office has dropped four titles. Of its three remaining, *PSA Magazine* may be in jeopardy when Pacifc Southwest Airlines completes its merger with USAir. To date, the publisher has laid off one-third of its local editorial and art staff, once 36-persons strong. Mr. Sinay said layoffs will continue.

Nationally, East/West publishes eight in-flight magazine titles. East/West is in the process of closing its Denver office.

West Coast News

Chiat/Day dominated the Advertising Club of Los Angeles' Belding Awards for the fourth year, picking up 14 of the competition's 41 Belding bowls. That included the Sweepstakes prize for its work for Brown-Forman's California Cooler. Phillips-Ramsey and Gary D. Johns won three awards each at the March 12 awards. Racking up two awards each were BBDO/Slightly Further West; DDB Needham; Della Femina, Travisano & Partners; W.B. Doner & Co.; Rubin, Postaer & Associates; and 213-827-9695 & Associates.

Plantronics, Santa Cruz, Calif., has added five agencies to compete against BBDO Worldwide, Chiat/Day and Woolward & Co., all San Francisco, for its $2 million account. VP-Sales and Marketing Al Pepper is overseeing the account review following the departure of Director of Marketing David Hodges.

Hal Riney & Partners, San Francisco, promoted John Yost, 37, to senior VP-general manager, as expected (AA, Jan. 26), succeeding Don Ashley, who left. Mr. Yost retains the title of director of client services. Also, Paula Kahn, 38, has been named senior VP-group management supervisor, a new post. Most recently, she was senior VP-account director, J. Walter Thompson USA, Chicago.

Raging Waters, San Dimas, Calif., last week assigned its $750,000 advertising account to Salvati Montgomery Sakoda, Santa Ana, ending a 6-month agency search.

Special Report

Marketing to the Affluent

Creative promotions win wealthy response

By Pat Gray Thomas

Marketing furs, yachts, houses or horses to the affluent no longer requires strict adherence to the understated approach—without price tags.

Although some of them may consider it vulgar to discuss money or price in most circumstances, the affluent still flock to the flamboyant promotions and double-point shopping parties given by Dallas-based retailer Neiman-Marcus. (See Page S-2)

As information about the affluent sector increases and changes with a multitude of new studies being done, marketers are responding with everything from $4 peanut butter to million-dollar sports spectaculars.

"While people making $50,000 a year may not mind splurging on expensive chocolates at $20 a pound, they're probably not the same people who buy paintings worth millions of dollars," says Bill Turner, author of The Affluent Market, a recently published study from FIND/SVP, the New York-based market research company.

Marketers need to be aware of the various segments in this category—its demographics and psychographics, Mr. Turner says.

Although theories vary on the income required to be considered affluent in current dollars, perhaps the most important—because of size—and attractive of these segments is the 11 million to 13 million households that report income of $50,000 or more. This group accounts for two-thirds of total discretionary income in the U.S., and is projected to increase 50% between 1985 and 1995, by Wharton Econometric Forecasting in the FIND/SVP study.

The FIND study also estimates that black affluents will increase by 50% in the next 15 years; affluent women are projected to double to 26% of the total population by 1990.

The acquisition and display of affluence is more acceptable today than it was in the 1960s, "It's chic to be rich," says Marty LeGrand, news editor of *Polo*, Gaithersburg, Md.

Fur retailers wrap wealthy clients in amenities

By Sally F. Robbins

Jet trips to Leningrad, U.S.S.R. for fur auctions, shopping incentives to win trips or caviar, at-home fur presentations or special service any time of day: This is the treatment given the affluent clientele of fine furriers.

It's a multimillion dollar business for a select group of retailers, but the approach is subtle and personalized.

In an industry that is dominated by retailers targeting the mass market, Dallas-based Neiman-Marcus and Paris-based Revillon Inc. at Saks Fifth Avenue are among the few *creme de la creme* furriers who cater to the superrich on a national scale.

The Carol and Irwin Ware Fur Collection at three I Magnin stores in Chicago and suburbs is an example of a select furrier that caters to a smaller, more local audience.

"The ultrafine [fur] product is a narrow strata of the market and is not representative of what the fur business is today," says Bernard Groger, co-publisher, *Fur World*, a Manhattan-based trade journal.

Sally F. Robbins is a New York-based free-lance writer.

As a result of an influx of imports the past five years, about 85% of furs sold today retail for less than $5,000, Mr. Groger says. The remaining 15%, the high-end of the market, wields enormous pocketbook power and expects high quality and ultra service from its retailers.

The unofficial industry estimate of retail fur sales in 1986 was $1.9 billion, says Mr. Groger.

For quality furriers like Neiman-Marcus, shopping in the Soviet Union for sables to be distributed in the U.S. "is the ultimate in marketing to the high-end," says David Wolfe, senior VP at N-M, Dallas.

"We're the largest single retailer under one label selling tens of millions of dollars in volume," he says. The average fur purchase at N-M is $8,000.

"We sell legitimacy, quality and workmanship—actual product integrity. We create our image through people," he says, who are groomed and promoted within the company. They also happen to be attractive and articulate salespeople. "We encourage our people to think in a proprietary way and to be honest and fair."

Fur catalogs and mailers from Neiman-Marcus and Revillon at Saks Fifth Avenue use exotic locations as backdrops to attract the discriminating affluent buyer.

Several years ago, N-M initiated a marketing program called InCircle. "Customers have dubbed it 'the frequent buyer program,'" says Billy Payton, VP-director customer service. The unusual promotion allows charge card customers to accumulate a minimum of 3,000 points per dollar spent during a 12-month period. The points are then redeemable at the end of the year for gifts of merchandise in several categories.

One option in 1987, demanding the maximum $250,000 in points, is first-class travel to an exotic location to attend a fur photography session.

In 1985 the biggest spenders visited Peter the Great's palace in Leningrad and occupied front row seats to watch a Russian photographer capture the essence of N-M's fur-wrapped models.

After racking up $100,000 in points, customers have opted for a trip for two to London. For $60,000 in points, they can attend special events around the country, such as opening night of the Boston Symphony Orchestra's fall season.

The advantages for members include an InCircle charge card,

(Continued on Page S-4)

Minimarket for megayachts widening its wake

By Christopher Bubin

Drive a fast car, you're on the road to success. Own a Fendi fur, you've passed the first turn. Wear multicarat diamonds and have a vacation home in the south of France, you're heading down the home stretch.

When you get a megayacht—measuring 80 feet or more in length—you've arrived.

Christopher Bubin is a staff writer for the Tampa Bay Business Journal *in Florida, and a free-lance writer.*

William and Ruth Weiss have arrived. In fact, some might say they arrived when they bought their first yacht, a 60-footer built by Burger Boat Co., Manitowoc, Wis., in 1955. They've owned three boats since then, each bigger than the last and all Burgers. Their current 86-foot pride and joy is for sale to anybody with "a little better than $3 million," says Mr. Weiss.

When he sells Panacea IV, which serves as his Palm Beach, Fla. summer home, he'll commission a 100-foot Burger.

Time after time, advertisers splash the message across the pages of *Cruising World, Power and Motoryacht, Sail* and *Yachting:* If you have a megayacht, you've arrived. The ads, understated and sensual, sell prestige unmatchable, ultimate quality, ultimate luxury, ultimate speed on the water.

In 1986 fully 10%—or $671,000—of *Power and Motoryacht's,* Stamford, Conn., display ad revenue came from marketers of yachts more than 100 feet in length, says Jerry Faber, ad director.

Yet only about 300 such boats exist worldwide.

The target market for big boats is so limited that special interest magazines are about the only media available. Other than that, marketing megayachts means promotions, Mr. Faber says.

Perhaps the most successful promoter of the big-boat lifestyle is Fort Lauderdale, Fla.-based Broward Marine. Each April, the company sponsors an "owners' rendezvous" for prospective buyers, selected media types and, of course, Broward boat owners. About 20 Broward yachts—all hovering in the 100-foot range—converge on the Ocean Reef Club in Key Largo, Fla., for four days of fun and games.

By day, the owners and guests mingle at golf, tennis and assorted water sports. At night, they dine aboard each others' yachts.

Mel Wolff, exec VP of New York-based Muhlfeld & Wolff's Fort Lauderdale office, handles advertising for Broward and several other large yacht manufacturers.

"When somebody goes there [to the rendezvous] and sees 19 or 20 Browards, it's really an awesome sight," says Mr. Wolff. "It's a chance for owners to get a really good look at other Browards, and we always sell a few boats because of that."

The U.S. boasts more than 14 million recreational boats, but the number of megayachts throughout the world amounts to a comparative handful. However, a growing population of millionaires—especially American millionaires—has boosted demand for the big boats in recent years.

"The whole market is exploding," says Bonnie O'Boyle, editor of *Power and Motoryacht.*

"Nobody *needs* a 300-foot yacht," she says. "There's a lot of ego involved in building a very large yacht. It's sort of living proof that you've been very successful." She says advertisers have to walk a subtle line to avoid overselling to buyers of ships and near-ships. "Advertisers are dealing with pretty sophisticated people," says Ms. O'Boyle.

Mike Kelsey, owner of Palmer Johnson Inc. in Sturgeon Bay, Wis., seconds that assertion. His

America's Cup runs over with corporate sponsors

For the big motor yachts and for big business, Perth, Australia was the place to be in 1986 and early 1987. The megayachts came to watch the America's Cup races, and the megacorporations came to pay for them.

In all, six American groups made a run for the cup, and though all the numbers aren't yet in, it looks like they spent about $70 million in the battle for the coveted chunk of sterling.

The money comes in part from companies hoping to hitch their wagons to a star, because associating with a winner can be of superb promotional value for the company.

The key for sponsors, then, becomes picking the winning group.

Each group, called a syndicate, develops one or more boats that it feels can make a serious challenge for the cup. Generally a large yacht club spearheads the syndicate's efforts. Because most clubs can't—or won't—foot the average $10 million to $15 million cost of a try for the cup, they turn to private donors and big business, selling sponsorships in return for cash, materials, technology and personnel.

(Continued on Page S-7)

Megayacht minimarket

company manufactures five or six yachts of more than 80 feet in a year. Prices start at about $3 million, and can soar from there. "We're basically selling to a very, very small audience that already knows we exist," he says. Therefore, he keeps all his company's advertising low-key. Sharpe Studios, a London design company, produces the layouts, but Mr. Kelsey places the work in American specialty magazines himself.

The $200,000 per year he spends on high-end yachting magazines is the only media advertising the manufacturer does. It represents only a tiny fraction of the company's gross, yet the ads keep the Palmer Johnson name in the megayacht arena.

The company recently delivered Fortuna, a 100-foot vessel, to the king of Spain. Capable of speeds up to 52 knots (60 mph) the turbine-powered craft was a gift from the king of Saudi Arabia. To achieve such great speeds, the yacht uses a fuel pump from a Saturn V rocket as a sort of overdrive.

A recent ad campaign featured a picture of the yacht with the caption: "Have you a dream we can build?"

Mr. Kelsey says word of mouth gets his name to those who need to know it. It's hard to determine how much the company spends on promotions, because he considers every finished boat a promotion.

"I tell our workmen, 'The biggest single piece of advertising we have is the product.' We get a lot of publicity in magazine articles." Since the boats are so noticeable, and their owners often so high profile, his product regularly is found in the news.

His yard, for example, built the sailing yacht Tenacious. Atlanta businessman Ted Turner raced the boat off the coast of Britain during the 1979 Fastnet regatta.

During the race, a storm did immense damage to the fleet of boats, killing 15 sailors. Mr. Turner's Tenacious won the event—and escaped damage.

Mr. Kelsey makes a marketing distinction between totally custom superyachts, and what he calls semicustoms. He says the semicustom product, which amounts to a highly customized set of appointments on a standard hull, has become very popular among the newly moneyed in the U.S.

Because the people buying semicustoms are generally new to the megayacht crowd, more intense marketing efforts are required to position the product and cement brand loyalties. The bulk of Palmer Johnson's advertising and promotion efforts goes to attract these potential customers, Mr. Kelsey says.

Still, every company needs face-to-face promotions to sell megayachts.

"There are two or three watering places around the world where you've just got to be," he says. Fort Lauderdale, the Mediterranean and Greece make that list. "If you're going to build Ferraris, you have to be around the race track a little bit," he says.

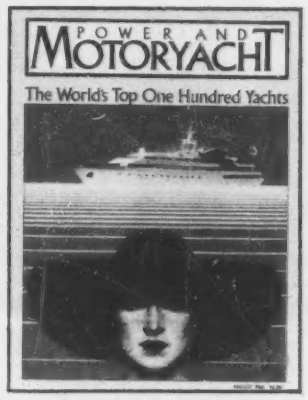
Everyone seems to agree there's no season to buy or sell a megayacht.

"These are not sold like probably anything else that you're familiar with," says Jim Grattelo, director, Miami-based Sterling Yacht and Shipbuilders. "There's such a small group of people who can afford a $10 million to $15 million yacht, they tend to know each other."

In its two-year history, Sterling has delivered five yachts, all completely custom-designed and built. The company has three more under construction, all in the 150-foot-and-up range.

Sterling spends about $200,000 per year to advertise with full-page spreads in various yachting magazines worldwide. Besides the American slicks like *Yachting*, the outfit also makes buys in the British *Boat International* and the French *Prestige*.

All but one of Sterling's sales have been to owners upgrading to a larger yacht. The average length of megayacht ownership —about four years—means as soon as a boat is delivered, manufacturers start thinking about selling the customer another boat.



***Power and Motoryacht* derived 10% of its 1986 ad revenue from marketers of yachts more than 100 feet long. The market is "exploding," its editor says.**

Burger Boat Co., has built yachts for 123 years. The company sells about half its product to repeat customers who want a bigger, better Burger, says Roy Sea, VP-marketing of Burger Boat's West Palm Beach, Fla. sales and service office.

Besides repeat buying, another 25% of Burger's sales comes from word of mouth. "The dockside gossip is very powerful," says Mr. Sea.

Hearsay indeed seems golden in the marketing of megayachts. Broward Marine officials estimate "well over 90%" of their customers have owned boats before. To keep them in what Mr. Wolff calls the "Broward family," the company publishes a newsletter about four times a year.

It typically contains eight to 12 pages of pictures and descriptions of new equipment, plus news from other owners.

In a departure from traditional full-page ads in the boating slicks, Mr. Wolff has cut the frequency of Broward's placements in half, and gone to double-page spreads. He says the pictures look better, and people remember the ads.

Perhaps without any advertising, the truly big yachts would sell just as well. No doubt their presence means success, and the call of the sea is strong. Yet Mr. Weiss, the owner of Panacea IV, sees another reason for building such large and sumptuous craft.

"I've never failed to make a profit on any of them," Mr. Weiss says.

America's Cup runs over

(Continued from Page S-2)

The business of a 12-meter challenge can take three years. The syndicate must house and feed at least two 11-person crews, design and build boats and sails and buy support equipment—such as complete machine shops. Sails alone can cost $8,000 each, and most boats need about 100.

This year, dozens of companies backed American syndicates. Corporate philanthropists were reluctant to back any particular syndicate and risk having their selection eliminated during the qualifying stage.

In response to this problem, a foundation was established to collect money for the American effort. The foundation, called The Americans, collected money in the name of all U.S. entries except one, and divided the contributions among the participating syndicates according to how well they did in the qualifying races in Australia.

About half a dozen companies participated in the scheme, according to The Americans Chairman Robert D. Scott, president of the Ibox Group, a San Francisco computer leasing company.

"We are providing an avenue by which individuals and corporations can support all of the groups," says Mr. Scott. At least two companies refused individual syndicates' pleas for funds.

However, both companies made commitments to The Americans. American Express contributed about $480,000, with the lion's share going to Stars and Stripes and USA—the two American boats that made it to the semifinals. United Airlines agreed to donate money according to a coupon arrangement that runs until July—every individual giving $75 to The Americans gets $50 off a United ticket. This could mean as much as $6 million to The Americans, says Mr. Scott.

Of the six American syndicates, only New York Yacht Club's America II declined to participate in The Americans' effort.

The New York group had strong support early in the fund-raising efforts. Cadillac backed America II with an estimated $1 million; *Newsweek* and Amway, were early corporate sponsors; and several "corporate partners" contributed between $50,000 and $1 million.

The winning entry, San Diego Yacht Club's Stars and Stripes, spent about $15 million to get the cup back. While a good chunk of cash came from private donors, millions came from corporations.

Most yacht clubs can't—or won't—foot the average $10 million to $15 million cost of a try for the America's Cup so they turn to big business.

For the winners, money is still easy to get. General Mills, Pepsi-Cola Co., Philip Morris USA, Polaroid Corp. and US Sprint purchased major sponsorships after Stars and Stripes made the finals. Each paid between $1 million and $3 million for the right to associate with the victors. A few of these latecomers have made provisions to back defense of the cup three years hence.

Early backers probably paid less. Those that got in on the ground floor included Allied Signal Corp., Budweiser and Merrill Lynch.

By way of indirect contributions, the local Coca-Cola bottling plant in San Diego agreed to print a request for support, along with a toll-free telephone number, on about 70 million soda cans.

Other sponsors took ads in various publications—such as the *Wall Street Journal*, *Yachting* and *Sail*—affirming their support for the Stars and Stripes effort and listing the same telephone number.

In addition to cash, Allied supplied a space age plastic called Spectra Fiber for use in sails and lines. The no-stretch material helps sails keep their shape and makes lines less elastic, allowing more precise sail trimming.

Money can come from anywhere. Most agree that the reason the U.S. lost the cup in 1983, and the reason it came back had more to do with technology than funding.

The U.S. efforts got plenty of scientific help. Those lending personnel or equipment included: Boeing, Cray Research Inc., Digital Equipment, Grumman, Hewlett-Packard, Massachusetts Institute of Technology, McDonnell Douglas and NASA.

Polo clubs mount campaign to rein in sponsors, fans

By Julie Liesse Erickson

Polo aficionados are fond of calling it the sport of princes. Today, however, it is polo's corporate sponsors that are treated like royalty.

In the past decade, making investments ranging from $5,000 to more than $1 million a year, marketers as diverse as British Airways, Cadillac, Cartier, and US Sprint have discovered polo as a vehicle to reach the often-elusive affluent market.

Polo clubs are eagerly pursuing these sponsorships, which not only open up the possibility of improved facilities and a broader audience, but also take some of the financial burden off the devoted cadre of wealthy entrepreneurs who traditionally have bankrolled polo teams.

In their eagerness to accommodate marketers, clubs offer various kinds of sponsorship packages. A marketer can place his company name on a weekend tournament, a one-day event, a pavilion at a match or a team. In return for a team sponsorship, the sponsor's name appears on uniforms and the company usually receives all the other perks given to smaller-scale sponsors: Ads in club programs and magazines, club membership, free tickets, hospitality pavilions, product sampling and display opportunities.

Supporting a team is by far the most expensive proposition. The sport's U.S. renaissance has entailed a transition from casual matches in a clubby atmosphere. Today's top teams feature professional players who often rotate from club to club, receive salaries comparable to those of major league football and basketball players, and require expensive transportation and upkeep for their "ponies."

Although sponsoring a one-day or weekend polo event costs as little as $5,000; a yearlong team sponsorship at Oak Brook Polo Club, Oak Brook, Ill., could cost a minimum of $150,000, says Dennis Gilmore, VP-general manager of the club.

William Hilliard, executive director of the U.S. Polo Association, Lexington, Ky., says one unidentified club is paying a combined annual salary of $625,000 for just two top-rated players. "As [wealthy individual sponsors] have become fewer and fewer, corporate sponsors have picked up the slack, and put some money into the game."

When Prince Charles played in Oak Brook, Ill., corporate sponsors were in attendance.

A *Time* ad by Rolex Watch USA promoted the Rolex Gold Cup in Palm Beach, Fla.

The Palm Beach Polo and Country Club, West Palm Beach, Fla.—generally considered the most aggressive polo marketer in the U.S.—dates its sponsorship programs back nine years. The first club to seek backers, it currently has more than 40 corporate sponsors. With that type of financial support, it is no coincidence that the universe of both players and spectators has expanded.

The U.S. Polo Association in 1986 included 2,102 playing members and 200 clubs, not counting collegiate teams. Since 1980 the number of members has increased 47%, while the number of clubs is up 51.5%.

An informal analysis of the 1986 USPA membership by *Polo*—a Gaithersburg, Md., Fleet Street publication with a circulation of 5,000—shows that California boasts the most players; 18% of the USPA's members live in or play primarily there; Florida and Texas are next with 11% and 10% respectively.

As the number of players has increased, so has audience participation. Sunday attendance at the Palm Beach club averaged 4,000 in 1986, says Fern Margolis, director of communications and public relations. Janet Frisk, sponsorship director for the Oak Brook Polo Club, says attendance for Sunday matches averaged 1,500 during the five-month 1986 season.

'Sport of Princes' broadens its appeal

Polo came to the U.S. by way of the U.K., where it was introduced by governmental and military officials returning from duty in India. Britons gave polo its name.

The game always has been popular with the military. With its intimacy between horse and rider, polo is considered the epitome of calvary training. Devotees point out that great soldiers of the ages, from Marco Polo to George S. Patton, were expert polo players.

Although the U.S. Polo Association was founded in 1890, polo's U.S. popularity peaked in the 1920s and 1930s, when it became a part of the opulent, Great Gatsby-like life of wealthy Americans in the Northeast.

Today, in terms of numbers and intensity, the acknowledged No. 1 polo-playing country is Argentina, followed by the U.S. "The U.K. used to be the mecca of outdoor polo, but it's grown phenomenally in the States," says William Hilliard, executive director of the U.S. Polo Association, Lexington, Ky.

In the U.S., he says, New England sports the most clubs, but California is the fastest-growing market—partly because of arena polo, a variation of the traditional outdoor game. "Arena polo—or indoor polo—is an easier game, and has helped open up the game to people who previously didn't have the means to get involved," says Marty LeGrand, news editor of *Polo*, Gaithersburg, Md. The two largest arena polo locations are in California, she says.

Polo traditionally is played by four-man teams in six 7½-minute periods called chukkers. For arena polo, the team size is cut to three and the playing field is considerably smaller than the 200-by-300-yard outdoor fields.

Usually, players change ponies—they're always called ponies, although most are full-grown thoroughbreds—at the end of each chukker. But some outdoor clubs feature teams with four players and two alternates—a configuration that allows players with only one pony to compete.

Innovations like these, combined with the marketing efforts of club executives and sponsors, have brought polo to a wider and younger audience. "The game used to be followed mostly by those who'd followed it for years—since its heyday in the 1930s," Ms. LeGrand says. "Today, it's a younger crowd."

Reach the Big Spenders

With WG&L Action Card Decks

Warren Gorham & Lamont (WG&L) Action Card Deck recipients are all proven direct mail buyers—affluent, top-ranking professionals and business executives who have spent up to $5000 per order through the mail.

Surveys show that these upscale professionals and corporate executives possess the purchasing power direct mailers always look for. Their combination of responsibility, mobility, and affluence—a mean income of $80,000—makes them excellent prospective customers for a wide range of products and services.

The WG&L Action Card Decks offer you a unique opportunity to reach almost 700,000 of these quality names for less than 2¢ per contact. Plus you can go directly to eight key markets with these specialized decks:

- WG&L Accounting Action Cards—105,000 circulation.
- Auerbach Computer Action Cards—50,000 circulation.
- WG&L Banking Action Cards—110,000 circulation.
- WG&L Law Action Cards—100,000 circulation.
- WG&L Personnel Action Cards—60,000 circulation.
- Practical Accountant Action Cards—55,000 circulation.
- WG&L Real Estate Action Cards—105,000 circulation.
- WG&L Tax Action Cards—110,000 circulation.

A complimentary media kit or further information about any of the WG&L Action Card Decks is available from:

Catherine Rogers, Card Deck Division
Warren, Gorham & Lamont, Inc., One Penn Plaza, 42nd Floor
New York, NY 10119 (212) 971-5000

WG&L ACTION CARD DECKS

"Increased interest in polo reflects, in large part, today's stronger interest in the fashion world," says Michael Butler, chairman of the Oak Brook club and a real estate magnate.

Polo's elegance brings back the era of F. Scott Fitzgerald's "The Great Gatsby," Mr. Butler says. "Elegance, service and quality are key for today's consumers. Polo represents a quality, upscale, elitist sport."

Says Marty LeGrand, news editor of *Polo*, "This kind of affluent display has become more acceptable than it used to be in the 1960s. It's chic to be rich."

But for casual fans, polo only looks expensive. The Palm Beach club runs newspaper ads throughout southern Florida promoting its matches at "$5 a head"—the general-admission price. And at the Oak Brook club, a non-playing membership costs as little as $150 a season.

Another part of polo's charm, Mr. Butler says, is the "challenge, the difficulty of playing." For horse lovers, Ms. Frisk says, "Polo is the only alternative to the racetrack."

Polo's celebrity angle also fascinates spectators: North American Watch Corp.'s Piaget sponsors a Hollywood-based touring celebrity team. A trip by the Prince of Wales and his polo guru, Major Ronald Ferguson—father of Sarah, the Duchess of York—to the Oak Brook club brought 6,000 spectators to a Friday afternoon match last September.

BMW of America was listed as the Prince of Wales Cup's official sponsor, but other marketers, including the *Chicago Sun-Times*, Cadbury Schweppes and Cunard Line Ltd., paid $6,000 each for sideline pavilions set up for parties.

"Any company that would use polo as a backdrop [in advertising]," Ms. Frisk says, "is a prime candidate for sponsorship—champagne marketers, auto companies, jewelers."

The Oak Brook club counted 17 corporate sponsors during the 20-week 1986 season, Mr. Gilmore says. Club executives try to pair sponsors with special events; last year, for example, Jamaica's Red Stripe beer sponsored a visit from the Jamaican national team.

Sponsors, Ms. Frisk says, can count on "our very loyal membership. A sponsor gets high brand awareness, getting his name out there in front of our audience. It's an entertainment vehicle as well; you can put on a fantastic party."

Although nine-year commitments make Rolex Watch USA and Piaget its oldest sponsors, the Palm Beach club says Cadillac currently has the broadest sponsorship program.

The automaker's six-year involvement started when Cadillac became the official car of the Palm Beach club, says Sheri Perrelli, director-public relations for the Cadillac Motor Car Division of General Motors, Detroit. In 1987 its commitment includes sponsoring:

- One Palm Beach polo team that includes two 10-goal (highest-rated) players, Memo and Carlos Gracida.
- The year-old Cadillac National Polo League.
- The sixth annual Cadillac Challenge Cup in Palm Beach.
- The Cadillac World Cup Championship in Palm Beach.
- The American Polo League at the Los Angeles Equestrian Center, built for the 1984 Summer Olympics. "This gives us a polo anchor on both coasts," Ms. Perrelli says.

"The association with polo has been a very natural one for us," she says. "The demographics fit right in with our targets."

Current buyers of the Seville, the official car of the Palm Beach club, claim a median household income of $80,000. About 41% of the car's primary drivers are women, and 44% are college graduates.

Polo sponsors' ads promote their involvement—a recent Rolex ad in *Time* promoted the Rolex Gold Cup at the Palm Beach club—and also capitalize on polo's celebrity talent. A 1986 Rolex ad featured Geoffrey Kent, chairman of Abercrombie & Kent Safaris, and captain of the Rolex A&K team.

But polo gradually "is becoming less of a social event and more of a legitimate sport," Ms. LeGrand says. This year in Argentina, the International Polo Federation, representing players in 25 countries, is holding its first world championship since the 1936 Summer Olympics. Polo executives hope this is the first step toward reinstatement as an Olympic sport.

Polo enthusiasts recently stubbed their toes in broadcasting an hour of action from a Greenwich, Conn. match. Mr. Hilliard says Greenwich team owner and real estate developer Peter Brant bought the air time from CBS-TV and tried to resell it; Mr. Brant "did OK, but he sure didn't break even," Mr. Hilliard says.

"Networks have been reluctant to televise polo, because of the high action and because it requires a lot of cameras," he says. "And there has not been as much enthusiasm on the part of sponsors as they'd like."

Although they say a wider audience won't affect the sport's sponsorship appeal, polo devotees seem unsure about opening it up to a mass market.

While Mr. Butler continues to discuss the possibility of a polo match in downtown Chicago's Grant Park, he says, "We would resist having it move into a mass-market sport. It's not a Coca-Cola kind of sport. We value its family tradition."

However, Ms. Margolis of the Palm Beach club says, "We'd like nothing better than to see polo become a sport for the masses—we'd love to have 12,000 spectators each week."

Mr. Hilliard predicts polo's popularity will continue to grow, largely because interest at the intercollegiate level has increased in the past several years; currently there are 24 teams listed with the USPA. "Once you get the kids interested," he says, "you're in."

Rich diet for Wendy's

Wendy's International is going back to the burger basics in a new TV campaign featuring a series of people floating by an exaggerated 10-foot "hot 'n juicy" hamburger to "give a nibble." Dick Rich Inc., New York, created the campaign. *(See story on Page 77.)*

Georgia-Pacific takes on P&G

Slates $75M paper drive

By JUDANN DAGNOLI and LAURIE FREEMAN

Georgia-Pacific Corp., the paper-products company that's accustomed to walking in the long shadow of Procter & Gamble Co., now is hot on its bigger rival's heels.

In a six-month marketing effort, G-P will spend as much as $75 million in advertising and promotion—a record for the company—to introduce a new bathroom tissue and upgrade its lower-price Coronet line of tissues, towels and napkins.

In addition, both competitors coincidentally have chosen similar car-giveaway programs as major promotional efforts: G-P is working with American Motors Corp., while P&G has tied in with Chevrolet.

The ad campaign, which breaks today, supports the national introduction of Angel Soft premium bathroom tissue. The promotional effort, starting later this week, will back the established Coronet line.

The $20 million-to-$30 million ad investment could make Angel Soft the heaviest-supported brand in the category.

"Georgia-Pacific was telling [grocery store] buyers that they would be spending at a rate of $20 million to $30 million," said a marketing executive at a major G-P competitor. "That would mean they would lead the category [in spending]. We had a hard time believing that [but it turned out to be true]."

In taking on P&G, the No. 1 player, G-P is trying to leapfrog No. 2 Scott Paper Co.'s ScotTissue, Cottonelle and Waldorf brands and No. 3 James River Corp.'s Northern line.

Angel Soft, the first premium brand from G-P's Darien, Conn.-based Consumer Paper Products Division, is aimed directly at P&G's Charmin and White Cloud brands. Although sold under the Coronet umbrella, it is positioned as top-of-the-line.

The ad campaign by Altschiller Reitzfeld, New York, focuses on a softness message. TV spots show babies dressed as angels, with a voice-over by Sterling Holloway, the voice of Winnie the Pooh, and original music written and performed by John Sebastian (formerly

Luisi seeks O'Donnell's JWT letter

By STEWART ALTER

JWT Group's two crises—involving ex-employees Marie Luisi and Joseph O'Donnell—suddenly came together last week in an unexpected way.

In a filing in New York State Supreme Court, JWT Group moved to keep information about its problems with Mr. O'Donnell, who was dismissed in January, from surfacing in legal documents related to Ms. Luisi's libel suit against JWT.

Ms. Luisi was dismissed by J. Walter Thompson USA in 1982 as the executive "responsible" for the improprieties discovered in its barter syndication unit. She subsequently sued for libel, charging she was not solely responsible for the problem and was a scapegoat. She now is in the final weeks of the pretrial discovery process and plans to file on March 31 for a trial date.

JWT in effect asked the court to prevent Ms. Luisi from taking depositions from Mr. O'Donnell and John Peters, Thompson's ex-president, in order to learn whether anything in a letter from Mr. O'Donnell might be useful to her case. The agency steadfastly has refused to make public the letter written to JWT board members by Mr. O'Donnell, which contributed to his ouster as chairman of J. Walter Thompson Co. (AA, Feb. 2, *et seq.*).

While JWT has "resisted a lot of stuff" in the discovery process of Ms. Luisi's lawsuit and has directed witnesses not to answer questions, this is the first time it has attempted to stop her from taking depositions, said her attorney, P. Jay Wilker.

A JWT spokesman, who confirmed that these were the first depositions the company was seeking to stop, said the reason was that "we see it as a fishing expedition" and called the letter "irrelevant" to Ms. Luisi's case. "The letter dealt with matters in 1986," he said, observing that nothing that current had to do with "accounting ques-

Legislators ask probe of Visa

Attack on AmEx backfires

By PATRICIA WINTERS and STEVEN W. COLFORD

Visa International's attack on American Express Co.'s new Optima card has backfired into a wellspring of support for AmEx from consumer groups and members of Congress.

The Consumer Federation of America and four legislators—including a potential presidential candidate—last week asked the Department of Justice to investigate possible antitrust violations by the industry—and Visa in particular—after Visa President C.T. Russell sent a letter to member banks warning them about Optima's "competitive threat" (AA, March 16).

In its telegram, San Francisco-based Visa suggested that the banks reconsider issuing AmEx traveler's checks and other AmEx products now that its revolving-credit Optima card will be competing with the banks' credit-card business.

"I had hoped," Rep. Charles Schumer (D., N.Y.) responded, "that the credit-card industry's response to the new American Express card would be an appropriate free-market response: lowering the interest rate on their cards . . . or, at the very least, trying to explain to consumers why they should spend more for Visa or MasterCard.

"Instead, Visa chose to rely on strong-arm pressure tactics and on a call for a boycott by banks of American Express products."

Timing undoubtedly played a part in eliciting Rep. Schumer's response. The Optima card, whose 13.5% interest rate is five percentage points lower than the average rate for Visa and MasterCard, was introduced on

Highlights

Georgia-Pacific tags P&G 1
Georgia-Pacific Corp., the paper-products company that's accustomed to walking in the long shadow of Procter & Gamble Co., now is hot on its bigger rival's heels. In a six-month marketing effort, G-P will spend as much as $75 million in advertising and promotion—a record for the company—to introduce a new bathroom tissue and upgrade its lower-price Coronet line.

Children's promotions on rise 3
White Castle, Pizza Hut and other fast-food chains are rediscovering the children's market, a segment most of the industry effectively had conceded to McDonald's Corp.'s dominance.

Underwear tug of war 4
Hanes Knitwear and Fruit of the Loom are set to air their dirty laundry in the courts, escalating a battle over a string of contentious TV commercials for underwear.

Commodore's clone killer 12
Recuperating personal-computer giant Commodore International is hungry for a piece of the $1.3 billion IBM PC-compatible market. In a $2 million print campaign starting this week, the company introduces the PC10 computer as "The clone killer."

Haircare help 22
Helene Curtis Industries' plan to spend $40 million to introduce its Salon Selectives line has jolted the slumbering $3.5 billion haircare market.

Generics wind down 76
Today, generic products celebrate their 10th anniversary on an inauspicious note. With the exception of the cigarette market—which still is getting mileage out of cut-rate, unadvertised brands—generics' best days are behind them.

CORPORATE CLOSEUP

Wilson will exclude athletes 6
Wilson Sporting Goods Co. is serving up some fiscal responsibility in its new advertising campaign. Facing skyrocketing endorsement fees, Wilson's new corporate ad campaign reveals the names of star athletes but doesn't use their pictures.

FEATURES

Year's best 35
Advertising Age presents the best commercials of 1986. This year's lineup features everything from a conga line of raisins to a talking head in a box, and almost everything in between. As creative directors struggle with declining TV audiences and the almighty zap factor, the emphasis has shifted from selling products to producing impact and attracting attention.

INTERNATIONAL

Italian food marketer expands 48
H.J. Heinz Co. and CPC International, among others, were outbid recently by Italian agribusiness conglomerate Ferruzzi S.p.A. of Rome for Latin America's largest food marketer. Brazil's Companhia Industrial de Conservas Alimenticias—CICA—soon may become a much more serious competitor for food marketers under Ferruzzi's ownership.

British Airways turns to U.S. TV 48
British Airways today brings its global ad campaign, focusing on the airline's treatment of passengers, to seven U.S. cities. The Saatchi & Saatchi campaign aired in 33 countries last year.

Financial woes sting Abel shop

By JENNIFER PENDLETON

Hollywood—The Canadian parent of Robert Abel & Associates has installed a new president-chief executive officer to turn around financially the production company responsible for some of the most innovative—and expensive—special effects in TV advertising history.

R. Abel

Omnibus Computer Graphics named Bill Kennedy, a former VP of Crownx Inc., a Canadian diversified-services company, as president of Omnibus and its Abel unit. He replaces John Pennie, who becomes vice chairman.

Mr. Abel, the award-winning creative force behind the company that bears his name, continues as executive creative director.

Omnibus reportedly had a working capital deficit of $5.9 million for the three months ended Dec. 31. It also is in default on certain [illegible] its line of credit with the Royal Bank of Canada.

Omnibus acquired RA&A last August for $7.3 million.

As part of the restructuring, Omnibus has let go a substantial number of RA&A's staff, currently about 150 people. Observers expect further paring to take place.

RA&A has been responsible for some of the most talked-about and lavish TV commercials. Its work has given its principal, Robert Abel, the reputation of a creative genius.

Among RA&A's noted work: Levi Strauss & Co. spots featuring animated Levi's logos; Transamerica's commercials showing King Kong on the company's distinctive San Francisco pyramid building; and the Canned Food Information Council's "Sexy Robot" commercial.

While RA&A's work has always been somewhat experimental, its business has suffered in recent years due to growing competition.

"In the late 1970s, Abel was the only game in town," said one source. "Now there are many other production companies offering the same services."

Peter Johns & Partners feels pinch

San Francisco—Agency principal Peter Johns said Peter Johns & Partners is feeling "extreme pressures on ... cash flow," but emphasized he hopes to be able to turn around the ailing shop.

When asked if the agency might file for bankruptcy protection, the former president of Wells, Rich, Greene/West said it's "a possibility."

But Mr. Johns said he has several undisclosed new clients that he hopes will put the agency on a stronger financial footing by April.

According to numerous ex-staffers, about 10 employees have left the agency, claiming salaries haven't been paid since February.

Among those leaving the shop recently were Mickey Lonchar, VP-creative director; Donna Bischoff, director of research and VP-account supervisor; and Margaret Paradis, account supervisor.

Mr. Johns denies that staffers haven't been paid.

Current clients include the Claremont Hotel & Resort, Berkeley; Cathay Pacific; and a new theme park—as yet unbuilt—called Gold Rush City.

PJ&P's financial crisis follows the loss of its largest account, the estimated $1.5 million-to-$2 million Plantronics account, now in review (AA, March 16).

Suppliers say the agency is behind on payments. Local photographer Larry Keenan says PJ&P owes him $23,000 and he is contemplating pressing charges against the agency.

A Sun Valley, Idaho, photographer, David Stoecklein, has filed a civil suit in Blaine County (Idaho) District Court against the agency and Mr. Johns as an individual, seeking collection of an outstanding debt of $4,700.

PJ&P began operating under its current name in March 1986, following the departure of Mr. Johns' former partner, Ed Mangino. Prior to that the agency had been doing business as Mangino/Murray/Johns.

South African-born Mr. Johns was president of WRG/West, Los Angeles, until 1982. Early in that year, WRG spun off its Los Angeles office as an independent subsidiary—Johns, Cohen & Pasqualina—to avoid conflict between Continental Airlines (handled out of Los Angeles) and Pan American World Airways (a New York client). It subsequently lost the Continental business, and Mr. Johns left (AA, March 12, 1982).

West Coast News

CORPORATE CLOSEUP

The copy describes golfer Ben Crenshaw, but the athlete's picture is noticeably absent in this b&w ad for Wilson Sporting Goods.

Wilson looks past star athletes' fees

By LAURIE FREEMAN

RIVER GROVE, ILL.—Wilson Sporting Goods Co. is serving up some fiscal responsibility in its new advertising campaign.

Emerging from a long period of introspection under new ownership, Wilson finds the rules of the marketing game have changed, and not in its favor. Endorsement fees have skyrocketed for celebrity athletes who long have dominated sporting-goods ads, and smaller companies have been priced out of the high-stakes competition.

So in its new corporate ad campaign—budgeted at $5 million and themed "Where there's a will, there's Wilson"—the names of such star athletes as George Brett, Chris Evert, Michael Jordan and Walter Payton are shown against stark, b&w photography of the playing fields where they learned their sports. The athletes themselves are not shown.

D'Arcy Masius Benton & Bowles, Chicago, is the agency.

Wilson marketing executives have crafted the strategy only partly because of the fiscal reality; the other part is a belief that athlete endorsements don't automatically add up to sales anymore.

"[The celebrity athletes'] day is done. Except for a few, their ability to deliver is minimal and their value diluted because of the many endorsements they do," said Dave Lumley, Wilson VP-advertising, during an interview at Wilson's corporate headquarters here. "Consumers ... know that the player has sold out and is being paid large sums of money to wear the clothing and use the equipment."

Whether that's true or not, much has changed since Wilson was sold to Wesray Capital Corp. by former parent PepsiCo in September 1985. Wilson executives have spent much of the transition time identifying and seeking solutions to the problems that had caused company profits to deteriorate.

For 1984, the year before its sale to Wesray, Wilson posted a loss of $17 million on sales of $247.6 million. That trend continued into 1985, when sales of $255 million translated into a loss of $37.8 million.

While Wilson says its new campaign reaffirms its belief in the value of image-building advertising, management knows advertising means nothing if the company doesn't have the accompanying dealer support.

Mr. Lumley said the company is putting substantial time and effort into repairing damage to its trade relationships.

After being named company chairman in late 1985, John Murray sent a letter to sporting-goods dealers admitting the company's past mistakes and explaining corrective measures. These included new terms for retailers, proper pricing procedures and, importantly, upgraded products.

Most of Wilson's problems under PepsiCo were caused by frequent management changes, sources report, and resulting short-sightedness. Poorly conceived products became permanent inventory.

During this PepsiCo period, relations with retailers were badly damaged—almost beyond repair, according to some industry executives.

Wilson now is determined to rebuild, to re-establish its past preeminence in the $15 billion industry. Still, it intends to work within its means, as evidenced by its attitude toward athlete endorsements today.

"What's happened is the en-

No end in sight to promotion's upward spiral

By Richard Edel

Not long ago, Paddington Corp., Fort Lee, N.J., made an incredible offer to consumers in selected New York markets where it was promoting J&B Scotch. Consumers who bought a $12 bottle of J&B were entitled, free of charge, to select a watch, a credit card, radio or a movie videocassette, with retail values between $20 and $50.

How could a company afford premiums worth two to four times the value of its product based on a single purchase? (The answer is somewhere in this story.)

Under normal circumstances, a company can't. But in the sometimes crazy world of sales promotion, seemingly anything is possible.

Consumer product marketers are rethinking the rules of the game as they devote more money to sales promotion, says Richard Vincent, director of marketing services at Donnelley Marketing, Stamford, Conn.

These marketers still spend billions each year on brand advertising to promote long-term customer loyalty, but heightened competition and the rising cost of network TV is causing them to divert more marketing dollars into short-term tactics, such as cents-off coupons, money-back offers, premiums, sampling, sweepstakes, contests and other sales incentives. Unlike image advertising, these forms of promotion have built-in systems for tracking performance, he says.

"The market is reacting to the high cost and diminishing effectiveness of network TV. You can see the change in attitude as agencies come under pressure to find new marketing approaches," Mr. Vincent says.

For the past nine years, Donnelley, a division of Dun & Bradstreet, has surveyed package

Promotion's spiral

(Continued from Page S-1)

goods and consumer product companies' marketing expenditures.

A draft report of the latest survey, pre-released to Advertising Age, indicates that consumer promotions accounted for 29% of marketing expenditures in 1986, a 1% drop from 1985 spending, but up from 24% in 1978, the first year of the study.

Combined with trade promotions—the special deals that manufacturers offer retailers to give their products an extra push—non-media promotion accounted for 66% of all marketing expenditures in 1986, up 1% from 1985 and up 8% from 1978. Media advertising fell to 34% of marketing costs in 1986 from 35% in 1985 and 42% in 1978.

The Promotion Marketing Association of America, New York, predicts total promotion industry expenditures will top $100 billion for the first time in the fiscal year from June 1986 to June 1987, says Robert D. Brandon, PMAA chairman and president of Beaumont-Bennett/-Brandon, Atlanta.

One reason for the increased interest in consumer promotion is advertisers' growng difficulty in finding a unique selling proposition with the onslaught of new products, brand extensions and me-too offerings.

Factoring in resistance from the retail trade to price increases, an increasingly popular way to differentiate products is through price reduction and value-added promotions, such as premiums and incentives.

"It boils down to who can shout the loudest," Mr. Brandon says.

The dramatic rise of non-media promotions for a major package goods marketer can be seen in promotional spending by Chicago-based Quaker Oats Co. At Quaker's annual meeting Nov. 12, William D. Smithburg, chairman-ceo, said the company's advertising and merchandising expenses as a percentage of sales over the last decade jumped from about 11% to nearly 20% on net sales of $3.67 billion for the year ending June 30, 1986.

Most promotions simply switch around price-conscious buyers and rarely attract new users.

Quaker's total advertising and merchandising budget for the fiscal year was just more than $700 million, of which media advertising represented about 25%, Mr. Smithburg added.

That means Quaker spent $175 million for advertising, compared with combined trade and consumer promotion of $525 million, says Ron Bottrell, senior manager of corporate communications.

"Our total marketing budget is going up and there is a shift in the way it is being spent, with media spending [falling as a percentage of the total] and trade and consumer promotion going up. But we've never been too precise about the way the pie is carved up," Mr. Bottrell says.

Compounding the reasons for a shift in favor of non-media promotion is the rising buying power of retailers through industry consolidation, and their greater access to almost instantaneous information on product movement through computerized scanner data.

Promotions give marketers an edge in gaining precious shelf space and advertising support from retailers. Trade promo-

Promotion's spiral

(Continued from Page S-2)

tions provide a push effect through distribution and retail channels, while coupons, contests and incentives create a pull effect by luring consumers into stores, analysts say.

Because the manufacturer picks up the tab for all deals and incentives, retailers have everything to gain by seeking out ever-sweeter deals. When done correctly, promotions build customer traffic, boost sales volume and result in incremental profits for the manufacturer.

However, reckless use of sales promotion could lead to an endless spiral of ever larger deals and incentives. The prospect of mortgaging a brand or category's future profitability is real, says Don Schultz, associate dean of the advertising department at Northwestern's Medill School of Journalism, Evanston, Ill.

Soft drinks, coffee and cookies, among others, already have fallen victim to frequent promotion cycles, Mr. Schultz says. The result is that leading brands simply trade market share on a week to week basis, depending on which is being promoted.

"It's a prisoner's dilemma. The big question is, who's going to be the first one to quit?" he asks. "In many categories, share of market is an unattainable goal. The key question is whether you make any money."

Mr. Schultz blames consumer product companies for creating a pay and bonus system that rewards executives for short-term tactics that move product volume rather than long-term strategies that build consumer loyalty.

"A ceo is evaluated based on sales volume for the last quarter. The executive who thinks ahead is a rare breed," he says.

What is needed is an integrated, long-term marketing strategy that examines promotion allocation by brand, category and markets on a localized basis, Mr. Schultz says.

"I'm trying to get people to look at promotion allocation on a market-to-market basis using scanner data and research rather than people just saying, 'This is the way I think it works.' The way it has traditionally been done is wrong," he says.

The first misconception is a belief in spending more money for so-called efficient national media buys, he says. "The assumption is that there is a national market. In truth, there is no national market."

Another misconception surrounds what makes advertising successful, Mr. Schultz says. Success depends on how good the advertising is, and whether it clearly explains the consumer benefit, creates emotional or rational involvement, and is exposed to the correct target market.

These principles frequently are misunderstood by marketers who use promotion to prompt a product trial, Mr. Schultz says. Research indicates that advertising, not sales promotion, convinces consumers to try a product.

Advertising explains the product benefits or creates an emotional attachment, Mr. Schultz.

Promotion's spiral

(Continued from Page S-4)
says. Most promotions simply switch around price-conscious buyers; they rarely attract new users, he says. Light users of a product also are more responsive to promotion than heavy users because they tend to stock up.

For established products, marketing success generally depends more on retail support than on the manufacturer's promotional activities, Mr. Schultz adds. A big placement in a free-standing insert is small potatoes compared to an end-aisle display in a major chain store, he says.

The latter trend was just what PepsiCo had in mind when the soft drink marketer took action to boost sales in the Southeast by teaming up with Eckerd Drugs in a promotion targeted at female heads of households.

Pepsi became co-sponsor in late 1985 with Clearwater, Fla.-based Jack Eckerd Corp. of the "Meet the Stars" sweepstakes. The game asked participants to answer questions about the TV soaps and offered a grand-prize tour of the sets and a chance to meet the stars.

"[PepsiCo is] looking for retailers who can offer adequate display space, good location in the stores and the right kind of product to back up a sale and meet demand," says Ronald Peterson, exec VP-marketing, Eckerd Corp. This is especially true if the product is high volume and needs a large display area, such as soft drinks, he adds.

Experts say retailer support will become critical in the future as consolidation places buying power in fewer hands. "We predict that by 1990, 40% of all commodity volume in grocery products will be controlled by 10 chains," says Jeff McElnea, president of Paramus, N.J.-based Einson Freeman, one of

(Continued on Page S-8)

From ugly duckling to golden goose

Independent sales promotion agencies may be victims of their own success. Their ability to lure dollars away from brand image advertising has made them among ad agencies' most attractive buyout targets.

In the past few years, major agencies have acquired some of the largest independents: Saatchi & Saatchi Compton Worldwide's buyout of the Howard Marlboro Group, New York; Grey Advertising's acquisition of Beaumont/Bennett, New York; Young & Rubicam's purchase of Rogers Merchandising, Chicago. On Jan. 1, the Australian agency Mojo MDA acquired San Francisco-based Allen & Dorward.

Other large agencies are either starting their own promotion agencies or are rumored to be negotiating to buy independents, observers say. By growing their own promotion agencies, they avoid the cultural clashes that sometimes occur when an entrepeneur-driven company is acquired.

"When you own a promotion agency, everyone and their dog is after you," says Dick McLean, president of The Merchandising Factory, a San Francisco-based independent promotion agency.

It's not hard to figure out the reasons for this. As large agency profit margins are squeezed by lower use of network TV, they are looking for new income sources. Profit margins generally are higher in sales promotion, he says.

"With the shift toward sales promotion, the ad agencies see potential revenue slipping through their fingers," says William A. Robinson, president of the Chicago-based agency that bears his name. "The acquisition of sales promotion agencies into general agencies is a horrible trend."

The lack of sales promotion capabilities can hurt an advertising agency in a market where clients are looking for more services, as illustrated by Doyle Dane Bernbach's loss of its Brown & Williamson Tobacco Corp. business last year.

"It makes sense for large agencies to offer a complete range of services to the companies that want them," says Barry E. Loughrane, chairman of New York-based Omnicom Group, which last year reorganized its three public relations companies and eight direct marketing agencies into two promotion agency networks under its Diversified Agency Services division. Omnicom now is making a concerted effort to market its promotional capabilities. "I think we can come a little closer, if not to one-stop shopping, at least to convenient shopping," Mr. Loughrane says. "It will never be a utopia where we can offer all clients everything they want," he adds.

Perhaps the key to big agency interest in promotional agencies is that more clients are looking for a return on their marketing investment, says Mr. Robinson. Where national media may take months or years to produce measurable results, various forms of sales promotion, such as coupons, sweepstakes and incentives, offer almost immediate response. An example is Quaker Oats' 1985 "Where's the Cap'n?" promotion, which resulted in a 50% increase in volume sales of Cap'n Crunch cereal during the promotion, Mr. Robinson says.

"One of the trends in our business is well-informed clients. In years past, it was enough that we did better than last year. Now the client asks, 'How many cans of soup am I going to sell if I spend an extra million on sales promotion?' " he says.

Ad agencies once thought of sales promotion agencies as the guys in plaid jackets who push pens and calculators with company logos. Now they view sales promotion as an indispensable factor in the integrated marketing mix, Mr. Robinson says.

"They like to come to a client without a bias as to any type of medium, whether it's sales promotion, public relations or agency work," says Joe Flanagan, president of Chicago-based Impact, a division of Foote, Cone & Belding.

"Sales promotion is the ugly duckling whose time has come," says Mr. McLean.

How did Ciba introduce Slow Fe® so fast? With the help of Comart.

When business considerations say "move fast," the best promotion isn't good enough if it isn't completed in time. That's why Ciba Consumer Pharmaceuticals called on Comart to help launch their SLOW FE® Slow Release Iron inside of 60 days. With over 30 years of experience in moving cases and moving minds, Comart knows how to make every word, picture and *minute* count.

Our entire program recognized one key fact. Persuading brokers, wholesalers and chain buyers to give Ciba rapid retail distribution meant the product story would have to *motivate*. And motivate it did. From the salesperson's training materials, to the selling tools, to point-of-sale merchandisers, every facet of the sell-in package said "make room" for SLOW FE. Result? The usual long lead times were overcome and a record sell-in was achieved by Ciba's consumer products marketers. If this sounds like your kind of creativity and thoroughness, your kind of results, call our president, Vincent Sottosanti, in New York.

Promotion's spiral

(Continued from Page S-7)
the nation's oldest sales promotion agencies.

"We must meet the needs of the retailer one-on-one," he says. With technology, retailers increasingly are able to adjust ordering patterns, and revise merchandising schemes with up-to-the-minute information. "You can't sell them a bill of goods. The retailer knows too much," he says. Manufacturers sometimes will go to great lengths to attract retailer support by making unusual offers. Which brings us back to Paddington's J&B promotion, and how the company could afford its expensive giveaways.

The promotion has all the elements: attractive benefit, rational involvement, a clear message and exposure to a well-defined regional target market. Slippage is the reason Paddington can afford the promotion, explains Mr. McElnea, whose agency dreamed up the idea.

Slippage is defined as the percentage of consumers who buy a product, but never follow though on a redemption offer. It is a key ingredient in many of the high-ticket offers that tie in with low-priced consumer goods.

In this case, Paddington required that consumers soak off the J&B label and return it to the company with a proof of purchase. The company took a gutsy risk that few consumers would soak the label off a premium product prior to emptying the bottle. And by that time, the offer would be long forgotten.

"I'd have to give Paddington credit for attempting this strategy. You're getting the benefit of incremental sales without having to pay for redemption," he says. "Payout is the ultimate criteria.

"It's not every day that a client is willing to take a bold risk," Mr. McElnea says.

If The MoneyBack Company Handles Your Next Consumer Rebate Offer, The Very Last Rebate Goes To You!

Are you being charged for rebate checks which are mailed out but which are not received or not cashed? It's an unarguable fact that every rebate program ever devised has yielded up to at least 10% in "float." That's money that is mailed out but never cashed. It belongs to only one firm: *yours*. Have you been getting it?

At The Fulfillment House, we account for every dime of your money because the only way we ever earn our keep is by charging a fair price for our services. No more, no less. And no low-ball fees either, just because of all the "float" that floats a fulfillment service's way. *No way!*

Neither do we become your partner when we work for you. Just your reliable Fulfillment House (capital letters, please). We never for a minute think that your money is our money the way most other fulfillment businesses do. We're just taking care of it for you for a while.

If undelivered or undeposited checks have been credited in the past to your account, then you may be in good (perhaps even great) hands. If not, try our hands. They won't be in your corporate pockets—just up to the knuckles in good, old-fashioned, honest hard work.

If you've never received a substantial check from your current fulfillment service at the end of every single one of your rebate programs, and if you're attracted by the prospect of producing 100% of your forecasted results with as little as 90% of your forecasted cost, you can stop further erosion of your money by letting us administer your next rebate project because...

When we handle your next consumer rebate offer, the last rebate goes to you!

Vic, Inez and Mel Poretz whose slogan is *"We're small enough to care, big enough to get the job done."*

Rebates challenge coupons' redeeming values

By Ronnie Telzer

Refunds are presenting a potent challenge to couponing's dominance as a sales promotion tool. Refund offers are attractive because they stimulate sales without the high costs and waste often associated with cents-off coupons.

"Everybody talks about couponing when they discuss the growth of promotion, but we continue to see declining redemption rates in couponing due to the glut of couponing activity," says Austin Chave, president, Promotion Dynamics Worldwide, New York, a subsidiary of Omnicom Group.

"Refunds have become a major promotion tool because they are consistently predictable in terms of results and liabilities. With refunds, you know what you're getting for your dollars," Mr. Chave says.

He cautions that overuse of refunds can be tremendously detrimental—particularly in noncommodity categories like cereals, cigarettes and soft drinks, where there is strongly perceived product differentiation. "Too much reliance on refunding can undermine and erode the positive brand imagery that can be built up by advertising. But when refunds are used wisely with a well-rounded mix of other promotion techniques, they can be very effective."

Donald C. Vaillancourt, corporate VP-corporate communications and consumer affairs, Grand Union Co., Elmwood Park, N.J., says, "Coupons and refunds are a plus in the marketplace. They enhance the sale of new products and stimulate the sale of other products that may be declining in the product life cycle." He says Grand Union has "no problem with manufacturers' refunds and rebates. But what we object to," he says, "is when competition forces us into double coupons [redeeming twice the face value of a coupon] —when the extra value of the coupon is paid from Grand Union's corporate funds."

Michael Rourke, VP-communications and corporate affairs for A&P, Montvale, N.J., says A&P also dislikes "the cost of double couponing, and uses it only in self-defense. Coupons are a way of life, which may have gone too far in the last few years. There are too many coupons for stores to handle efficiently."

"Unlike coupons, rebates don't affect us directly in terms of handling costs. We feel refunds can help stimulate product movement and help increase sales," he says.

According to Roger Shaw, exec VP/national sales director for Wilton, Conn.-based Manufacturers Coupon Control Center, a division of Dun & Bradstreet, manufacturers' coupon handling allowances went from 5¢ to 7¢ in 1980; an increase to 8¢ was rolled in through 1984.

"Promoting with Consumer Refunds," a study by MCCC, shows that the number of households using refunds has nearly doubled, from 27% in 1977 to 51% in 1984, the most recent date for which figures are available. That year the average number of requests per refunding household reached six—an increase from four refund requests per household in 1977.

Dan Ailloni-Charas, president of Stratmar Systems, an international marketing services company based in Port Chester, N.Y., attributes this growth to three market factors: the promotion and popularity of high-ticket rebates on items from autos to appliances; the increased desire for shoppers to obtain greater savings than those achievable through couponing alone and the proliferation of consumer swap clubs that foster awareness of promotional offers.

Mr. Ailloni-Charas emphasizes that consumers are not the only beneficiaries of refund promotions. "The big winners are manufacturers, who are spared the costs of coupon misredemp-

tion, which runs as high as 20%, and retailers, who generate incremental and multiple purchases without assuming the burden of double/triple couponing and coupon handling costs.

"Slow coupon redemption payments have become such a problem that some retailers have actually begun to deduct the money due them from payments for goods," he says.

In 1985 Stratmar Systems introduced a cooperative refund event called "Shoppers PayDay." Mr. Ailloni-Charas says it was designed "to make refund promotions easier and more attractive than ever before."

The program combines refund offers from several package goods marketers under an attention-getting banner headline that appears in daily newspaper food-day ads and "take one" flyers distributed via supermarket floor-stand displays. The ads and flyers invite consumers to "Get up to $12.75 [or other amounts] in cash, coupons and free merchandise and win a five-minute shopping spree."

Conducted on a regional basis from 1985 to 1987, the Shoppers PayDay program is expected to run nationally for the first time in mid-to-late 1988. The national program will have an estimated circulation of 40 million to 45 million, and will be supported by a strong merchandising program including local market radio and newspaper advertising, in-store shelf talkers and point-of-purchase displays.

"A cooperative refund event like Shoppers PayDay is highly efficient. It represents a tremendous amount of value which should attract a great deal of attention," Promotion Dynamics' Mr. Chave notes.

"Because Shoppers PayDay requires proofs-of-purchase, it virtually assures manufacturers that the proper products have been purchased," Mr. Ailloni-Charas says. "For the price of a

(Continued on Page S-20)

Brand loyalty fostered by video offer

A new cooperative promotion vehicle from Diamond Promotion Group Inc., New York, will offer the purchasers of selected package goods brands an unusual incentive—the opportunity to obtain free prerecorded videocassettes. According to Diamond Promotion Group President Andrew Cohen, the Diamond Entertainment Club was begun to foster long-term consumer brand loyalty—much like airline frequent flyer and retail trading stamp programs.

To participate in the program, consumers mail in an enrollment form available from point-of-purchase "take-one" pads or free-standing newspaper inserts, along with several qualifying proofs-of-purchase from participating brands. They will then receive a collection booklet and credit points in exchange for their initial proofs-of-purchase.

The collection booklet will list the point value of participating brands' UPC codes or proof-of-purchase seals, along with the number of points needed to qualify for each free video. The booklet also will contain pages where these proofs can be affixed. The more UPC codes or seals consumers obtain, the more videos they can order from a group of 40 or more titles.

Mr. Cohen points out that the open-ended program will provide an opportunity for advertisers to influence consumers' long-term purchasing habits instead of generating one-time sales, and will create a variety of cross-merchandising activities. He believes the program is far superior to coupon programs because it utilizes UPC codes or product package seals to ensure that the proper products actually have been purchased.

The program will be tested for nine months starting this fall in Baltimore—a city selected for its high videocassette recorder penetration. A national rollout is projected for 1988. Companies taking part in the Baltimore test will pay $10,000 to participate and will receive product category exclusivity, along with the first right of renewal for one-year contracts when the program is launched nationally.

Point values per proof-of-purchase will be determined by the participating brand, which is assessed at 10¢ per point fee—plus a 3¢ to 4¢ fulfillment charge for proof-of-purchase processing—when the contents of the collection book are redeemed.

Rebates challenge

(Continued from Page S-19)
single postage stamp, consumers mail the completed Pay Claim form and proofs-of-purchase to a single address and receive a single check that reflects the amount of their refund."

Refund offers in Shoppers PayDay can be more cost-effective for manufacturers than coupon or solo-refund programs. Mr. Ailloni-Charas says that a $1 refund offer in Shoppers PayDay that required five product purchases would cost the manufacturer $1 for the refund plus 16¢ for fulfillment—including postage and processing of five proofs-of-purchase.

In contrast, five product purchases made with cents-off coupons valued at 20¢ each would cost the manufacturer $1 for the face value of the coupons, plus 8¢ per coupon for the retail handling allowance and 2¢ per coupon for clearing-house charges. Thus, the manufacturer's cost for generating five product sales would be $1.16 for the refund offer vs. $1.50 for the coupon offer. Furthermore, total costs for a single, conventional solo-refund offer range from 25¢ to 30¢ per purchase.

Because refund offers are often made in response to competitive pressures, Mr. Ailloni-Charas says they should ideally provide "a competitively favorable price-value ratio for the product." Shoppers PayDay program research shows that money refund offers pull five times as well as product coupons for comparable values.

Terry Atkins, associate promotion manager, Camden, N.J.-based Campbell Soup Co., says "Participating in Shoppers PayDay makes your brand part of a highly coordinated event that's bigger than something you could do on your own." Mr. Atkins has tested the program with Campbell's Chunky soups, "red-and-white" soups and Franco-American Spaghetti-Os using a variety of refund and premium offers.

Campbell Soup will use Shoppers PayDay again, Mr. Atkins believes, when the program is introduced nationally so that "we can support the program with national events under our own umbrella."

Slippage is another important consideration working in refunds' favor. Stratmar's surveys indicate that the slippage factor for manufacturers' refund offers is about 2-to-1, which means that for every purchase proof submitted by consumers, two additional purchases were stimulated but never submitted for redemption.

"Clearly, slippage is what makes refunds work," Mr. Chave says, "since the manufacturer gains the purchase at no cost. Refunds are simple to communicate and easy for the consumer and trade to understand. They are very efficient due to the inherent slippage, and represent a very real, genuine value to the consumer."

Managing editor Cecelia Reed coordinated this report on Sales Promotion.

By R. CRAIG ENDICOTT

Strong returns from advertising agency networks overseas bolstered modest gains at home to push worldwide gross income to $8.65 billion, up 11.5%, and billings to $59.32 billion, up 11.9%, in 1986 over the prior year for U.S. advertising agencies comprising the AD AGE 500, according to the 43rd annual Agency Income Report published by ADVERTISING AGE.

Non-U.S. billings growth of 38.4% powered Young & Rubicam, New York, to worldwide gross income of $628.4 million on billings of $4.19 billion for the No. 1 spot in both categories, its perennial position. It far outdistanced No. 2 Saatchi & Saatchi Compton Worldwide, which had been No. 5 in last year's report.

Saatchi & Saatchi Compton Worldwide, with gross income of $490.5 million, held off a pack of contenders bunched around No. 3 Ted Bates Worldwide, a subsidiary of Saatchi's own parent, Saatchi & Saatchi PLC, No. 6 BBDO Worldwide, No. 5 Ogilvy & Mather Worldwide, No. 4 J. Walter Thompson Co., and No. 7 McCann-Erickson Worldwide. Gross income is media commissions, fees and markup for materials and services an agency charges the client.

Such pyrotechnics among the top 100 agencies on the chart tended to obscure other trends spotted in the compilation of the AD AGE 500. Non-traditional agency services—all the direct response functions, independent pr firms, point of sale units, etc.—continue to be spawned or bought up by the larger agencies. This supermarketing of services gives the agency greater capability and provides one-stop shopping for clients.

A measure of media spending by the 500 compared with various media costs indicates the total media ad dollar volume is no longer tied to prime time network television prices. Trends of the two virtually were inseparable from 1976 until 1984 when media billings of the 500 veered upward while prime time net TV plateaued. The spread that has developed between the two is a product of network ad erosion, reduced TV rates and increased spending by agencies in less traditional media such as direct response and point of sale.

There is slightly less concentration of ad monies in the big cities in this year's report, particularly New York and Chicago, the two dominant cities among agencies comprising the 500. Between them, they control 55% of the 500's total ad billings.

The top 100 agencies on the list represented 80.3% of total 500 billings in 1986, down from 81.5% in 1985. This reflects greater market segmentation and the advertisers' need to fine-tune marketing reach, and stronger ad contributions from growing "regional" centers like Minneapolis and Boston.

On the whole, agencies have become lean and mean. The performance level of the top 100 agencies as measured by employees per $1 million in billings (EPM) is improving—up 4.4% in average ratio to 1.56 EPM. Basically this is a function of greater ad budgets outpacing slight employment increases. Hidden in that EPM growth, however, is a decline in employment among the top 25 agencies. Mergers among these agencies have produced staff redundancies resulting in pink-slipping by some of the larger agencies, particularly No. 8 DDB Needham Worldwide and Bates' domestic operation.

International influence, spurred by currency gains traced to the declining dollar, agency acquisitions and new business, lifted non-U.S. income 19.2% to $2.15 billion—most of it recorded among the top 25 agencies which account for 65.9% of worldwide gross income of the AD AGE 500. This propped up a 7.6% increase in domestic gross income to $6.5 billion for the 500.

The international influence, spurred by currency gains traced to the declining dollar, agency acquisitions and new business, lifted non-U.S. gross income 19.2% to $2.15 billion. This propped up a 7.6% increase in domestic gross income to $6.5 billion by the AD AGE 500.

The 500 as a barometer of agency growth in 1986 accounted for about 47% of the $66 billion in U.S. media spending that is handled by agencies, according to media totals compiled nationally by Robert J. Coen, McCann-Erickson. Local newspaper, local radio and other minor media account for about $36 billion in additional advertising expenditures in 1986, most of it noncommissionable.

Actually, the 500's percentage of all media placed by nation's agencies is far greater, because 50 out of the 500 did not break out media, reducing the universe for the totals. Agencies submit their media reports to AD AGE on a voluntary basis.

The prevailing trend in the agency business toward bigness—considered a necessity to attract the big ad budgets, spread the risk of client pullbacks and pullouts, generate the capital needed to push for new business, offer one-stop shopping and develop efficiencies through economies of scale—held the industry hostage to a near-hysteria of buying and selling in 1986.

The top 100 agencies in the AD AGE 500 made 1986 a year Wall Street won't forget. Twenty-six of these agencies were hit by changes in ownership. But two big deals dwarfed the rest: The creation of Omnicom Group, a holding company for BBDO Worldwide, No. 8 DDB Needham Worldwide and several other agencies including No. 32 Tracy-Locke; the insatiable craving by Saatchi & Saatchi PLC for U.S. prop-

Verification

☑ Indicates that agency received signature of independent accountant verifying gross income figures supplied to AA. See story at right.

Agency compliance

☑ Advertising Age graphically spotlights—with a box and check—those agencies which complied with the publication's request to provide a signature from an independent accountant confirming the figures they are reporting for 1986.

The box shown at the head of this article accompanies the profile of each agency in compliance and is placed at the left of the corresponding agency on the charts beginning Page 8.

This is the third year the editors have requested verification, and the percentage of agencies has improved from one-third three years ago to 65% this year. There are several barriers to full compliance:

- Most agencies are private and in a highly competitive environment, and often are reluctant to release even gross income figures.
- Some agencies report on a fiscal basis and have not closed the books for the current reporting period. They return unsigned questionnaires stating their audit will not take place until after the publishing date. Editors then assure them that an audit is not required—an opinion rendered by the New York Society of CPAs. Many retort that "their" cpa firm would balk anyway at signing such a statement. The editors respond that a previous year's audit will do. The agency in general stands firm.
- Then some just beg to get by: "TAKE MY WORD FOR IT!" shouted one exec on the form where the signature is required. Another responded: "Figures should be accurate within a couple of bucks or so."
- One agency in the top 50 said it would not comply. Its figures would compromise its cpas because its report was only 90% correct. It planned to "fudge like everyone else."

Compliance has had the effect of reducing the number of agencies reporting. Stronger language used by Ad Age in requesting figures this year scared many off. Some 690 reports were processed last year compared with 544 this year.

Annual review

Kobrand Corp. Beefeater Gin, gained in late 1985, helped existing accounts contribute 63% of the year-to-year growth in billings in 1986 at AC&R, which is part of the Ted Bates network bought out midyear by Saatchi & Saatchi PLC. The agency gained a potential $10 million in annualized billings with the majority coming from Simmons bed mattresses, Johnson & Murphy, and Flashlegs Hosiery. Declines in billings amounted to an annualized $6 million with Arrow shirts accounting for the majority. To produce efficiencies in the Saatchi network, the agency is being consolidated this year with other Bates' units, Diener/Hauser/-Bates and Sawdon & Bess, into AC&R/DHB & Bess. AC&R brings its strengths in cosmetics and fashion to the new unit to be headed by its chairman-ceo Stephen Rose. Mr. Rose will be chairman of the exec committee and ceo at AC&R/DHB & Bess.

Annual review

The $13,533,000 in actual billings added at Admarketing, giving it a 7.9% increase in billings was split between internal growth and new business. Admarketing, a retail advertising specialist, expects billings growth to continue in 1987, since it gained a potential $26.5 million in annualized billings while declines were kept to $7 million annualized.

Annual review

After MCA and Ally Gargano got together last year and weathered an overall loss of 10.3% or $33.9 million in billings, including the loss of MCI's $50 million account and the departures of Schlitz malt liquor, Deneuve perfume and Frye Boots, the newly merged agency set about shoring up its operation.

About 60 people, mostly in duplicated administrative and accounting positions, were let go; three Ally Gargano creative directors also left to form Messner, Vetere, Berger & Carey Inc. But, by yearend, new business efforts began to show.

The agency gained Waldenbooks and Oral Research Laboratories' Plax, each billing about $5 million. It also added to its account list Connor Toys and the national introduction of Lipton's fruit teas.

U.S. accounts

Gained: Thomas J. Lipton, Fruit Tea; Waldenbooks; Plax-Oral Research Labs; Connor Toys.
Lost: MCI Communications; Avon, Deneuve Perfume; Stroh Brewery, Schlitz Malt Liquor; Frye Co.

Annual review

A&P, which has grown in billings at a compounded rate of 35% over the past 10 years, fell under that figure in 1986 but still reaped a 15.4% year-to-year increase of $20 million. Existing clients and new business contributed equally to the increase. New clients Cadbury ($15 million) and Norwegian Caribbean Lines ($15 million) played hot potato with A&P, by coming on board early in the year and jumping ship at the end of year. The agency expects new clients in 1987, Brown & Forman and Reebok, to stick around longer.

In addition to the main New York office, the agency has service offices in Atlanta, Dallas, Chicago, and Los Angeles primarily to service BMW dealers in those locales.

Readers' guide to agency profiles

Brilliant Advertising Co., headquartered in New York, answered a questionnaire sent to the agency by Ad Age in late December. If the editors had not heard from Brilliant by the questionnaire filing deadline in late January, they sent a second mailing to the agency. If there was still no response and Brilliant Advertising had gross income of $5 million or more, the agency was telephoned for a response.

The ☑ in the boxtop means the agency received the signature of an independent accountant verifying gross income figures supplied to Ad Age. See Page 6 for more information.

Media breakdown defines where an agency spends the clients' monies. The breakdown figures are percentages of the total U.S. capitalized volume per medium. The breakdown is provided in dollars ($000,000).

Most office billings breakouts were supplied on the questionnaire by agencies. Where they did not respond, agencies were asked to confirm Ad Age estimates based on published reports on individual markets and other criteria. For the most part, those who did not provide the necessary information on the questionnaire responded to the estimates.

Financial data are collected for gross income and billings and are in millions of dollars.

- Gross income: Agencies are ranked by gross income, which gives a better indication of an agency's size than billings. Gross income generally is the sum of three sources: The 15% an agency makes from buying media; a 17.65% markup for materials and services billed the client, and the fee charged the client—a form of remuneration popular with clients whose media market is low-cost in comparison with more costly media like tv or consumer magazines.
- Billings: Billings is short for "capitalized billings" and represents the sum of three types of agency activity: Total commissionable billings for ad space and time; gross billings to clients for materials like artwork, research and so on for services when supplied or performed by organizations other than the agency, and capitalized fees. Fees are capitalized by multiplying fees by 6.67. This makes an equivalent of fee income and commissions from media billings. For example, if commissions from media are 15%, then commissions multiplied by 6.67 would be the total media placed (6.67 is the quotient of 100 divided by 15). For non-U.S. shops in parent worldwide financial totals, Ad Age seeks figures representing only the parent's equity in the shop.

Ad Age based annual reviews on staff interviews with top executives at the agency.

in all media except newspapers, which were up slightly.

Annual review

In late December, Ayer joined the ranks of mergermania in purchasing Cunningham & Walsh, Direct Marketing Agency, and Reiser Williams deYong from Mickelberry Corp., New York for an estimated $30 million. These new purchases will add $275 million to total billings. The agency gained a potential $174.5 million in annualized billings in new clients, the majority coming from Continental Airlines, worth $60 million, Citicorp, corporate advertising, $55 million, and Citibank, N.A., $30 million. Annualized losses amounted to $24.5 million, with $15 million coming from the loss of Kraft Dairy Group business. The U.S. Army ($100 million billings) threatened full-scale evacuation in 1986 and made it reality early in 1987. Jerry J. Siano, formerly worldwide creative director, was made chairman of NW Ayer, N.Y., a post that also oversees Detroit and a new Houston operation that opened during the year to serve Continental.

Backer & Spielvogel	Chicago	53.0
Backer & Spielvogel	Hunt. Beach	8.0

Annual review

The agency was acquired in May by Saatchi & Saatchi PLC., London. The buyout triggered the sale early this year of the Chicago arm to local management because the merger had placed under the same umbrella competitors General Mills (Saatchi) and Quaker Oats (Backer & Spielvogel). The Chicago shop billed $53 million. The 17.7% growth in overall billings in 1986 is attributed to new accounts Hyundai, Arby's, and North American Philips, Magnavox division, as well as to new product introductions for existing clients, particularly Miller Brewing and Fisher-Price. During 1986, the agency brought in potential annualized billings of $70 million as compared with potential annualized billings losses of $11 million.

Annual review

Bates had a rough go in 1986. Following its purchase by Saatchi & Saatchi in May for $450 million, the agency lost nearly an entire management tier including Robert Jacoby, chairman, president-ceo, and lost $290 million in annualized business in the U.S., which amount to 15.3% of total U.S. business. Clients lost were Colgate, $100 million, Warner-Lambert, $68 million, Anheuser-Busch, Michelob, $50 million, Mars Inc., $37 million, General Foods, $25 million, Commodore International, $10 million. Bates under the leadership of Donald Zuckert will need to shore up its client base in 1987 to keep even with 1986 because many of the account losses did not show up in billings totals recorded for 1986, a year in which U.S. billings fell 1%. The potential value of accounts gained in 1986 is $21.5 million, while the agency in 1987 has gained a potential $40 million from client, Castle & Cook, Dole division. Acquisitions helped the bottom line in 1986, particularly on the international level with the addition of nine new shops which helped boost international buildings 14.7% over 1985. In the U.S., Bates purchased Kobs & Brady, a Chicago direct marketer. In other executive changes, M. Lawrence Light was promoted to president, Ted Bates International, and Ralph Rydholm came over to Bates from JWT, Chicago, to become exec vp, chief creative officer, Ted Bates Advertising/New York.

U.S. accounts

Gained: Ted Bates, New York—Prudential Bache; Xerox; *New Yorker.*
Lost: Commodore; Anheuser-Busch; Colgate Palmolive; Warner-Lambert; General Foods

Foreign accounts

Gained: Denmark—German Tourist Organization; Pirelli; Fyn Tours. France—Mars M&M's, Balisto; Beecham, Williams Shaving Gel; Germany—Mars M&M's; IDA Irish Development (industrial devel); Milupa slimming prods; Hong Kong—Effem Foods (Mars); Fortress Ltd. electrical appliances; Air New Zealand. Italy—Guaber household prods; Greenpeace (organization for the defense of environment). Netherlands—Mars Balisto; Whitehall household cosmetics. Norway—Budget rent-a-car; Avis rent-a-car; Bang & Olufsen. Portugal—D.H.L courier; Robert Bosch multiple prods. Venezuela—Perugina chocolate, Primor rice.
Losses: Denmark—Trykkeri. Germany—Olivetti personal computer; Henninger Bier. Hong Kong—Colgate Palmolive dental cream. Italy—Barbieri, Aperol aperitif. Netherlands—Gouda's Glorie margarine; Haagtechno Panasonic. Norway—Statoil (govt oil); Philips (white goods). Venezuela—Shulton Pinesol; Iqua Balance.

Annual review

BBDO Worldwide growth in the U.S. came largely from buyouts and growth from existing clients. This activity, which included the acquisition of Ingalls & Associates, Boston, and Richard Weiner Inc. (by Doremus), proved the growth margin as new mega-clients like Apple, Polaroid and Equitable basically restocked the business lost largely because of conflicts related to BBDO's merger into Omnicom with DDB Needham. Among clients lost, conflicts sent Stroh Brewery, Pillsbury and Quaker packing. BBDO has consolidated financial returns from its former subsidiary agencies which now fall under the Omnicom catch-all division, Diversified Agency Services. BBDO restated its 1985 figures to reflect current agency lineup.

U.S. accounts

Gained: Apple Computers; Polaroid; Equitable Insurance
Lost: Black & Decker; Stroh Brewery; Pillsbury; Quaker Oats; Almaden; Fisher Price

Foreign accounts

Gained: I.N.H., Gas & Oil Brands; Sony Espanol, tvs, videocassettes; Volvo
Lost: The agency did not report accounts lost

BBDO Chicago

BBDO Chicago reported gross income of $14,788,000 in 1986 on billings of $121,100,000. In 1985, it reported gross income of $13,841,000 on billings of $115,421,000.

The agency's 1986 U.S. volume consisted of $107,268,000 in media, $9,705,000 in materials and services and $4,127,000 in capitalized fees. Its 1985 U.S. volume consisted of $106,200,000 in media, $6,800,000 in materials and services and $2,421,000 in capitalized fees.

BBDO Chicago consists of five agencies—Chicago, Kansas City, Kan., Cincinnati, St. Louis, Avalon, Calif. Figures from these shops were consolidated into BBDO/Chicago.

In 1986, the agency gained: Alberto-Culver hair grooming aids, feminine hygiene spray, anti-static spray, cooking spray, sugar substitute. It lost: Quaker Oats LIFE cereal, Quaker 100% Natural, puffed cereals.

Annual review

New business gains, especially Sandoz, Alfa Romeo and new product assignments from Nestle's Carnation div accounted for 76% or $14,440,000 of billings growth while current clients, particularly Anheuser-Busch and Zales, contributed the majority of the remaining 24%. The agency gained a potential $100 million in annualized billings from new clients in 1986, while losing an estimated $37.5 million. Of the losses, $25 million coming from Anheuser-Busch Dewey Stevens Wine Cooler.

Annual review

The 37.1% growth in billings came from the opening of a media buying division ($19,166,000 in billings), and from new clients ($19,297,000), each claiming half of the $38,463,000 in growth. Some of the larger gains recorded by the agency: USAir and Freddie Mac, $20 million; Bailey Deardourff & Sipple, from in-house, $17 million; Sheraton Hotels (northeast), $4 million; New Jersey Transit, $3 million. The agency lost two $3 million accounts: Chevy Chase Savings & Loan and Philadelphia Electric. The agency opened new offices in Newark and Richmond, and entered into a joint venture in Chicago with McConnaughy Barocci Brown. Subsidiary billings are included in capitalized totals.

Annual review

Most of Burnett's 1986 increase in billings came from existing clients, with only 10% attributed to new accounts. Domestic gains from existing clients included an additional $50 million from Kraft, $25 million from P&G and $15 million each from Kellogg and UAL. Overseas additional business came from McDonald's in Argentina and the U.K., totalling $10 million. The agency is strengthening its hand in the direct marketing area, bringing in Jerry Reitman, formerly of the Reitman Group, to head up its new internal direct marketing operation.

Campbell-Ewald	Warren, Mich.	464.6
Campbell-Ewald	New York	77.0
Campbell-Ewald	Chicago	2.6

Annual review

Campbell-Ewald in celebrating its 75th anniversary in 1986 became wholly stateside-oriented by divesting its overseas operations to Lowe Marschalk, both agencies of which are part of Interpublic. It also sold its Richmond office, closed shops in Boston and Pittsburgh and reorganized operations by placing non-traditional ad services in a new division called CECO Services. CE expects a healthy 1987, in part because it gained a potential $27 million in annualized billings against annualized losses of $5 million.

Annual review

Existing client base provided 55% of the year-to-year billings growth at this Ted Bates network agency, with especially good gains coming from Kroger, ($13 million), Lowe's ($9 million), Anderson, General Mills. New business gains added the remaining 45%. New business also brought a potential $60 million in annualized billings, while losses were held to $14 million with the majority coming from the departure of Montgomery Ward ($4 million) and Pentax ($4 million).

($ in millions)	City	Billings
Chiat/Day Advertising	Los Angeles	141.0
Chiat/Day Advertising	San Francisco	97.1
Chiat/Day Advertising	New York	76.0

Annual review

Despite the exit last September of Apple Computer and its $40 million in billings, Chiat/Day expects 1987 billings to increase through new account gains and internal growth. Over-all, $55 million in annualized billings left the agency, but a potential $45 million in annualized billings was regained. The biggest gainers were Quaker's Golden Grains, $10 million, Kitchens of Sara Lee, $9 million, and Ricoh office products and cameras, $9 million. Since the beginning of 1987, the agency has added a potential $14 million in annualized billings from accounts National Car Rental, Royal Caribbean Cruises, and Fox Broadcasting. The agency expects existing clients, World of Wonder, toys, Nynex, Yellow Pages, MaxiCare HMO, Home Savings & Loan, and California Cooler to continue their high growth patterns in 1987.

U.S. accounts

Gained: Amblin Entertainment; Foster Farms; Berelson, sea legs; Quaker, Golden Grains; Rayton Fissore; Arrow Shirts; Ricoh Office Products & Cameras; Rockport; Kitchens of Sara Lee.

($ in millions)	City	Billings
Cole & Weber	San Francisco	10.0
Cole & Weber	Seattle	53.0
Cole & Weber	Salt Lake City	8.0
Cole & Weber	Los Angeles	9.5
Morton/Cole & Weber	Portland, Ore.	10.0

Annual review

Client cutbacks in spending and a drop in tv rates accounted for the 18% decline in U.S. billings. Brisk business in its Canadian operation led to a 3% increase in international billings, but it did not stem the overall loss of Cole & Weber's total volume, down 12.8% from 1985. Six new accounts brought in $10 million in new billings, led by FHP, an HMO.

Cole & Weber indicated budgets of existing clients are moving back toward pre-1986 levels, suggesting a stronger performance for the agency in 1987.

1986 billings by major office

($ in millions)	City	Billings
BBDM/C&W	Chicago	22.3
Cunningham & Walsh	New York	159.7
Direct Marketing Agcy	Stamford, Ct.	60.4
Reiser Williams deYong	Irvine, Calif.	31.9

Annual review

In December, C&W Group, then a subsidiary of Mickelberry Corp., agreed to merge forces with NW Ayer for an estimated $30 million. Included in the sale were C&W, Direct Marketing Agency, and Reiser Williams DeYong. The merged agency is expected to retain the NW Ayer name. After the transaction, Mickelberry Corp. will be left with Laurence, Charles, Free & Lawson and BBDM/Cunningham & Walsh, Chicago. The decrease in 1986 billings reflects the 1985 loss of Mitsubishi Motors ($35 million), the selling of the San Francisco office and resulting resignation from the Qantas account ($5 million), and the closing of offices in Dallas and Fountain Valley, Calif. Billings could rise dramatically in 1987 from the potential new business gains of $40 million annualized, mostly from P&G's Duncan Hines contributing the majority, against annualized declines amounting to $14 million, with the resigned Ricoh account comprising the majority.

Annual review

DMB&B in 1986 continued to consolidate its operations following the merger in mid-1985 of D'Arcy McManus Masius and Benton & Bowles. The combined unit, which suffered a 5.8% decline in billings in 1985 over the prior year as a number of clients withdrew their business citing account conflicts, eked out a worldwide gain of 1.3% in 1986 after factoring a 7% gain in foreign billings against a decline of 2.5% in U.S. billings. The agency acquired offices in Japan, Mexico, Saudi Arabia and Thailand to buttress its global presence, but withdrew from Atlanta, Minneapolis and Houston where it had small offices, and in February, 1987, sold Poppe Tyson to Lorimar's USAdvertising.

Annual review

Positioning itself to be a leading independent Pacific Rim agency, DJM&C had a 6.1% year-to-year billings increase, fueled 80% by existing clients, notably Glendale Savings & Loan, Toyota local dealers, McDonald's co-op in central Calif., and Portland, and Ralph's. New business gains accounted for the remaining 20%. During the year, DJM&C gained a potential $8 million in annualized billings with KFWB and McDonald's co-op of Milford contributing the majority, while annualized billings declines amounted to $4 million, mostly from Ole's Home Center, an account taken in-house by Wickes when it purchased the business. In March, 1987, DJM&C merged its Hispanic advertising subsidiary, Ad Latina, into Ferrer/Ad America, Los Angeles, a joint venture partnership with the Mexican agency Grupo Ferrer.

Annual review

The merger DDB Needham network under Omnicom, gave Chicago-entrenched Needham a stronger New York base, and DDB help to deal with its financial, management and creative problems, but it also effected lost billings of $200 million. Needham lost its Los Angeles base (now Rubin Postaer) in a management buyout and with it, American Honda that would have conflicted anyway with DDB's VW business. DDB closed Fletcher/Mayo, Atlanta, when Union Carbide pulled up stakes. Client conflict could be cited in Nabisco and IBM's exit from DDB.

Annual review

DFT&P's year has been marked by takeover, controversy and continued recognition of its creative product. Figures for 1986 have been estimated by Ad Age since the agency preferred not to respond because of the confusion resulting from the takeover by WCRS; its takeover of accounts from the former HBM/Creamer-New York; and the creation of a new subsidiary, Della Femina & Udell, which specializes in beauty and fashion accounts. Billings are estimated at $150 million for 1986. Figures for 1987 will reflect the acquisition this January of the old HBM/Creamer, New York, accounts, totaling around $70 million. Those accounts are A&W Beverages, Sheraton Hotels, Viewmaster/Ideal, Hercules chemicals, Ilford film, Mobil Oil's non-consumer oil products, Raytheon, Hershey Food's pasta products, and Alexander's Department Stores. The agency lost its vice chairman-coo, James D. Travis, to Hal Riney & Partners.

DFS Dorland World	New York	709.4

Annual review

Clients at DFS, which merged in April with Britain-based Dorland Advertising, a wholly own subsidiary of Saatchi & Saatchi PLC, tightened their belts, in effect, forcing down total gross income and nudging up billings only slightly. Of the U.S. totals, 60% of the growth in billings, or $23.7 million, came from existing clients and 40% from new clients. The small 4.6% year-to-year growth in U.S. billings was influenced by an estimated $97 million in annualized billings leaving during 1986, including $30 million from P&G's Luvs and Bounty, and $15 million from Cadbury Chocolates. These left, citing account conflicts resulting from the merger. Another $40 million in annualized billings walked out the door with Wendy's, but a total loss was averted as media planning and buying were retained. However, new business gains—Northwest Airlines, RJR/Nabisco biscuit div, North American Philips Lighting, and Helene Curtis, Finesse hair care prods—accounted for the majority of an estimated $119 million in annualized billings brought in during 1986. The agency expects a stronger billings year in 1987 as the full impact of new business gains come on line.

U.S. accounts

Annual review

This agency, which is merging into a new identity to be known as AC&R/DHB & Bess within the Ted Bates empire, enjoyed a 16.8% increase in billings, going from $112.9 million in 1985 to $131.8 million in 1986. Spot tv and newspaper ads saw the biggest increases in spending. No accounts were lost, and six new clients were added, with Foster's Lager leading the pack. DHB brings its strength in entertainment to the new agency, the president of which will be DHB's president, Hank Weintraub.

U.S. accounts

Gained: Foster's Lager; Cinetel Pictures; Vestron Pictures; Ariel Vineyards; MGM Home Video. The agency did not report accounts lost in 1986.

Annual review

In August, the group purchased Response Communication, a direct marketer-telemarketer for retailers and financial institutions, which accounted for 50% of the billings growth in 1986. The other billings gains came equally from existing and new clients with Bell Atlantic and Mervyn's the largest gains. The largest loss during 1986 came from Chase Manhattan Bank. In 1987, the agency expects its strong billings growth to continue as existing clients begin to use direct marketing more aggressively, and new clients look for more effective ways to get messages to target consumers.

U.S. accounts

Gained: Bell Atlantic, telecommunications; Key Banks, ITT Information Systems, micro computers; "Frequent Traveller" Newsletter; Brooks Bros.; Ann Taylor, retail; Mervyn's, department stores; The Limited; Crosslands Savings Bank; Prudential Insurance, financial svcs

Lost: Chase Manhattan Bank, financial svcs; InterBusiness Card, trade exchange; Woodward & Lothrop, dept stores; Chevy Chase Bank; CPI, technical education

W.B. Doner & Co.	Detroit	101.0

Annual review

Doner celebrated more than its 50th anniversary the first of this year; it revelled in generating $37,437,000 in new business, split equally between internal growth and new business. The vibrancy of the agency can be seen in the acquisition of Lou Beres & Associates, Chicago, and the potential $48 million in annualized billings gained against annualized declines of $11.4 million. The billings gains came from additional assignments from N.A. Philips, new clients Giant and Turtle Wax, existing clients Eckerd, McCormick & Klondike, and Standard Oil. Additional assignments from N.A. Philips and Standard Oil helped the Cleveland office explode 376% in year-to-year billings growth.

Doremus & Co.	Chicago	14.0

Annual review

This 83-year-old subsidiary of BBDO Worldwide performed like a young upstart in 1986, posting its best results in the past three years and flexing its muscle in all three parts of its business: Financial services, pr, and general advertising. A rapid take-off of its office in London also sent overseas billings to $6.2 million from $1.4 million in 1985. The pr division, through mergers with Richard Weiner and Porter Novelli, has become the third largest pr company in the U.S. The Weiner shop has expertise in special events and packaging, and Porter Novelli has sizable geographic coverage and pr experience in the U.S. Overseas, the London business is expected to continue to climb, while the Tokyo office develops more slowly. Tokyo is an investment to serve client needs there and may show some income in 1987. Apart from any new business in 1987 from new clients, Doremus expects to see billings top $300 million from its existing clients.

Annual review

The combination of advertising budget cutbacks and the Japanese yen appreciation caused domestic billings to decline 8.4%, but currency translations helped overseas billings increase 15%. Although DYR sold in December its N.Y. office to Dentsu-owned DCA because of client conflicts, the agency will re-establish a N.Y. presence. DYR opened an office in China, and expects the European and Asian operations to continue their good growth.

Eisaman, Johns & Laws	Chicago	16.9
Eisaman, Johns & Laws	Los Angeles	48.3
Eisaman, Johns & Laws	Houston	24.1

Annual review

Eisaman, Johns & Laws' existing clients and new business contributed equally to the 4.9% growth in billings in 1986. A gain of $4 million in annualized billings from Neutrogena, additional product assignments, and general spending increases from existing clients, particularly Pennzoil, should spur billings in 1987. The agency did not lose any accounts in 1986.

Annual review

The 17% year-to-year billings growth recorded in 1986 was divided equally between new business, notably U.S.A. Wet, and existing clients, especially additional assignments from Wendy's. During the year, Evans gained a potential $25 million in annualized billings while declines where held to $15 million annualized with Triad accounting for the majority. The agency bought in 1986: Arnold, Foster, Sherrill & Carrithers, Dallas, in October; Pollack & Norman, Denver, in May; Morris & Paller, Atlanta, in April; and Bean Marriott, Seattle, in September.

Fahlgren & Swink	Southeast div	47.6

Annual review

A 35% growth in billings came from the acquisition of D'Arcy Masius Benton & Bowles' Atlanta office, existing clients, and new business. Main contributors to the annualized billings gains of $30 million where new accounts Dairymen, Drackett Co., and Georgia Federal Bank. Annualized losses amounted to $4 million. The agency sees its packaged goods accounts, Drackett, Big Drum ice cream, and Worthington Foods, as growth builders in 1987.

U.S. accounts

Gained: Drackett Co., Bristol-Myers; O-Cedar Mops & Brooms; Twinkle, new prods; Kardex Systems; Information Storage & Retrieval; Elanco Products, Eli Lilly; Worthington Foods, Morningstar Farm frozen foods, Scramblers, Natural Touch; American Pioneer Savings Bank; Amoco Foam Products; Dairymen, Inc., Flav-O-Rich and UHT divs; Fairfield Communities, Inc.; Georgia Federal Bank; Georgia Power Economic Development Dept.; SDRC, MCAE Software; Silver Dollar City Corp., Dollywood, Silver Dollar City, White Water; Southeast United Dairy Industry Assn.; Southern Co. Annual review

Highlights of 1986 were the arrival of Lee Jeans' $20 million account, Scott fertilizer ($5 million), and Wolverine's $7 million account split between Brooks running shoes and Hush Puppies, not to mention the Clio's and New York Art Directors' awards. Lowlight was the ZAP Mail work that never materialized, emotionally a big disappointment when Federal Express canceled ZAP before it began. In February, 1986, Scali, McCabe, Sloves of the Ogilvy Group purchased 75% of Fallon.

Annual review

FCB, active on the acquisition and divestiture front in 1986, purchased Leber Katz & Partners in New York and folded its New York operations into that unit giving FCB better geographic balance, and bought agencies in Thailand, Montreal, Australia, Turkey, Venezuela and Mexico. The agency toward the end of the year sold North Castle Partners in a management buyout, Carl Byoir & Associates, and Deutsch, Shea & Evans. The wash of billings gained and lost favored the gains which totaled $380 million annualized over losses of $230 million. Of the growth of $186 million in U.S. billings, 40% came from new clients, including sizable gains in annualized billings from Colgate-Palmolive ($70 million), RJR's Salem cigarettes ($35 million), Nabisco Brands ($25 million), No-nonsense Hoisery ($20 million), Fred Alger ($15 million), and Citicorp's Diners Club ($10 million) among others. Existing business contributed 60% of actual growth. During the year, Norman Brown became chairman, succeeding John O'Toole who retired.

U.S. accounts

Gained: Fred Alger; Colgate-Palmolive; Citicorp, Diners Club; RJR-Nabisco; NutraSweet; Lipton; Berlin Tourism; Ciba-Geigy Pharmaceuticals; Frank's Nursery & Crafts; S.C. Annual review

Gaining the $20 million Jaguar and $8 million Amaretto di Saronno accounts highlighted 1986's performance, and maturation of the new business will spell growth for 1987. Although the loss of IBM came as a blow, new business and increased spending by current clients offset losses, enabling billings to hold steady at $105 million and income at $15.8 million. The agency is passionately committed to staying independent and mid-size, believing that it can offer clients a commitment that large publicly held agencies cannot.

Annual review

Billings growth was flat and total gross income declined because of the structure of certain client contracts in 1986. A bright spot was the potential new business gains of $15 million in annualized billings with the majority coming from Kraft Foods, while declines amounted to $3 million annualized with Schenley Imports comprising the majority. Billings growth during 1987 should come from Kraft and Quaker Oats, new introductions from L'Oreal, and existing clients Fuji Photo Film and Nintendo, videogames. In the London office, Robert E. Geers returned as creative dir of Geers Gross Ltd.

Gross Townsend	New York	34.0

Annual review

Grey, which built up worldwide billings by 18.7% in 1986, got a big lift from its international sector in which billings grew by $196.1 million, or 38.6% from 1985, a credit to overseas expansion of sales promotion and direct marketing, and the opening of new international offices for a net gain of 34 offices abroad. New business stateside was credited with 67% of the domestic growth in billings of $127.4 million, and existing clients the rest. Big gains came from Strohs ($50 million in annualized billings) and Quaker State ($12 million annualized). Losses were paced by Northwest Airlines ($50 million annualized). Existing client P&G pushed through $35 million more in billings for Crisco, ABC Entertainment added $25 million more and Alberto-Culver $20 million. In October, Grey purchased Gross Townsend Frank Hoffman and sold Grey Medical to BJK&E. Partial year contributions from those units are included in Grey's returns.

1986 billings by major office

($ in millions)	City	Billings
HBM/Creamer	Boston	142.0
HBM/Creamer	Chicago	28.0
HBM/Creamer	Pittsburgh	97.0

Annual review

With the takeover of HBM/Creamer by WCRS Group PLC in September and the subsequent spinoff of its New York office, the 1986 figures do not reflect the banner year it was in fact for the agency: Boston had the best year in its 12-year history, Pittsburgh added some $20 million in new and increased business, the agency acquired Schneider, Parker & Jakuc and its $20 million billings, and the design and direct marketing units expanded. Morale remains high, new business activity is brisk, and hiring of new people continues. A major factor in maintaining the high morale has been the appointment of 16-year agency veteran Mary Moore as president of the Boston office. Accounts at the New York office were divided between WCRS's Della Femina Travisano & Partners and newly formed independent Pedone & Partners Inc., which opened officially in January, 1987, and is headed by Michael F. Pedone, former president of HBM/Creamer New York. Della Femina got about $70 million in annualized billings from nine accounts, led by the $20 million Sheraton Hotels division of ITT and A&W Root Beer. Pedone & Partners walked away with $18 million in billings on 13 accounts: Cumberland Packing Corp.'s Sweet 'N Low; W. Goebel's Hummel figurines; Palm Beach Inc.'s Evan-Picone and Palm Beach clothing; S.T. Dupont division of Gillette; Knomark's Ty-D-Bol, Primo and Esquire shoe polishes; Tradex, discount brokerage; Shaw-Ross International's White Horse Scotch; Florasynth, flavors and fragrances; and the food service and military advertising for N. Dorman's cheese, Lindy's cheesecakes, T.J. Lipton's teas, Chesebrough-Ponds, and Colgate. Since the takeover by WCRS, HBM/Creamer's pr division has been established as an independent subsidiary, Creamer Dickson Basford. HBM/Creamer with its main office in Boston also has offices in Pittsburgh and Providence, as well as an account service office in Hartford.

($ in millions)	City	Billings
HCM	Los Angeles	22.4
HCM	Chicago	80.4
HCM	New York	69.0
HCM	Denver	0.2
HCM	Pittsburgh	5.5

Annual review

Domestic growth of 7.4% in billings

was split between new clients (53%) and existing ones (47%) at HCM, owned 51% by Paris-based Eurocom and 49% by Young & Rubicam. Overseas, billings growth continued at a healthy 15% clip with the offices in France particularly showing good health. The agency domestically gained $22 million in annualized billing, the majority coming from Peugeot Motors, while losing $16 million in annualized billings from the Jack-in-the-Box. The agency looks for continued growth from clients, Dannon and Blue Cross & Blue Shield and several clients gained in late 1986. The agency continued its consolidation of offices by closing its Pittsburgh unit.

Annual review

The precipitous drop of the dollar in 1986 led to reductions in ad spending by clients, "21" Brands and St. Pauli Girl, who market imported beers and wines, which in turn reduced Henderson's predicted 9% increase in 1986. Vigorous new client business offset these reductions, giving Henderson a year-to-year billings increase of 2.2%. With the leveraged buyout of the agency complete, the next level of management was promoted from within. In March, 1987, Bob Jones joined the agency as executive creative director, coming from the JWT shop in Atlanta. Long-range plans include remaining independent, doubling in size in the next five years, and possible acquisition of another agency outside South Carolina. Henderson serves clients from New York to Florida and west to Indianapolis. The agency predicts a 5% increase in business for 1987.

Annual review

New business gains during 1986 accounted for 75% of the billings growth while existing clients added the remainder. Over the course of 1986, the agency gained a potential $7 million in annualized billings with the majority coming from Resorts International. The annualized billings value of accounts lost during the year amounted to $200,000. In the early months of 1987, the agency gained the estimated $5 million Ciba-Geigy business, which along with the product expansion plans of Riunite, fruit wines, and H.P. Hood, dairy products, could help the agency top 1986's nominal 2.3% billings growth.

1986 billings by major office

($ in millions)	City	Billings
HHCC	New York	4.3
HHCC	Boston	187.7

Annual review

The acquisition of the London agencies Aspect, now Aspect Hill Holliday, and Woodman Chapman Hudson, helped fuel a 95% increase in overseas billings. HHCC has offices in Frankfurt, Hong Kong, London, and Paris, and affiliates in Sydney and Toronto, billings from the latter two of which were not consolidated. On the domestic front, existing clients, notably John Hancock, accounted for 70% of 1986 billings growth, while new clients, Bank of New England, L.L. Bean, and Revlon contributed the remaining 30%. HHCC expects good billings growth in 1987. It gained a potential $60 million in annualized billings with Bank of New England and Revlon contributing about $20 million each, while declines in annualized billings amounted to only $23.5 million, with BayBanks and Gould representing $8 million each.

Annual review

Highlights at Ingalls/Quinn & Johnson were the consolidation of the two agencies under the BBDO Worldwide (Omnicom) umbrella and the move to new headquarters. Conflicts caused by the Q&J purchase of Ingalls produced a drop of $10.2 million in annualized billings; however, it strengthened the delivery of account services and attracted $6.5 million in potential annualized billings, the majority of which came from Putnam Financial services and *Boston Herald*. Sizable new business acquisitions, and a 5-10% increase in ad budgets of existing clients are anticipated for 1987.

Annual review

To mark its 25th year as a medical advertiser, the agency added a consumer products division and expanded overseas, entering the European market through its new Paling-Ellis/KPR operation, purchased in 1985, with offices in London and Brussels. The international business offset the more sluggish domestic side which rose a mere 1%, giving an overall 10% increase in billings in 1986. The agency got a number of new products from one of its biggest clients, Johnson & Johnson. KPR moved with its parent, Doyle Dane Bernbach, to Omnicom last year when DDB merged with Needham, and is now part of the D.A.S. group at Omnicom.

($ in millions)	City	Billings
Keller-Crescent Co.	Dallas, Irving	22.4
Keller-Crescent Co.	Evansville	86.5

Annual review

On Jan. 1, 1987, the agency was purchased from American Standard in a management-led leverage buyout. Billings growth patterns tied to the existing client base are expected to continue. Such internal growth in 1986 came to 90% of overall billings growth. One obstacle to overcome will be restoring the loss of $25 million in annualized billings from clients in 1986, notably Lincoln Manufacturing and Wayne Dalton. On the upside, $20 million in annualized billings came in the door with new clients in 1986, particularly Eureka Co., Pinkerton Tobacco and Amoco Oil, lubricants div.

Annual review

A new entrant to the ranks of the top 100 agencies by gross income, Kenrick's 1986 growth came 75% from existing clients like Sandoz agribusiness and 25% from new clients, notably ConAgra frozen foods, and KangaROOS. During 1986, the agency gained a potential $4.8 million in annualized billings, while losing $4.6 million, some $3.1 million of that from Elanco. Kenrick, which has 9 offices in the St. Louis area, opened an office in Springfield, Mo. In the future, the agency wants to expand its consumer products accounts in order to avoid having to lay off people as it did in 1986 in the direct marketing and direct mail areas.

Annual review

The 28% growth in billings came largely from American Honda Motor Co.'s Acura div, which introduced the Acura automobile in March. New business from DuPont, electrical div, Melitta, coffee prods, and local Acura dealerships have the potential to produce $27 million in annualized billings in 1987. Account losses on an annualized basis where kept to an estimated $2.5 million.

U.S. accounts

Annual review

As billings growth slowed to a less dramatic 15.2% from 35.2% in 1985, the drama at this direct marketing agency reverted to its ownership. After wedding its fortunes to Ted Bates Worldwide in April, the agency soon found itself in another camp when Bates was bought out by Saatchi & Saatchi. Some 78% of billings growth came from new clients, particularly Fidelity Investments and Tupperware. It lost an estimated $4 million from client departures. The agency opened a San Francisco office.

Annual review

Billings in 1986 got a shot in the arm when Tom Lawson came over from Rosenfeld Sirowitz to be president and brought along a potential $35 million in annualized billings from regional McDonald's franchises. For the year, new business provided 85% of the billings increase at this Mickelberry Corp. subsidiary, while existing clients added the remainder. New business in fact is expected to generate $70 million in annualized billings against a decline of only $3 million from Del Laboratories.

Profiles with a checked box (☑) indicate an independent CPA or accounting firm has reviewed the gross income reported and signed a statement of verification supplied or approved by Advertising Age. See story on Page 6.

In 1987, the agency sees billings growth coming from Hearst Publications, Gorton's and McDonald's regional franchises and Thompson Medical. To better service the McDonald's business, field offices where opened in Bloomfield Hills, Mich., Indianapolis, and Madison, Wis.

U.S. accounts

Gained: Air France; Abbott Laboratories, new prods; American Tobacco, Pall Mall, Tareyton; Clairol Inc., condition prods; Drackett Co., Behold; McDonald's Owner/Operators Assns, Indianapolis, South Bend, Fort Wayne, Terre Haute, Madison, New York, Outstate, Quad; McDonald's Advertising Assn., Milwaukee; McDonald's Operators Assn., South Eastern Mich.; Thompson Medical, Dexatrim, Sleepinol, NP 27, Sportscreme, Asper Creme, new prods

Annual review

New client gains provided 70% of the $4.75 million billings gain recorded in 1986 while existing clients added the remaining 30%. This trend should continue in 1987 as the agency picked up a potential $6.5 million in annualized gains with clients Pennsylvania Blue Shield and Sabena World Airlines contributing the majority, while annualized declines amounted to $1.5 million with the majority coming from Resorts International. During 1986, the agency opened a new pr division in N.Y. to complement its 3-year-old Philadelphia pr unit. This month, Grayson F. Lathrop is to retire as chairman.

Annual review

The 43.3% increase in billings for this Grey Advertising subsidiary came on the strength of existing clients, Subaru of America, Subaru distributors, Seagrams and New York Air, before the latter switched to another shop. New business accounted for 25% of billings growth with Subaru distributors of Southern California contributing the majority. The loss of New York Air was especially painful as it accounted for $10 million in annualized billings. The potential $6 million in annualized billings gained from Southern California Subaru distributors will help bolster 1987 billings. Offices outside New York are primarily field offices to provide account services for Subaru distributors.

U.S. accounts

Annual review

Two-thirds of the billings growth during 1986 came on the strength of existing clients, particularly Dean Witter, Sony, Contel and Chemical Bank. The remainder came from new business. During the year, the agency gained a potential $51 million in annualized billings, the majority coming from IBM; it lost $8 million in annualized billings, most from Parfums Sterns. Growth should continue through 1987 as new clients complete a full year of spending.

Annual review

Nearly all growth in billings in 1986 came from new clients, particularly McNeil (Medipren: $30 million annualized) and Ponderosa ($15 million). Xerox ($30 million) came in at yearend, the latter being a coup for the fledgling direct marketing unit, an emphasis that has led to the creation of LM's Marketing Group. LM nabbed Parker Pen and Poloner, also served by LM's English connection. LM U.S. is 70% owned by Interpublic and 30% by Lowe Howard-Spink & Bell PLC, parent of Lowe Marschalk Worldwide.

Annual review

A boost of $12.5 million in billings from existing clients and $25.7 million from new business kept the agency on a high performance level and in October, 1986, lured a successful suitor, Scali, McCabe, Sloves, a member of the Ogilvy Group. Major new clients included Signet Banking Corp. ($6.5 million in annual billings) and Blue Cross Blue Shield of Virginia, worth $3 million. A large roster of direct response clients came aboard with the acquisition of Stenrich Group in early 1986, a connection that now serves as Martin's New York office. Martin also has a service shop in Jacksonville, Fla. The big growth in 1986 has led the agency to estimate billings of $107 million by early 1988.

Annual review

A shot in the arm from St. Luke's-Roosevelt Hospital Center helped edge billings upward at this 61-year-old medical advertising agency. During the year, the agency lost an estimated $4 million in annualized billings while gaining only a potential $2 million. To expand its services, the agency formed a new special projects division named Triclinica Communications. Billings gains for 1987 hinge in part on FDA approval granted existing clients for a number of new drugs under review.

Annual review

M-E had its best new business year, attracting $182 million in annualized gains against $32 million in annualized losses. The Interpublic subsidiary's largest annualized gains were Coca-Cola megabrand ($70 million), Black & Decker ($35 million), and RJR Nabisco ($20 million), while the largest decline came from Coca-Cola's Tab ($20 million) that was swapped with sister agency SSC&B:Lintas for the megabrand. ME bought Ohlmeyer, some Miller-Reid shops and Sieber & McIntyre, and formed sales promo, regional marketing and creative troubleshooting divisions.

1986 billings by major office

($ in millions)	City	Billings
Medicus Consumer	New York	11.5
Medicus Intercon	New York	47.3
Science & Medicine	New York	23.6

Annual review

Continued growth in new business acquisitions abroad and increased spending by existing clients at home largely accounted for a year-to-year billings improvement of 14% at this DMB&B subsidiary. Billings growth in its U.S. Science & Medicine Group was 73%. Abroad, capitalized billings growth was particularly strong in Hong Kong and the U.K., up 76%, and Japan, up 21%. The agency sold its office in France, closed several others, but added staff over-all. It established a new division in New York, Medicus Consumer Communications. Heavy activity continued to pump spending into point-of-sale, which jumped 74% to $60.9 million in billings, and direct mail, up 13%.

1986 billings by major office

($ in millions)	City	Billings
Mojo MDA-A&D	Houston	7.1
Mojo MDA-A&D	San Francisco	68.1

Annual review

In late December, 1986, the agency was purchased by Austrialian agency Mojo MDA (Monahan Dayman Adams) for $9 million. The billings gain also was $9 million for the year, with $7 million of that coming from new business. The agency gained a potential $15 million in annualized billings, most of which came from Bank of America, but lost $25 million in annualized billings, including $13 million from Castle & Cooke. An over-all decline in billings in 1987 is predicted.

U.S. accounts

Gained: Ross Stores; Bank of America; Grant Auto; Philippine Airlines; Shamitoff; Sun World; Tahoe Visitors Authority; Superior Farms

Nationwide, a recruitment agency serving personnel/human relations departments of client companies in the U.S. and Canada, opened a new office in Orlando, bringing its U.S. offices to 30; the agency has five offices in Canada. With its business dependent on U.S. economic growth and regional fluctuations in hiring, the Northeast and Midwest regions have been strong while the Southwest has declined.

Annual review

Greater acceptance of direct response advertising on the international front—non-U.S. billings sprinted 63% over the year earlier period—helped push billings up 37.2% worldwide. On the domestic side, a $40 million growth in billings, up 20%, was aided greatly by the acquisition of Target Communication, a McLean, Va.-based direct marketer with billings of $10 million. A potential $30 million in annualized billings was gained from new clients, Home Shopping Network, Quality Paperback Books, General Foods, and additional assignments from AT&T. On the downside, $17 million in billings left, with TWA accounting for $15 million. Along with seven pieces of new business, O&M Direct expects Ryder, a new client as of 1987, to boost billings this year.

Annual review

Overseas billings rocketed 31.6%, while domestic operations at this Ogilvy Group subsidiary expanded only 2.8%. During 1986, O&M Worldwide consolidated O&M Partners into its N.Y. operation, and formed the O&M Public Relations Group, which includes Adams & Rinehart, Dudley, Anderson & Yutzey, Washington Public Affairs and Sage Group. On the domestic billings front, the year's largest gains came from new clients Harris 3/M and Hospital Corporation of America, while the largest billings declines were credited to TWA and Avon.

U.S. accounts

Gained: Seagram, Boodles Gin, Golden Spirits; Caterpillar; Cayman Britannia; *Fortune* magazine; Harris 3/M; Hospital Corp. of America; General Foods, Log Cabin Syrup, Maxim; Metier Management Systems; Metropolitan Transit Authority, Houston; North American Watch; QMS, laser printers for computers; Ryder System; Sears Soft Lines, catalog; United Technologies; Christian Children's Fund

Annual review

The Richards Group actively pitched for new clients to buffer against the advertising budget cutbacks of existing clients in the oil-related business. This strategy paid off as new clients contributed 80% of the billings growth in 1986 and brought potential billings of $26 million to the agency.

The largest of the billings gains was for restaurant/bar chain TGI Friday's at $7 million, an account gained in 1986. Estimated annualized losses amounted to $9.5 million, with Metromedia Long Distance, the largest at $4 million, followed by Whataburger at $3 million.

U.S. accounts

Gained: Amdahl Communications div; American Catfish Institute; Aerobics Corp. of America; Axon; El Chico Corp.; Grandy's; Motel 6; Otasco; TGI Friday's

Lost: Crown Leasing Corp; Dallas Apparel Mart; Hogan Systems; Metromedia Long Distance; Whataburger; Metrocel Cellular Telephone

Annual review

New business from existing clients accounted for 90% of the increase in billings in 1986 over 1985, while new clients accounted for the remaining 10%. The largest annualized billings gain came from Thompson Medical, and the largest loss, from McDonald's New York/Michigan co-op advertising. Billings growth will continue in 1987 on the strength of new business gains added late in 1986 and existing client growth from accounts, particularly Charles of the Ritz and Chase Manhattan.

U.S. accounts

Gained: Thompson Medical, Ibuprin; Chase Home Mortgage Corp.; Chase Student Loans; Chase Bank of Florida; Charles of the Ritz, Fla.
Lost: McDonald's New York/Michigan Co-op; Yugo; Pennaco

Ross Roy	Detroit	293.2

Annual review

RR added Calet, Hirsch & Spector to its lineup in January, 1986, after buildings its Cleveland strength in 1985 by buying out Griswold Advertising. The agency expects strong billings growth in 1987, related to its $26 million gain in annualized billings against annualized declines of $1.5 million in 1986.

Annual review

In October, the agency was created from a management-led buyout of Needham Harper/LA. Existing clients Home Federal Savings & Loan, California State Lottery and American Honda helped provide 70% of the billings growth during 1986, while new clients added the remainder. The agency expects strong billings growth in 1987 because it gained a potential $10 million in annualized billings—$8 million of that coming from New Century/Vista Film Co.

It lost an annualized $2 million from Chicagoland Honda Dealers Assn. The agency opened a New York office to service the New Century/Vista Film account.

McCaffrey & McCall	New York	203.7
Rumrill Hoyt	New York	163.9
Saatchi & Saatchi Inc.	New York	600.7

Annual review

This agency is essentially one of three main networks comprising London-based holding company, Saatchi & Saatchi PLC, whose intention is to operate the world's largest advertising network and have one of the top five agencies in the world's top 10 ad markets.

S&SCW contains three large groupings: Saatchi & Saatchi Compton-U.S., Saatchi & Saatchi U.K., and the large Saatchi network throughout the rest of the world. Both U.S. and overseas billings grew by about $144 million each, giving the U.S. a 12.5% growth compared with 7.9% abroad because of the smaller base in the U.S. Major U.S. business came from P&G Camay ($16 million billings annualized) and *Video Digest* ($10 million), but account conflicts related to Saatchi & Saatchi's acquisitiveness particularly hurt its other P&G business. It lost $70 million with the exit of Crisco and Duncan Hines. U.S. figures include only the advertising contributions from subsidiaries Hay Group, Irv Koons, Mayo Infurna, Siegel & Gale and BTD, and full returns from subsidiaries listed below. Ted Bates Worldwide, Backer & Spielvogel and Dancer Fitzgerald Sample, other S&S PLC units purchased in 1986, are not included in S&SCW totals.

U.S. accounts

Gained: Saatchi & Saatchi Compton Inc.—Mellon Bank; McNeil, Delsym; Johnson & Johnson, new prods; P&G Camay Soap; *Video Digest*; BVD, socks.

Sawdon & Bess	New York	65.3
Sawdon & Bess	Los Angeles	9.0

Annual review

Sawdon & Bess recorded a 5.7% increase in billings, with existing clients Footlocker, local Cadillac dealers, Southeast, Southern California, and Matchbox constituting the majority. S&B is being consolidated this year with other Ted Bates subsidiaries, AC&R and Diener/Hauser/Bates, into a new agency, AC&R/DHB & Bess, which will have a combined $321 million in worldwide 1986 billings. S&B brings a strong retail capability to the merged unit, which is expected to produce savings of $1 million. The move is the first consolidation engineered by parent, Saatchi & Saatchi PLC, to produce efficiencies. Jerome Bess will be the new agency's chmn.

1986 billings by major office

($ in millions)	*City*	*Billings*
Fallon McElligott	Minneapolis	178.8
Martin Agency	Richmond, Va.	90.3
Scali, McCabe, Sloves	New York	259.2
Scali, McCabe, Sloves	Los Angeles	2.0
Scali, McCabe, Sloves	Atlanta	8.0
Stevens & Buchsbaum	New York	N/A

Annual review

Acquisitions dominated the scene this year, for this subsidiary of the Ogilvy Group, as the agency purchased Fallon McElligott, Minneapolis, in April, Martin Agency, Richmond, Va., in October, and a 20% interest in Stevens & Buchsbaum, N.Y. The 1986 billings figures for Fallon McElligott, $187,829,200, and Martin Agency, $90,335,800 are consolidated into SM&S totals, while Stevens & Buchsbaum are not. Apart from these subsidaries, Scali, McCabe, Sloves billed $269,165,000 in 1986, which amounted to a 10.4% gain over billings of $243,875,300 in 1985. This growth came 70% from existing clients. During the year, the agency gained a potential $38 million in annualized billings with Champion and Harris Lanier accounting for the majority. It lost annualized billings of $20 million, when Continental Airlines left. Overseas billings grew 11.3%, but the purchase in February of the French agency, Audour Soum, should enable SM&S to top that in 1987. Stating he needed new challenges, Edward McCabe, left the agency as president, creative director worldwide, left the agency Jan. 1, 1987, and entered the Paris-to-Dakar auto rally.

"If you could see what AD/AID has done for this agency, you'd install it today."

"IT'S THE AGENCY MANAGEMENT SYSTEM FOR PROFIT MINDED AGENCIES."

"Three years ago we selected AD/AID to handle the business side of our agency. Like most growing agencies, we needed a software system that would closely track our profitability while it managed production billing, financials, and even media buying if we wanted. With AD/AID we've doubled our billings and have had to add just one person to our clerical staff!

"Thanks to AD/AID we've really gained control of our operation. And AD/AID gives us historical and status reports that allow *nothing* to fall through the cracks. AD/AID is user-friendly, so all our staff benefits from data base reports like Client Profitability, Traffic Assignments, and Estimate Reporting. So do our clients.

"AD/AID will still be right for us when we've doubled our business again. It's that flexible and intelligently designed. Let me put it to you this way:

"If you can imagine what you want, AD/AID will give it to you."

Annual review

A subsidiary of Y&R specializing in healthcare advertising, S&H secured its growth in 1986 from abroad—overseas billings grew 43.8% during the year-to-year period, while domestical growth slowed to 2.1% from 11% recorded in 1985 over 1984. A year ago, the agency had expected domestic billings to be stronger in 1986 because the FDA had approved at yearend 1985 the general distribution of a number of new products marketed by H&S clients.

Annual review

Unexpected belt tightening by existing clients hurt billings growth in 1986, holding TL&K to a modest 1.4% increase from the year earlier period. Large new business gains coming from Nabisco Brands and Continental Baking Co. helped push potential annualized billings gains to $56 million against an annualized decline of $18 million, some $17 million of that coming from Continential Bank. During 1986 Charlotte Beers became active chairman of the 4A's and took on the additional title of chmn, and William P. Youngclaus added the title of president.

Annual review

A moderate 3.5% U.S. billings growth came largely from additional assignments: Warner-Lambert ($25 million), Kodak ($20 million) and new client IBM ($50 million). Product losses came from Kraft ($75 million) and Kodak ($15 million). Departing were USAir ($18 million) and Dole Pineapple ($15 million). Overseas billings grew 14%, which provided leverage for overall billings to climb 8.4%. Early this year Joseph O'Donnell, chairman-ceo, was fired after attempting to curry board member allegiance for a management buyout.

U.S. accounts

Gained: Digital Communications Associates, JWT/JWT Direct; Godfathers Pizza; American Greetings; Acemesa; Hyatt; Ames Department Stores; Phoenix Metro FDAF; Cellular Telephone, Los Angeles; Goodyear; American Learning; Presto Foods; Conroy's Flowers; IBM; Kodak; SEGA of America; Lignum 2; Black Angus Restaurant; North American Van Lines; Stanford Federal Savings & Loan; Cutter Group, Deltakos; Beth Israel Medical Center; Merit Mutual Foods; William Underwood; additional assignments—Warner-Lambert, S.C. Johnson, Oscar Mayer, Quaker Oats, Fischer Price, Beatrice, Kraft
Lost: Original Appalachian Artworks; Kraft; Anderson Co.; Champion Spark Plug; Ryder Truck Rental; Showtime, The Movie Channel; Kodak; Chef San Francisco; Dole Pineapple; USAir; Federal Home Loan Mortgage; Colonial Penn, Direct; Decision Resources, Direct; Sears Discover Card, Direct; US Sprint Communications, Direct

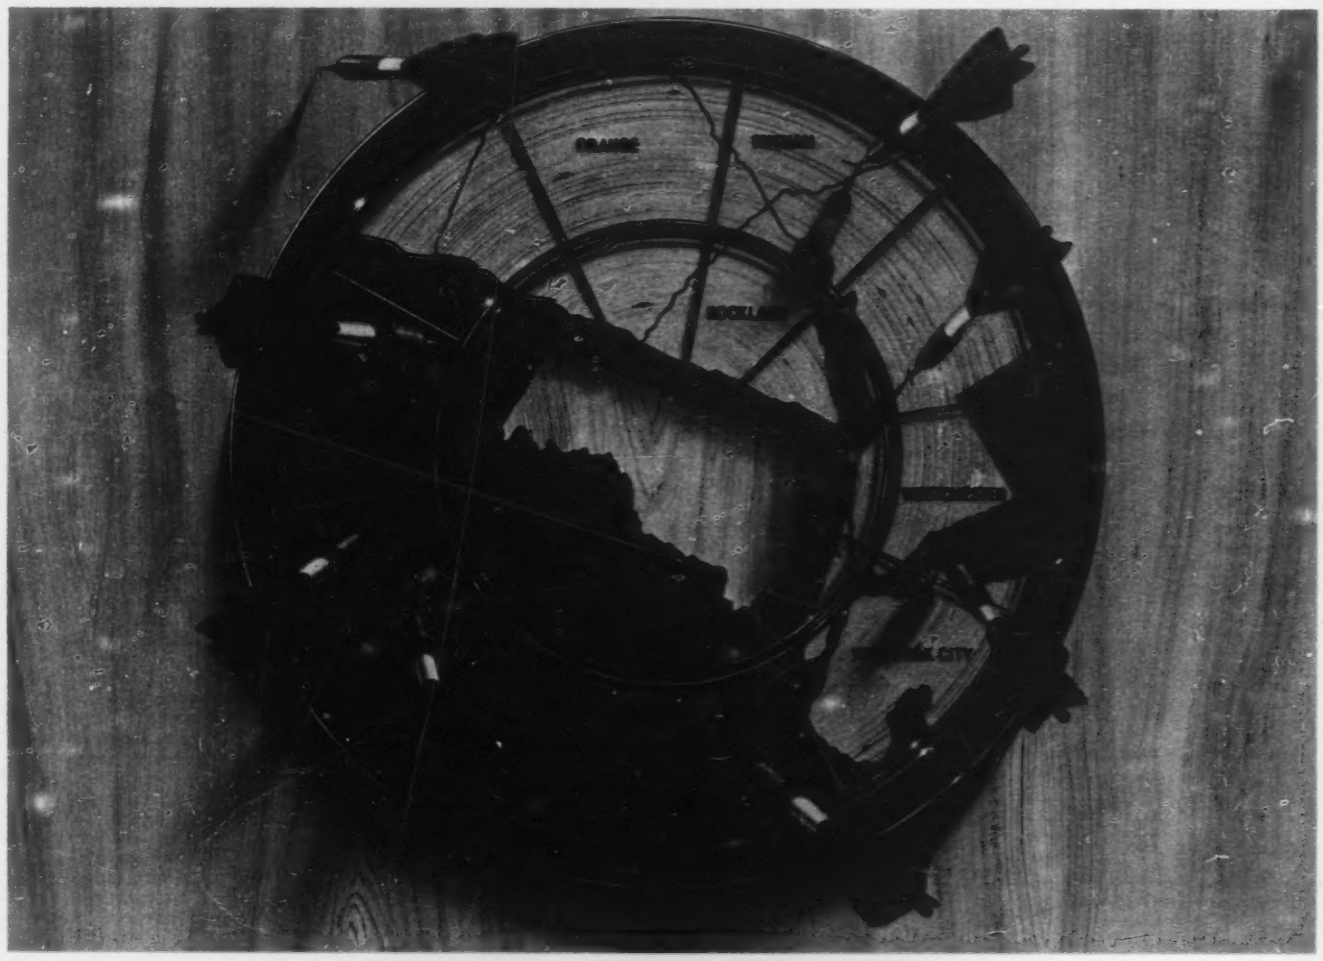
Annual review

Existing clients provided 70% of the billings growth during 1986, notably additional assignments from Canandaigua Wine Co. and growth from Emerson Radio, while new clients added the remainder. The potential $10 million in annualized billings gains added during 1986 against no losses, along with the development of a proprietary marketing research system, has led the agency to predict good growth for 1987 billings.

U.S. accounts

Gained: Fisher-Price, diversified products/licensing, books; Widmers Wine Cellars; Manischewitz Wine Co.; Canandaigua Wine Co., Cool Breeze Dessert Wines



Your media plan may be missing the mark.

If you're taking aim at the New York ADI, make sure your media plan isn't missing an important part of its target audience: the affluent residents of Bergen and Passaic counties in northern New Jersey.

Only one newspaper gives you a clear shot at this lucrative market and the $20.7 billion in purchasing power wielded by the people who live there: The Record, New Jersey's largest evening newspaper.

The Record reaches more adults in the Bergen/Passaic market than any other newspaper, and targets readers with the greatest spending power.

In fact, Record readers have the second highest personal employment income in America, and Bergen/Passaic residents account for more than 21 cents of every dollar spent in the entire state of New Jersey.

In 1985, they dished out an incredible $909 million in restaurants, and rang up $10.1 billion in retail spending. This impressive grand total placed Bergen/Passaic 29th in the nation for total retail sales.

With The Record's Bergen/Passaic audience, you're taking aim at a market whose population of 1,293,400 makes it the 33rd largest in America. And sixty-five percent of this affluent audience cannot be reached regularly in any other newspaper. That's because no other newspaper covers their world so well or so colorfully. The Record's award-winning reporting, full-color graphics and eye-popping demographics give you an advertising forum that hits home with Bergen/Passaic residents like no other newspaper.

The Record. Try to target the Bergen/Passaic market without it, and you're just taking a shot in the dark.

The Record

We cover your world. All of it.

Annual review

A wide ranging client base and location of offices in different geographic regions has helped prevent billings declines in the face of depressed economic conditions in the Southwest and West. Credit for 1986 billing growth of $44.2 million was split between existing clients, notably Pepsi food service div., bottling div., and Taco Bell, and new clients, such as Curtis Mathes ($6.6 million) and McIlhenny. The potential value of annualized billings gains amounted to $16.8 million, while annualized billings declines amounted to $14 million with Labatts' Importers ($6.5 million) and Frontier Airlines ($3.5 million) accounting for the majority.

Chapman/Warwick	San Diego	6.0
Warwick	New York	132.0

Annual review

The loss in January, 1986, of the $25 million Seagrams account held at the agency for 46 years particularly drew a pallor over 1986, but the future brightened up as the agency gained a potential $23 million in annualized billings, the majority of which came from Joseph Victori Wines. Existing clients, Jockey and Sandoz agricultural products, are expected to sustain growth in 1987.

1986 billings by major office

($ in millions)	City	Billings
Roska Direct Marketing	N. Wales, Pa.	6.0
Schaefer Advertising	Valley Forge	26.0
Weightman, Inc.	Philadelphia	54.0

Annual review

In January, 1986, Weightman purchased Schaefer Advertising, Valley Forge, Pa. whose numbers are included in the 1985 figures for comparative purposes. Existing clients contributed 66.7% of the 1986 billings growth while new clients added the rest. The group gained a potential $8 million in annualized billings with Wendy's International, eastern div, accounting for the majority, while declines in annualized billings amounted to $1 million.

The group expects billings growth trends to continue in 1987, led by new product introductions for existing clients. It also expects a boost in activity on the research side from newly formed Weightman Research, designed to service existing and outside clients. Paul Strasser is this fifth operating unit's president.

Wells, Rich, Greene	Detroit	34.0

Annual review

For the second year in a row, WRG had a modest billings increase and continued management reshuffling. The agency was hurt by some belt tighting at existing clients who accounted for 80% of year-to-year billings growth while new clients pitched in the remainder. WRG expects 1987 billings to show more movement because of the creation of a new Image Group division in N.Y. and from the potential $100 million in annualized billings gained during 1986 against declines of $30 million. The largest annualized gains came from Cadbury-Schweppes, estimated at $60 million, and Richardson-Vick's, $30 million, while the largest losses came from Purolator Courier, $12 million and *National Enquirer*, $9.2 million. The Image Group has been credited with saving the Philip Morris Benson & Hedges accounts and attracting the Warnaco business.

U.S. accounts

1986 billings by major office

($ in millions)	City	Billings
WR&K	Detroit	20.0
WR&K	New York	204.5

Annual review

Existing clients accounted for 80% of the year-to-year billings growth at this Y&R subsidiary, while new clients added the rest. Overseas, billings of this direct marketing agency skyrocketed an estimated 72%, which the agency credits to currency gains, a greater acceptance in Europe of direct marketing, and the establishment of three new offices abroad. Overall, the agency gained a potential $50 million in annualized billings while losing only $2 million annualized. Significant new clients were American Express and U.S. Army recruitment. A more conservative billings growth is predicted for 1987, with domestic operations expanding at a rate of 10% and international operations at 20%, notes the agency.

U.S. accounts

The agency did not report accounts gained or lost in 1986.

1986 billings by major office

($ in millions)	City	Billings
Wyse Advertising	Cleveland	73.2
Wyse Advertising	New York	14.3

Annual review

Wyse's slim growth in billings is attributed to the teeter-totter effect caused by the growth of existing client Stouffer Hotel & Restaurants and new clients General Dynamics and Standard Oil balanced against the loss of Goodyear Tire & Rubber auto stores in 1984 and Rax Restaurants in 1985. The restructuring of certain service fees, however, has helped total gross income increase 15.1% from the year earlier. Bigger things are expected in 1987 because of the gain of Ohio Mattress, Sealy div, a potential $6 million client.

Annual review

Riding the crest of the wave of clients leaving mega-merged shops for independent agencies with worldwide services and global resources, Y&R again this year posted top billings for the No. 1 position. U.S. billings rose a solid 5% from $2.27 billion in 1985 to $2.39 billion in 1986. The drop of the dollar and strong new business in Europe and Canada contributed to the 17.2% overall increase in billings from $3.58 billion in 1985 to $4.19 billion in 1986. New domestic clients who found a haven from merger-mania and assurance that Y&R intended to remain Y&R include Kodak ($18 million annualized), Heileman Beer ($15 million), TWA ($40 million), Warner-Lambert ($30 million), RJR ($50 million), Unisys ($50 million), and Pillsbury ($25 million). Overseas new accounts include the $40 million Ford account in Germany, the $15 million Kodak account in the U.K., as well as Kodak's $12 million account in Canada, and the $22 million British Gas account in the U.K. In November, just as insider trading deals were being exposed on Wall Street, Y&R and Paine Webber announced their new joint-venture, PaineWebber/Young & Rubicam Ventures, to aid companies in restructuring in line with consumer trends and a company's product capabilities. The move signals the innovative ideas that are sparking at Y&R at a time when ad agencies are looking toward long-term survival. Figures for Y&R subsidiaries are Ad Age estimates based on information gathered from a variety of sources. In December, Y&R and the *New York Daily News* entered into an agreement for an 18-month test of negotiating special rates for national package goods advertisers, to try to cut the differential between retail and national newspaper ad rates.

The 1986 Ad Dollar Summary lists 35,000 Brands and how much they spent in 7 Media.

You can't buy this complete listing anywhere else.

These are the official industry figures.
If you want to know who's spending what on advertising, BAR/LNA's Ad Dollar Summary is the reference tool you need.

Because only in this one volume will you find a complete summary of ad dollars from the PIB Magazine and Newspaper Supplement Service, from BAR's Broadcast Services and from the LNA Outdoor Advertising Service.

These are the very same figures LNA prepares for major media organizations like MPA, TVB, RAB, and IOA. They're used by leading advertisers and their agencies. The trade journals also turn to LNA for media data.

Includes cable TV.
The Ad Dollar Summary tells you how much each of 35,000 brands is spending in consumer magazines, newspaper supplements, network and spot television, network radio, outdoor advertising, and since 1985, cable TV.

Brands are listed in alphabetical order along with their parent company identifications and the media used.

And that's not all. We have listings that show the top 100 companies ranked by expenditures in each of the media.

Top 1000 Companies by total ad dollars.
The Ad Dollar Summary includes other vital reference data.

For instance, there's a convenient listing of Top 1000 Companies ranked in order of total media expenditures and broken out in each of the seven media.

There's also a section in the year-end edition showing the top 10 brands in 275 product categories, with a category total.

Year-End 1985 Edition on sale now.
If you didn't subscribe to the last year's Ad Dollar Summary, now is your chance to order the entire year round-up in one conveniently bound edition for just $175.00.

Multi-Media Services from BAR/LNA.
The Ad Dollar Summary is just one of the Multi-Media reports we offer, and the only one available without subscribing to the full service. Our full-service subscribers receive two additional reports which complement the Ad Dollar Summary with more detailed analyses.

- Company/Brand – an alphabetical listing of companies and how much is spent on each brand in seven media.
- Class/Brand – compares competitive brands within 275 product categories. This enables you to see not only how much each brand spent in specific media, but also who the major spenders are in each category.

For more information about our other media analysis services, including on-line programs and customized reports, just check the box in the adjacent column.

Our Market Closed Higher Today.

While some markets keep moving up and down like yo-yos, Diario Las Américas' Hispanic market keeps moving up in an ascending curve in virtually all market segments. Day after day. Month after month. Year after year.

Readership is up. Income is up. Spending power is up. And the future is looking up.

Diario Las Américas' Hispanic market scores high above the Dade County average in income not just for Hispanics, but for the overall market.

What's more, almost all of our readers own cars, most own their own homes and the vast majority use credit cards. In short, it's a growing, dynamic, affluent market that's surging ahead in many different fields — an American success story written every day in Spanish.

That's why blue chip companies like AT&T, P&G, Colgate Palmolive, Ford and American Express invest in the pages of Diario Las Américas.

Whether they're selling consumer goods or cars, financial services or communications, they know they can get a solid return on their advertising dollars in the pages of Diario Las Américas.

For complete information about the upscale Diario Las Américas audience, call Enrique J. Pérez, Advertising Director, and ask for your free copy of Diario's Reader Profile, conducted by Strategy Research Corporation.

Group 3hree Advertising, Pompano Beach, Fla., had gross income of $10,200,000 on billings of $34,000,000 in 1986, compared with $11,531,005 in gross income on billings of $38,350,000 in 1985.

The agency did not break out volume.

During 1986, decreased ad spending by long-time client Piper Aircraft (hit by high costs of liability insurance) coupled with the loss of two major bank clients as a result of mergers were not offset by the return of former client Gould and three other new clients.

However, 1987 looks to be more promising: Orlando Zone Chrysler-Plymouth Dealer Advertising Assn.'s ($3.5 million) has come aboard along with Mitel Corp., a telecommunications company, and Pompano Outlet Mall.

In 1986, it gained Gould Computer Systems div; Gould Information Systems Sector; Grant & Thornton PR; Holland & Knight, statewide Florida law firm; H.B. Kedney & Assoc., a retirement community management company. It lost: Southeast Bank; First Bank.

Top exec: Philip L. Rushlow, chmn; O. Leslie Nell, president; David Rushlow, Lee Rushlow, exec vps; John Baldari, vp, dir acct svcs. Employees: 43 in 2 offices.

Phone: (305) 785-9000

Group 243, Ann Arbor, Mich., reported gross income of $9,908,913 in 1986 on billings of $50,900,000. In 1985, it reported gross income of $6,761,122 on billings of $47,200,000.

The agency's 1986 U.S. volume consisted of $42,500,000 in media, $3,630,950 in materials and services and $4,769,050 in capitalized fees. Its 1985 U.S. volume consisted of $39,600,000 in media, $3,397,900 in materials and services and $4,202,100 in capitalized fees.

The agency did not consolidate subsidiaries:

- Image Masters, offset printing
- Portfolio Contract Furniture, residential & office furniture

In 1986, the agency gained: Wolverine Technologies, vinyl building prods; Eden Foods; St. Luke's Hospital; Business Resources, office furniture and supplies. It lost: None.

'Brands' explained

The billings scorecards of agencies traditionally lump together the agency's subsidiary revenues to arrive at total company revenue. But many advertisers want to assign business to a leading agency without getting involved with the subsidiaries that handle pr, direct response, Yellow Pages, medical journals or sales promotion, to name a few.

Who are these leading U.S. advertising agencies, the so-called "brand" or core shops once their support elements are peeled away, and what are their billings?

Ad Age for the second consecutive year has unbundled the merged and megamerged agencies or holding companies to arrive at the core "brand" agency in a replay of the "brand" chart published July 21, 1986, that was based on figures supplied the publication by agencies for last year's Agency Income Report.

In compiling the list, all units that are subsidiaries of a "brand" name agency were excluded from "brand" totals, but branch offices, most of which bear the name of the "brand" parent, were included. This may prove to be more controversial than last year, because a number of the larger shops, particularly BBDO Worldwide, DDB Needham, Foote, Cone & Belding and Young & Rubicam, are now seeking to become "seamless," though in the case of some subsidiaries, they maintain separate identities—a sort of loosely woven cloth at this point.

Ad Age editors pared down the shops based on their reporting of figures for subsidiaries as part of their totals in this 43rd annual Agency Income Report. Where such information was not provided, agencies were asked to provide the information. Estimates were assigned the various components by editors when they could not be obtained from the agency.

In streamlining agencies by unconsolidating the consolidated, a number of "seamless" agencies emerged.

Heading the "brand" list was J. Walter Thompson Co., which ranked No. 4 in the rankings for consolidated agencies beginning on Page 8. Omitted from the core agency's billings were Brouillard Communications, JWT Direct, JWT Healthcare, Thompson Recruitment and pr units.

The No. 2 brand agency was Leo Burnett, which ranked No. 9 among consolidated agencies. Burnett is the largest U.S. agency under one roof—that of Prudential Plaza bordering Chicago's Michigan Avenue—and currently building its own corporate headquarters several blocks away.

DDB Needham edged out Foote, Cone & Belding for the No. 3 "brand" agency. DDB Needham, an Omnicom combo, is No. 5 among consolidated agencies in this report, and FCB is No. 7 in U.S. billings. DDB Needham's sister Omnicom unit, BBDO Worldwide, made one of the biggest climbs compared with last year's chart—from No. 14 to No. 10. BBDO was aided by a reorganization that turned previous subsidiaries—BBDO Chicago, BDA/BBDO, Atlanta and BBDO West—essentially into branch offices.

Such a listing of core shops has the most impact on subsidiary-packed agencies like Young & Rubicam, although Y&R has stated its move toward "seamlessness." The No. 1 agency on a consolidated basis in the U.S., Y&R, drops to No. 6 among brand agencies.

Ted Bates, the No. 3 agency in consolidated U.S. billings, ranks No. 15 when unbundled.

New entries on the list for 1986 billings include Doremus Porter Novelli, the Omnicom unit that rose to No. 33 among "brand" charts; Ogilvy & Mather Direct Response, No. 39 and Rumrill-Hoyt, No. 45. Dailey & Associates, Warwick Advertising and DYR Worldwide dropped from the top 50 "brand" chart, all of which lost U.S. billings in 1986 over 1985.

and $1,713,789 in capitalized fees. Its 1985 U.S. volume consisted of $6,354,345 in media, $1,342,553 in materials and services and $1,308,247 in capitalized fees.

The Way It Used To Be

It's addictive, learning about our heritage. And the addicts are the bright people, the educated, the affluent. Reach them in the magazines they study, argue with and keep.

CIVIL WAR TIMES

It's the "news magazine" of the Civil War, mining the bottomless treasure of diaries, eyewitness accounts and Monday morning quarterbacking about our nation's most traumatic experience.

American History

The details of our American past tell us who we are, even better than the recital of great events. AHI brings them home to us in illustrated accounts of those who were there.

BRITISH HERITAGE

For anglophiles—a history magazine and more. BH brings alive castles and cathedrals, gardens and country homes, art and antiques—all things English. For readers and travelers.

COMBINATION RATES AVAILABLE

For demographics and other information, call Kathy Read, 717-657-9555.

NOTE: Dollars in millions.

Leading agencies in top 75 markets

Advertisers are increasingly rejecting the shotgun approach to reaching a national audience through network tv, for example, for more selective firepower that focuses on the demographics within the nation's top markets.

AD AGE spotlighted developments within the nation's 100 Leading markets in a special issue, Dec. 8, 1986, and as part of the reporting for that issue, obtained estimated rankings of the leading agencies in those markets.

Presented here are AD AGE's estimates of the top agencies in each market. Most of these agencies reported their financial information in this issue, and therefore have confirmed billings. However, those with asterisks (*) did not report for this issue. Their figures were requested, and if not received, were estimated based largely on their number of employes in the local market.

The top 100 markets were whittled down to 75 mainly because few agencies of size are found in the markets, Nos. 75-100. The 75 were further consolidated into 68 either because of the dearth of agencies or because the market relys heavily on services from adjacent markets. Agencies in the immediate New York-area markets, for example, dominate markets such as Ocean-Monmouth, New Jersey, further down the commuting line.

Further significance of these markets as marketing foci is that much of the growth in media is happening in media reaching deep into local markets: Newspapers grew 24.3% from 1985 to 1986 among the AD AGE 500; radio, mostly spot, increased 21.4%, and spot tv grew by 25.1%.

Market rankings are based on U.S. Census data for Jan. 1, 1986.

Saatchi is new group leader

Saatchi & Saatchi PLC made the race for leadership of agency groups a cakewalk as it sprinted from second place last year past Interpublic to hit $1.2 billion gross income worldwide on billings of $8.25 billion. But the race was not without drama. Omnicom Group entered with great fanfare, and events at JWT Group showed the vulnerability of bigness.

Saatchi's surge to the front from second place a year-earlier was so strong that the race for second place took on more interest. The perennial leader among the groups, Interpublic, in being passed by Saatchi & Saatchi, held off Omnicom by only a $2.3 million margin in world gross income, or $822.4 million for Interpublic to $820.1 million for Omnicom. On the billings side, Omnicom slipped past Interpublic's $5.59 billion to $5.56 billion.

Omnicom's entry to the field in the spring of 1986 came with the pomp and circumstance of a coronation. Omnicom appeared the heir apparent to Interpublic in total billings. But as soon as all the hoopla over its entry to the market died down, Saatchi & Saatchi stepped in to buy Ted Bates Worldwide to gain the top.

Omnicom's presence pushed JWT Group, No. 3 in last year's issue, back to fourth, and Ogilvy Group, the previous No. 4, fell to fifth.

Saatchi & Saatchi world gross income rose a phenomenal 107% from 1985 to 1986 largely because the acquisition of Ted Bates Worldwide, Dancer Fitzgerald Sample and Backer & Spielvogel, fueled the Saatchi machine with an additional $674 million in gross income and $4.6 billion in billings.

The Bates presence also pushed Saatchi into the No. 1 position in U.S. gross income and billings. Omnicom, an amalgam of three agency groups previously known as BBDO International, Doyle Dane Bernbach and Needham Harper Worldwide, ranked No. 2 in the same categories, with JWT coming in third just ahead of Interpublic.

Agency groups are not ranked in this issue because they are holding companies not operating agencies. Their emergence in the past few years since Interpublic was formed in the early 1960s generally has been encouraged by an evolution in the advertising market toward bigness.

Factors influencing the evolution: Global reach is required to serve many clients that are consolidating their worldwide advertising into a single network. Bigger ad budgets require bigger agencies. A covey of agencies under a single umbrella can lead to one-stop shopping and efficiencies for the client and agencies. Margins at agencies are thinning as a result of greater in-house capability by clients, especially in media buying—historically the major source of income for agencies. A loss of several big clients can devastate an agency without the resources of a parent. Vast sums of money are open to holding companies because most are public.

The events at JWT earlier this year show the flipside of one of those virtues—that access to public money can mean public access to the company, and that access can lead to a hostile takeover, particularly if stock prices begin to drop. Apparently afraid of such action, JWT last fall bought back a half-million shares of its stock, then trading at depressed levels. That action pointed to its intention to remain independent. Then earlier this year when upper management discovered that Joseph W. O'Donnell, chairman-ceo of J. Walter Thompson Co., had held discussions with Claremont Group Ltd. about buying out or recapitalizing JWT, it was viewed as seditious and led to his dismissal in January, 1987.

Another big issue is client conflict. Conflicts arise when agencies with competing clients merge. P&G, for example, took its $70 million business elsewhere from Saatchi, citing account conflict. Saatchi has attempted to minimize the problem by structuring the holding company so that networks and certain agencies are autonomous.

NOTES: Dollars in millions.

Saatchi & Saatchi PLC

Saatchi & Saatchi PLC, London, had 1986 gross income of $1,209,600,000 on billings of $8,255,400,000, compared with gross income of $583,900,000 on billings of $3,190,000,000 in 1985.

The advertising sector of the holding company comprises:
- Saatchi & Saatchi Compton Worldwide
- Ted Bates Worldwide
- Backer & Spielvogel
- DFS/Dorland Worldwide
- KHBB, London

Essentially, Saatchi & Saatchi PLC runs three advertising networks: Saatchi & Saatchi Compton Worldwide, Ted Bates Worldwide and DFS/Dorland Worldwide. The holding company structure is designed to enhance these operations by keeping their reporting structures separate. Falling outside these three networks are Backer & Spielvogel, New York, and KHBB, London, primarily to minimize client conflicts with network shops in their markets.

The holding company's expressed aim is to operate the world's largest advertising network in addition to having one of the top five agencies in the world's top 10 ad markets. It claims it is short of achieving such recognition only in Canada. Saatchi entered Canada in 1985, purchasing Hayhurst Advertising, Toronto, which ranked 13th in gross income among Canadian agencies reporting to Ad Age's 1986 International Agency Report (April 21, 1986).

But apart from advertising, Saatchi has made noises in the past year of developing a more wholistic business service that integrates advertising and consulting, a "merging of the external with the internal," according to a Saatchi official. Saatchi in late 1986 hired Victor E. Millar from Arthur Andersen & Co. to head Saatchi & Saatchi Consulting, its consulting unit.

The holding company had $150 million in cash at the end of the year and raised an additional $95 million in capital from a private placement of shares in Europe. It plans to use these funds to build its consulting side through acquisition. The company recently purchased for $2 million, Cleveland Consulting Associates, an Ohio-based company involved in retail distribution.

Saatchi & Saatchi PLC for its yearend results ended Sept. 30, 1986 reported net income of $58.4 million, up 72% from the prior year period. Revenue jumped 47% to $693 million. Results should be even more favorable in 1987 because in fiscal 1986 only partial year contributions were included from three profitable U.S.-based agencies acquired by Saatchi in 1986: Bates, purchased for $450 million in July, 1986, Backer & Spielvogel, for about $50 million in April, 1986, and Dancer Fitzgerald Sample (DFS), for about $75 million in February, 1986.

Saatchi & Saatchi Compton Worldwide contains three large groupings: Saatchi & Saatchi Compton-U.S., Saatchi & Saatchi U.K., and the Saatchi & Saatchi network throughout the rest of the world.

Only the advertising sectors of Hay Group, Irv Koons, Mayo Infurna, Siegel & Gale and BTD are included in totals for Saatchi & Saatchi Compton Worldwide, and full returns are included for subsidiaries: Saatchi & Saatchi Compton Inc., New York, Klemtner, Fairfax, Rumrill-Hoyt, Cochrane Chase Livingston and McCaffrey & McCall.

The worldwide network of agencies outside the U.S. and U.K. reported gross income of $203,468,400 in 1986 on billings of $1,326,236,000, and gross income of $195,475,600 on billings of $1,306,870,000 in 1985.

Top execs for Saatchi & Saatchi PLC: Maurice Saatchi, chairman; Kenneth Gill, president; David Perring, secretary. Directors: Simon Mellor, Victor Millar, David Newlands, Charles Saatchi, Anthony Simonds-Gooding, Andrew Woods.

Interpublic Group of Cos.

Interpublic, New York, reported worldwide gross income of $822,398,000 in 1986 on billings of $5,551,980,000, compared with $752,640,000 in gross income on billings of $5,066,162,000 in 1985.

Of the worldwide totals, U.S. gross income was $373,475,000 on billings of $2,491,079,000 in 1986, compared with gross income of $340,698,000 on billings of $2,272,456,000 in 1985.

Interpublic, which had not made a major U.S. acquisition or divestiture the past few years, encountered that arena on several fronts in 1986. McCann-Erickson bought out Ohlmeyer, largely a media-buying unit of RJR Nabisco, and purchased the Chicago medical shop, Sieber & McIntyre, and several Miller-Reid units in the South.

Agencies assembled under the Interpublic umbrella:
- McCann-Erickson Worldwide
- SSC&B:Lintas Worldwide
- Campbell-Ewald Worldwide
- Lowe Marschalk Inc.
- Dailey & Associates

Interpublic did some legerdemain with what was previously called Marschalk/Campbell-Ewald Worldwide. Marschalk became Lowe Marschalk, the Lowe borrowed from the British holding company, Lowe Howard-Spink & Bell PLC. LH-SB gained a 30% interest in the agency and with it its long-sought U.S. entry. LH-SB also got Campbell-Ewald's non-U.S. offices in the deal that saw Interpublic become the largest stockholder (about 27%) in publicly-held LH-SB. Lowe Marschalk is now the U.S. entity of London-based Lowe Marschalk Worldwide whose U.K. entity is Lowe Howard-Spinks Marschalk.

Interpublic agencies employed 13,201 worldwide in 1986, compared with 13,026 in 1985.

The holding company staff in 1986 numbered 209, down from 214 in 1985. Top officials at Interpublic: Philip H. Geier Jr., chairman-ceo; Eugene P. Beard, exec vp-finance & operations, cfo; Edwin A. Kiernan Jr., senior vp, general counsel and secretary; C. Kent Kroeber, senior vp-human resources; Charles A. Mittelstadt, senior vp-Center for Advertising Services; Henry Strock, senior vp and controller; Thomas J. Volpe, senior vp-finance operations and treasurer; Arthur E. Wilen, senior vp-development and professional services.

Omnicom Group

Omnicom, New York, reported gross income of $820,069,000 in 1986 on billings of $5,586,047,000. In 1985, it reported gross income of $762,150,000 on billings of $5,223,343,000. U.S. income was $557,402,000 in 1986 and $529,165,000 in 1985. Figures for 1985 are on a historic basis.

The holding company's U.S. billings were $3,834,063,000 in 1986 and $3,669,337,000 in 1985.

Omnicom was formed in the spring, 1986, with the merger of BBDO International, Doyle Dane Bernbach and Needham Harper Worldwide. Omnicom, under the leadership of Allen Rosenshine, president-ceo, is the umbrella organization for: BBDO Worldwide, DDB Needham Worldwide and Diversified Agency Services.

BBDO Worldwide includes old BBDO Inc. shops in New York, Detroit and Minneapolis, BBDO Chicago, BBDO/West and BDA/BBDO, Atlanta. BBDO Worldwide is headed by Norm Campbell, chairman-ceo. DDB Needham, headed by Keith Reinhard, chairman-ceo, includes the old DDB and Needham-named shops.

Diversified Agency Services, led by Barry Loughrane, chairman-ceo, includes: Tracy-Locke, Ingalls, Quinn & Johnson, Waring & LaRosa, Blair, CAK, Kresser Craig, Doremus Porter Novelli, MARCOA DR Group, Rapp & Collins, Kallir Philips Ross, Lavey/Wolff/Swift, Frank J. Corbett, Baxter Gurian & Mazzei, Franklin Spier, Cargill Wilson Acree, York, Alpern, Bernard Hodes, GM Dubois, Hannaford, RC Communications, and TELERx Marketing.

For 1986, Omnicom posted a loss of $4 million compared with 1985 earnings of $30.1 million. Revenue climbed 12% to $753.5 million from $673.4 million. The loss for the year reflected a fourth quarter charge of $5.9 million for restructuring (consolidating staff and facilities), and a third quarter charge of $25.5 million.

Top execs: Allen Rosenshine, president-ceo; Barry E. Loughrane, chairman, ceo-Diversified Agency Services; Robert G. Pfundstein, cfo; James A. Cannon, comptroller; Edward A. Haymes, treasurer; Raymond E. McGovern, secretary, general counsel; Stephen B. Oresman, corporate administrative officer; Thomas Watson, president-Diversified Agency Services. Employees: 10,340.

JWT Group Inc.

JWT Group, New York, had worldwide gross income of $644,771,000 in 1986 on billings of $4,300,622,000, compared with $590,083,000 in gross income on billings of $3,935,853,000 in 1985. Figures for 1985 were readjusted to reflect the acquisition in 1986 of Gray & Co.

International activity at JWT Group slightly outpaced the domestic growth rate in 1986 as non-U.S. gross income grew 14.7% to $249,193,000 from $217,341,000 on the same percentage growth in billings to $1,662,117,000 from $1,449,664,000.

In the U.S., gross income grew 6.1% to $395,578,000 from $372,742,000 the year earlier, and billings grew the same rate to $2,638,505,000 from $2,486,189,000.

JWT Group earned $5.9 million in 1986, down from $19.4 million in net income in 1985. Revenue (commissions and fees) rose 11% to $641 million. Poor fourth quarter results—a loss of $4.9 million compared with net income of $8 million in the period the previous year—had a particularly negative impact.

JWT Group figures include:
- Walter Thompson U.S.A.
- Thompson Recruitment Advertising
- Brouillard Communications
- Lord, Geller, Federico, Einstein
- Hill & Knowlton, pr
- MRB Group, market research

JWT Group is headed by Don Johnston, chairman-ceo, who also assumed the post of ceo at J. Walter Thompson Co. in late January, 1987, after the dismissal of Joseph W. O'Donnell, then chairman-ceo of the agency.

Other top executives at JWT Group: Ronald A. Kovas, exec vp; Terence D. Martin, exec vp-finance & administration; Stephen M. Salorio, exec vp, general counsel and secretary; Ralph A. Daiuto, senior vp; Kenneth A. Drucker, senior vp-treasurer; Douglas L. Heerdt, senior vp; and board member, Robert L. Dilenschneider, president, ceo-Hill & Knowlton.

Worldwide, the group employed 10,440 in 1986 in 264 offices, compared with 10,277 employees in 269 offices the year earlier. In the U.S., the group has 4,994 employees in 1986 in 102 offices, compared with 4,807 employees in 100 offices the prior year.

Ogilvy Group

Ogilvy Group Inc., New York, reported worldwide gross income of $548,695,000 in 1986 on billings of $3,802,426,000. In 1985, the agency reported worldwide gross income of $481,102,000 on billings of $3,318,657,000.

Most of the growth came on the international side: Non-U.S. gross income rose 31.9% to $229,426,000 in 1986 from $173,917,000 in 1985, and non-U.S. billings rose 31.8% to $1,672,902,000 from $1,269,733,000. Both domestic gross income and billings rose 3.9%, the former to $319,269,000 from $307,185,000, and the latter to $2,129,524,000 from $2,048,924,000. Figures do not include those of Research International, acquired in January, 1987.

Major agencies comprising Ogilvy Group:
- Ogilvy & Mather Worldwide
- Scali, McCabe, Sloves Group
- Cole & Weber

Scali was particularly active in 1986 buying Fallon McElligott, the highly creative Minneapolis shop and Martin Agency, Richmond, Va., which ranked as the top agency in year-to-year percentage gain in U.S. and world gross income and in world billings among the top 100 agencies in this issue. Scali led all U.S. agencies by percentage growth in U.S. billings.

Ogilvy Group is run by an executive committee comprised of William E. Phillips, chairman-ceo; Kenneth Roman, vice-chairman, president-Ogilvy & Mather Worldwide; Norman Berry, creative director, president-Ogilvy & Mather, N.Y.; Graham Phillips, chairman-Ogilvy & Mather, U.S.; John P. Gill, secretary and treasurer.

The group had 8,817 employees in 271 offices in 1986, up from 8,781 employees in 266 offices in 1985. In the U.S., there were 3,845 employees in 65 offices, up from 3,755 employees in 60 offices the prior year.

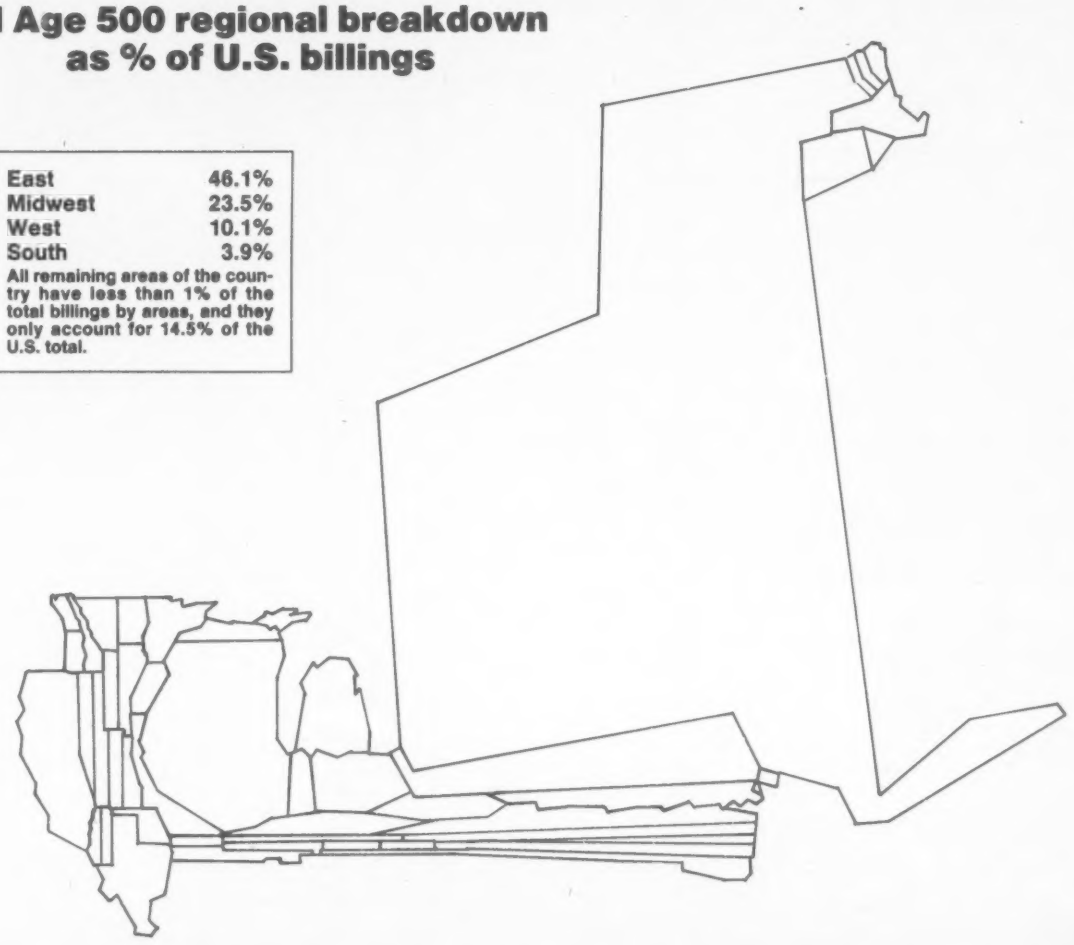
Ad Age 500 regional breakdown as % of U.S. billings

East	46.1%
Midwest	23.5%
West	10.1%
South	3.9%

All remaining areas of the country have less than 1% of the total billings by areas, and they only account for 14.5% of the U.S. total.



Top 100 by productivity

NOTES: Employees per $1 million in billings is computed by dividing total U.S. employees by total U.S. billings in millions of dollars. A negative percent change in employees per $1 million in U.S. billings—in parentheses—indicates an improvement in productivity from 1985 to 1986. Twelve agencies, listed at the bottom of this chart, did not report total U.S. employees.

Employees: 12.
Phone: (609) 235-5768. ☑

Yellow Pages Marketing Services, Mequon, Wis., reported gross income of $5,318,000, of which $99,000 was non-U.S. contributions, in 1986 on billings of $34,810,730. In 1985, it reported gross income of $4,767,000, of which $91,000 was non-U.S. contributions, on billings of $31,281,000.

Billings for both years was all in media.

Included in the agency's figures were returns from the offices in Milwaukee, Fort Lee, N.J., Los Angeles, Chicago, Kansas City, Minneapolis, Houston and Cleveland.

Included in the agency's figures were returns from subsidiary, Creative Media.

The agency did not report accounts gained or lost in 1986 and 1985.

Billings breakdown by media: Yellow pages 100%.

Top execs: Richard C. Miller, president; Robert B. Kennedy, James F. Ponce, sr vps; David J. Madison, vp-eastern district mgr; Rudy N. Magnolia, vp-western district mgr; George R. Boehm, Mark O. Brown, Cynthia M. Dzikowski, Helen B. Harper, Ann J. Kosack, Jeffrey S. Miller, Kathleen L. Smith, Richard M. Tuchalski, Marilyn G. Young, Donald A. Zimmel, vps. Employees: 104 in 8 offices.
Phone: (414) 241-8600. ☑

Zam + Kirshner + Geller, Garden City, N.J., reported gross income of $861,400 in 1986 on billings of $6,250,426. In 1985, it reported gross income of $781,400 on billings of $5,701,478.

The agency's 1986 U.S. volume consisted of $1,562,175 in media, $1,518,000 in materials and services and $3,170,251 in capitalized fees. Its 1985 U.S. volume consisted of $1,412,300 in media, $1,385,020 in materials and services and $2,904,158 in capitalized fees.

4A's message: Rebuild trust

By STEWART ALTER and GARY LEVIN

Boca Raton, Fla.—Disruptions caused by mergers and a slowdown in ad spending last year have given way to a sobering new perspective at ad agencies.

One major concern is a "crisis in advertiser confidence in [ad] agencies," American Association of Advertising Agencies President Leonard Matthews was scheduled to say in his windup speech for the group's 69th annual meeting here.

"The bottom line is that many advertiser top-management people view us in a less favorable light than ... two years ago. We appear less responsible, less accountable, less businesslike. We appear more money-oriented and less creative-oriented. We are less likely to be considered business-marketing partners than we were."

Agency executives gathered here last week pointed to three areas of concern: rebuilding trust in agency-client relationships; remaining lean and efficient while ad budgets begin to come back this year; and pursuing opportunities presented by last year's megamergers.

Also, in marked contrast to other meetings where food and cosmetics & beauty aids clients announced plans for major increases in marketing expenditures (AA, Feb. 23, *et seq.*), most of the 700 agency executives, guests and spouses at the Boca Raton Hotel & Club did not share the same exhilaration.

In a prepared text scheduled to be delivered March 28, Mr. Matthews said that three-quarters of the Four A's 60-member sampling panel "are projecting improved income and profits in 1987 and more than half expect to see improved profit margins."

But, cautioning against too much optimism, Mr. Matthews explained that "this projection is relevant to 1986, and 1986 was a lousy year. So my reading is that 1987 will be better than 1986, but it may be far from the best years we've experienced in the late '70s."

And while many agency employees lost their jobs last year as revenues declined, the business is far from the "lean and mean" machine it might fantasize itself to be, he said.

Using the number of employees per $1

Frito play

New 'basics' strategy takes on regional rivals

By JENNIFER LAWRENCE

Dallas—Frito-Lay, the nation's largest salty-snack marketer, is implementing a regional marketing program that will redirect part of its national promotion budget to eight offices across the country.

Field marketing staff for the first time will have the authority—and the funds—to tailor programs against strong, local competitors.

At the same time, the $3 billion company is putting marketing emphasis back on its existing, powerhouse brands—Cheetos, Doritos, Fritos, Lay's, Ruffles and Tostitos.

The reason for this shift is that Frito-Lay, the "financial underpinning" of parent PepsiCo as its traditionally top profit contributor, had a disappointing 1986, mostly because of a bungled new-product binge.

Although F-L's net sales were up 6% to $3.01 billion last year, profits were flat before a $52 million write-off resulting from the unsuccessful new items, namely three specialty snacks earlier—now ironically—dubbed Max Snax.

The unit's operating profits accounted for 47% of PepsiCo's profits in 1985, but '86 profits of $343 million contributed only 38% to the parent's total. It was the second consecutive year of lackluster profit growth at F-L.

The man behind the refocused strategy is Michael H. Jordan, 50, who since December has been at F-L's helm as president-ceo of the newly organized PepsiCo Worldwide Foods (AA, Dec. 1).

Formerly exec VP-chief financial officer and then president of the Purchase, N.Y.-based parent, Mr. Jordan had been F-L's president in 1983 and '84. He reassumed the reins from Willard C. Korn, who resigned as F-L president after leading what was possibly the most aggressive new-product push in the company's history.

In his first interview since taking his new post, Mr. Jordan told Advertising Age that his mission is not only to bring a return to profit growth but to marketing discipline as well. That includes the attention being paid to the regions.

"Traditionally, Frito-Lay spent less than 10% of resources on a regional basis—but we will be spending a significantly larger amount," Mr. Jordan said.

Back in charge, Michael Jordan returns to the basics of chip marketing.

Frito-Lay's new top executive also intends to change things by reasserting the strength of F-L's well-known brands (any new brands on the agenda will be delayed until 1988).

The company already is pushing hard with one of last year's winners: A Cool Ranch flavor addition for its Doritos tortilla chips.

Doritos' Salsa Rio, a picante-flavored tortilla chip, will be put into test next month in the Pacific Northwest.

One of the lessons learned from Max Snax: The test marketing of new products is essential, even for Frito-Lay.

Management agrees that Max Snax—actually Rumbles, a granola snack; Stuffers, a cheese-filled snack; and Toppels, a cheese-coated cracker, all introduced simultaneously (AA, April 14)—suffered from premature rollout.

Perhaps more significant for Mr. Jordan's turnaround effort, long-term, is his vision of F-L as a national brand marketer with a strong regionally differentiated promotion strategy.

"Our [new] strategy," Mr. Jordan said, "will be much more flexibly driven and

Federal: Goodbye Ally

By BRIAN MORAN

New York—Ally Gargano/MCA Advertising's loss of the $20 million Federal Express Corp. domestic account to Fallon McElligott triggered an immediate flurry of employee dismissals and raised questions about the once high-flying agency's future.

The layoffs extend into all Ally Gargano/MCA departments and are expected to total about 50 employees, or 25% of the staff.

Dismissals last week included Larry Dexheimer, exec VP and former agency president; Gene Willhoft, VP-associate media director, and Marsha Cohen, VP-manager, research; and Mark Hurst, VP.

Layoffs in the agency's creative department were not expected to begin until March 27, when Amil Gargano, chairman-creative head, returned from an out-of-town trip. Mr. Gargano, who gave up the agency ceo post in January to MCA's Robert Kamerschen, could not be reached for comment. Mr. Kamerschen and President William Bishop also did not return.

A staff memo issued by Mr. Kamerschen on March 24, the day of the account loss, said in part that "FedEx's decision will have a major adverse economic impact on our operations, necessitating some substantial and immediate personnel reductions. ... We will complete the necessary staff reductions within a week

Highlights

Tracer's blitz 4

Ford Motor Co.'s Lincoln-Mercury division is backing its new upscale subcompact Mercury Tracer with the division's biggest-ever advertising blitz, topping even the $35 million media launch for the Sable. The estimated $38 million Tracer campaign represents about 30% of the division's total 1987 spending.

Raisins lead ad awareness 6

With a yearly budget that pales in comparison to McDonald's Corp.'s monthly spending, the California Raisin Advisory Board inched past the fast-food marketer in advertising awareness. The board's "grapevine" spots came to mind first for 2.3% of respondents asked to recall the first ad they had seen, heard or read in the past 30 days.

Hush Puppies step out 12

Wolverine World Wide is determined to get its Hush Puppies footwear division out of the doghouse. Contemporary image-oriented print ads, breaking in late April issues of consumer magazines and a trade publication, are designed to shed Hush Puppies' staid image as a marketer of only pigskin shoes.

Apple of Seattle's eye 26

The Washington State Apple Commission's decision to hire McCann-Erickson's Seattle office for its $6 million account is the latest indication that the city has begun to recover from a slew of account departures that began 18 months ago.

Automakers try to recoup 28

New promotions that offer detergent and paper towel buyers a chance to win automobiles are attempts to solve a problem caused by the automakers themselves. The problem is that a previous marketing tool—expensive, deep-discount consumer loans—has helped dry up demand and consumer excitement.

No holds barred at nets 58

Major TV networks will go all-out with miniseries, specials, TV movies and fresh episodes of their strongest series to boost ratings during the next rating sweeps period in May.

Extending coffee's yield 62

Chock Full o'Nuts is banking on continuing growth of the $550 million extended-yield coffee segment—despite declines in coffee prices. Going national with new Ultra Blend, company officials said they are optimistic about extended yield, one of the fastest-growing segments of the $5.5 billion coffee market.

Malt liquor king 63

G. Heileman Brewing Co. is moving to increase its dominance of the malt liquor segment with a $3 million campaign for its recently acquired Champale brand. Malt liquors, with higher alcohol content than regular beer, accounted for only 3% of total beer industry shipments last year, but La Crosse, Wis.-based Heileman is close to making the segment a private fiefdom.

INTERNATIONAL

Hyundai loses momentum in Canada 46

The honeymoon seems to be over for Hyundai Auto Canada, but the Korean automaker plans to remain a force in the Canadian market. Sales slipped last year to 70,000 cars, compared with 79,000 units in 1985.

U.K. shops stake out France 48

Three large British-owned ad agencies are taking a closer look at buys in France, a market U.S. shops have found tough to penetrate. France's most creative agencies—including Boulet Dru Dupuy Petit and Roux, Seguela, Cayzac & Goudard—are increasingly looking for U.S. and U.K. buys themselves, rather than be acquired.

OTHER NEWS

General Foods Corp. this week starts its first network TV advertising for Post Natural Bran Flakes—more than tripling ad spending for the high-fiber cereal targeted to consumers age 45 and over. Page 6.

A host of advertisers, ad agencies and media companies have adopted or considered new shareholder structures in recent months. Interest in limited partnerships and Subchapter S filings is a reaction to the new tax law, which makes personal tax rates lower than corporate rates. Page 24.

The explosive growth of TV shopping services is both threatening and beckoning to marketers that traditionally have thrived on selling goods and services directly to consumers. Page 34.

Producers of marginally rated TV series trying to fend off cancellation may have an edge on negotiating renewals if they have scored impressively with black audiences. Doug Alligood, VP-special markets at BBDO, reached this conclusion after comparing viewing in black and non-black households last October, December and January. Page 50.

The way Black & Decker Corp. sees it, the next best thing to putting a Dustbuster mini-vacuum into the hands of today's consumer is putting a replica into the hands of tomorrow's consumer. The company's vacuums, mixers, toasters and irons soon will appear as toys for kids through a licensing agreement with Creative Design, Jenkintown, Pa. Page 62.

SPECIAL REPORT

***Cable Television**—With most of the nation wired for cable, the industry's future growth depends heavily on its ability to market itself. Multiple system operators, networks and premium pay services are stepping up their activities.*

Scali, BJK&E garner major toy business

By SARA E. STERN

Major toy marketers and the industry's major retailer are cleaning out their ad-agency toyboxes.

In the largest single reassignment, New Rochelle, N.Y.-based retailer Toys "R" Us last week moved creative responsibility for its estimated $15 million account to Scali, McCabe, Sloves, New York, from Grey Advertising.

DDB Needham Worldwide, SSC&B and Bozell, Jacobs, Kenyon & Eckhardt, all New York, were the other finalists in the review (AA, March 9).

Bohbot & Cohn, New York, remains Toys "R" Us' media-buying agency.

Similarly, the marketer that did much to boost the toy-chain's sales over the past few years, Coleco Industries of West Hartford, Conn., moved an estimated $14 million in billings from longtime shop Richard & Edward's, naming BJK&E for creative on its Furskin plush bears and Rambo action-figure line. Media buying is going to Admerex International, N.Y.

Loss of its largest client could be a crippling blow to Richard & Edward's. An agency spokeswoman said the agency is considering a "restructuring."

Pawtucket, R.I.-based Hasbro, meanwhile, will add a third ad agency next month, this one to handle a joint-venture electronic-toy subsidiary it is creating with Axlon of Sunnyvale, Calif.

Al Carosi, Hasbro corporate VP-marketing services, said this new unit will be called either Hasbro Electronics Division or Hasbro Technology. Six agencies are involved in the review, he said, including incumbents DDB Needham Worldwide, Chicago, and Griffin Bacal, New York.

Billings will exceed $5 million, Mr. Carosi said, with new products to be unveiled as early as summer.

Toys "R" Us VP-Marketing Ernie Speranza said Scali's creative will focus on the chain's reputation as a "children's supermarket."

Despite a modest 5% growth last year in the $12.5 billion toy industry, Toys "R" Us in 1986 reported sales of $2.5 billion, a 24% increase over 1985. While it credits Coleco's Cabbage Patch Kids dolls with helping to boost sales over the past five years, sales of the adoptable dolls have plummeted 58%, to $250 million, causing the retailer to look elsewhere.

> While "Coleco can't afford not to advertise, we have to be very careful how to spend our money."
>
> —*Coleco's Dean Heitler*

Mr. Speranza foresees interactive toys—including possibly Coleco's new Talking Cabbage Patch Kids—as best-sellers.

Coleco, too, is banking on Talking Cabbage Patch Kids as well as a talking ALF doll and its StarCom action-figure line to relieve its 1986 loss of $110 million on sales of $500

(Continued on Page 72)

Northrop severs Lord, Geller ties

Los Angeles—Northrop Corp. will end its one-year relationship with Lord, Geller, Federico, Einstein, New York, when their contract expires April 30.

Jim Taft, Northrop director of corporate advertising, said the agency was unable to deliver acceptable creative. Northrop is contacting West Coast agencies concerning its $4 million-plus corporate image account.

Northrop is using BBDO/-Slightly Further West for a project, but Mr. Taft wouldn't comment on the potential for a greater commitment.

West Coast News

Northern California Chevrolet Dealers, San Francisco, hired Graham Advertising, Walnut Creek, for its $5 million account, previously at Mojo MDA-Allen & Dorward. Also competing were Girvin, Conrad & Girvin, Rancho Cordova; J.W. Messner Inc., Grand Rapids, Mich.; and Pinne, Garvin, Herbers & Hock, San Francisco.

Atlantis Dairy Products, Huntington Park, is introducing Bon Lait Fromage Frais, a yogurt-like cheese product, in southern California. Light-hearted TV spots use Robin Leach, host of "Lifestyles of the Rich and Famous," as narrator. He takes viewers on a journey through the "Refrigerators of the rich and famous"—those belonging to model Christie Brinkley and actress Lauren Bacall. Mendelsohn/-Zien, Los Angeles, created the campaign, which breaks today. Another TV flight starts in June.

Safeway Stores' southern California division on April 2 begins a one-month joint promotion with Long Beach-based Jet America Airlines, offering 10% discount coupons on air fares and free flights. The grocery chain is distributing the coupons in newspaper ads in southern California, Arizona and Nevada. Radio spots support. Italia & Associates, Long Beach, Safeway's agency, is handling the promotion. Basso & Associates, Newport Beach, is Jet America's agency.

GF's Post puts ad bulk behind its bran flakes

By JUDANN DAGNOLI

General Foods Corp. this week starts its first network TV advertising for Post Natural Bran Flakes —more than tripling ad spending for the high-fiber cereal targeted to consumers aged 45 and over.

The estimated $7 million campaign is further evidence of a renewed push in the $5 billion ready-to-eat cereal market by GF, which earlier said it will test two new cereals this year (AA, Feb. 23). The perennial No. 3 in the category with a 13.3% share, GF trails No. 1 Kellogg Co.'s 41.6% share and General Mills' 21% share.

The TV spots breaking March 31 feature entertainer Steve Allen and Rue McClanahan of NBC-TV's "Golden Girls." The two appear in separate 15-second spots, whose initial six-week run will be back-to-back on morning news programs and daytime slots, said Peter Isaia, VP-management supervisor at Grey Advertising, New York. The spots later will run separately.

Rye Brook, N.Y.-based GF is trying to line up other celebrity spokesmen for the cereal.

GF appears to be trying to revitalize its cold-cereal line, which analysts say suffered in recent years from a cutback in new-product introductions and ad spending. The Post unit's volume dropped by 4% in 1985, compared with 8% growth for Kellogg and 5% growth for General Mills.

During the first nine months of 1986, the Post bran entry received $1.9 million in media spending, according to Leading National Advertisers.#

Raisin' recall

Grapevine beats Big Mac

By JULIE FRANZ

When it comes to pitching food products on their nutritional value, which are consumers most likely to remember: McDonald's, the nation's largest restaurant chain, or a bunch of dancing raisins?

TV spots for the California Raisin Advisory Board featuring three completely cool, Claymation raisins danced past McDonald's last month to claim the crown as the best-recalled advertisement.

With a yearly budget that pales in comparison with what McDonald's spends in a month, the board's raisins came to mind first for 2.3% of respondents asked to recall the first ad they had seen, heard or read in the past 30 days.

McDonald's ads pulled 2.1% of first mentions. It has been combining a TV push for its five breakfast sandwiches with its continuing $12 million print effort showing its responsiveness to consumers' nutritional concerns. McDonald's garnered 2.7% of first mentions in the January survey.

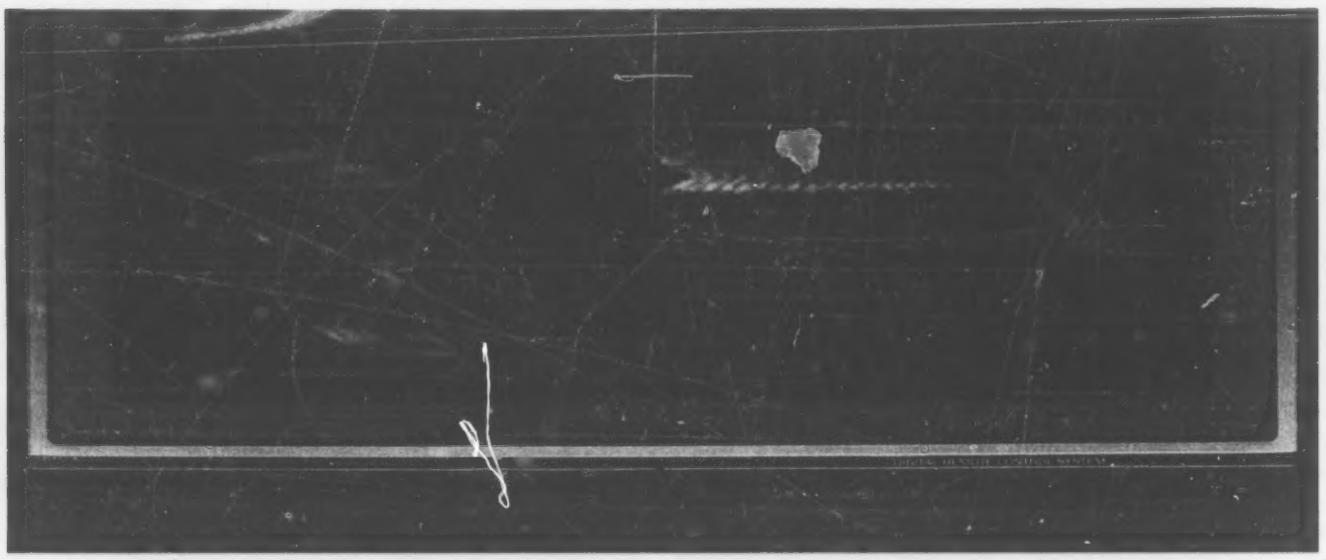
The singing, dancing clay raisins appeared among the top 10 recalled ads as soon as they hit the airwaves, placing No. 6 in October. They moved into the top spot in both November and December, but fell back to No. 5 in January when McDonald's first broke its nutrition campaign.

Those raisins are hip, but they've got a long way to go if they hope to beat McDonald's amazing record. Big Mac's advertising consisently has placed among the top 10 in unaided awareness since April 1982,

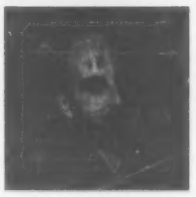
(Continued on Page 71)

CORRECTIONS & CLARIFICATIONS

- One of the creators of Inc.'s salt-and-pepper shaker set promotion (AA, Feb. 16, P. 46) was misidentified. The monthly's Boston office and Amy Krakow, a New York-based free-lance copywriter, created the promotion.
- In the Bank of Baltimore spot in Global Gallery (AA, March 2, P. 40), the name of the director was erroneously listed as Ralph Boda. It should have read Jeff Millman; Mr. Boda was the cameraman on the production.
- Mark Liu's age was misstated in an item on his appointment at *Lear's* (AA, March 23, P. 8). He is 40.
- The sales and earnings chart accompanying the Wilson Sporting Goods Co. corporate close-up was incorrectly plotted (AA, March 23, P. 83). The left-axis numbers should have started with $350 million at the top and $50 million at the bottom.#



When Showtime/The Movie Channel scrambled, so did we.



Stephan W. Schulte
Sr. Vice President, Direct Broadcast Development
Showtime/The Movie Channel Inc.

"We knew that when we started scrambling our satellite transmissions, there was a potential of over a million and a half homeowners with earth stations who would immediately want to know how to unscramble them.

"To be prepared to deliver that information we had to deal with the company that had the capability of handling five thousand calls, fifty thousand calls, or half a million calls on very short notice.

"And that's why we went to WATS Marketing of America.

"With the potential of receiving so many viewer calls, we were very concerned about the customer's ability to get through and have a responsive, cooperative operator at the other end of the line. WATS could handle it.

"And it's an ongoing relationship, because as more of the channels on the satellite scramble, the number of inquiries will continue to increase."

Helping clients reach marketing objectives. That's our goal at WATS Marketing of America. No one has more experience and no one gets results like we do.

For information on how WATS Marketing of America can help you achieve your marketing goals, give us a call. We'll tune you in to the action-oriented way we do business.

CBN's image campaign spreads the gospel truth

By Janet Meyers

CBN may well be the Rodney Dangerfield of cable networks—it gets no respect.

From its inception in April, 1977 as a religious broadcaster, CBN has struggled to grab onto mainstream advertisers and their dollars. The high-profile campaigning of founder Rev. Pat Robertson, an expected Republican presidential candidate in 1988, has only added to that struggle, even though CBN Cable Network tries to maintain a distinct identity from parent Christian Broadcasting Network.

Ad agency executives sniffed at the channel's "holy-roller" beginnings as part of Rev. Robertson's Network, and refused to buy it for fear their clients would be linked in viewers' minds with the electronic ministry. Agency buyers who did deign to examine CBN's healthy ratings often dismissed the network's programming as stodgy and boring. Having headquarters in Virginia Beach, Va., also didn't help much in selling ads to New York executives.

Those were just a few of the special problems besetting CBN, the fourth-largest cable network in terms of viewership according to A.C. Nielsen Co.'s fourth quarter, 1986 ratings, as it battled for advertising dollars.

Only recently has CBN programming expanded sufficiently that the channel's touchstone, the "700 Club" talk show hosted by Rev. Robertson, comprises only four hours of its daily fare compared to six hours five years ago and five hours last fall.

Ad-supported, non-religious programming currently represents 75% of the network's offerings, according to John Roos, CBN VP-advertising and marketing. Over the past year, Mr. Roos adds, the channel's religious programming has decreased 25%.

"They're trying to come across as a mainstream cable network," says Alec Gerster, exec VP-media for Grey Advertising, New York. "They're trying to say, 'We're not just the '700 Club' or 'Mr. Ed.'"

CBN now has 34.1 million viewers according to Nielsen's January figures, and is flexing its developing muscles.

In February, some 17 basic cable networks, including CBN, ESPN, Lifetime, USA Network and Ted Turner's WTBS superstation, formed a consortium called CableOne. The central buying office will negotiate with agencies on behalf of the networks; it plans to offer clients a buy that will run on all 17 networks, with a guaranteed rating level. The consortium's collective clout should help CBN diffuse its lingering image as a religion channel.

But CBN also wants to take care of itself. In the past two years, it has aggressively produced and pursued fresh, original programming, such as its upcoming, brand-new "Lassie" series. And last September, it tripled its trade budget to nearly $1 million and launched its first major trade campaign that dared advertisers to "Just Watch Us."

That campaign, created by Wunderman, Ricotta & Kline, New York, deluged the New York ad community with telephone kiosk ads and subway posters; radio spots and direct mailings blitzed New York and other markets as well. The campaign continues this year with special emphasis on CBN's programming.

Original programming, however, is expensive to produce, so now CBN has to convince advertisers not only to buy the network, but to buy it at higher prices than in the past. CBN Cable President Tim Robertson admits that's a "classic marketing problem. How do you go from being a discount shop to being a boutique?"

The network saw its ad revenues rise 30% last year. "We've seen an increase, but we need to be up more," says Mr. Roos.

Progress is slow. One ad exec says CBN's image is still "tarnished"; others look positively at CBN's new programming.

Before embarking on its "Just Watch Us" campaign, CBN commissioned Wunderman in late 1985 to find out why it couldn't score with advertisers, despite its healthy viewership.

Research showed that the ad community believed CBN was "too bland, too conservative," says Mr. Roos. "We took that thought and addressed it directly with an ad headlined, 'So you never thought CBN had an original idea.'" The ad, which ran in trade publications last year, featured a scene from "The Campbells," a Canadian series produced exclusively for CBN.

This year, CBN again will spend about $1 million on trade advertising, with ads focusing on such new CBN fare as its "Lassie" series breaking this fall and an exclusive, two-year run of "Paper Chase" shows. Mr. Robertson hopes "Paper Chase," a series about lawyers, will reel in the upscale professionals CBN has been missing.

Its demographics are skewed heavily female, aged 25 to 54, earning $25,000 and up. While that's attractive for package goods and household products, CBN wants a broader mix. To help accomplish that, the network entered into a joint venture with Coca-Cola Telecommunications, Burbank, Calif., to produce four new comedy and drama series for 1988. It is scouting around for other programming as well.

CBN and Wunderman are also readying an ambitious direct mail campaign that will be sent to 200 top agency executives and advertisers throughout the country. The packet includes a video of Mr. Robertson discussing the network, as well as a folder containing information on the network's programming, ratings and demographics.

Wunderman's research also revealed that the ad community's perceptions of the network didn't jibe with CBN's viewer profile. Agencies seemed to believe, says Mr. Robertson, that CBN's viewers lived in less populated parts of the country. While he admits that urban representation isn't as high as he would like, he notes that more than 50% of CBN's audience lives in more populous suburbs and counties.

Wunderman's campaign has taken a jazzy, contemporary approach. Radio spots feature music commissioned from recording studio Sweet Home, a subsidiary of Joy Art, Chicago. The spots have aired in Dallas, Denver, Los Angeles, New York and Seattle, and will break in Chicago and other markets in April. In Denver, CBN bought radio time for a three-minute version of the "Just Watch Us" song created specifically for the campaign.

To spread the gospel about its growing Nielsen numbers, CBN is planning a direct mail contest aimed at agency media buyers who will be eligible to win a free trip anywhere in the world.

The basic problem we sensed was that people didn't understand what we were," Mr. Roberston says. "They thought we weren't serious about being in the cable business and that we weren't serious about advertisers and weren't paying attention to them."

Mr. Robertson has doubled CBN's sales staff, and some New York agencies say they're noticing CBN's higher profile.

Consumer advertising, handled in-house, will be more than $3 million this year, up about $1 million from 1986, Mr. Roos says. The network plans more direct spending in addition to co-op ads with cable operators.

"'Just Watch Us' was a dare," explains Joel Tucciarone, Wunderman senior VP, director of strategic marketing. "We needed a campaign that was very up. 'Just Watch Us' had an implicit challenge in it, but not in a nasty sense. We wanted to get people to try CBN, but sort of as a come-on."

Mr. Tucciarone is about to delve into new research to discover how agencies' perceptions of CBN have changed since the campaign began.

CBN's religious affiliation shouldn't be a deterrent, Grey's Mr. Gerster says. "As people get used to it over time, those types of issues tend to fade away."

Co-op promotion pushes products, shrinks bills

By Nancy Zeldis

Late this summer, cable TV households in Southern California and Pittsburgh will be party to a novel marriage of advertising and promotion that turns package goods purchases into savings on cable bills.

Eighteen Southern California multiple system operators, representing 49 cable systems in the Los Angeles County area of dominant influence, will begin a six-month test of the program in August. Englewood, Colo.-based Tele-Communications, Inc., the nation's largest MSO, will undertake a Pittsburgh-based test at the same time.

The participating Southern California cable systems represent 920,000 of the 1.2 million subscribers in the Los Angeles County ADI, according to William Aubrey, assistant to Doug John, president and marketing manager, Westport, Conn.-based Glendinning Associates, which created the promotion. Among those taking part are American Cablesystems, Comcast Cable Communications, and Falcon Communications.

"We hope to see the promotion roll nationally on a quarterly basis by early next year," says Mr. John. Package goods marketers' first commitments to the initial dual-market test are expected in early May.

The Free Cable TV Shopping Spree" features a booklet inserted in cable subscribers' monthly bills containing photos, by category, of participating brand-name grocery items.

Subscribers are asked to buy the featured products at the store of their choice and send their Universal Product Code labels to the fulfillment center at Glendinning as proofs-of-purchase. Glendinning supplies postage-paid return envelopes.

Subscribers receive a rebate check from Glendinning for the amount of credit they've accumulated, which they send to the cable operator with the remaining portion of their monthly payment.

"Every two products purchased will cut $1 off the subscriber's monthly bill," Mr. John explains. Spree credits earned through purchases can whittle a bill down to zero. If the credited amount exceeds the bill, additional savings will go toward the following month's bill.

Package goods manufacturers handle 90% of the cost; the remainder is split between operators and Glendinning.

According to Tony Farwell, executive director of the Southern California Cable Television Marketing Council, whose members include the 49 participants, Glendinning pays operators a fee to cover costs for inserting the booklets into home service bills. The cable companies advertise the promotion on their systems, charging package goods advertisers, via Glendinning, a fee of just less than 10% off their rate card.

Mr. Farwell says that for package goods manufacturers, the promotion is a high-profile alternative to the cluttered, free-standing insert arena. "What's more, it's a retention program for cable operators. We think people most likely to take this up are those who are price sensitive, and therefore not likely to renew their subscription," he says.

The slogan tentatively adopted for the promotion is "Turn Your Everyday Shopping Into FREE Cable TV service." Mr. John says the program is just being presented to package goods manufacturers now. While he won't divulge names, he says a number of major companies are close to signing contracts with Glendinning. He adds that the company is willing to negotiate product exclusivity rights with manufacturers. "We're pursuing brands with broad household penetration and high purchase frequency," he says.

To take part in the program, manufacturers will pay Glendinning approximately $20,000 each; if consumer response is overwhelming, the cost could be higher. The program has been in the planning stages since last September.

"Los Angeles was selected as a kind of torture test," Mr. John says. "We felt if we could arrange a mechanism for linking up 90% of the [county's cable] subscriber base, which we did, we could do it anywhere."

The promotion marks the first time cable operators will be banding together to market their services as a whole in the Southern California area. "Cable operators realize it's best to band together to grapple with marketing problems," Mr. John adds.

The promotion is primarily geared to reducing the industry churn rate—the number of subscribers dropping their subscriptions each year—and to boosting cable penetration in the stiffly competitive Los Angeles market.

"If you can reduce the erosion of the subscriber base, it turns into increased profit," Mr. John says.

MSO challenges viewers' programming savvy

By Lori Kesler

Sometime this spring, some 800,000 subscriber households in United Cable Television's 53 operating systems will get an invitation in the mail inviting them to play "The $50,000 Cable Network Challenge."

Sounds easy enough. Just match the cable programs to their cable networks, write in the correct channel numbers on the game cards, and get a $5 instant-winner prize as well as a shot at the $5,000 grand prize.

But here's the catch. To fill out all nine game cards correctly, the contestants will have to do a little homework—either from their TV screen or from a cable TV program guide.

They'll have to figure out, for example, which network carries the world's messiest game show. They'll have to look for "Larry King Live" and comedian Robert Klein's series. They'll even learn where to locate the exuberant Dr. Ruth with her helpful hints about good sex. By the time the contestants finish entering the contest, they'll be transformed into cable programming experts. And that's the whole idea.

Denver-based United Cable Television, the country's eighth-largest multiple system operator, recently launched the promotion as part of an elaborate $1.5 million campaign designed to position deregulated cable as a new, improved product.

"In the past, companies like ours didn't spend very much money on marketing because they didn't need to," says Nimrod Kovacs, United's marketing VP. "New business came from building new systems. But now that there's no more virgin territory, we're all going to have to spend some hefty dollars to get people to make greater use of our product."

Lori Kesler, Advertising Age's St. Louis correspondent, is a frequent contributor to Special Report.

Mr. Kovacs says the cable industry's "pole-climbing" days have given way to a marketing-driven era. And he says government has loosened its grip on cable operators because they function in a far more competitive environment today.

On Jan. 1, the Federal Communications Commission effectively removed state and local governments' power to set basic cable rates. System operators now are free to charge whatever they think customers will pay for programming packages.

Prior to deregulation, says Mr. Kovacs, basic rates were kept artificially low while price pressures pushed the unregulated, premium-channel fees artificially high. Meanwhile, he says, cable faced mounting competition as the video rental market rapidly grew into a $4 billion industry and independent TV stations proliferated from about 80 five years ago to 250 today.

Cable operators eventually convinced the government that regulation was obsolete. Says Mr. Kovacs: "We argued successfully that the alternatives to cable aren't regulated, and that to compete with them, we had to be able to effectively manage our business."

Like many other MSOs, United Cable, which owns or manages 53 systems in 18 states, has taken steps to do just that by overhauling its price structure, adding new programming services, realigning channels and mounting the biggest marketing campaign in its history.

In January, basic rates went up an average of 15% in most United systems. The suburban Denver system, for example, boosted its monthly fee to $12.95, a jump of $1.50, or 13.1%. But United sweetened the basic package by adding such ingredients as the American Movie Classics channel, C-Span II (which offers live Senate coverage), Cable Value Network and the Discovery Channel.

"We're bringing the cost of basic cable in line with its value, but we're not taking wholesale price increases," says Mr. Kovacs.

At the same time, United is reducing premium service fees for "multi-pay" customers—those who subscribe to more than one premium service. Mr. Kovacs says the company is also considering cutting prices for "single-pay" customers.

Direct mail booklets highlight United's services.

To fill out its menu of programming services, United is making interactive pay-per-view available in all markets during 1987. Officials think the interactive equipment will help increase pay-per-view business because it lets subscribers receive pay movies simply by pushing a remote control button at home; they previously had to call ahead to get PPV programs.

And United, like most other cable operators, has repackaged its channel lineup—a move now allowed by deregulation—so that some of the most popular basic cable networks occupy the more attractive low-number spots while some local-access channels have been bumped higher up the dial.

"We try to put the best basic cable in the slots between the ABC, CBS and NBC stations," Mr. Kovacs says. "It's like a shopping center, and we're going after the foot traffic."

To highlight the changes taking place in United systems, the company in January began the staged rollout of its five-month, $1.5 million advertising and promotional campaign themed, "The New United Cable. See What's In It For You."

Officials say they hope to bring some 60,000 to 70,000 units into the system during the campaign drive, which broke first in the suburban Denver system and is scheduled to roll through United systems in suburban Los Angeles, suburban Detroit, Scottsdale, Ariz., and other markets.

"Our goal is to increase revenues per homes passed," says Joel Susel, corporate director of field marketing operations. He says the company also is trying to retain more of its old customers in the face of price increases. The cable industry loses some 30% to 35% of its subscribers every year, he says, "so to come out ahead, we have to make up for the churn and grow beyond it."

United is promoting its message on its own cable TV systems and is spending about $200,000 for outdoor, print and radio advertising created by Wills & Evans, New York.

But the bulk of the corporate marketing budget—$1.3 million—supports a sweepstakes game, direct mail, telemarketing and direct sales calls. Mr. Kovacs says the company depends heavily on direct marketing because it provides measurable results and efficient coverage. "In most cases, we don't own an entire market, so there's too much waste in mass media coverage."

Then too, he adds, direct mail is capable of delivering a lengthy, informational message to the consumer, and the telemarketing or sales call opens a direct dialogue. All that is important, he says, because "cable is a complicated sale."

By the end of June, some 1.8 million households in every major United Cable market will have received a 12-page direct mail booklet touting United's programs and making a one-time offer to install or upgrade their cable service for just 87¢.

Existing subscribers get their $50,000 Cable Network Challenge game cards in the mail soon after they receive the booklet; new subscribers are given the game package when their cable is installed.

The second phase of the marketing plan calls for telemarketers or door-to-door representatives to contact households that do not respond to the direct mail offers.

The $50,000 Cable Network Challenge game initially was set up to teach new customers about basic. When research also revealed that old customers' awareness of basic was low, the company expanded the game plan to include them.

The game serves another purpose. Because winners must claim their prizes in merchandise ordered through Cable Value Network, the promotion stimulates trial of the home shopping network. United keeps 5% of the CVN sales made through its systems; it also owns a piece of CVN.

When United's marketing campaign hit the suburban Denver market in mid-January, it attracted 800 new basic subscribers for that month and generated a large backlog of orders for February. The campaign's impact surprised company officials.

"After Christmas, people tend to disconnect," says Mr. Susel. "Last year, for example, we lost 300 units in January. And this year we had the price increase, so we would have been happy just to break even. Instead, we recorded the best January ever."

Meanwhile, the first 100,000 game packages dropped in the Denver market generated an unexpectedly high 20% response rate. Among those entries, 58% got all the answers correct to qualify for the $5 prize and gain entry in the sweepstakes.

"I'm stunned by the response," says Mr. Susel, who admits he never expected to have to pay off so many winners. "But I'm delighted. We were told nobody would enter because the game was too complex. But obviously lots of people are taking the trouble to find the right answers—and that means lots of people are learning about cable."

Promotion shrinks bills

(Continued from Page S-11)

Robert Alter, president of Cabletelevision Advertising Bureau, New York, estimates the industry churn rate at 12%. However, Steve Tuttle, spokesman for the National Cable Television Association, Washington, puts the national annual rate at 33%. But the true figure is actually less because most disconnects are because of "people moving and later reconnecting their service across town," he explains.

"The growth of this industry will be due to remarketing," he adds. "We're pretty much finished with rewiring the country except for the last remaining urban pockets, such as the outer boroughs of New York. Promotions like this are welcome."

Margaret Durborow, Van Nuys, Calif.-based VP-marketing and programming for participating United Cable Television, a Denver-based MSO, agrees. "We see this as the beginning of future opportunities to target consumers in a distinctive and effective manner," she says.

"Industry bonding has occurred recently with Los Angeles cable stations agreeing to change to a common channel line up, which helps aid tune-in advertising. But this helps out the institutional, feel-good side of the business," she adds.

Such promotions are particularly timely, as many cable companies are increasing their basic service rates since deregulation took effect Jan. 1.

"It's a way to redress the increases and give cable a positive image," says Melvin Matthews, president, Kinneloa Television Systems in Pasadena, Calif., one of the smaller participating operators in the Glendinning promotion with just 2,500 subscribers. Kinneloa's basic rate is $11.95 a month. "We're lowering it. We think it is fairly high already," he says.

"The main thing that made this attractive to us was that it's a good retention tool. You can hook people in with lower bills. So we jumped on it," he adds.

Cable penetration

Top 10 market areas ranked by TV households

Market	Percent cable penetration	Cable TV households
1. New York	39.3%	2,637,690
2. Los Angeles	37.9	1,661,040
3. Chicago	31.3	943,570
4. Philadelphia	47.4	1,192,890
5. San Francisco-Oakland	49.5	1,021,650
6. Boston, Manchester	53.1	1,041,030
7. Detroit	38.2	635,750
8. Washington D.C.	33.9	525,300
9. Dallas-Fort Worth	39.1	602,670
10. Cleveland, Akron	46.4	660,000

Coming

Next week Advertising Age's Special Report will focus on **Computers.**

Grapevine's grasp

(Continued from Page 6)
when adWatch first began monitoring advertising awareness.

Foote, Cone & Belding, San Francisco, handles the raisin account. Leo Burnett Co. USA, Chicago, handles McDonald's.

Rounding out the top 10 in unaided ad awareness, in descending order from third place, were Ford; Coca-Cola; Budweiser/Bud Light; Chevrolet; Miller/Miller Lite; Pepsi; Chrysler; and Marlboro.

AdWatch is a joint project of Advertising Age and SRI Research Center, Lincoln, Neb.

Advertising awareness is measured by asking a nationally projectable sample to name the advertising that first comes to mind of all seen, heard or read in the last 30 days.

Consumers are queried on the first ad they remember overall as well as in a variety of product areas. During February, 1,000 consumers were polled by telephone.

Those changes in advertising awareness that are deemed statistically significant by adWatch researchers can be attributed to more than sample variation.

There were some signs of life last month in the coffee category, but they didn't come from perennial leaders Folgers and Maxwell House.

The big news came from a decaffeinated brand, Sanka.

Sanka's latest campaign, in which a woman talks about her concerns over chemical decaffeinating processes, obviously caught viewers' attention. The brand's advertising awareness rose 3.3 percentage points in February to 7.4% of first mentions, its highest score ever. Young & Rubicam, New York, is the agency.

Folgers remained No. 1 in advertising awareness among coffee marketers, with 24.4% of first mentions last month. Maxwell House ads followed, coming to mind first for 23.5% of the sample.

Taster's Choice, which also has new advertising touting it as "naturally decaffeinated," trailed Sanka with 3.8% of first mentions; Hills Bros. was in fifth place with 3.1%.

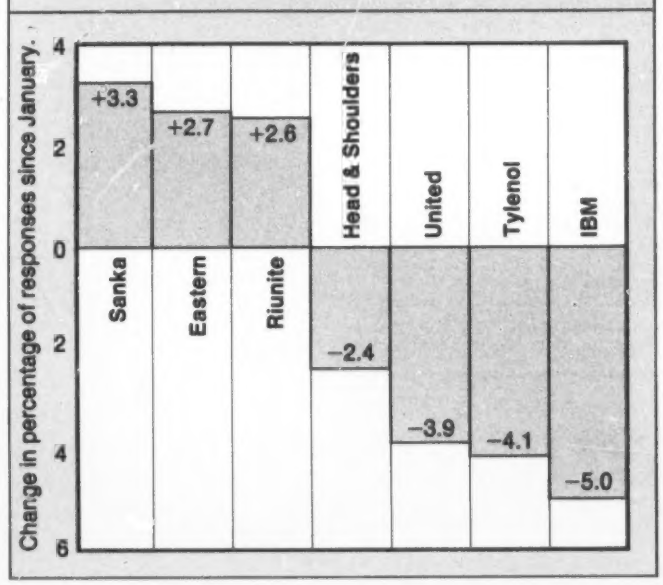
Among other significant changes in February advertising awareness:

- Fare wars tend to cause more excitement in the **airline** category. Eastern's top-of-mind awareness score increased 2.7 percentage points to 10.1% of first mentions, enough to pull it into second place from fourth place last month. United's score dipped 3.9 percentage points to 14.3% of first mentions, but remained No. 1 in airline advertising awareness. American was third with 9.7%.
- IBM's advertising registered the biggest dive in top-of-mind recall in February, dropping 5 percentage points to 16.2% of first mentions in the **computer** category. IBM remains No. 2 in that category behind Apple, whose computer advertising came to mind first for 22.9% of respondents. Tandy Corp.'s Radio Shack was third last month with a 2.5% share of first mentions.#

For additional information or data, contact SRI Reseach Center, 301 S. 68th St., Lincoln, Neb. 68506. Phone: (402) 489-0351.

February winners and losers

Question: Of all the advertising for (product category) you have seen, heard or read in the past 30 days, which ad first comes to mind? Source: SRI Research Center Inc., Lincoln, Neb.



Frito-Lay

(Continued from Page 70)
goods with GrandMa's cookies.

For a company used to success, and whose benchmark for success is a standard $100 million sales-rate "hurdle" for new products, Max Snax's combined sales performance of $75 million did not make the F-L cut. The three products were pulled from store shelves late last year.

The expensive Max Snax lesson hit home. For Mr. Jordan and other F-L senior management, the failed venture showed that thorough test-marketing of new products is essential.

"We didn't crack the code on Max Snax from a marketing standpoint," Mr. Jordan admitted. "We never quite figured out how to interest the consumer in the products. Our repeat rates were good, but our trial levels did not get up to where we felt they should."

But Rumbles, Stuffers and Toppels are "still good products," he added, "and may be resuscitated in the future."

The attempted combined launch also demonstrated the limitations of the company's widely recognized as exceptional store-door delivery system (a 10,000-person driver sales force delivers direct from the manufacturing plant to individual stores, thus eliminating an intermediate warehousing operation).

There simply were too many new products for trucks to handle, Mr. Jordan said. "We just tried to do too much and overloaded the system," he noted, adding that certain products in the future may require a parallel distribution system.

The aggressive move into these other areas of the total $24 billion snack market was spurred by market research that projected a slowdown in salty-snack consumption.

"Frito-Lay felt a sense of urgency about getting into new products because of indicators that the salty-snack market was softening," said Leo Kiely, senior VP-sales and marketing. "When you have 50% of the market, you want to be at as much view as possible. We didn't want to be at a sins-of-omission position."

But "data that looked like things were slowing down were not accurate," he said, "and we [now] see that salty snacks continue to grow at twice the rate of other food categories.

"From Max Snax, we gained conviction about our core business potential. Last year's base business was better than what we had thought it would be."

Several new items introduced last year did fare well—they were all new flavors of established brands. Cool Ranch Doritos, Chili Cheese Fritos and Jalapeno & Cheddar Lay's potato chips, combined with the relatively new Delta Gold potato chips, added $250 million in new sales.

"I'd say that 1986 initiatives concentrated in traditional salty snacks—where the system clearly had leverage—paid off," Mr. Jordan said.

Now, with his eye riveted on the bottom line, Mr. Jordan said he will apply the Vince Lombardi school of football to snacks: concentrate on a few good moves and win the game. And clearly the moves center around the mainstays.

Still, despite this caution on new products and particularly non-chip items, Mr. Jordan maintained that F-L eventually will be doing "a lot of non-salty snacks."

One "sweet snack" product that he is high on is McCracken's Apple Chips, a sliced, baked apple "chip" in test in Grand Junction, Colo. Test-marketing may be expanded this year; it may be ready for national rollout in two years.

F-L is proceeding slowly not only because of the lessons of '86 but because of McCracken's complex and expensive manufacturing process (in which F-L, in effect, slices apples like it does potatoes).

Nevertheless, Mr. Jordan believes McCracken's could be a "$200 million product."

He added: "We are evaluating a number of different options for taking non-salty snack products to market. Right now, we are just stepping back and asking how we can tackle this. What do we have to do to make those successful? We don't have any answers now—just a lot of questions."

Mr. Jordan probably will find the answers.#

For the Record

DFS DORLAND WORLDWIDE, New York, won Gold International Broadcasting Awards from the Hollywood Radio & Television Society for TV spots for former client Wendy's International, Dublin, Ohio. It won best TV short and best TV series for 1986. The agency lost the Wendy's creative assignment last October to Dick Rich Inc., New York.

COCA-COLA CO., Atlanta, denies it is interested in buying Wendy's International, Dublin, Ohio. The fast-food chain is rumored to be a potential takeover target. The soft-drink company says it continues to have no interest in becoming a competitor to its fast-food customers—a swipe at rival PepsiCo, which while trying to improve its fountain sale business also competes in that category through its restaurant arm with Pizza Hut, Taco Bell and Kentucky Fried Chicken.

OVERALL CALIFORNIA WINE shipments rose by 8% in 1986, with total volume hitting 424 million gallons, says the Wine Institute, a San Francisco-based trade association. Wine coolers, which now account for 19% of the state's wine shipments, showed the largest growth with a 38% jump to 80 million gallons. Shipments of bottled table wine increased 2% to 262 million gallons. Appetizer and dessert wines, with a 2% decline to 30.9 million gallons, showed the sole drop in the category.

DENNIS BROWN, 37, will go to bat for the three major advertising industry associations as director of their State Legislative Alert & Action Coalition, which monitors state and local initiatives aimed at advertising. Mr. Brown most recently was a director of TV programs for trade conventions at Teleguide Convention News, a Washington-based production company. Earlier, he held public affairs and industry relations positions with the National Fertilizer Solutions Association and the National Turkey Federation. At the SLAAC, Mr. Brown succeeds Bill Sutherland, who left (AA, Jan. 26).

FEDERAL TRADE COMMISSION Chairman Daniel Oliver is requesting a fiscal 1988 appropriation of $69.85 million; 48% would go for consumer protection. Mr. Oliver, speaking to a House appropriations subcommittee, requested a slight increase in manpower for the consumer protection bureau that regulates advertising and deceptive marketing practices. But Mr. Oliver had no criticisms for major advertisers' practices, which he recently praised in an address to industry officials.

A CABLE TV "must carry" policy approved by the Federal Communications Commission is under fire from the Association of National Advertisers. The ANA says the rule doesn't sufficiently guarantee that cable homes will be able to get over-the-air TV stations. The FCC is requiring cable systems to continue carrying some local TV stations but only for five more years. The rule requires cable operators to offer, for a fee, a device that lets subscribers switch from cable to over-the-air reception.

THE SENATE COMMERCE COMMITTEE overwhelmingly endorsed a bill sponsored by its chairman, Sen. Ernest Hollings (D., S.C.), that would codify the Federal Communications Commission's controversial Fairness Doctrine. Major advertisers have long opposed the doctrine, saying it stifles issue-oriented ads. Similar legislation is anticipated in the House; several congressmen want to put the doctrine into law.

JAPAN AIR LINES, New York, is running a $4 million campaign promoting an expanded schedule effective April 1. Each testimonial-style ad features two U.S business executives discussing the benefits of travel on JAL. The effort will run in newsweeklies and major daily newspapers, backed by radio spots in JAL's gateway cities. DCA Advertising handles.

CAMDEN HOUSE PUBLISHING'S *Harrowsmith*, Charlotte, Vt., will get "a significant financial boost" following Editor-Publisher James Lawrence's sale of his Canadian holdings—*Equinox* and *Harrowsmith* magazines—to Toronto-based Telemedia Publishing. Telemedia publishes *Canadian Living* and *TV Guide* in Canada. For starters, the U.S. *Harrowsmith*, introduced in January 1986, will increase its rate base July 1 by 11.1% to 200,000 and again next January by 12.5% to 225,000.

ACCOUNT ACTIVITY: **MainStreet**, Chicago, a specialty-retailing division of Federated Department Stores, is reviewing its $2.5 million broadcast account with undisclosed local agencies after parting with W.B. Doner & Co., Southfield, Mich. The retailer is expected to name finalists by April 8. . . . **Verbatim Corp.**, Eastman Kodak Co.'s floppy-disc subsidiary, Charlotte, N.C., to **Altschiller Reitzfeld**, New York, from D'Arcy Masius Benton & Bowles, San Francisco, for its $5 million account. . . . **Columbia Pictures**, Burbank, Calif., to **Bermudez & Associates**, Los Angeles, as its hispanic marketing consultant. The studio originally planned to hire a full-service agency for the hispanic account but opted instead for a consulting arrangement, as expected (AA, March 2). . . . **Miller Brewing Co.**, Milwaukee, to **Howard/Marlboro Group**, New York, from Focus Marketing, Westport, Conn., sales-promotion agency of record for its Lowenbrau, Meister Brau and Miller Lite brands. . . . **Kayser-Roth Corp.**, Greensboro, N.C., to **Tatham-Laird & Kudner**, Chicago, from Grey Advertising, New York, for Leg Looks pantyhose and additional new-products assignments.

WORTH NOTING: **Eric Ober**, 45, to president, CBS Inc.'s owned-and-operated TV stations, from VP-public affairs broadcasts, CBS News. He succeeds **Peter Lund**, now president, Multimedia Entertainment (AA, March 23). . . . **"Single Man,"** a half-hour TV comedy that was among Fox Broadcasting Co.'s fourth-network backup shows, is on hold, following the sudden death of actor Dean Paul Martin. . . . **Pabst Brewing Co.**, Milwaukee, has signed as a major sponsor of "Tuesday Night Fight" on USA Network, its first significant cable TV venture. Asher/Gould Advertising, Los Angeles, handles Pabst. . . . **Arby's**, Atlanta, has signed comic Jeff Altman as its first commercial spokesman in more than a decade. First TV executions in the second phase of its "Taste the difference" campaign (AA, Feb. 9) start in mid-April. Backer & Spielvogel, New York, handles. . . . **Trusthouse Forte Hotels**, El Cajon, Calif., is running its first national TV campaign in six years for its 450-unit Travelodge chain. The animated spots, created in-house, promote Travelodge's "Special spring rates." . . . **Tiffany & Co.**, New York, filed a registration statement with the Securities & Exchange Commission for an initial public offering of 4 million shares of common stock. The offering is expected to take place by early May, and the price will be between $21 and $23 a share.

Highlights

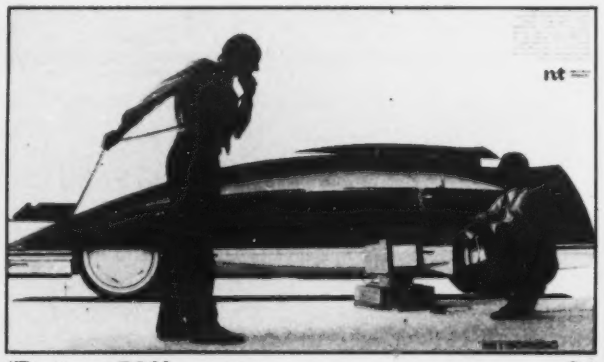
Baseball's promotion curve 4
Major League Baseball clubs are out to prove again that a strong lineup of in-park promotions and corporate sponsor tie-ins can yield high attendance with little advertising support.

Y&R's newest network 24
Young & Rubicam, through a minority holding in U.K. agency Collett, Dickenson, Pearce & Partners, is helping spearhead a new agency network in Europe. The network plans to enter the U.S. and German markets this year.

Beers speaks of transformation 30
As American business changes, so does the advertising industry. The challenge is for agencies to take their fate more in their own hands and "manage our own transformation," said Charlotte Beers, the new chairman of the American Association of Advertising Agencies, at the group's annual meeting in Boca Raton, Fla.

Getting Time on campus 32
Time Inc. is expanding into the lucrative college market as part of a new strategy to acquire magazines rather than start them up. The company has agreed to acquire the assets of Campus Publishing, Upper Saddle River, N.J., from its 23-year-old president, Douglas Ranalli.

Cola bragging rights 48
The two leading cola marketers, Coca-Cola USA and Pepsi-Cola USA, both see good news in the latest figures measuring soft-drink sales through food stores. Coca-Cola hailed the figures, measuring December and January sales, because it became the No. 1 marketer of sugar cola products. However, Purchase, N.Y.-based Pepsi pointed out that Pepsi-Cola continues as the single-largest selling soft-drink brand in food stores.



'Fortune 500' sponsor 81
Northern Telecom Inc. has scored a publishing coup by becoming the first exclusive sponsor of the *Fortune* 500 directory of companies, appearing in the magazine's April 27 issue. Northern Telecom bought 21 pages in the issue, including 15 ads created specifically for it, at a total cost of $1.5 million.

INTERNATIONAL

Agencies rethink global buys 54
Global agencies are questioning whether it is preferable to own 100% of their overseas offices or leave some equity in local hands.

Nestle competitor gets U.S. base 54
By purchasing Chicago-based Brach Inc., Jacobs-Suchard, the Swiss chocolate and coffee manufacturer, has established a base for a major push into the North American market in the next decade, according to Zurich financial analysts.

Long-term boost seen in A-B probe

By SCOTT HUME

Top executives at major sales-promotion agencies see the Anheuser-Busch/Hanley Worldwide scandal as a short-term image setback that ironically may help the industry achieve several long-sought goals.

Chief among those goals is an end to the tradition of hiring promotions agencies primarily for project work and, instead, accelerating the trend to formal, agency-of-record relationships like those with advertising agencies.

Hanley Worldwide, the now-defunct St. Louis advertising/promotion agency being investigated for possible kickback arrangements with employees of Anheuser-Busch (AA, March 30), was a throwback to the sales-promotion industry's "unsophisticated and unsavory" past, say industry executives. They call it one "bad apple" that is unnecessarily tainting the whole barrel *(see related story on Page 82).*

The Hanley allegations "do some short-term damage to the sales-promotion field, especially when they reach the front page of *The Wall Street Journal*," said Jeff McElnea, president of Paramus, N.J.-based Einson Freeman. "When that happens, top executives send the clippings down to middle management and begin to ask new questions about promotional spending.

"The silver lining is that when companies' top management takes more notice of the promotions field, it allows the top companies, the cream of this industry, to rise higher. Top management should be involved enough to ask questions."

While agreeing the situation presents possibilities for long-term industry improvements, some sales-promotion executives feel the field is treated unfairly.

"I think these incidents can be blown out of proportion. The Hanley situation doesn't really say anything more about sales promotion

(Continued on Page 82)

Account worth $15M

Vons Grocery moves to JWT

EL MONTE, CALIF.—Vons Grocery Co. last week hired J. Walter Thompson USA, Los Angeles, to handle its $15 million broadcast account, previously at Grey Advertising, Los Angeles.

The region's largest supermarket chain also moved a $1 million account for its Pavilions superstore chain from Keye/Donna/Pearlstein, Los Angeles, to JWT. Vons intends to double the number of Pavilions superstore outlets to 10 within a year. Keye/Donna/Pearlstein retains Vons' Jerseymaid dairy unit.

The Vons account change follows a two-month agency search that involved nine agencies. JWT beat out Los Angeles agencies Admarketing and Keye/Donna/-Pearstein in the final stages of presentations.

Goodby, Berlin & Silverstein staffers and Fred Wessinger, the former owner of Blitz Weinhard Brewing Co., have formed a partnership in San Francisco to develop and market several brands of beer.

The new entity, called McKenzie River Corp., will introduce its first entry, a malt liquor, on May 1. McKenzie will test the product in San Francisco, backed by radio and outdoor ads created by Goodby, Berlin & Silverstein.

G. Heileman Brewing Co. is manufacturing the product.

California State Lottery selected Casanova Pendrill, Los Angeles, in association with Burrell Advertising, Chicago, and Pacific Rim Advertising, Los Angeles, to handle its two-year contract for "ethnic" marketing services valued at $4 million to $5 million annually.

The team beat out two other multi-agency finalists: Bermudez & Associates, Los Angeles, in association with Carol Williams Inc., Oakland, and Joint Art Media, Alhambra; and UniWorld/West, Los Angeles, with La Agencia de Orci y Asociados and Uyeda & Associates.

Rubin Postaer & Associates, Los Angeles, which lost the general California State Lottery contract a few weeks ago to Dailey & Associates (AA, Feb. 9), previously handled the lottery's marketing efforts targeted to blacks, hispanics and Asians.

Mojo MDA-Allen & Dorward, San Francisco, has formed a new sports marketing division headed by Ken Flowers, the former VP-marketing and community affairs of the San Francisco 49ers national football team.

The new division is called Ken Flower Sports.#

Technology drives industry down a new path

By Janice Steinberg

New technology generates excitement in most industries, but it's what the computer industry relies on to survive. Despite a watershed year for technological advancements, including faster microprocessing chips and speedier, more versatile personal computers, computer industry analysts are projecting only modest revenue increases this year. After the turbulence of recent years, however, any semblance of steady growth is welcome.

Industry analysts at San Jose, Calif.-based Dataquest, a division of Dun & Bradstreet Corp., predict 7.1% revenue growth in business computer sales in 1987 and a 7.5% jump for microcomputers.

John McCarthy, research manager of Forrester Research, Cambridge, Mass., also sees minicomputer sales advancing 7% to 10% with the most growth occurring in fourth quarter, 1987. Uncertainty about IBM's new products will slow the microcomputer market down, he says, particularly in business sales. "Microcomputer growth this year won't be more than 3% to 4%, because of the confusion about what IBM's going to do in the market place."

Forrester Research asked 100 *Fortune* 1000 sites in January to project PC unit growth over the next two years. "Up until this January survey—that's across seven or eight surveys in three years—people always said a 100% growth rate or close to it," says Mr. McCarthy. "This January the growth rate across the respondents was 48%, and people were saying, we're slowing our purchases; we're waiting to see what happens."

The big technical news concerns the 80386

Ads begin to bite into criticism

It's not exactly one of the gray-haired ladies among agency clients, but computer advertisers have been around long enough for that sector of the ad business to settle down. Because consumers were uncertain about what to do with the first wave of personal computers, clients and agencies struggled with how to position them.

One direction has been mapped, however. Consumers now want to know precisely how a computer will solve real problems in their work and their lives. As a result, image ads are out.

"One of the big complaints I've had with advertising is that advertising people are not technologists, they don't understand the technology and how to apply it," says John C. McCarthy, research manager of Forrester Research, Cambridge, Mass. "As people become more computer-literate, advertisers are going to need to extend a more sophisticated message."

He sees an important trend in Digital's theme, "We have it now," and Wang's "We make it work." "Computers are no longer a promise," says Mr. McCarthy. "They can do it today."

BBDO's first campaign for Apple, tagged "The Power To Be Your Best," focuses on people and how Apple products help them realize their full potential, says Bruce Mowery, Apple advertising manager.

While the major computer manufacturers are the most visible industry advertisers, other segments of the market are advertising heavily, primarily in print.

Computer manufacturers account for only $20.7 million of the $262 million the industry spent on print advertising in 1986 in the top 20 computer publications, according to Sheila Clarke, VP-marketing, Adscope, a Goldendale, Wash.-based ad tracking service.

Software manufacturers spent $82.62 million; mail and phone order companies, $51.86 million; PC boards, $25.61 million; peripherals, $34.25 million; other categories, $50 million, according to Adscope.

"As the microcomputer grows in processing capability and also grows in terms of the variety and number of users, you're talking about advertising opportunities that far outweigh anything that even came close in any other industry," says Seymour Merrin, VP of the Gartner Group, Stamford, Conn., a data processing consultancy.

"It's like the automobile industry, where people are advertising cars and also tires. But it's as if you're also advertising windshields and steering wheels and seats," Mr. Merrin says. "There are so many different vertical markets and it's so widespread you can afford to do national advertising."

—Janice Steinberg

I Don't Mince Words, Folks

I call them as I see them. I'm pretty opinionated. But so are the 375,000 PC brand specifiers I write for.

They don't read my columns in PC Magazine because they need to know the price of a software package. They read me because they want the down and dirty details on where software prices are headed, what's hot, what's not, which products are on the back burner, and which portable is selling like hotcakes: in short, the inside track.

I may irritate a few advertisers from time to time but, hey, if my readers wanted a "yes man", they wouldn't be reading PC Magazine. I have a reputation for calling a hoax what it is and for calling attention to both the real gems and the real dogs I come across in this business.

It's not that I'm cranky—I'm just a straight shooter. And that's what my readers expect. In fact, they demand it. Why?

Because PC Magazine readers don't have time to fool around. They're brand specifiers and their companies know they're real superstars when it comes to PC technology. So they trust these guys to decide what gets bought whenever new PC products are on the agenda.

Now I ask you, if you were responsible for choosing a machine that uses a 68020 CPU over an 80386, would you want to look dumb?

These guys don't. They know there are too many groaners and clunkers out there that can cost their company plenty. And they know that if they want to look smart they have to stay smart. That's why 375,000 brand specifiers turn to PC Magazine.

Fortunately, we have a monopoly on the best team of writers around—and let's not forget we've got the only wall-to-wall PC product testing laboratory in computer publishing—PC Labs. Now, brand specifiers are a sharp bunch and they know that with qualifications like that, they're going to get exactly the kind of scoop they need to keep on top of what's available. PC Magazine is their insurance so they don't blow it when it comes time to buy.

You may not know this, but in eleven studies, PC buyers said that PC Magazine was the publication they read most regularly. It's also the one buyers are most likely to trust. Plus, they said they look at our ads more closely, too. You can send for the studies if you want more proof. But I'm here to tell you that for your money, PC Magazine draws a bigger crowd and a better crowd. That's why we're the Big Book. And I mean B-I-G.

Technology

(Continued from Page S-1)

chip—referred to as the 386—developed by Intel Corp. of Santa Clara, Calif. The 386 chip offers microcomputers more speed, greater memory and multitasking capabilities.

Compaq Computer Corp. of Houston and Advanced Logic Research, Irvine, Calif., introduced the first 386 computers in late summer 1986; Armonk, N.Y.-based IBM is expected to announce its entry into the 386 arena this week. In December Compaq announced it had shipped more than 10,000 Deskpro 386's and was having trouble keeping up with orders.

There is tremendous enthusiasm about the 386 chip's impact on information processing. "The 386 brings capabilities to the desktop that 10 years ago were only affordable by *Fortune* 1000 companies," says Norm DeWitt, director of Dataquest's personal computer industry service. "We believe the 386 machines are going to breed a whole new generation of software that the market hasn't even dreamed."

However, Mr. DeWitt cautions against expecting the 386 to return the industry to the high, double-digit growth it enjoyed a few years ago. Initially, 386 machines will sell only to the high end of the market, and many industry watchers say it may be several years before software catches up with the new technology.

Another technical buzzword this year is desktop publishing. Apple couldn't sell "The Macintosh Office" in 1985. In 1986 desktop publishing software helped Macintosh—paired with Apple's LaserWriter—build recognition, acceptance and sales. According to Tom Willmott, VP of the PC-microcomputer group at International Data Corp., Framingham, Mass., Apple sold 100,000 Macs to businesses with annual revenues of more than $100 million in 1985. Sales reached 175,000 in 1986. He predicts the number will catapult to 325,000 this year.

Apple's success has spurred a number of manufacturers to release desktop publishing software for the IBM family. Last

(Continued on Page S-5)

Chip realigns players in follow-the-leader game

By Brian Moran

The personal computer market's 5-year-old game of follow the leader is ripe for a shakeup this year, as close to a dozen companies will attempt to challenge IBM Corp.'s mantle as the industry's technological innovator.

Compaq Computer Corp., Kaypro Corp. and Zenith Data Systems Corp. are looking to make a challenge with a new generation of faster, more powerful PCs based on Intel Corp.'s 32-bit microprocessor, the 80386. The moves mark a significant departure from the traditional strategy of following IBM's lead by depending on the industry giant to set standards for the makeup of a PC's basic operating functions.

Marketing 80386-based PCs ahead of IBM is a highly risky move for any computer player, because early versions may require redesign once IBM brings out its version. IBM's 32-bit model could include proprietary features that may render the first machines obsolete almost overnight.

For Houston-based Compaq, which kicked off the 80386 frenzy with the introduction of its Deskpro 386 PC last September, preempting IBM is a huge gamble. Compaq has been the industry's most successful practitioner of the follow-the-leader strategy, marketing souped-up PCs that often improve on IBM's offerings by performing faster and with more features. The success of the company's original portable computer forced IBM to make a series of price cuts on its Portable PC and eventually led to the IBM model's demise last year.

Compaq now claims some 20% of the PC market, compared to Armonk, N.Y.-based IBM's 46%, according to InfoCorp, a Cupertino, Calif.-based market researcher. Company spokespeople say its market research has indicated 80386-based machines might seize as much as 10% of the entire PC market this year and up to 25% by 1990.

Because the new chip has much greater memory capacity than previous hardware, its supporters say it will allow desktops to use powerful programs that now run only on larger minicomputers or mainframes.

The 80386 also can run any of the popular programs written for IBM's PC line, up to four times faster than available chip technology. Some analysts say the chip marks the biggest advancement in the industry since the IBM PC's 1981 debut.

"The 386 chip is the platform of the future," says John McCarthy, analyst for Forrester Research, Cambridge, Mass. "It will open up the personal computer to a whole new level of software."

Yet detractors point out that the operating system software needed to take full advantage of the 80386's capabilities is not yet available. Therefore, they say, the first machines are merely expensive, faster versions of current PCs. The operating software needed to trigger the 80386's fifth-gear power may not be ready until 1988.

The system's current inability to run broad applications limits the appeal of first-generation 80386 models to segments that put a high premium on speed alone, such as financial analysts and programmers in large corporations that can pay the $6,500 to $9,000 price. Despite this limitation, Compaq says it already has sold close to 15,000 units of its Deskpro 386 in the U.S., Europe and Australia.

For Compaq, which kicked off the 80386 frenzy with the Deskpro 386, pre-empting IBM is a huge gamble.

The arrival of an operating system will trigger a storm of competition among software marketers to offer word processing, spreadsheet, database and other applications packages. Big software players like Lotus Development Corp., Microsoft Corp. and Ashton-Tate already are developing packages.

Apple Computer also has beaten IBM to the 32-bit generation via a new version of its Macintosh PC, featuring Motorola Corp.'s 68020 chip. The new Mac features color graphics and larger display screens than current models. Cupertino, Calif.-based Apple in early March introduced its first 32-bit PC, the Macintosh II, a machine that signals the company's direct challenge to the high-powered 386 PCs. The new Mac also is capable of running IBM-compatible software via an external card.

Analysts say that a major factor in IBM's cautious stance on the 80386 chip is Big Blue's desire to break away from its traditional use of off-the-shelf operating systems for its next generation of PCs. IBM is expected to use customized components in some models of its first 32-bit computers; developing such features will take time.

Naysayers also point out that early 80386 models are making their debut in a period of sluggish market demand. The technology will never take off without IBM's endorsement, these analysts say.

IBM reportedly is concerned that the new chip's tremendous power could affect sales of its higher-priced minicomputers, which account for about 20% of the company's revenues. In addition, Big Blue's current priority appears to be resolving its battle against low-end discounted imports, a struggle that has sapped IBM's market share and dragged down earnings. IBM cited flat PC sales as a factor in a 48% drop in its fourth-quarter 1986 profit, down from $2.68 billion to $1.39 billion. Quarterly revenue dipped 1.2% to $16.95 billion.

The 80386-based entry will provide a critical challenge for IBM to boost its market share and leave the clones behind via internally-developed features. Because IBM will be late to market, the company will want to make sure that its 80386 entry offers significantly more than Compaq's. Big Blue's reputation as a standards-setter will be on the line.

"IBM will make its 32-bit machine as proprietary as possible," says Clare Fleig, analyst with International Technology Group, a Los Altos, Calif.-based market researcher. "It's absolutely critical that they offer something special as an entire generation of computer users is getting ready to move up to a new step."

IBM reportedly has shown software developers and corporate customers prototypes of an 80386-based PC with proprietary sound and graphics features and the ability to connect to IBM mainframes.

Meanwhile, Compaq is racing to make its Deskpro 386, which

(Continued on Page S-6)

Technology

(Continued from Page S-4)

year IBM created a semi-autonomous unit to address host-based and desktop publishing, but is not yet ready to announce new products, says Jim Monahan, press information representative at IBM's Montvale, N.J., office.

Mr. Willmott says Apple will continue to dominate desktop publishing this year. "The software development process will have to go on for two or three more quarters before we'll see a product in the marketplace that represents an honest challenge to the Mac and Apple LaserWriter environment."

"After three years of false starts, the Year of the LAN has arrived," said *PC Magazine* in its December issue on local area networks, which, explained simplistically, combine PCs to share information. This is "a very healthy market," says Douglas Gold, senior research analyst at International Data Corp. He says in 1986 companies shipped $924.9 million of LAN equipment. Mr. Gold projects shipments of $1.3 billion this year, growing to $3 billion by 1991.

LAN revenues illustrate one reason analysts decline to call the computer industry's 1984-85 difficulties a slump. They prefer the term "slowdown" and cite a number of reasons the market was stronger than it appeared.

One main reason is the diversity of market segments—LANs, software, PCs, mainframes, etc. "The idea of a slump is a misconception on the part of people who look at the industry as a whole," says Kevin Jenkins, president of Hercules Computer Technology, Berkeley, Calif., a leading peripherals manufacturer, which opened its doors in 1982 and had sales of $52 million in 1985. "They don't realize the great number of dynamic markets within it."

Robin Shepherd, director-corporate communications, Borland Interna ional, says the company has not suffered any effects of a slump.

Scott Oki, senior VP, sales and marketing, Redmond, Wash.-based Microsoft says that summer 1986 was the biggest quarter in their history: Microsoft racked up $66.8 million in sales, putting it ahead of Cambridge, Mass.-basedLotus Development Corp., which had sales of $65.6 million for that quarter, according to Menlo Park, Calif.-based *InfoWorld*.

Another reason the industry's troubles were overstated is the market simply was maturing, says Mr. DeWitt. "When you're a $4 billion market, it's not too difficult to double in a year, but when you're a $33 billion market you don't do that."

Although the computer industry clearly appears to be on the rebound, several major questions must yet be resolved.

Many of the most critical questions involve IBM, which has seen its market share eroded by less expensive clones. Dataquest reports that IBM garnered 40% of total 1985 U.S. microcomputer sales revenues. Its share dropped to 29.5% in 1986.

IBM also has lost some of its minicomputer market—particularly to Digital—because of the incompatibility of its diverse product lines. This year IBM is introducing the 9370, its first entry level minicomputer, which carries the System 370 architecture found in IBM mainframes. Because the 9370 will not be generally available until the fourth quarter, according to Rita Black, senior information representative at IBM in Rye, N.Y., the mini will raise more questions than answers for now.

Whatever IBM does, it is not called Big Blue for nothing. Suzanne Purnell, industry analyst at Dataquest, says IBM still holds 50% of most segments of the business market. Computer and business publications are buzzing with the lateat rumors about the company's new products. And in a tribute to its continued power, Mr. McCarthy predicts a sluggish market until everyone sees what's coming from IBM.

Source: Media Records

This data has been provided by Media Records for exclusive publication in Advertising Age and may not be reprinted or published in any form without explicit permission from Media Records. All newspapers represented are subscribers to Media Records. For those newspapers that subscribe to Media Records National Advertising Reporting Service, Total Advertising data shown has been supplied by the publisher to Media Records and included in this compilation. All publisher supplied figures are converted to MRCS/SAU inches by Media Records. These newspapers are indicated with an asterisk (*).

REPORTING METHODOLOGY

Media Records continues to measure in linage but due to the introduction of the SAU 6 column format Media Records has designed and developed a methodology with the approval of our subscribers, the INAME Measurements Committee, The ANPA/NAB Working Committee, The AAAA Newspaper Committee, and other industry groups.

The approved methodology is titled The Media Records Conversion System (MRCS) and is based upon the printed page area of each product of the newspaper and is a five step approach as follows:

1. Measure Printed Page
   Width and Depth in Inches
2. Determine Square Inches of Page
   Multiply Width by Depth Inches
3. Determine the Number of SAU Inches of Page
   Divide the Square Inches by 2.0625 (SAU Inches)
4. Measure the Total Lines of the Page
   Multiply Column Depth Agate Lines by the Number of Columns on the Page.
5. Determine the Factor for Converting Measured Lines to Reported SAU Inches
   Divide the Total Lines of Page by the Number of MRCS/SAU Inches of the Page.

Turning on the juice

Coca-Cola Foods, Houston, targets calorie-conscious adults in this 30-second spot introducing Minute Maid Light 'n Juicy low-calorie fruit beverage (inset). The spot, via Lowe Marschalk, New York, breaks nationally April 20. Couponing and in-store sampling also support. Ads focus on what Light 'n Juicy does not have: no added sugar, no crystals, no preservatives, no bubbles. The drink is positioned as "four delicious fruit flavors and the goodness of real juice." Budget was not disclosed.

Maybelline consolidates at Needham

By PAT SLOAN

Maybelline Co., fighting intensified competition from Noxell Corp., has consolidated the bulk of its estimated $60 million advertising budget at DDB Needham Worldwide, Chicago.

The switch ends Maybelline's 12-year association with Ted Bates Advertising, New York, and circumscribes a five-year relationship with the Bloom Agency, Dallas.

Bates loses about $31 million in billings in the move, while Bloom gives up about $9 million. Both shops retain other Schering-Plough business.

The consolidation at DDB Needham brings together the Moisture Whip line of cosmetics, makeup, creams and lotions, which was at Bloom, with the other Maybelline eye, lip, face and nailcare products handled by Bates.

The Memphis, Tenn.-based company plans to boost ad spending by 50% this year.

Although Maybelline remains

WRG will brew ads for new P&G coffee

By STEWART ALTER and JUDANN DAGNOLI

In a move against archrival General Foods Corp., Procter & Gamble Co. is about to perk up its Folgers brand with a premium-coffee line extension.

The new product has been assigned to Wells, Rich, Greene, New York, which is a relatively new agency to P&G's beverage division.

The product, which sources say is called Folgers Colombian Supreme, represents P&G's first entry into the premium-coffee segment, where rival GF already has gained a solid foothold with entries such as Yuban and Maxwell House Private Collection.

Cincinnati-based P&G had no comment.

There is speculation P&G is planning to move into this segment quickly. It reportedly will present its introductory program to its sales staff this week.

Ad spending could not be determined, but P&G spent $38.8 million in measured media to support the entire Folgers line last year, according to Leading National Advertisers.

Although the specific positioning of Folgers Colombian Supreme is not known, industry executives say the combination of the Colombian and the Folgers

Last Minute News

FDA backs use of latex condoms

WASHINGTON—The Food & Drug Administration late last week said marketers of latex condoms may, for the first time, advertise their products as helping to prevent acquired immune deficiency syndrome. In a letter to manufacturers, the FDA said the spread of AIDS has made it "very important that users be fully aware that latex condoms provide protection." Condoms made of natural membranes are excluded from the ruling.

O&M eyes overseas TV efforts

LONDON—Ogilvy & Mather is moving into program barter and syndication outside North America. It will buy programs and trade them to TV networks in return for airtime to sell to O&M clients.

Galoob enlists Towne, Silverstein, Rotter

SAN FRANCISCO—Lewis Galoob Toys here added Towne, Silverstein, Rotter, New York, to its agency roster, sharing its $28 million

Florida ad tax leaps Senate hurdle

Industry descends on Legislature

By STEVEN W. COLFORD

TALLAHASSEE, FLA.—Florida's proposed advertising tax was rammed through a state Senate committee last Thursday, setting the stage for crucial votes in the Legislature this week.

The tax bill extends Florida's 5% sales tax to advertising that originates within the state and, in an unprecedented step, to advertising that enters the state via national media.

National advertising groups are joining Florida advertisers and media companies in an 11th-hour bid to stop the bill. Association of National Advertisers president DeWitt Helm Jr. said he and a delegation of ANA member executives will arrive here Tuesday to "walk the halls" of the Legislature with local Florida ad industry groups.

The American Association of Advertising Agencies and the American Advertising Federation are working closely with Florida agencies and adclubs.

Industry officials contend they have a "50-50" chance to defeat the tax, partly because of the political uproar that was created when Senate President John Vogt, a Republican, added five hand-picked senators to the 11-member Taxation and Finance Committee.

The expanded committee defeated an amendment 10-6 that would have excluded advertising from the tax. Without the new members, the exemption would have been passed 6-5.

Howard Bell, AAF president, said the expansion of the panel "made it impossible for the ad industry and the consumers of Florida to get a fair legislative hearing."

The committee went on to pass by an 11-5 vote the full sales tax bill, which would extend the sales tax to more than 60 service businesses. Florida officials said the new taxes, if enacted, would add $900 million a year to state revenue, about $100 million of that from advertising.

The bill now goes to the Senate appropriations committee and is expected to reach the full Senate this Wednesday.

The Florida House, which hasn't completed its sales tax proposal, is expected to push a final draft to the full membership this week or next. Votes in both chambers are expected to be much closer than last week's Senate committee ballot.

The Legislature's leadership is trying to push the politically unpopular sales tax plan to quick judgment. They want to minimize anti-tax lobbying by business.

A statewide poll, released Friday, showed nearly two-thirds of the state's voters oppose expanding the tax. The same Florida poll, however, also showed 40% of the voters support a sales tax on newspaper advertising.

Despite the initial legislative defeat, industry lobbyists were encouraged by the failure of House leaders to act on the tax bill last week. The hang-up, lobbyists said, is advertising; they say they think the House bill will exclude national advertising from the tax.

"That is a possibility," said Charles Ranson, the industry's Florida lobbyist.

Mr. Ranson said he also believes the final House and Senate bills will be sufficiently different to require a conference. He even suggests that a majority of House and Senate members may eventually oppose the tax plan.

"I think it's real close," he said. "There's a real question whether the leadership has a ma-

Highlights

Racing to soaps 4
Chrysler Corp. and Yugo America are moving into a TV daypart automakers largely have ignored: daytime soaps. Yugo, which opened new marketing territory with its car priced under $4,000, will break new ground April 20 with spots on four CBS soap operas. Meanwhile, Chrysler's Plymouth division is using its long-running "The pride is back" spots on ABC soaps.

Network signs 21 agencies 6
A fledgling group of independent agencies claims it now has the clout it needs to gain media buying parity with the major shops. As they gear up for their final planning meeting this week in Los Angeles, backers of the Leading Independent Agency Media Buying Network said they have signed 21 members.

Arden looks beautiful to Avon 12
Avon Products is hitting the acquisition trail again, this time taking a look at a substantial entry in the retail beauty products market. An Avon spokesman confirmed that Avon is looking at Eli Lilly & Co.'s Elizabeth Arden division, a company with sales of $398 million that is expected to fetch as much as $620 million.

Guinness studies U.K. setup 24
Guinness is expected to announce soon a reshuffling of its $22.5 million in annual billings at U.K. ad agencies. The move will be the first step in the long-awaited realignment of the liquor brands it acquired last year in a takeover of United Distillers.

Tapping the yogurt culture 32
Atlantis Dairy Products has beaten major yogurt marketers to the stores with fromage frais, a yogurt-like blend of fresh fruit and cheese. The Huntington Park, Calif., company is marketing its Bon Lait fromage frais in Los Angeles and San Diego, backed by TV commercials featuring the voice of Robin Leach, host of "Lifestyles of the Rich and Famous."

First-class 'Traveler' 86
Conde Nast's Traveler, a monthly to appear in September, will make a first-class entry in a segment of the magazine industry that's almost as crowded as steerage.

Stars of the Interior 93
Charles Bronson, Clint Eastwood and Lou Gossett respond when the president says what they can do for their country. Public service announcements featuring the three actors are being distributed this week as part of a $350,000 campaign for the U.S. Department of the Interior.

INTERNATIONAL

BRAZIL

The color of money 64
This week's section focuses on Brazil, besieged by high inflation, debt woes and creeping unemployment. The problems are in stark contrast to avant-garde creativity and bold colors typically found in the country's advertising. The special section includes stories on the general economy; an overview of Brazilian creativity; a profile of the marketing success of the Grendene brothers; a story about front-runner TV Globo and the networks breathing down its neck; and a diary by a U.S. marketing executive detailing the red tape and headaches of launching a new product.

OTHER NEWS

The average price of a 30-second spot in syndicated children's TV shows has dropped 35% from record levels two years ago, based on 1987-88 advance sales just completed by major barter syndicators. Page 4.

K mart Corp.'s sale of most S.S. Kresge and Jupiter variety stores indicates the No. 2 retailer won't sacrifice profitability to overtake Sears, Roebuck & Co. Page 22.

Making a financial success of *California* is a goal that has eluded some of publishing's more accomplished players—Clay Felker, Rupert Murdoch and Mike Levy. But under Alan Bennett, the magazine's president of three years, the monthly is doing what it's never done before: making money. Page 28.

The advertising industry believes it has the votes to stop legislation that would ban the advertising and promotion of tobacco products. Page 36.

The high cost of establishing a new name in the crowded automotive market has led the major automakers to revive old names. For every Corsica-Beretta backed by a hefty ad budget, a Chevrolet Nova is recast to stretch a modest budget. Page 41.

Saatchi & Saatchi Co., while not yet able to effect a merger of its major agencies, is slowly but surely consolidating its smaller New York shops. Its latest move is to combine McCaffrey & McCall and Rumrill-Hoyt's New York offices under the same roof. Page 95.

SPECIAL REPORT

***City and regional magazines—** Shakeouts and editorial revamps seem inevitable among city and regional magazines. Publishers are bolstered, however, by a growing sense of regionalism among readers and advertisers.*

Address all subscription correspondence to Circulation Department, Advertising Age, 965 E. Jefferson, Detroit, Mich. 48207 (313) 446-0494.

Rate-cutting slammed by publishers

By STUART J. ELLIOTT

NEW YORK—The publisher of *Good Housekeeping* is charging that rate-cutting has "gone crazy," and is calling for an immediate end to it.

Soft advertising sales allegedly are spurring a renewed round of rate deals throughout the industry.

Because other magazines are giving advertisers and their agencies special rates not on publications' rate cards, *Good Housekeeping* lost "at least 100 [ad] pages," said Louis Porterfield, VP-publisher of the Hearst Magazines women's service book.

L. Porterfield

Alan Waxenberg, VP-publisher of Hearst's other women's service monthly, *Redbook*, termed rate-breaking "a cancer." He estimates *Redbook* has lost "200 or 300 pages a year . . . if not more."

General Motors Corp. and Unilever's Chesebrough-Pond's are benefiting from rate-cutting, say magazine and agency executives.

The beneficiaries "tend to be corporations with a multitude of brands, because they have the potential clout, the volume," said Michael Ephron, exec VP-director of media services at Scali, McCabe, Sloves.

"When times get tough, it gets worse, and this year it's really bad," Mr. Porterfield said, citing "the economy, the fact [that] advertisers are watching the bottom line more closely and the 15-second commercial [drawing marketers] back into broadcast again."

Ad sales this year for the "seven sisters" women's service titles—*Better Homes & Gardens, Family Circle, Good Housekeeping, Ladies' Home Journal, McCall's, Redbook* and *Woman's Day*—have been flat to down.

According to figures supplied by *WD*, the seven have lost almost 400 pages through their June issues vs. last year's first half of 5,129 pages.

This is the second time Mr. Porterfield has spoken out against rate-breaking. When he became *GH's* publisher, he warned it would be "the ruination of the magazine business" (AA, June 25, 1984).

One of the reasons there is for more rate-breaking, he said, is because that more agencies are "set-

Immigration's bounty

3 shops share $10M account

LOS ANGELES—The U.S. Immigration and Naturalization Service, Washington, hired a trio of agencies here for its $10.7 million advertising program to advise illegal aliens of new amnesty laws taking effect May 5.

Hill & Knowlton, La Agencia de Orci and Coronado Communications Corp. will produce English and Spanish-language ads for the service under the Justice Group name. Within three weeks, a flight of ads will address illegal aliens. A second component breaking in June will warn employers of stiff fines for hiring illegals. The campaign will use hispanic celebrities.

Liquor Barn, a San Leandro, Calif.-based unit of Safeway Stores, hired DDB Needham Worldwide, San Francisco, as agency for its $1 million-to-$2 million account, previously at Cole & Weber, San Francisco. The win may be fleeting, however, because Safeway is considering proposals to sell the 105-unit retail chain.

Liquor Barn hired DDB Needham after a review involving San Francisco agencies Evans/Lynch Rockey, Mojo MDA-Allen & Dorward and Reiser Williams deYong.

Also new to DDB Needham: TeleCake International, Oakland, a cake-by-wire service, from McLean-Stewart Advertising, San Francisco.

Daihatsu America, Long Beach, Calif., has narrowed its agency search to Abert, Newhoff & Burr, and Kresser, Craig/D.I.K., both Los Angeles, for its projected $1 million account. Japan's Ministry of International Trade & Industry has authorized Daihatsu to market 11,500 of its Charade three-door cars in the U.S. starting in the fall.

AN&B also handles advertising for Daihatsu's Hi-Jet vehicle.

West Coast News

Winegrowers of California, the Burlingame, Calif.-based marketing co-op of vintners and grape growers, will disband on June 30, following a stormy 3-year existence. The group's nearly 6,000 vintner and grower members voted to dissolve the association plagued by internal squabbling over its marketing approach.

As a result of the dissolution California vintners have filed a request with the state Department of Food & Agriculture to form their own commission. Pinne, Garvin, Herbers & Hock, San Francisco handles the Winegrowers' $1 million account.

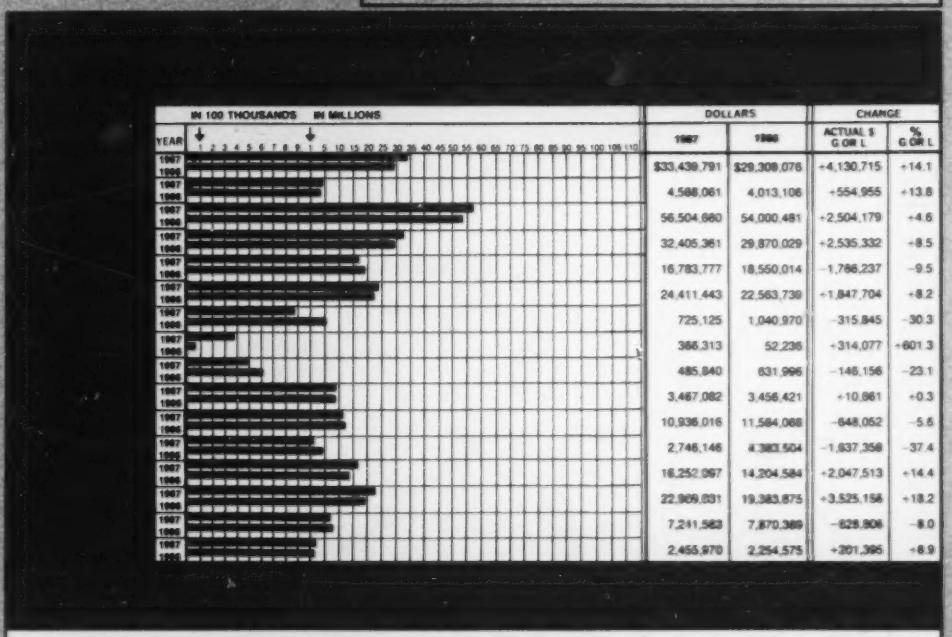
Great headline and great illustration for Oce copiers. Anderson & Lembke, Stamford, Conn., is the agency. Creative director: Steve Trygg; copywriter: Dave Goldenberg; art director: Susan Casey; graphic designers: Nancy Manfredi, Francine Nasseif; photographer: Steve Bronstein.



Ad spending hops by 5.5%: amusements, autos surge

NEW YORK—Advertiser spending in the major-market daily newspapers measured for the ADVERTISING AGE Flash Report increased to $235.5 million in January, a 5.5% increase from the same month in 1986.

The amusements category led all gainers in dollar volume increase, rising 14.1% to $33.4 million.

Other big gainers included new passenger car spending, up 18.2% to $22.9 million, and airline spending up 14.4% to $16.2 million.

Department stores spent 4.6% more than in January '86, with total spending in the category at $56.5 million. The food stores category was up 8.5% to $32.4 million, and the general-merchandise stores category was up 8.2% to $24.4 million.

Among other gainers were computer stores and supplies, up 13.8% to $4.5 million; public-service utilities and commissions, up 0.3% to $3.4 million; stock, bond and investment houses, up 8.9% to $2.4 million; and cameras, photo supplies and services, up 601.3% to $366,313.The biggest downturn in dollar volume was in the radio-TV-phonographs-records category, down 9.5% to $16.8 million.

Other losers included publishing and media, down 5.6% to $10.9 million; banks and trust companies, down 8% to $7.2 million; cigarettes, down 37.4% to $2.7 million; alcoholic beverages, down 30.3% to $725,125; and computers, equipment and services, down 23.1% to $485,840.

Media Records Inc. prepares the Flash Report, based on SAU inch measurements in 29 daily and 23 Sunday newspapers in 16 major markets.#

A good marriage of color, illustration and headline makes the point in this McDonald's ad by Leo Burnett USA, Chicago. Creative director: Greg Taubeneck; associate creative director-copywriter: Jim Dyer; art director: Jim Bruck; photographer: Dennis Manarchy.

A good graphic coupled with great use of color and a striking headline make this ad for Procter & Gamble's Crest toothpaste via D'Arcy Masius Benton & Bowles, New York, an attention-grabber. Creative director: Kenneth Charof; creative group heads: Norm Siegel, Ellen Azorin; copywriter: Craig Demeter; art director: Jeff Cooper; photographer: Jerry Friedman.

Test your condom. Right here. Right now.
Here's how:
Four questions to ask:
Your condom
Ramses EXTRA
Yes No Yes No
1. Does it have a spermicide for extra protection?
2. Is each individually tested for maximum reliability?
3. Is it strength tested to exceed a minimum of 2500 PSI?
4. Does it have a lubricant for greater sensitivity?
EXTRA

The headline stopped us in our tracks. The ad, done by Euramerica International Advertising in New York for Schmid Laboratories' Ramses condoms, goes for shock value in a new and somewhat controversial category. Special Report

City & Regional Magazines

Steve Bassett

Category ages gracefully despite competition

By Julie Liesse Erickson

City and regional magazines have found that with age comes a more complicated life—not only in staying the competition, but in keeping up with readers' needs.

The '70s were boom years for city and regional titles, the early '80s a time of segmentation. As the category matures, shakeout and continuing editorial refinement seem inevitable.

"The '70s saw an enormous number of start-ups; today we're seeing a shakeout, particularly in markets that are just too small to support a magazine," says Michael Levy, publisher of *Texas Monthly*, Austin, Texas. "The classic city and regional magazines are doing OK. But in Texas, for instance, there really was only one local magazine in 1973; today there are more than 40. There is no way the sluggish market can justify all those magazines."

Shakeout or no, publishers are confident in the future of the category as a whole. For one thing, says Gary Johnson, VP-marketing for *Mpls./St. Paul*, Minneapolis, "We're all legitimate, finally; we're an accepted part of the magazine industry, winning editorial awards. You just don't see the great diversity of quality that you used to."

A growing regionalism also bodes well for city and regional titles. "Regionalism has become a major component of publishing," Mr. Johnson says. "Consumers have developed a stronger sense of place; the '70s notion of transience is over. Also, consumer product marketers—Campbell [Soup Co.], auto marketers—are looking toward regional strategies.

"Aberrations in local economies aside, the category has every reason to think that the future holds greater stability and health."

Unless otherwise noted, all circulation figures used in this Special Report are Audit Bureau of Circulations' FAS-FAX averages for the six months ended Dec. 31, 1986.

Leno to host AA Awards

Gala evening scheduled for June 15

CHICAGO—Comedian Jay Leno, frequent guest host on "The Tonight Show," will host the second annual ADVERTISING AGE Awards Dinner on June 15 at the Hyatt Regency hotel here.

Mr. Leno will take time out from the movie he is filming, "Collision Course" with De Laurentiis Entertainment Group, to host the national awards show.

The comic and former auto mechanic writes his own material and has been acclaimed as "the funniest comedian working today" by David Letterman. Jack McCallum of *People* billed Mr. Leno "the king of stand-up comedians."

In recent months, Mr. Leno has played to sell-out crowds at New York's Carnegie Hall and Los Angeles' Universal Amphitheatre.

At the awards show, AA will announce the Agency of the Year, Best Newspaper Advertisement, Best Magazine Advertisement, Best Television Commercial in 12 categories, Best of Show Commercial, Best Commercial Director, Best Music, Best Sales Promotion and Sales Promotion Agency of the Year.

Winners will receive a bronze sculpture designed, cast and signed by prize-winning sculptor Joseph A. Burlini. In the television categories, sculptures will be presented to the winning production houses, as well as to the winning agencies and advertisers.

Eric Harkna, president-ceo of BBDO here, is general chairman of the event, which will benefit the Museum of Broadcast Communications.

The Dick Marx Orchestra will provide music for the black-tie optional gala.

Nuzzo to promote promos in address to AA workshop

NEW YORK—Tony Nuzzo, VP-marketing for American Express traveler's checks, will be one of the more than 40 speakers to address the annual ADVERTISING AGE Creative Workshop, Aug. 23 to 26 at the New York Hilton.

Mr. Nuzzo, who spent 10 years with Johnson & Johnson and Procter & Gamble before joining American Express three years ago, will deliver a presentation called "Creative promotion ideas for a changing business environment."

According to Mr. Nuzzo, promotions, once conceived of as limited in application and scope, now are viewed as a critical and logical part of any overall marketing plan, for any type of business. Mr. Nuzzo will demonstrate the applications of promotions, including sweepstakes, giveaways, coupons and cause-related marketing concepts. He will show how high-quality promotions can build upon a company's image, while poorer-quality promotions possibly can hurt a company franchise.

"Attendees will see how broad-based promotions can be customized to fit specific markets or segments in order to generate greater results," said Mr. Nuzzo. "They also will be shown how these results can be measured using techniques such as analysis, tracking and testing and how planned spending in a person's area can be minimized by using this information."

For more information, contact ADVERTISING AGE Education, 220 E. 42nd St., New York 10017, or call 1-800-233-3435. In New York state, call 1-212-210-0296.#

FRANK CERMINARO

LAS VEGAS—Frank Cerminaro, 61, who spent 35 years in single-copy sales circulation, died of a heart attack March 29 while attending a convention here.

Mr. Cerminaro was senior VP-client relations for New York-based Kable News Co. He was active in the Independent Newsstand Circulation & Executive Association and the Bureau of Independent Publishers & Distributors.#

P&G hops on regional trend

By LAURIE FREEMAN

Procter & Gamble Co. is moving toward regional marketing for its top-selling national brands, which may mean further changes in its pioneering brand management system.

The Cincinnati-based consumer products giant is considering renaming its assistant brand managers "regional/assistant brand managers," said a former P&G brand manager. The managers would track product sales, market-share changes or variations on a regional basis and then develop market-specific strategies to improve sales, the source said.

Proctor is the first major household products company to develop a regionalized strategy—a trend begun in the food industry—although Lever Bros. has made moves in the marketplace indicating its interest in this approach.

P&G has appointed a regional marketing director in its national sales organization whose main responsibility is "identifying some regional opportunities," according to a spokeswoman.

No changes have been made in the basic brand-management structure, she added.

It is not known whether the funds to fuel regional or local marketing programs would come from national advertising and/or promotion budgets.

General Foods Corp. is setting up a localized marketing plan that will be funded by trade-promotion dollars (AA, Feb. 9).

P&G is the nation's largest advertiser, with expenditures of $1.6 billion in 1985 for its current operations; full-year '86 figures aren't yet available. Its fiscal 1986 sales were $15.4 billion.

"It's not surprising that Procter would test, if not add, such an approach because of the

Ward's chief hails new image

Bernard Brennan, Montgomery Ward's president-ceo, says "People don't dislike us . . . they just ignore us." (See Page 3.)

Playtex commercials running in Europe already feature women modeling lingerie. This European spot was created by Grey Advertising.

Playtex first to model lingerie

Nets strip undie ad policy

By PAT SLOAN

Lingerie will be modeled in network TV commercials for the first time May 4.

That's when International Playtex breaks new commercials for its Cross Your Heart bra, taking advantage of a reversal of policy by the Big 3 networks. Until recently, each has prohibited the modeling of lingerie by live models.

ABC-TV dropped the commercial content restriction last November, informing marketers of the change in December. Stamford, Conn.-based Playtex then contacted CBS and NBC, and both changed their policies.

NBC, however, restricts the advertising to daytime.

All three networks still require the commercials be in "good taste."

The Playtex campaign is budgeted at $4 million. The two new commercials by Grey Advertising, New York, were filmed in Australia.

Bali Co., a division of Sara Lee Corp., now may change its scheduled airing of a live-model commercial for its new Isotoner bras and panties.

Developed by DFS Dorland Worldwide, New York, the spot is part of a New England market test for Isotoner intimate apparel. The commercial is scheduled to air on the three Boston network affiliates at the end of May, but sources report that airing may be moved up to early May.

Not every undergarment advertiser is rushing to use live

Court fight predicted as Fla. ad tax looms

By STEVEN W. COLFORD

TALLAHASSEE, FLA.—Ad industry leaders plan to go to court to stop Florida's 5% ad tax now that an 11th-hour lobbying blitz in the state Legislature failed.

The sales tax bill could be approved as soon as this week, and take effect July 1.

In a display of political muscle, pro-tax forces in the state Senate and House last week defeated ad industry-backed amendments that would have exempted advertising from the sales tax. The vote was 24-16 in the Senate and 75-39 in the House.

"The battle is far from over," said American Advertising Federation President Howard Bell following the defeats.

If final appeals to the conference committee and the Florida governor fail, Mr. Bell said the industry "will consider all legal options to prohibit this costly, inequitable and ill-founded state sales tax on advertising."

Officials from the AAF, the Association of National Advertisers and the American Association of Advertising Agencies met last week in Washington to discuss strategy; late in the week the ANA said it is forming a special litigation committee to examine possible court challenges.

So far, the industry is fighting a losing battle against the bill, which not only would tax advertising that originates within the state but also advertising that enters the state via national media.

The tax on national advertising is an unprecedented step that has made Florida a major battleground for the ad industry.

Industry officials fear that the Florida move will be

Bates may lose $40M Xerox account

STAMFORD, CONN.—Several New York agencies have approached Xerox Corp. here about handling its $40 million account, agency sources say. However, Xerox denies it is considering moving the account, now at Ted Bates Advertising, because of a conflict with sister agency Backer & Spielvogel, which handles NCR. The sources say Xerox is about to replace the Bates-created office products campaign, featuring an actor portraying Leonardo da Vinci.

Colgate takes country route with Curad

NEW YORK—Colgate-Palmolive today breaks a 30-second network TV spot for its Curad adhesive bandages, featuring country & western star Hank Snow's song "I Don't Hurt Anymore." The spot shows children "ouchlessly" removing the bandages. FCB/Leber Katz Partners handles (see related story on Page 3).

Nets ride high in third-quarter sales

NEW YORK—An unusually brisk third quarter for the Big 3 TV networks' scatter ad sales is inspiring hopes among broadcasters but warnings from agency executives, according to *Electronic Media*. Inventory is selling at 30% to 60% above upfront prices, and ABC,

Highlights

Hart, Simon hats in ring 4
The latest pair of Democrats to plunge in the '88 presidential sweepstakes are going to face image problems unique to their experience levels—Gary Hart is an old hand at chasing the presidency and Paul Simon is a novice.

MasterCard's new possibilities 6
MasterCard International will end its "Master the possibilities" TV campaign in July and resume in September with new creative to compete with Visa International's Olympics-inspired ad push. MasterCard's $40 million account is under review.

NARB to handle Bryan Foods dispute 12
The Council of Better Business Bureaus' National Advertising Division referred a case involving Sara Lee Corp.'s Bryan Foods unit to the National Advertising Review Board after failing to resolve a dispute over Bryan's ad claims. Competitors have continued to complain even though Bryan agreed to modify TV and print claims more than a year ago.

4A's worries about Big 3 cost-cutting 36
The American Association of Advertising Agencies is concerned Big 3 TV networks may discontinue commercial-clearance programs and reduce efforts to review marketers' complaints about competitors' spots. Four A's President Leonard Matthews said he "will not [let] go unanswered" the letter his group sent to the networks, arguing against major changes in commercial-review procedures.

J&J makes healthy expansion 38
Johnson & Johnson, which has built a reputation on products that treat the ills of America, will branch out to keeping people healthy. J&J's new subsidiary, Johnson & Johnson Health Management, will market health maintenance programs to business.

Burger King: Service crucial to success 43
Burger King Corp. executives said in-store service is the key to restaurant marketing. But other, smaller chains voted for the power of advertising by announcing new programs. Both opinions were expressed to financial analysts and portfolio managers at a conference sponsored by Prudential-Bache Securities.

'M*A*S*H'ing together IBM campaign 78
When Lord, Geller, Federico, Einstein first entertained the idea of re-assembling the cast of the "M*A*S*H" TV series to introduce IBM Corp.'s newest computers, the concept almost died on the spot. Later, the campaign turned into a reunion for the actors, some of whom hadn't worked together in more than a decade.

DFS Dorland faces lawsuit 92
Saatchi & Saatchi's ability to juggle clients within its agency network is being tested by a U.K. retail client. Dixons Ltd., an electrical goods retail chain, fired Saatchi-owned DFS Dorland from its $42 million account and sued the agency last week in a bid to prevent it from working for another retailer, F.W. Woolworth.

GF exec out as coffee ad fund slashed

By JUDANN DAGNOLI

The president of General Foods' $2.5 billion Maxwell House division resigned as GF prepared to cut its $70 million coffee advertising budget by 25%.

Stephen Morris, 43, said he resigned as Maxwell House president earlier this month because of "philosophical differences in how to manage the business."

Mr. Morris, reached by telephone at his Chappaqua, N.Y., home, would not confirm that his decision was related to the ad-budget cut, estimated at $17.5 million for the Maxwell House, Sanka, Brim and Yuban brands.

Mr. Morris said changes were underway at Maxwell House that "are completely different than anything previously discussed [at the Rye Brook, N.Y.-based company]." He would not elaborate on that statement.

The development has reignited long-standing speculation Maxwell House may be up for sale. Talk also has been fueled by the appointment of Raymond Viault, VP-group executive, desserts division, to replace Mr. Morris. Before GF sold its Gaines pet food division to Anderson, Clayton & Co. in 1982, Mr. Viault was made the division's marketing manager.

Both GF and Mr. Viault, 43, adamantly denied Maxwell House will be spun off. Mr. Morris also said he considered it extremely unlikely

May expand beyond ABC

Coors, Stroh link for tv boxing buy

By BRIAN MORAN

Rivals Adolph Coors Co. and Stroh Brewery Co. have made an unusual joint advertising buy on ABC Sports and say they hope to extend their collaboration to other network and cable TV dayparts.

The joint buy involves splitting the beer sponsorship of a four-event, weekend afternoon boxing series on ABC.

The series began April 19 with Stroh underwriting "Schlitz Malt Liquor Professional Boxing," a telecast featuring the World Boxing Association junior middleweight title fight between champion Mike McCallum and Milton McCrory.

The second event, "Coors Professional Boxing," will feature the May 3 International Boxing Federation light-heavyweight bout between champ Bobby Czyz and Jim MacDonald.

Each brewer has an option with ABC Sports for an additional fight —Stroh in June, Coors in July.

The brewers' joint bid for the boxing series is another indication of the willingness of advertisers to rewrite traditional relationships and practices with the media, particularly TV. Executives of Golden, Colo.-based Coors and Detroit-based Stroh said they hope to forge similar two-party buys in other TV dayparts when their marketing needs are compatible.

"We've talked [about] the concept with all three networks and with the cable networks," said

(Continued on Page 97)

Lucky for Grey

By MARCY MAGIERA

Lucky Stores last week named Grey Advertising, Los Angeles, to handle its recently consolidated Northern and Southern food divisions' $30 million account.

Lucky, based in Dublin, Calif., was previously handled by Cochrane Chase, Livingston & Co., Newport Beach (Southern division), and Shelly Berman Communicators West, Oakland (Northern division). DYR, Los Angeles, had been the agency for Lucky's Gemco division, which is now defunct.

Mojo MDA-Allen & Dorward, San Francisco, continues on corporate projects.

Grey resigned the $14 million account of Vons Grocery Co., a client of 14 years, in February, about the time Lucky was announcing its combined business would go into review.

Grey Chairman-CEO Miles Turpin denies the agency had an inside track for Lucky. "We had to compete for the business just like anyone else," he said, "and we had to be divorced from Vons before we could go after it."

El Monte-based Vons earlier this month selected J. Walter Thompson USA, Los Angeles, to replace Grey (AA, April 6).

Lucky's business includes 341 Lucky and Food Basket stores in California and the 48-store Southwest division. Lucky is the seventh-largest supermarket chain in the U.S.

Vons dominates supermarket sales in southern California, followed by Federated's Ralphs division (which includes Giant) and Lucky.

Cushman campaign targets businesses

By PATRICIA WINTERS

New York—National commercial real estate company Cushman & Wakefield is running a cable TV and print campaign designed to increase its profile among businesses.

"In the past, our advertising was pretty spotty," said Denise Dreany, Cushman & Wakefield ad manager. "We've become more sophisticated and aggressive about the need to advertise to corporate America."

A 30-second TV spot airing on Cable News Network and Financial News Network is themed "Business America's real estate firm"—a tagline introduced last year (AA, April 6).

Print ads in business and real-estate publications give specific examples of how Cushman & Wakefield has handled some of its clients' needs.

Companies highlighted include Federal Express, Honeywell and Physicians Health Services, a health maintenance organization. Bozell, Jacobs, Kenyon & Eckhardt, New York, is the agency.

In the first nine months of 1986, Cushman & Wakefield spent $300,000 in measured media, according to Leading National Advertisers. Spending for its latest effort is estimated at more than $1 million.

Cushman & Wakefield has offices in 60 markets and competes against a host of regional companies, as well as national ones such as Sears, Roebuck & Co.'s Coldwell Banker subsidiary.#

Addenda to Agency issue

Chicago—The Agency Profile issue of Advertising Age (AA, March 26) contained some entries that require correction and/or clarification.

• In the chart on leading agencies in the top 75 markets (AA, March 26, P. 135): Weightman Group, listed at $54 million in billings in the Philadelphia market, should have been $86 million. The $54 million that was listed reflects billings solely for Weightman Inc. in Philadelphia.

Wolkcas Advertising, Albany, N.Y., with 1986 annual billings of $5.4 million, should have been included in the listing for the Albany market.

DFS Dorland Worldwide, New York, with annual billings of $709.4 million, should have been included in the listing for the New York market.

• A footnote (P. 18) reported Young & Rubicam, New York, as owning 50% of HCM and 49% of DYR. Y&R actually owns 49% of HCM and 50% of DYR. Y&R's 1985 estimated billings from its Y&R core shops should have been $988 million, not $1.1 billion (P. 130).

• In the profile on W.B. Doner & Co., Southfield, Mich. (P. 40), James Dale, vice chairman-corporate creative director, was misidentified.

• The first name of Lloyd Highbloom, exec VP-director of the business development group, DDB Needham Worldwide, was misspelled (P. 37).

• Omnicom Group's worldwide billings were $5.82 billion, not $5.59 billion (P. 136).

• Klemtner Advertising, New York, had 1985 gross income of $6.7 million, not $4.8 million (P. 116).

• Hill, Holliday, Connors, Cosmopulos, Boston, was reported as losing the Spalding account, but it lost only the golf club portion. It continues to handle golf balls, team sports and corporate advertising for Spalding (P. 48).

• Stone & Adler, Chicago, involved 100% in direct-response advertising, should have appeared as the sixth-ranked agency in direct marketing on the chart (P. 118) based on its U.S. billings of $96.9 million.

• Lockhart & Pettus, New York, had billings of $2,878,000 in materials and services for 1986, not $2,300,000 (P. 118).

• Figures for Spangler/Fischer Advertising, Minneapolis, on the gross income chart rankings (P. 18) should have been an estimated $946,700 gross income on billings of $6,150,900 in 1986, and $675,800 gross income on billings of $4,359,600 in 1985, which were the figures appearing in the agency's profile (P. 131).#

Second tier cities winning top rated events

By Sharon Donovan

Location, location, location—the maxim used to pinpoint the top three criteria for a successful real estate investment turned out to be only one factor that earned New Orleans the 1988 Republican convention—a first for this sultry southern city.

What convinced GOP officials that "New Orleans is the best possible place for us to do our work and have fun at the same time"?

It was a tireless, unrelenting lobbying effort that overcame questions about budget problems, high crime, a lagging economy and traditional Democratic ties.

In exchange for location, facilities and hospitality, the convention, Aug. 15 to 18, 1988, is expected to pour about $50 million into the local economy and give the city unprecedented national exposure. That does not include what planners and television crews will spend during the set-up procedure for 50 days prior to the convention opening.

But the multimillion dollar expenditures are not the most important items, says Jerome P. Dickhaus, executive director to the mayor for economic development.

"The significant element is the residual. It's the focus on the city for such a long time," Mr. Dickhaus says. For the last three years New Orleans had no advertising or promotion budget to attract convention and tourism business. "So the impact of just the advertising and marketing value is phenomenal."

The eight months of lobbying began last spring and after the field narrowed in January from 10 cities to three, New Orleans, Kansas City and Atlanta, the GOP selection committee was swayed by Republican National Committee Chairman Frank Fahrenkopf Jr.'s preference for

Second tier

(Continued from Page S-1)
holding the convention in the Deep South—an attempt to increase the party's regional strength.

In tandem with the impor-

They vowed to leave no stone unturned in the run to woo . . . the site selection committee.

tance of the location was the attraction of the Superdome and its 76,800 seats, and a proximity to 26,000 hotel rooms within 30 minutes drive.

Not the least among New Orleans' selling points was its old-fashioned southern hospitality. "I began to realize the whole thing was kind of personal," says Peggy Wilson, the city councilwoman who helped map the strategy to snag the convention.

Although other cities saw New Orleans as the one to beat, New Orleans saw itself as the dark horse. The city made a pitch for the 1984 GOP convention, but President Reagan wanted the event in Dallas, and that ended that.

This time, the organizers vowed to leave no stone unturned in the run to woo the nine-member site selection committee.

For the first introduction in July, when the selection committee officially visited New Orleans, they were each assigned a "sitter"—a local Republican who took special care to court his charge. They were feted at the city's best restaurants and in the finest private homes.

Another, unofficial, visit to the city was from an invitation to attend a Saints-Redskins football game in the Superdome.

The red carpet was rolled out again via dinner at historic Gallier Hall in the French Quarter. State Democratic officials, led by Gov. Edwin D. Edwards, and U.S. and state senators and representatives were part of the affair catered by six local restaurants at no charge. Wine and liquor were donated by local suppliers and a department store decorated the hall.

After dinner, guests were driven in donated limousines to the palatial homes along St. Charles Avenue for dessert with prominent New Orleans families.

The subtlety of their strategy was not lost. "In no other city had leading citizens opened their homes to the committee as they did in New Orleans," says Nathan Landow, selection committee chairman.

In addition, Louisiana Republicans made it their business to visit site selection committee members and key Republican National Committee members in their hometowns.

Organizers also sent all 192 RNC members "reminders" of New Orleans: king cakes, pralines, bottled gumbo, trinkets, an Audubon Zoo poster, a video tape about New Orleans, an audio tape of local music, and baskets from the French Market. "Every time they came back from visiting a competing city, we had a gift waiting for them and a note asking them to remember New Orleans," Ms. Wilson says.

One of the organizers' greatest lobbying strengths was their ability to respond. When there was a suggestion that the business community didn't seem to support the convention effort, organizers recruited 25 of the city's top chief executive officers to write letters. The campaign brought 200 letters, five times as many as generated by Kansas City and 15 times the number from Atlanta, says Ms. Wilson.

The daily newspaper, the *Times-Picayune*, launched a letter writing campaign supported by full-page ads providing readers with forms to compose their own invitations to the GOP committee. This effort produced 500 letters that the paper forwarded to the RNC.

The organizers also recruited residents in the home states of the selection committee members to write letters on New Orleans' behalf.

However, every campaign has a trump card. And a number of convention backers credit Mayor Sidney Barthelemy, who made scores of telephone calls, wrote letters, trekked to endless dinners and cocktail parties, with holding the winning hand.

"Sidney Barthelemy has been very gracious," said Ebbie Spivey, a site selection committee member from Mississippi. "Even being a Democrat, he's been extremely nice to us."

Early skeptics thought the city's Democratic tradition would be a strike against it. But proponents argued that the number of registered Republicans and GOP elected officials in Louisiana is growing.

The mayor convinced the GOP that the city's financial woes are temporary and they won't impede the city's ability to host the convention or meet its contractual obligation for $8 million in services from public or private sources.

Critics who voiced concern about a dramatic increase in crime were silenced with "Every city has crime," and reassured that the city will provide adequate security.

"New Orleans did more than everyone else," says Carl Gillis Jr., Georgia committee member. But, he added, "If it didn't have any better facilities than Seattle, that sort of thing wouldn't help at all."

Guido Alberto Rossi/©The Image Bank

Geoff Gove/©The Image Bank

Location, plus an unrelenting lobbying effort, Bourbon Street and jazz, the Superdome and nearby hotels, and that good old fashioned southern hospitality enticed the GOP to this sultry city.

Signing celebration sparks showtime

By Ed Fitch

The folks at the Philadelphia Convention & Visitors Bureau are expecting a better turnout this time around. The first Constitutional Convention pulled some 55 people, most of whom stayed at the Indian Queen Tavern or City Tavern. This summer bureau officials expect about 5½ million to 6 million people to fill the city's hotels as participants in We The People 200, the bicentennial celebration of the 1787 Convention.

A 15% to 20% increase in visitors is likely, says Paul Decker, the bureau's VP-tourism, "and I think hoteliers will see a 7 to 10 point jump in occupancy."

Despite this increase, Mr. Decker is predicting there will be room at the inns. "We don't anticipate too many sellouts, maybe five." One reason is the celebration is not a one-day event, but a May to September series of events.

The program was designed to avoid human waves. "That kind of thing gives you bad press, and people get the attitude that they won't be able to find a room, so why bother?" he says, alluding to last year's Statue of Liberty celebration problems.

That's not to say the celebration, which will feature daily soapbox oratory, musical performances and fife-and-drum parades, intends to play second fiddle to any historical event. "We're going for the maximum," Mr. Decker says. "But you couldn't sustain it over such a long period without exorbitantly high costs."

The celebration instead will feature a carefully conceived mix of main events and smaller-scale exhibits and projects. The showstoppers predictably are scheduled for Memorial Day, July 4, Labor Day and September 17, the 200th anniversary of the Constitution's signing, which will be marked by the largest parade in U.S. history.

To pull people to the celebration, the bureau and Philadelphia-based Spiro & Associates created a $1.4 million print campaign that highlights specific events and targets the groups most likely to attend them, says Sam Rogers, the bureau's VP-communications. "For example, an event related to cooking was promoted heavily in New York. The opening weekend is being pushed primarily in New York, Wilmington, Harrisburg and Washington."

Magazines will command $1 million of the budget; *Time* alone will corner about $400,000. Other magazines that will carry the ads—featuring a Ben Franklin look-a-like—are *Better Homes & Gardens, Ebony, Ladies' Home Journal, Signature, Travel & Leisure* and *Travel Holiday*. "[They are] books we've had strong conversion rates from inquiries in the past," he says. A small schedule also is being placed in history buff magazines.

The trade was wooed a while back. Convention business was first solicited two years ago, and tour operators six months later, Mr. Rogers says. Public relations coverage has been extensive, and the bureau has engineered a major spring thrust to place stories in newspaper travel sections. Although most tour arrangements were finalized last fall, "if a tour operator has people come in and ask what they have going to Philadelphia, we may pick up some last minute business," Mr. Decker says.

Tour operators will find a warmer welcome in the City of Brotherly Love this year than they did during the 1976 Bicentennial. "The hoteliers didn't do any favors for the tour operators during the Bicentennial," he says, "and they learned some lessons from it. During the peaks, they'll go close to the rack. But they won't kick up their rates too much throughout the season."

Another lesson in fiscal responsibility was taught during the Bicentennial. In putting together that event, the organizers "threw money into a hole," Mr. Decker says.

About $10 million of We the People's estimated $17 million cost is covered already, says Hobie Cawood, superintendent of Independence National Historical Park and chairman of the celebration. Local, state and national government funding has helped, he says, as have foundation contributions and donations of services, such as legal, accounting and phone expenses.

Licensing projects—including such items as We The People-labeled California wines, Lenox china, a Franklin Mint flag set—are providing revenues.

"We broke down the various elements and put price tags on them," Mr. Cawood says, "and this has gone nicely."

Of the 35 sponsors, Bell of Pennsylvania is the largest, having underwritten a $1.3 million exhibit. "Anything that's been an attractive project in the $100,000 to $250,000 range has gone quickly," he says.

What's left is a $2.5 million pavilion just begging for a corporation to call its own. "This is the centerpiece for the whole thing," Mr. Cawood says. "It's where Congress will meet and will be the focal point for many events; it's going to get a lot of TV coverage. It could be the focal point of a great marketing effort—but it's a tough sell."

Despite the hoopla over the Constitution's bicentennial Mr. Decker says attracting convention business also is a tough sell.

"We had some response based on We the People. I can't put an exact number on it, but we'll have a better than average year for conventions," he says.

To be a spectacular year, the bureau would need the new convention center and accompanying hotel rooms that are still in the planning stages.

If construction begins this year, the center should be open for business in 1991. Although that's too late for this year's celebration, the city can look forward to more convention and hotel revenue in the future. In a city where a cracked bell is a major attraction, We The People 300 has a nice ring to it.

Top of New England!
This Northeast market is one of America's most livable cities. The market is also ranked in the Top 10 of U.S. Metro's in per household retail sales. It is an ADI Market which is the fastest growing in New England over the past 5 years. . .(growing at more than twice the rate of Boston, Hartford, Springfield, and Providence in population!)
The forecast through 1989 shows this market surpassing the growth of all other New England ADI's in population, households, total retail sales, and effective buying income.
It is the fastest growing ADI in one of America's fastest growing and more prosperous regions.
Where's this market that is tops in New England in growth? Shouldn't it be somewhere near the top of your New England media buy?

Tour guide helps cut through the fat at the supermarket

Fitness fans who want to eat light but don't know how to shop light now have a way to find out. Dallas dietitian Leni Reed is conducting "Supermarket Savvy Tours," 2½-hour jaunts through supermarket aisles to point out healthy, low-fat, high-fiber, nutritionally balanced foods to consumers.

Leni Reed leads a tour group down the healthy path in the supermarket.

The idea was born out of major frustration. "My clients would listen to what I was saying about healthy eating while they were in my office," she explains, "but then they'd go to the market and buy junk food out of habit. So I thought I'd try actually taking them to the market and showing them what and where these foods were."

Now, three years later, without advertising, she fills the 8 to 10 slots on each of the four weekly tours. Reed charges $35 a head, $60 a couple.

Reed's tour alumni write her to say it's the first time they've ever really understood nutrition and had all of their nagging questions answered. What foods are lowest in fat? What are best for lowering blood cholesterol? What should they feed their kids?

They also write that they can now go to markets on their own without fear. As a reminder, they also get an 8-page list of the foods mentioned on the tour. (It's available for $3.95 by writing Leni Reed, Box 25 A, Addison, Texas, 75001-0025.)

The Tom Thumb supermarket in which she does the tour also benefits from the arrangement. Many of her clients stay after the tour and shop. And tour members tell her that they now see the store as providing an educational service to the community instead of merely pushing goods.

The companies that produce the foods mentioned also benefit, naturally, and to help all concerned benefit even more, Reed has asked those companies to provide coupons for her tour groups.

Beginning in May, any person or company interested in starting a similar tour business can buy Reed's "Supermarket Savvy Tour Self-Study Training Kit" complete with manual and audio cassettes. At $245 a package, that's a healthy return on investment.

Self-help videos break the ice in modern dating game

Two new home videos, "How to Read a Woman Like a Book" and "How to be the Love of His Life," produced by Westwood, Calif.-based Fox Hills Video, attempt to demystify the art of dating in the 1980s.

"I hate even thinking about it as a war between the sexes, but sometimes you've got to be a little strategic," says one of three actresses portraying single women in "How to Be the Love of His Life."

The video is divided into three sections: "Making the First Move," "The First Date," and "Working it Out." As the three women talk about experiences with men, they indulge in an authentic pig-out session. Are they sublimating food for the broken relationships? Their recollections are intercut with scenes staged in restaurants, bars and movie theaters.

Men also talk about how they feel. "I'll be honest with you," says a guy. "It's scary to ask a woman out. You're definitely putting yourself in a vulnerable position."

"How to Read a Woman Like a Book" offers men insight into women's psyche. At the video's opening a young woman says, "What if you and I met at a bar, and I was sitting like this. Would you think I was trying to get your attention? You're not sure? Would you think I was ready to jump in your lap and have your babies? Well, sweetie, you've got a lot to learn."

Debra Gonsher, the videos' executive producer, says a profusion of "bad news" surveys on single women and their slim chances for matrimony, prompted her to make the video "How to Become the Love of his Life." "I wanted to do something very upbeat for women," she says.

To write the script, Gonsher, herself single, drew on her own experiences, and read "hundreds" of pop-psychology books. "A lot of the books say women have to compromise," she says, and agrees. "Some books had a real sense of manipulation, which I found abhorent."

For "How to Read a Woman Like a Book," she drew on her years as a college professor. "I taught non-verbal communication. I learned that men don't pick up on a lot of non-verbal things."

Several areas are explored in the video for men, including gestures and power linguistics. "Everyone is trying to read the signals and not get hurt," she says.

Sharon Edelson

Looking for a gold mine in In-A-Gadda-Da-Vida?

It may be more than 25 years since the musical British Invasion, but Beatlemania lives on with the recent release of the first four Beatles albums on compact disc as well as in the pages of *Goldmine*, the national "bible" of record collecting.

According to a recent issue, Beatles, Rolling Stones, Yardbirds and Kinks discs are selling for record prices. For example, the Beatles famed "Butcher" cover, which showed dismembered dolls sitting in the Fab 4's laps, is yours for a mere $1,000.

It was only last year when Sotheby's rock memorabilia auction grossed more than $500,000 for Beatles' artifacts, including artwork by Paul McCartney.

"There's a lot of revival interest right now, fueled by last summer's tours by the Monkees and the Grassroots," says Trey Foerster, *Goldmine's* managing editor.

The reason for the interest in rock 'n' roll history can be traced to "the lack of meaningful rock and contemporary music; teenagers and young listeners want to go back to rock 'n' roll's roots," he says.

What makes a collector's item? More than 14,000 avid collectors subscribe to the Iola, Wis.-based biweekly magazine just to find out. A few clues: picture discs and record sleeves; rock memorabilia; and 12-inch singles from the early days of punk rock. Bootleg recordings of Dylan and Springsteen that fans have been guarding for years probably are worth a little bit. "The older, the better," Foerster advises. Record collecting is in its infancy, although Foerster says almost anyone who grew up in the rock era probably has a wonderful collection gathering dust in a garage or spare bedroom. "They just don't know it," he says.

Laurie Freeman

Catalog browsing coming to a library in your neighborhood

If there's a HarrisCatalogLibrary Mail Order Catalog Center kiosk coming to a library near you, you'll soon be able to place orders for anything from azaleas to zoom lenses. This marketing service provides library patrons with a mini-marketplace of consumer goods, brings a new crowd of patrons into the library, provides direct marketers with a new and expanded market, and makes Warren Harris of Carmichael, Calif., one happy entrepreneur.

These kiosks provide library visitors access to about 5 million foreign and domestic products contained in some 1,000 indexed catalogs housed in metal binders. Generic order forms can be used to place and mail orders on the spot. Within the first year after installation in late 1985, Harris' prototype kiosk in Sacramento's Fair-oaks/Orangevale Library branch generated more than 3,500 known orders.

This quintessential one-stop shoppng spot was duplicated last month in Schaumburg, Ill., in that Chicago suburb's state-of-the-art library.

Harris likens his modular mail-order concept to "a time capsule. It's a wonderful slice of Americana." He would like to set up his store-away-from-home in such places as overseas U.S. military bases, U.S. embassies and consulates, foreign bookstores, and cruise ships. "Where people have the time [and money]. We'll put in Gucci and Tiffany catalogs and let them go berserk," Harris says. Other possible sites include supermarkets and post offices.

Catalog companies may find their $18

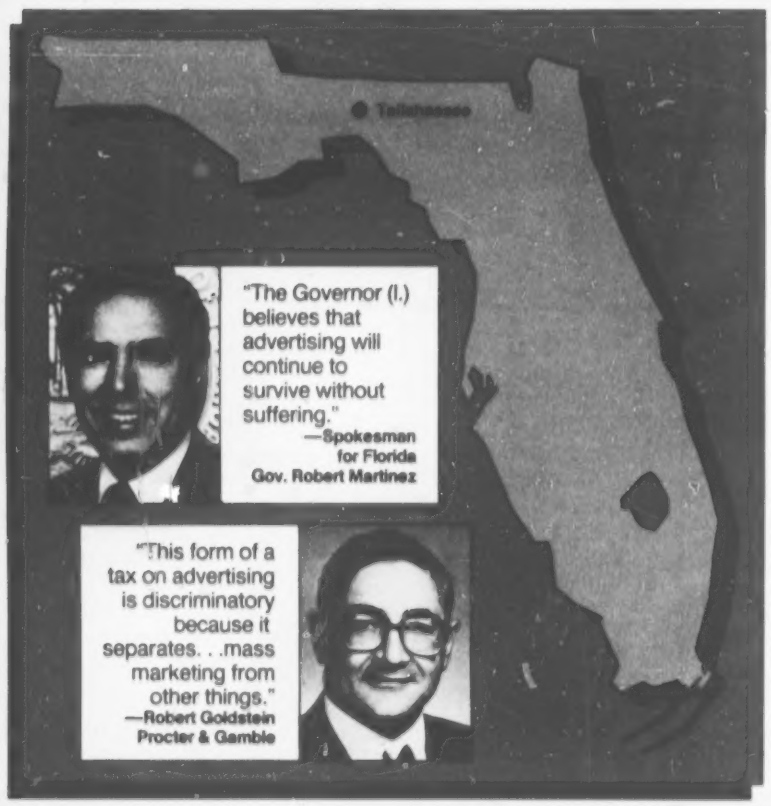
Florida faces ad boycott



Tallahassee
"The Governor (l.) believes that advertising will continue to survive without suffering."
—Spokesman for Florida Gov. Robert Martinez
"This form of a tax on advertising is discriminatory because it separates. . .mass marketing from other things."
—Robert Goldstein Procter & Gamble

ANA schedules summit as ad tax becomes law

By STEVEN W. COLFORD

Major consumer-goods companies are exploring an advertising boycott of Florida, a reaction to the state's new 5% sales tax on advertising.

Florida Gov. Robert Martinez signed the controversial tax legislation late last Thursday, the same day the state House and Senate forwarded the bill for approval. A spokesman for Gov. Martinez said the governor believes "advertising will continue to survive without suffering."

A national-advertiser summit meeting tentatively is set for the first week in May in New York. It is being arranged by the Association of National Advertisers.

"I have one report that there are no antitrust implications to advertisers banding together to influence legislation," said ANA President DeWitt Helm Jr. "If that's true, then the ANA may recommend canceling all advertising in Florida.

"A lot of people already are telling the networks to cut their advertising at the Florida border."

From a technical standpoint, that appears feasible, particularly with satellite transmission of programming from New York. "We can do it, and I think it will start happening," said an NBC VP. "It wouldn't surprise me at all."

Spokesmen at ABC and CBS agreed that such ad-stripping for an individual state could be accomplished.

For national newspapers, eliminating an ad in one state often would mean cutting it out of papers going to neighboring states as well, because of printing-plant requirements.

In *The Wall Street Journal*, an ad eliminated from Florida would be struck from Alabama, the Carolinas, Georgia and parts of Tennessee as well. *USA Today*, which has three printing sites in Florida, said it would be possible to black out advertising, but a spokeswoman added that it has never been done since the paper's advertising zones cover much larger geographic areas than just Florida.

How ad tax will work—Page 78

Radio networks often are forced to withhold advertising from certain markets, but it is done at the local-affiliate level.

"We can advise the affiliates in a given situation to cut a particular commercial," said a CBS Radio spokeswoman.

The Florida ad tax, to take effect July 1, is expected to raise as much as $100 million in its first year from Florida's advertising community and from national marketers whose advertising enters the state.

Among the companies expected to be represented at the ANA meeting are Procter & Gam-

Metter exit signals restructuring at JWT

By STEWART ALTER

NEW YORK—Bert Metter's resignation as chairman-ceo of J. Walter Thompson USA indicates more big changes are in the works at the agency.

Mr. Metter's departure last week came after JWT Group Chairman-CEO Don Johnston abruptly canceled Mr. Metter's plans to hire two key executives.

It remains unclear whether Mr. Metter's resignation stemmed from his embarrassment at having his hiring decisions overruled or because Mr. Johnston's U.S. reorganization ideas offer little role for Mr. Metter.

The full extent of Mr. Johnston's cost-control restructuring plan for JWT/USA is expected to be disclosed this week at an agency board meeting.

Mr. Metter's exit fuels the controversy over Mr. Johnston's stewardship of JWT. Mr. Metter is the fifth top-level agency executive to resign or be dismissed in the past 14 months over disputes with Mr. Johnston's succession plans *(see box, Page 78)* and his handling of the profit problems that continue to plague the company.

Just two weeks ago, Mr. Metter was prepared to bring two former JWT executives back to the agency. William Thompson Jr. had resigned as exec VP-director of multinational accounts at McCann-Erickson to become the top administrative officer of JWT/USA; Sonia Yuspeh had spent two months shutting down her research consultancy to assume Mr. Metter's former position as JWT's head of business development.

Only days before the two executives were to join the agency, Mr. Johnston canceled the appointments.

Neither Mr. Thompson nor Ms. Yuspeh were available for comment.

Mr. Thompson, once the top worldwide account exec on Coca-Cola Co. at McCann, still is expected to join JWT in a top-level account role (AA, April 20). Ms. Yuspeh is expected to reopen her consultancy.

Mr. Johnston, who assumed the title of chairman-ceo of J. Walter Thompson Co. after he dismissed Joseph O'Donnell from that post three months ago (AA, Feb. 2, *et seq.*), now has assumed the U.S. agency ceo duties from Mr. Metter.

B. Metter

But that arrangement could be short-lived, once Mr. Johnston announces his restructuring of the agency.

Details about Mr. Metter's departure and the U.S. reorganization are scant. Neither Mr. Johnston nor Mr. Metter returned phone calls.

It appears that Mr. Johnston plans to collapse the U.S. staff and overhead structure. Sources said Mr. Johnston wants to stress positions that actually work on client business and reduce the number of highly paid staffers. Mr. Metter was moving in the other direction.

Whatever the specifics of Mr. Johnston's plan, sources say he envisions it as the solution to the succession crisis and financial difficulties associated with

Merger plan places DFS over Compton

By STEWART ALTER

NEW YORK—Saatchi & Saatchi Co. last week put plans on the table for DFS Dorland Worldwide here to take over Saatchi & Saatchi Compton, a merger that calls for eliminating the Compton name.

A decision on the merger, which will affect only U.S. operations, is expected within two weeks.

Under the plan, DFS Dorland management would hold the top positions in the merged domestic agency.

Compton executives, who first heard the proposal formally last week, are expected to resist the plan in its current form.

The merger would create a $1.2 billion-to-$1.3 billion New York operation, surpassing Grey Advertising as the only other billion-dollar office here.

DFS Dorland handled $709 million in billings in New York and Compton had $600 million last year, according to ADVERTISING AGE.

About $100 million could be lost through "conflicts," however. DFS Dorland handles Northwest Airlines, while British Airways is based at Saatchi & Saatchi in Lon-

Highlights

Movable future for SAMI/Burke 4
Time Inc. appears poised to sell its SAMI/Burke research subsidiary after initially rejecting a sale because bids were too low, sources say. Time is said to be disenchanted with SAMI/Burke's financial results, which were dampened by the start-up of Scan-America, a joint venture with Arbitron Ratings Co.

Army's next round 6
The controversy surrounding the $100 million U.S. Army account Young & Rubicam landed in January is not over. Y&R and the Army now must contend with irate hispanic organizations rallying behind Sosa & Associates, a longtime subcontractor to the Army's former agency, N W Ayer.

AmEx checks competition 10
Visa International and MasterCard International had been holding ground with the top two best-recalled credit card ads, but American Express Co.'s "Membership has its privileges" campaign is knocking them silly.

Europe gets barter TV 12
U.S. advertising agencies are taking advantage of increasing TV deregulation in Europe to introduce the barter concept of trading programming to networks for free ad time around the shows.

Home secure home 24
The home security market, expected to grow from $3.8 billion in 1986 to $9 billion by 1990, will be fueled by the battle between Black & Decker Corp. and Schlage & Co.

Lotus to spread 31
Lotus Performance Cars is counting on its new agency, McCann-Erickson, to prepare the campaign for a line expansion that includes a $120,000 "super car." For the $2 million account, McCann-Erickson, New York, beat out finalists Brogan Kabot Advertising, Southfield, Mich., and incumbent Durfee & Solow, New York.

Beware fountain of youth 64
The U.S. Food & Drug Administration's belated check of anti-aging skincare claims is meant to send a warning to other makers of skincare—and hair-thickening—products that tout regenerative claims.

Pass the JUG 70
Although ad pitches for wine coolers typically are set on front porches, only one cooler appears to have been created precisely for porch drinking: JUG. The line of 750 milliliter wine coolers is marketed by the Wine Group, San Francisco.

Chicago's paper war 74
The *Chicago Tribune* abruptly replaced Ogilvy & Mather with Hal Riney & Partners last week just as rival *Chicago Sun-Times* readied a major image campaign and graphic redesign.

INTERNATIONAL

BJK&E aims for top 10 status 46
Bozell, Jacobs, Kenyon & Eckhardt plans to win top 10 worldwide status within two years through a series of acquisitions and affiliations overseas, according to Murray Smith, president-international of the agency.

'Herald Tribune's' centennial 47
The *International Herald Tribune*, an institution among Americans abroad and the English-speaking community around the world, is celebrating its 100th anniversary this year. The Paris-based paper is hosting events and conferences to honor the centennial in cities around the world.

OTHER NEWS

Procter & Gamble Co., which slashed its broadcast TV spending nearly $100 million last year, also cut its cable TV expenditures 12% to $27.7 million, according to the latest Broadcast Advertiser Reports figures. Page 10.

With fewer dollars—but no less product excitement—than the leading cola companies, the nation's second-tier soft-drink marketers are gearing up hot-weather advertising and promotional programs. Page 10.

Chevrolet, which dropped former Chicago Bear Dick Butkus as ad pitchman, turned to a grizzly bear to launch its new full-size pickup truck. Page 43.

As the magazine industry renews charges of rate-breaking, attention again has turned to the women's service titles. Page 51.

Yugo America is trying to broaden its image to set the stage for more expensive cars in its product lineup. Page 61.

When one business sells its name to another, the seller normally is required to change its name so there is no question that the buyer will obtain all of the goodwill for which it is bargaining. The same approach does not appear to have been applied to individuals selling their personal names for business use. Page 62.

Controversy continues to surround Roy Grace, who left Doyle Dane Bernbach in January 1986 to open the Grace & Rothschild agency. Page 70.

SPECIAL REPORT

Premiums & Promotions— *Although total expenditures in the industry grew only 2.9% in 1986 over 1985, industry observers predict the business will heat up this year as the trend toward enticing the consumer with extra-added attractions, including creative promotions and well-selected incentives, continues.*

Barter shops join forces to survive

By VERNE GAY

NEW YORK—Barter TV syndicators, confronting what they see as threats to their economic survival, are rapidly adopting a new protective measure: consolidation.

Most barter syndicators have been forced to concede that survival requires being part of a huge package of highly rated programming.

Staff photo by Arnold Adler

Henry Siegel (above), LBS chairman-president, said he will attempt a leveraged buy-out of the company from Grey Advertising, New York, or spin it off. Talks have ended with oilman Marvin Davis.

Megamergers among advertisers have consolidated syndicators' revenue base, and the emergence of more syndication shops has increased the programming offered. So, with a few notable exceptions, nearly every barter syndicator is talking with potential partners.

Advertisers, though, who spend $700 million a year in barter TV, appear mixed about the consolidation trend. Some say they haven't had any problems yet, but others say the trend makes it more difficult to negotiate a good price.

Among the major developments indicating the scope of the trend:

- King World is expected to make a "major announcement" within two weeks concerning its Camelot sales subsidiary. Sources said Camelot may be combined with another major barter house.

Rick Levy, president, said Camelot is "looking to expand with product lines in a lot of areas—kids, sports, late night. Essentially, we are considering a fourth network. We are setting ourselves up to be a full-service organization, either by ourselves or with others."

- Walt Disney Co. discussed turning over to Camelot its barter sales, currently handled by its Buena Vista division. Those talks are considered dead, and Buena Vista is said to be searching for another partner. Officials declined comment.
- Group W Productions wants to acquire Taft Broadcasting's Worldvision Enterprises, a huge international syndicator and a major domestic barter house. The acquisition would create the largest barter TV seller of children's commercial time. However, FMI Financial Corp. has bid to buy Taft and, if successful, is expected to keep Worldvision. Nevertheless, a

Nets hold time to counter make-goods

Upfront children's TV rates jump 30%

By VERNE GAY

NEW YORK—Cost-per-thousand rates soared as much as 30% from year-earlier levels in Saturday morning children's TV, as the Big 3 networks wind down advanced commercial sales for that time in the 1987-88 season.

ABC-TV said it had completed nearly all upfront sales, while the other two networks are believed to be still negotiating with several advertisers.

In addition, agency sources confirmed that the networks have held back large amounts of commercial time, to protect themselves from severe make-good problems next year.

The networks consider this a prime strategy in all time periods because of the drop in recorded audience levels expected from the use of A.C. Nielsen Co. people meters (AA, March 16).

Sources say the remarkable price rise in Saturday mornings—which only a year ago was suffering from a severe lack of advertiser interest—was due to several factors. But the chief one was the apparent success ABC and CBS had in getting advertisers to accept artificial cost-per-thousand price increases due to the switch to people meters.

The meters caused increases in CPM rates for children 2 to 11 during the 1986-87 season because tests demonstrated Nielsen's traditional diaries generally have overstated children's viewing. Advertisers have said they would resist accepting such an artificial increase in any time period.

But the networks, which faced millions of dollars of lost revenue, persuaded advertisers to negotiate *future* buys on the lower people meter results.

Both ABC and CBS said they would guarantee advertisers on

Charge-card pitch registers

AmEx soars to No. 2 position

By JULIE FRANZ

The major credit-card companies have gotten into a war of the airwaves for a bigger share of the almighty consumer debt.

Visa International and MasterCard International had been holding ground with the top two best-recalled credit-card ads, but American Express Co.'s new "Membership has its privileges" campaign is knocking them silly.

Top-of-mind awareness of AmEx ads vaulted it into a close second behind Visa from a distant third, jumping 9.2 percentage points to 21.3% of first mentions, in Advertising Age's March adWatch survey. That's the largest increase in advertising awareness for any advertiser that month.

ADWATCH

Awareness of Visa's "It's everywhere you want it to be" ads fell 3.7 percentage points, to 21.8% of first mentions, when consumers were asked to name the first credit-card ad that came to mind of all seen, heard or read in the past 30 days. BBDO Worldwide, New York, handles Visa.

MasterCard's ad awareness fell 5.2 percentage points to 15.2% of first mentions, the largest drop of any advertiser in March, shifting it into third place among credit-card advertisers.

It had narrowed the gap in recall between its ads and those of Visa with its "Master the possibilities" campaign, which started about a year ago. But the spots seemed to have lost their firepower as consumers tire of watching celebrities fulfill their hedonistic wishes by charging it.

MasterCard recently began a full-scale agency review that includes a dozen agencies.

One contestant is incumbent William Esty Co., New York, which has been its agency for 15 years (AA, April 20).

AmEx in February switched from its long-running celebrity pitch themed "Do you know me?" to a campaign focusing on services available to AmEx card members.

Ogilvy & Mather handles AmEx.

The company launched another campaign, this one touting its traveler's checks for use during domestic vacationing, after the March adWatch survey had been taken.

Coming on strong in the soft-drink category are commercials from Pepsi-Cola USA, Purchase, N.Y., featuring actor Michael J. Fox and a spoof on the movie "Top Gun" for Diet Pepsi.

Pepsi gained 4.9 percentage points among soft drinks for a score of 31.6%, overtaking Coca-Cola for the first time since November.

Diet Pepsi gained 1.9 percentage points of awareness, not enough to be considered statistically significant but enough to put the brand's spots in third position, up from fifth last month.

Coca-Cola's awareness remained steady at 30.2% of first mentions but dropped into second place.

Pepsi also is preparing a new spot featuring recl-

Hot weather breeds promotions

Smaller soda brands make summer plans

An Advertising Age roundup

With fewer dollars—but no less product excitement—than the leading cola companies, the nation's second-tier soft-drink marketers are gearing up hot-weather advertising and promotional programs.

At least three new ad campaigns began airing nationwide in the past few weeks. But more importantly for these smaller brands, a host of promotions are in the works.

"We have to look for things we can do better than the big guys," said Truitt Crenshaw, Shasta Beverages' director of sales and marketing.

The strategy for most of these brands is to tout their flavors as "change-of-pace" drinks. None can afford the hundreds of millions of dollars that giants Coca-Cola Co., Atlanta, and PepsiCo, Purchase, N.Y., pour into their marketing budgets each year.

But the marketing executions change from market to market, because of the regional and local nature of soft-drink preferences and the entrepreneurial bottler system. The promotions vary widely, from tie-ins with sports, movies, travel and non-profit programs to patriotic holiday efforts.

Hayward, Calif.-based Shasta is tying in with Universal Pictures' release of "Jaws of Revenge," the fourth film in the "Jaws" series. Shasta is owned by National Beverage Corp., Fort Lauderdale, Fla., which is in the process of acquiring Faygo Beverages, Detroit (AA, April 13).

Dr Pepper Co., Dallas, is conducting a summer sweepstakes related to cycling, while its sister company, Seven-Up Co., also Dallas, is offering exotic vacations in a game that asks contestants to identify vignettes from TV spots.

Both companies are majority owned by Dallas-based Hicks & Haas, also the largest stockholder in A&W

(Continued on Page 60)

Backdrops vary dramatically for the newest TV spots from the second-tier soft-drink companies. Dr Pepper chose Maui's Haleakala volcano for its "Pedaling All Across America" cyclists; 7UP spotlighted a basketball player who gets cooled down with a soft summer rain; and A&W root beer put William "Hi, I'm Larry" Sanderson and friends in a hot tub.

P&G cut 12% of cable ad budget in '86

By VERNE GAY

New York—Procter & Gamble Co., which slashed its broadcast TV spending nearly $100 million last year, also cut its cable TV expenditures 12% to $27.7 million, according to the latest Broadcast Advertiser Reports figures (AA, April 20).

Despite the big drop, P&G remained the largest cable TV advertiser, according to BAR and the Cabletelevision Advertising Bureau.

"Our total marketing efforts are made up of a number of different components and it is not unusual for there to be short-term shifts from time to time from one medium or another to take advantage of special opportunities," a P&G spokeswoman said.

In total cable spending last year, P&G was followed by Philip Morris Cos., with a 4% increase to $22.2 million, although its General Foods unit's cable spending remained flat at $16.1 million.

A GF spokesman said that although the company is "not disillusioned with cable," some of the cable networks' overall audience delivery "fell short of our expectations. On that basis, our use of cable is down somewhat."

Both GF and P&G were among the earliest supporters of the major cable networks and have used the medium to reach viewers siphoned from the Big 3 networks and other over-the-air outlets.

But both companies have been re-adjusting their cable expenditures recently to allow for expenditures in other media, particularly barter TV. Five years ago, both companies—as well as other package-goods marketers—instituted TV buying formulas to compensate for the loss in network audience shares.

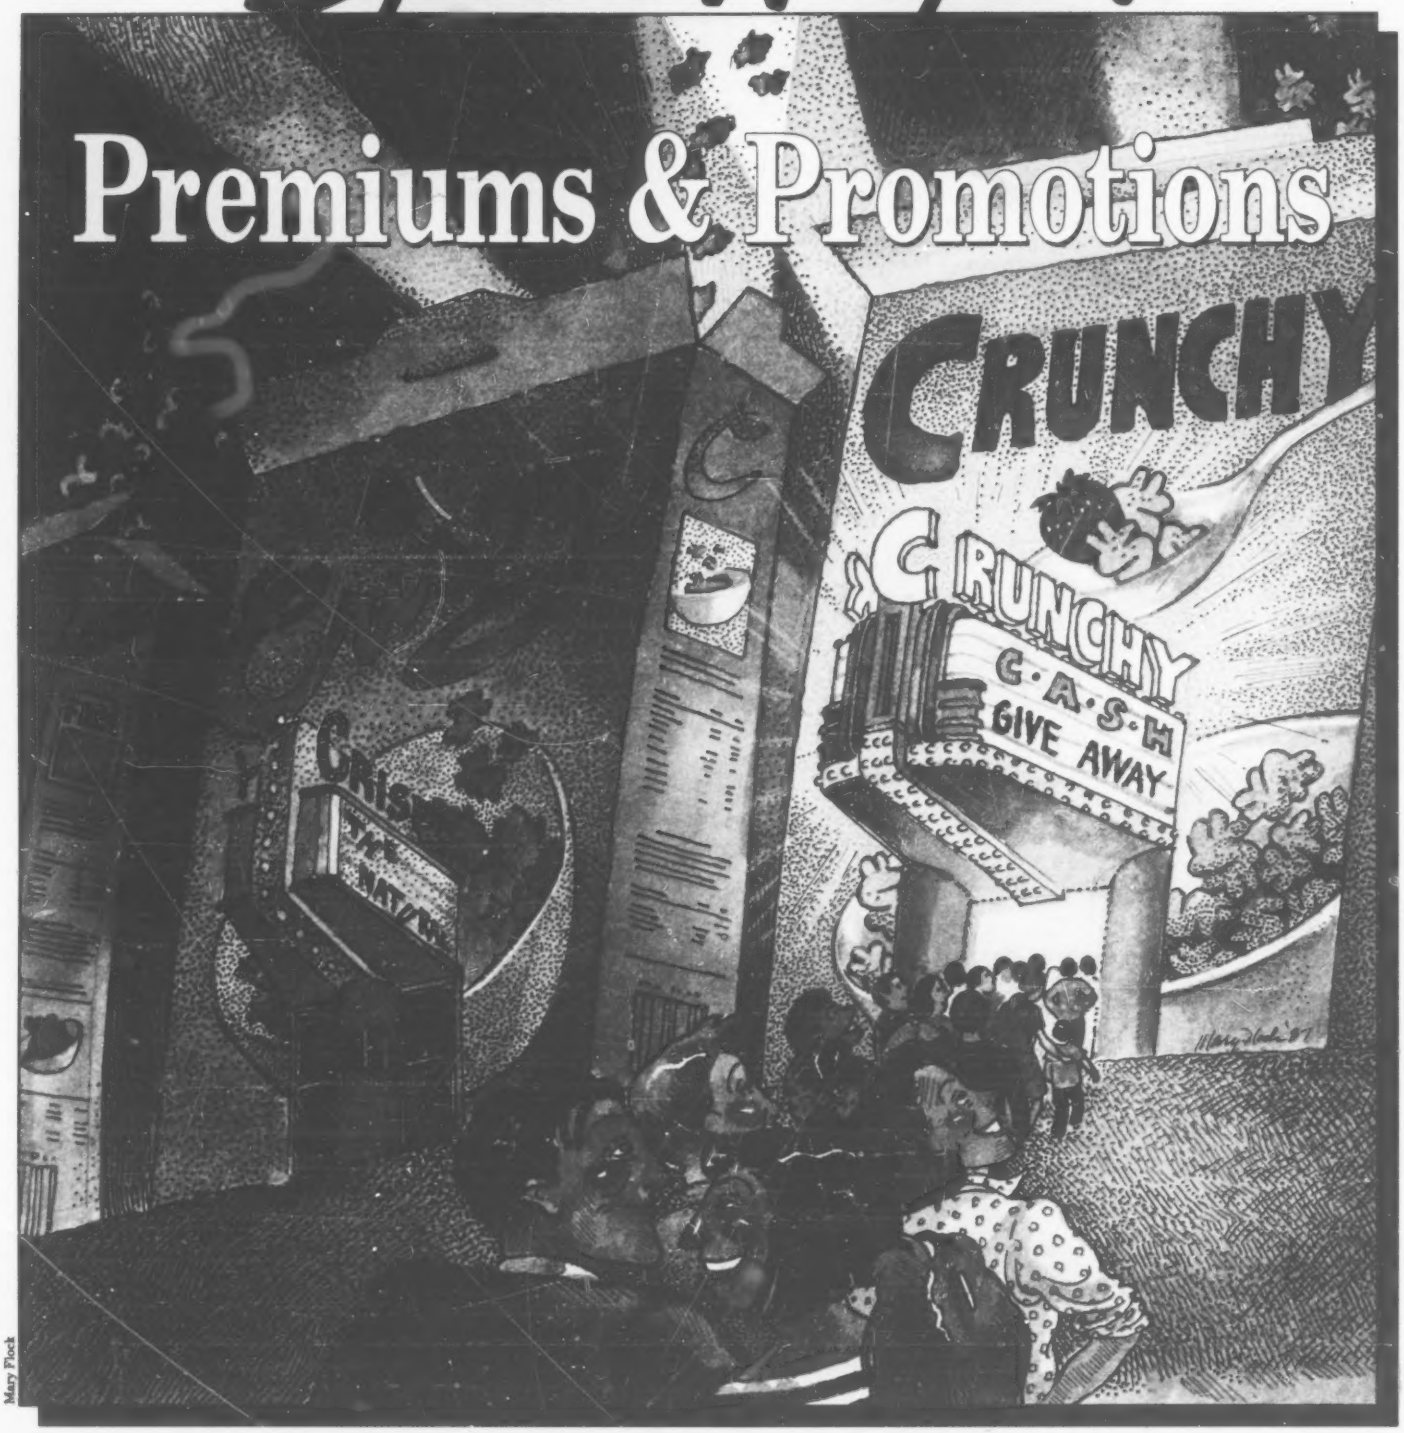
It is possible the cutbacks by P&G were not as severe as BAR reports. BAR measures the six major ad-supported networks—Cable News Network, CBN, ESPN, MTV: Music Television, USA Network and WTBS. It omits other midsize cable networks, in particular the Nashville Network and other key superstations.

According to Carmel, Calif.-based Paul Kagan & Associates, these six cable networks counted by BAR represented $543 million in cable TV network advertising revenue in 1986, out of a total of $718 million.

Superstation WTBS, the largest of the ad-supported nets, represented $163 million in ad spending last year, according to Kagan. Figures for local broadcast-station sales in WTBS' base, Atlanta, were not broken out.

According to BAR, total cable TV spending in 1986 was $543 million, a 13% increase from 1985.#

Special Report



Extra-added attractions grab the buying public

By Cecelia Reed

Yes, the premiums and incentives business grew in 1986, although it broke no records. *Incentive Marketing's* annual report on promotion activity showed total expenditures of $13.4 billion —a measly 2.9% increase from 1985 after having more than doubled in the last 10 years.

Marketers continued to reward sales and trade personnel for the vital push they give products in the marketplace. Spending on everything from trips to volume discounts in exchange for precious retail display space increased 6.2% to $5.8 billion.

Food companies led the way in consumer premium spending, an estimated $6.1 billion in 1986, which is just about what it was in 1985. Other leading spenders in the category were toiletries and beauty aids marketers, financial institutions, and beer and soft drink marketers.

Industry observers, however, predict the consumer premiums and incentives business will heat up this year. They maintain that pulling the consumer into the game with the extra-added attraction of creative promotions and well-selected premiums is a key element in the maintenance of products' life cycles.

Using trade incentives, point-of-sale displays, premium offers, contests, sponsorships, sweepstakes and coupons in programs that strengthen brand presence and excite consumer interest requires much of promotion specialists, especially in light of a recent article in the *New York Times.* It stated that consumers, after a four-year spending spree, are inhibited by "a sense of limits," and the most important buying decision many are making now is . . . not to buy.

William Slone, editor of New York-based Beverage Media, says that if the problem-plagued spirits industry put the focus on "point-of-sale displays that would catch consumers' attention when they're around the product, rather than dealer loaders [incentive merchandise] to justify

(Continued on Page S-2)

Extra-added attractions

(Continued from Page S-1)

large drops of goods with retailers, sales might start turning around." In a mature industry, "you have to give your consumers information that ties in with your brand's image and shows them how a product can become part of their lifestyle."

Soft-drink marketers have used the lifestyle connection to good advantage with young consumers. PepsiCo's sponsorship of Michael Jackson's "Victory" tour comes to mind. Now Coca-Cola Co. is featuring the Pointer Sisters, both in TV commercials and the Diet Coke/Sony CD "Just for the sound of it" sweepstakes. The grand prize is a trip to Las Vegas to see the group's 1987 New Year's Eve show. Winners also receive Sony compact disc players.

Marketers that hope to add pep to sluggish sales or who are about to thrust yet another product into an oversaturated environment need to design promotions that will build retail sales volume and consumer brand loyalty, experts say.

Victor Ayala, president of The Guild Group, a promotion agency in Pleasantville, N.Y., says that promotions have to become more sensitive to the image of the brand, more creative in their approach. "I've been trying to get marketers to rethink that 'Save 25¢' headline."

"There's a never-ending need for new concepts," adds Norton Cohen, director of account services for St. Louis-based Zipatoni Co., a full-service sales promotion agency. Zipatoni last fall created a life-size point-of-sale display for Anheuser-Busch Cos.'s a Sante bottled water. It featured a young woman wearing the sweatshirt premium, which had the words "Rock 'n' roll waters" on it. "It related to the fun personality of the brand —and the mounted sweatshirt was a dealer incentive," he says.

Bob Petisi, senior VP/managing director-promotions group for the Howard/Marlboro Group, New York, says his agency frequently uses premiums as part of many of its clients' promotions. "The objective of a premium is to leverage consumers or the trade to accomplish your objectives," he says. "It's an instant reward.

"Also, a premium can work as a nice image-connection and add perceived value to a product without undermining the product's efficacy. We did a free gifts promotion for Cutty Sark using a two-tiered premium program. With the purchase of one bottle of Cutty, consumers could get a brass tray; with three bottles, a brass desk lamp." These premiums actually are "disguised refunds," Mr. Petisi says, "but the consumer keeps it" as a constant product reminder.

Advertising specialties like keychains are a thing of the past, adds George Mann, president of the agency's Preferred Promotions. "They have progressed to a more sophisticated level, and budgets for premiums have gone up. It's important to try to tailor a premium to fit a product's advertising theme, to support its image and demographics."

Many companies are turning their attention to localized promotional efforts to reach their market. Regionalized promotions such as music, sports or charity events are especially important where there is reliance on local franchise support.

"Special events are an ideal promotional tool to be used selectively in key markets," says Jay Freedman, director of marketing/promotion for Miami-based Events Marketing Network. EMN is working with fast-food companies, concert and record promoters, tourist boards, airlines and hotels to design custom packages called Power Trips, which are offered to radio stations nationwide. These packages will be used as promotional on-the-air giveaways.

James Gould, professor of marketing at the Lubin Graduate School of Business at Pace University, White Plains, N.Y., says that the increased costs of mass media have caused many marketers to rethink their basic premises with regard to advertising and promotion.

"They have used advertising for its high exposure. But given the fragmentation of the mass audience, they're beginning to look at media that's more cost-effective and has better targetability," Mr. Gould says.

Research he has done shows that 15-second spots, for example, have significantly lower recall rates than 30-second spots, "so savings that companies think they're realizing may be illusory. Normal media don't have tangibility—you see it, and you forget it. Premiums have tangibility—they stay with you," he says.

"Before designing a promotion, marketers have to ask themselves, 'Who is the target market, and what kind of budget do I have?' The cost of an item isn't as important as its intrinsic value to a consumer. And marketers have to become more market-orientated again. They have to use marketing savvy to combat mass media clutter, and think of advertising and promotion as partners, rather than enemies."

PREMIUMS AND PROMOTIONS

Pepsi aims for the top with this 'Gun'

Pepsi-Cola USA has its sights set on the sky with its "Top Gun" promotion that kicks off May 1.

A fully integrated campaign ties in TV and radio spots with POP materials, public relations and a sweepstakes. First prize is a one-hour flight with test pilot Chuck Yeager in a P-51 Korean war vintage fighter at the Reno, Nev., Air Show in September.

Pepsi made history by including, for the first time, a commercial on the April videocassette release of Paramount's "Top Gun." The spot knocked the tape's retail price from $79.95 to $26.95.

The campaign fell together when Pepsi

Movie fans enter into this mystery

When a marketer of plastic wrap and trash bags teams up with a maker of celluloid dreams, you just know something unusual is happening.

Danbury, Conn.-based First Brands Corp. (of Glad Wrap and Glad bags fame) and De Laurentiis Entertainment Group (of Hollywood and motion picture fame) have put their heads together to script a national promotion for DEG's comedy-adventure film, "Million Dollar Mystery," opening June 12.

"Teaser" movie posters announce that a "Million Dollar Mystery" is coming.

The movie is about an old man's last words, a hunt for a stolen $4 million fortune and a mystery that reaches beyond the screen.

As the last scene dissolves, $1 million still haven't been found. But wait! Someone in the audience who enters the sweepstakes and solves the mystery will win the million bucks.

Here's where First Brands enters the scene. Beginning in May, special packages of Glad will carry the "Million Dollar

From Spuds to suds, inflatables take off

If Bud Light's Spuds MacKenzie is developing an overinflated opinion of himself, an El Cajon, Calif. company isn't helping matters. As always, this Spuds' grin is amiable, but his 30-foot height is formidable.

Spuds, the Noids from Domino's Pizza, Coca-Cola bottles, Nike's sneakers and Levi's jeans are among the familiar products and advertising characters rendered larger than life by Bigger Than Life, a two-year-old manufacturer of giant inflatables. President Dick Dickson says there may be nothing special about a soda or beer can, "but when you have a 30-foot six-pack of Budweiser, that's an auditorium, traveling around the country to Spring Break events and the Indy 500, that's going to pull people."

The company's giant products certainly pulled thousands of spectators' heads up during the 1986 Boston Marathon. They were treated to the spectacle of a pair of 30-foot-long Nike Sock Racers apparently running up the side of a Westin Hotel.

Mr. Dickson, six-feet-tall, likes to describe himself as "a peddler at heart," and he's proud that his young company has never made a product clients didn't reorder. "Inflatables have staying power; people remember them. Our products

Incentive programs light productive fires

By Joanne Y. Cleaver

A company held a contest for its salespeople with the top 20 producers in each district winning a trip to the Super Bowl. When the winners asked that a key sales support administrator also come along, the company responded that that was fine—if the winners paid his way. They did.

United Parcel Service, Greenwich, Conn., has a longstanding program that rewards drivers for good safety records. For each consecutive year of perfect driving, the employee gets to choose an item from a gift catalog, with the rewards culminating in items like diamond necklaces and furniture. As a result, UPS drivers' safety records per million miles are nine times better than the national average.

A West Coast bank attracted $1 billion more than expected in new deposits in a six-month period because tellers, VPs and other employees, who normally have non-selling customer contact, were motivated by an experimental incentive program.

Contests, bonuses, prizes, achievement awards and the like are no longer the exclusive domain of goal-oriented salespeople. U.S. companies are beginning to eye incentive plans to motivate their backroom support, administrative and production employees.

Mere compensation, management is finding, doesn't motivate employees to strive for greater productivity or customer satisfaction, but well-structured incentive plans do work.

According to research by New York-based *Incentive Marketing*, the sales incentive category grew 9.4% last year to $3.3 billion. There aren't any parallel figures for the size or growth of employee incentives, a highly fragmented and difficult category to track. Some divisions or departments of a company may sponsor programs, while others don't; some companies assign the reponsibility to human resources and others to marketing.

Experts in the field agree that overseas competition, combined with maturing businesses that have to squeeze more profits from lower sales, are driving employee incentive issues. A national survey completed last year by the American Productivity Center, Houston, revealed that the more competition a company faces, the more likely it will institute a non-traditional compensation program.

Dick Fordyce, president of E.F. MacDonald, a division of Minneapolis-based Carlson Cos.' Carlson Marketing Group, which helps companies establish motivational, training and incentive programs, estimates that in the last five years, non-sales incentives have grown about 30%. "We've all got a long way to go before we've fully mastered how to motivate internal employees," he says.

One finding in the Productivity Center's study illustrates the prevailing attitude toward reward systems. Mere recognition ranked lowest in a rating of the overall performance impact of nine commonly used approaches. Pay for knowledge scored highest, with 89% of the respondents ranking it a positive or very positive influence on overall performance; earned time off came in second, with an 85% positive rating; gain sharing was third, with an 81% rating. Small group incentives and individual incentives also were popular, receiving 75% and 73% ratings, respectively.

As companies seek the right motivational tools, they're rediscovering some tried and true methods.

The Chicago-based National Association of Suggestions Systems is an organization that tracks the methods and dollar savings of companies that use employee suggestions networks for specific purposes. It is enjoying a significant upsurge in membership, mostly *Fortune* 1,000 companies or those of similar size. In the last 18 months 150 of its 900 members have joined NASS. In 1985, the last year for which figures are available, NASS' members saved $1.25 billion as a result of employee suggestions, and made $128 million in awards for those ideas, says Alan Appelbaum, director of PR.

Usually, he says, companies set up a system of collecting and evaluating employee ideas. Then, they generally kick back to the employee involved 15% to 20% of the first year's savings that derived specifically from that idea. About 25% of all suggestions are generally implemented, NASS estimates.

Employers like the system because it creates a closed loop of productivity improvement and reward analogous to the increased sales and reward cycle enjoyed by salespeople.

Similar to this is gain sharing, an incentive growing in popularity. All members of a designated group are given a bonus for improved performance according to a predetermined formula.

Phillipsburg, N.J.-based Pump and Turbo Group of Ingersoll-Rand Co. began a gain sharing program several months ago at the same time it reduced its pay scale 25% for unionized labor and salaried workers.

"The employees are sensing

that this is their opportunity to get management to pay attention when they do a good job," says Michael D'Ambrose, VP-employee relations. "We actually have had the union complaining that we weren't taking enough discipline [against minimally productive workers]."

Under the plan, if the whole plant's production exceeds its historical rate, employees will get half of the company's additional incremental profits. The money will be distributed equally to all employees in quarterly bonuses.

"We've seen a marked difference from a year ago in our performance as a team," he says. "It [helps] supercede the old union-management roles."

While cash and merchandise are old standby rewards, there is a strong trend toward using that sales favorite, travel. Unlike the extravaganzas to which sales forces are accustomed, employees are more likely to be treated to a weekend at a local resort. Nevertheless, some companies think travel incentives add excitement to the competition, raising it above the level of job-related expectations.

In some ways, employee programs are more complex than sales programs. Salespeople must meet specific goals and then claim commensurate compensation, in whatever form that might be. Employees often aren't used to thinking that way—or if they do, their goals are usually longer term and more diffuse.

"We spend a lot of time talking about the awards structure, and that's not the key thing," says Walter Erickson, VP-marketing of Carlson Cos.' Carlson Marketing Group.

"The important thing is communication and training. You may have to custom design training and train the people who are being asked to change. Then you implement and execute a program, and then you give the award. If you skip any of these steps, it won't work."

"It's not easy to do an internal program," adds Robert Brandon, president of Atlanta-based Beaumont-Bennett/Brandon, a marketing services agency. "You don't ask something that's unreasonable, and you don't do it 'til it hurts; you do it 'til it feels good."

It's especially important to avoid the impression that awards are given out arbitrarily. Bob Guerriero, president of Journeymasters, a Salem, Mass.-based travel incentive company, likes to relate a story about a client who had good intentions, but managed to offend and alienate most of his employees with his incentive program.

The client's business is servicing equipment, and the company ran a contest that was supposed to result in better customer contact and give employees a sense of belonging to a growing organization.

It backfired because "he had an arbitrary way of measuring it," Mr. Guerriero says. "Then he asked employees if they felt it was a fair program. He got vehement answers, and all of them were along the lines of 'You had to suck up to the service manager, and you win the trip. It had nothing to do with how good a repairman you were.' That was the nicest thing employees said."

Accurate and objective measurement of employees' performance is a major concern of companies planning employee reward systems. It's also a topic of debate among productivity and incentive experts. Many of them insist that growth in employee incentive programs will be stunted until clear cut, objective yardsticks are developed. Such concerns have prompted the Productivity Center to pledge to study the issue in depth, and *Incentive Marketing* has just started a regular column on measurement systems.

Others are equally certain that anything can be measured—it's just a matter of examining the job functions and goals closely enough to extrapolate a logical measurement criteria.

"There are measurements if people look hard enough," says James Dittman, president of the Society of Incentive Travel Executives, New York. He cites the example of a copier service company that established a "number of copies between calls" formula for determining which servicemen did the best job.

Realistic methods underscore a company's credibility with its employees, says Mr. Dittman. "The best way to improve personal productivity is to improve the attitudes of the individuals in the company."

Rating of overall performance impact of reward systems*

Reward system	(N)	Percent
Gain sharing	170	81%
Profit sharing	507	74
Small group incentives	185	75
Earned time off	99	85
Lump sum bonus**	163	66
All salaried**	169	67
Pay for knowledge**	70	89
Individual incentives	192	73
Recognition***	487	30

Coffee consumption continues to decline

By JOHN C. MAXWELL JR.

Over the past 20 years the consumption of coffee has been declining, and in 1986 we estimate consumption dropped approximately 2.3%, to 25.4 gallons per person.

We believe this continues to be a move away from hot, acrid drinks to cold, sweet drinks.

The greatest consumption decline is seen in the youngest age group, whereas a 9% consumption increase occurred in the 60-year-old and above group.

On a long-term basis, however, we expect coffee consumption to continue to decline for the forseeable future.

The Brazilian drought cut the world's coffee supply and boosted the price of green beans to $2.50 a pound, bringing almost new highs to retail coffee prices in 1986. Improved weather conditions, lagging import demand and large stock supplies have begun to reverse this situation.

The situation in Brazil looks positive for the 1987-88 crop and we expect lower coffee prices for this year.

Recently, the Brazilian government sold excess coffee supplies that had built up last year. Overall, prices have fallen in anticipation of large worldwide crops in 1987-88.

Regarding market share, General Foods remains the leader, gaining 1.3 points, to a 37.8% share in regular coffee. However, GF lost share with instant coffee, dropping to a 42.6% share from a 43.4% share.

The only company in the instant area to gain share was Procter & Gamble.

In the regular area almost all companies gained or maintained share.#

Mr. Maxwell is with Furman Selz Majer Dietz & Birney, New York.

Strauss

(Continued from Page 57)

through bonuses and expenses; of broadening ownership so employees can "share in our prospects" (Creamer specifically had more than 70 stockholders when it sold to WCRS, compared with seven in '69); and of recognizing the asset of people who come along with the billings acquired in a purchase.

As for the sale to WCRS, Mr. Strauss noted that "I met WCRS while on a mission to London to buy, or buy into, a U.K. agency," explaining that "the reason was that Sheraton [hotels] and other clients wanted us to handle their business in U.K. and Europe."

But WCRS instead "saw us as their entry into the U.S.," Mr. Strauss said. "We decided to bring in other bidders. Maurice Saatchi had visited me about three years earlier on a flirtation visit. So I called him, and he had his people in the U.S. enter the bidding."

Mr. Strauss also noted that Chairman Donald Creamer brought in Interpublic.

Wertheim & Co. was hired to "help us evaluate the deals, as well as to measure deals against a public offering," Mr. Strauss said.

Saatchi "did manage to get a solid offer on the table," but its involvement at the time in the Backer & Spielvogel deal made Saatchi less interesting to HBM/Creamer, Mr. Strauss said. Interpublic "was never in the bidding game," he added.

While Mr. Strauss liked the idea of going public, "my partners like the all-cash, upfront deal with no complications and little risk, and I supposed I did too. WCRS first offered $35 million. We said no."

The partners thought twice net worth of $40 million would be a good price, but when WCRS made that offer, Mr. Strauss, who wanted $70 million, rejected it and "reluctantly settled for $64,150,000."

"Was it just kindness on my part?" he said of accepting that figure. "Not really. The reason is defined in this principle: You make the best deal when you are prepared to lose it. I was prepared to lose the deal at $60 million but not at $64 million."

Mr. Strauss ended his talk with some advice for the new owners: "WCRS must still learn how to manage their far-flung enterprise. All the units are managing themselves, and all the pieces within the units are managing themselves."#

Great for camping trips, too!

Harp funnels energy into cleanliness

By LENORE SKENAZY

Faced with unclean toilet seats nationwide, entrepreneur Lore Harp created Le Funelle, a device that allows women to urinate standing up.

The patented, foldable, paper funnel stays waterproof for about forty seconds but disintegrates when flushed. A four-pack retails for $2; a pack of 20 for $5.

Ms. Harp says she spent seven months and $200,000 developing it.

The creative alternative sprung from Ms. Harp's travels.

The San Mateo, Calif., businesswoman covered 200,000 miles a year as founder of the multimillion-dollar computer company, Vector Graphics, and encountered her share of unsanitary bathrooms.

With new invention in hand, she left Vector and formed Aplex to market Le Funelle.

Aplex breaks a three-month transit advertising campaign today in San Francisco proclaiming "Stand up for cleanliness." In addition, women will distribute buttons carrying the slogan and samples of Le Funelle.

Visual Imagery, Los Angeles, handles.

"The point was not so much whether you can or can't pick up anything [infectious] on public toilets, but to allow women an alternative," Ms. Harp said.

In focus groups of professional women ages 25 to 45, Ms. Harp found "very little opposition" to the revolutionary product. Even their husbands thought the idea nifty.

"No one was saying, 'God didn't intend women to do it this way,'" Ms. Harp said.

The product was first mailed to "opinion leaders"—described as businesswomen in the prime of life. Ms. Harp also is sending samples to 10,000 physicians, hoping they will give women Le Funelle when asking for a urine sample.

As the product gains acceptance, Ms. Harp expects to sell it in drugstores and supermarkets.#

Cleveland Horton in Los Angeles contributed to this story.

A transit ad campaign for Le Funelle, a paper funnel for women, breaks today in San Francisco via Visual Imagery, Los Angeles.

adWatch

(Continued from Page 10)

sive singer Michael Jackson. The commercial is delayed to coincide with the debut of his new album this summer, giving Pepsi another chance to burn its ad message into consumers' minds.

AdWatch is a joint project of AA and SRI Research Center, Lincoln, Neb.

Ad awareness is measured by asking a nationally projectable sample to name the advertising that first comes to mind of all seen, heard or read in the first 30 days. Consumers are queried on the first ad they remember overall as well as in a variety of product areas. During March, 1,000 consumers were polled by telephone.

Those changes in advertising awareness that adWatch researchers deem statistically significant can be attributed to more than sample variation.

The list of the top 10 in unaided awareness, without asking for a specific product category, also attests to Pepsi's growing strength. Pepsi advertising rarely scores higher than ads from Coca-Cola in unaided awareness, but in March it scored 4.1% of first mentions over Coca-Cola's 2.6% of first mentions.

Winners in the top 10 unaided awareness category are, in descending order: California raisins, Pepsi-Cola, Coca-Cola, McDonald's, Ford, Chevrolet, Anheuser-Busch's Budweiser/Bud Light, Chrysler, Philip Morris USA's Marlboro and Miller/Miller Lite.

Among other significant changes in adWatch data, new executions of Trans World Airlines' "Find out how good we really are" campaign boosted the carrier's top-of-mind awareness score by 3.4 percentage points to 10.9% of first mentions in the airline category.

Eastern Air Lines' ad awareness score fell by 3.6 percentage points to 6.5% of first mentions, having ended the push for its night flights.

United Airlines' ads remained No. 1 in the category with 14.7% of first mentions, followed by TWA in second and American in third with 9.8% of first mentions.

Delta Air Lines' ads are in fourth place with 8.8% of first mentions, and Eastern is fifth.#

25 WAYS TO IMPROVE YOUR BUSINESS (AND YOUR IMAGE).

AT&T LONG DISTANCE GIFT CERTIFICATES ARE BECOMING RECOGNIZED AS THE IDEAL INCENTIVE, PREMIUM—AND BUSINESS GIFT. WHY?

Whether you're a giant corporation or you own your own business, AT&T Long Distance Gift Certificates can help increase sales and productivity. *And* they can improve your company image, because they're *meaningful* gifts that help people keep in touch with the ones they love.

Here are just a few of the ways you can use AT&T Long Distance Gift Certificates to improve *your* business:

1 As a premium to help sell more frozen dinners and other foods.

2 As an incentive for your employees to work harder.

3 To motivate people to buy more washing machines (and other major appliances).

4 To draw more customers to your bank.

5 Or to tell your customers, "Thanks for giving us your business."

6 To sell more electric razors (and other small appliances).

7 Or to play Santa Claus (or Easter Bunny) to your entire company. (The Gift Certificates come in $1, $2, $3, $5, $10, $25, and $100 denominations so you can tailor them to your own business needs.)

8 To move more paper products.

9 Or to sell more detergent (and other soap products).

10 To move more soft drinks.

11 Or to reward employees with a good safety record.

12 To celebrate employees' anniversaries.

13 To reward your employees for a job well done.

14 To sell more cameras (and other photographic equipment).

15 To say, "Happy Birthday!"

16 To get more people to buy your newspaper.

17 To sell more floor wax (and other household products).

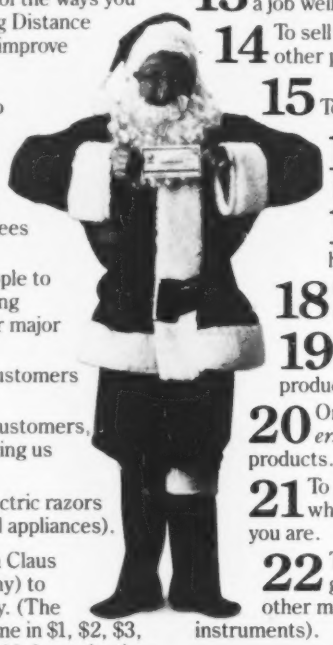
18 Or to say, "Happy Secretaries' Week."

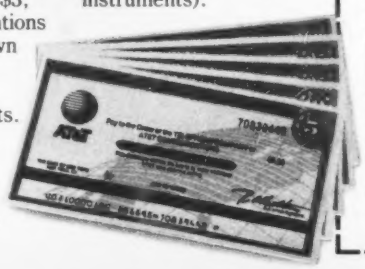
19 To sell more ceiling tiles (and other home products).

20 Or to entice small *retailers* to sell more of your products.

21 To show someone just what a "nice guy" you are.

22 To sell more guitars (and other musical instruments).





23 To move more VCRs (and other video equipment).

24 To sell more yogurt (and other milk products).

25 Or to sell more compact disc players (and other hi-fi equipment).

And whatever else your imagination tells you works best for *your* business.

AT&T Long Distance Gift Certificates are among those rare premiums and incentives that are easy to order, inventory, and store.

We'll work with you, of course, to help you get your promotions and incentive programs off the ground.

If you'd like to improve *your* business, mail the coupon *today*. Or write to AT&T Long Distance Certificate Center, P.O. Box 954, Netcong, New Jersey 07857-0950. Or call:

Nissan yanks record $150M

By STEWART ALTER
and CLEVELAND HORTON

In the largest single account move ever, Nissan Motor Corp. USA pulled its $150 million-to-$160 million in billings out of William Esty Co., almost 10 years to the day that it first hired Esty.

An agency review is planned, but most insiders expect Ogilvy & Mather Worldwide to win the account. Ogilvy cleared its decks of its $15 million Peugeot account in 1986, and has been pressing for either Nissan or Toyota (at DFS Dorland Worldwide) since then.

Agency sources in Los Angeles say Nissan is considering splitting its account around model lines, separating trucks, high-end sporty cars and low-end, entry-level cars.

Esty was fired just as new CEO Joseph O'Donnell visited Nissan's Carson, Calif. headquarters, presenting creative solutions for Nissan to C.P. "Chuck" King, Nissan senior VP-marketing and sales, and Joe Opre, general manager of advertising and sales promotion.

To demonstrate Esty's new resolve to do better creative work, Mr. O'Donnell informed Nissan he had hired Marvin Honig, exec VP-executive creative

Moonlight dancer

Bruce Willis, who last year sang for Seagram's Golden Wine Cooler, this year dances in a 60-second rock video. Directed by David Mallet, the video is the centerpiece of Seagram's campaign, via Ogilvy & Mather, that kicks off the summer cooler season. See story on Page 110.

Wall St. knocks JWT

By STEWART ALTER

NEW YORK—JWT Group Chairman-CEO Don Johnston tried to impress Wall Street last week, and Wall Street wasn't impressed.

In a major test of Mr. Johnston's leadership, the head of the world's fourth-largest agency group eliminated JWT/USA staff positions and gave top positions to "line"—or hands-on—execs. He also named a president and chairman—from inside the company—and formed a U.S. operating committee.

Stephen Bowen Jr., 43, becomes president of JWT/USA, and James Patterson, 40, creative director of Thompson/NY, also takes on the role of chairman-creative director of the U.S. agency.

The strategy: Re-emphasize creative work and strengthen cost-controls at a time when client loyalties may be uncertain.

But major Wall Street analysts

Average salary increase for 20 agency executive positions was near 14% last year, but 27% got no boost.

Salary survey

Average agency boost hit 14.6%, but one in four execs stiffed in '86

By BEN COLE and MATT SIZING

For many ad agencies and their top executives, 1986 was tough, though most weathered the storm and some even had an exceptional year.

How did the ups and downs in the advertising industry affect industry paychecks?

To answer this question, Cole Surveys in cooperation with ADVERTISING AGE conducted the second-annual survey of top-management compensation in advertising agencies.

A total of 2,667 executives were covered this year, a 61% increase over last year's sample of 1,654 execs. Among the highlights of this year's study:

- Three-quarters of the executives got at least some increase. Those reported in both the 1985 and 1986 studies received base salary increases that ranged from 1% to 110%; the average salary raise was 13.6%. The average total cash compensation (1986 base salary plus bonus) for these executives increased even more, up an average of 14.6%. And one of every eight executives had a great year, drawing a total cash increase of 21% or more.
- For one in four ad execs, however, 1986 was bad news: 26% saw no increase in salary, and 27% got no raise in total cash. These are the highest "zero-increase" statistics we've ever recorded in any industry in any year (in a typical year, 90% or more receive a pay boost). Many executives actually took a pay cut—their salaries were frozen, but their bonuses were slashed.

Hardest hit were top management in the smaller agencies, as well as the ceos of independents of every size. Some of the highest paid in the largest agencies saw their paychecks shrink. (See Tables 1, 2 and 3.)

Even in a shaky year, big bucks and big bonuses were much in evidence. While the average total cash compensation for all 2,667 executives was $69,700, the highest-paid agency exec pocketed $613,600, more than eight times the average.

One in six executives (444, or 16.6%) made more than $100,000; 66 (2.5%) earned more than $250,000; 10 made more than $500,000.

And even though incentives were somewhat scarcer this year, executives who got one averaged 22% of base salary, the same percentage as last year. The biggest bonus reported was $285,000.

Incentives are more than a key element in executive compensation. Because bonus pay is variable and can change (or disappear) from one year to the next, it is perhaps the best barometer of an industry's year-to-year fortunes as reflected in how its top executives are paid.

- Last year, six of every 10 executives (61.5%) with company-wide managerial responsibilities (ceos, presidents, branch office managers and executive vice presidents) received a cash incentive averaging approximately one-third

(Continued on Page 46)

Highlights

Reebok roulette 4
Ammirati & Puris last week resigned the $15 million Reebok International account after holding it only two months because, the agency says, Reebok officials changed their minds every week on the direction their advertising should take. Reebok then awarded the account to Chiat/Day's New York office.

Dairy board's dilemma 6
The National Dairy Promotion and Research Board, faced with a reduced ad budget, is reviewing the work of two ad agencies. D'Arcy Masius Benton & Bowles, Chicago, and McCann-Erickson, San Francisco, could lose a total of $27 million in billings.

Cadillac contradiction 12
Cadillac's long-range plan to reposition itself to a younger, more upscale audience is being undercut by local dealer groups who continue to target traditional, older buyers.

Apple's away 28
As IBM's advertising gunshots are echoing over the airwaves, all is strangely quiet on the western front—the marketing camp of Apple Computer. Cupertino, Calif.-based Apple, the second-largest personal computer marketer behind IBM, is running barely a maintenance schedule of advertising compared to IBM's estimated $50 million-plus blitz for its new Personal System/2 family of computers.

Xerox's financial expertise 39
Xerox conjures up images of copiers, but 47% of the company's profits come from financial services. To make its financial expertise known beyond Wall Street, Xerox Corp.'s Financial Services unit is appealing to the business community with a print campaign from Ciociola & Co. Advertising, New York.

FEATURES

A full crib? 72

The baby-boom generation's decision to have children has led to a population explosion among baby magazines. So many new local, regional and national parent publications have been introduced recently that some publishers are questioning whether the market is saturated. Despite new parents' "voracious appetite" for information, there may be "an information glut starting," said Jim Ritts, VP-publisher of Whittle Communications.

INTERNATIONAL

Advertising's hold in China 76
Advertising has escaped repercussions of the chill in China's political climate, say executives at international agencies. Other Western business representatives in China, however, are nervous about the new campaign, which opposes anything that might weaken the power of the Party—including Western ideas.

Beijing hosts conference 77
The People's Republic of China will play host to its first international advertising conference in June. The Beijing '87 Third World Advertising Congress is expected to bring together more than 1,000 top advertiser and agency executives from North America, South America, Europe, the Middle East and Asia.

OTHER NEWS

Orval Kent Food Co. formed a retail division to handle the expansion of its first branded product, Salad Singles, and to develop a strong standing in grocery store refrigerated sections. Guiding the program is Larry Haberkorn, 39, named president of the new retail division. Page 24.

Pharmaceutical giant Hoffmann-LaRoche will introduce a drug test that it says screens out substances that can hide drug abuse. Page 32.

Advertising is not confined to producing long-range results, according to a study by the Advertising Research Foundation. Page 82.

It's time to turn away from the megamergers that racked the advertising industry last year and get back to business as usual, according to the heads of two major agencies. Page 85.

Telemundo Group is arming itself heavily for its planned assault on Univision, the long-dominant Spanish-language TV network. Page 88.

Eastman Kodak Co. is spending an estimated $40 million through yearend to introduce a theme with a personal touch for its Kodacolor VR-G film. Page 92.

The 1988 elections are a year and a half away, but one labor union already is putting $1 million into a campaign to rekindle liberal feelings. And a conservative group has targeted its first liberal legislator in new ads. Page 93.

Toothpastes challenging P&G's Crest

By NANCY GIGES

New York—Colgate-Palmolive and Lever Bros. are putting a double squeeze on Procter & Gamble Co.'s market-leading Crest toothpaste, with challenges to its superiority claims for tartar control and cavity fighting.

Colgate broke a network TV spot April 30 claiming its Colgate tartar-control product is "proven better than tartar control Crest at fighting ugly tartar buildup." The three-week ad blitz is backed by spending at an annual rate of $125 million.

Lever is claiming, in new TV :15s from SSC&B, that its Extra Strength Aim is a more effective cavity fighter than Crest. Print ads say the new Aim contains 50% more fluoride than standard toothpastes. It also attacks Colgate in a 15-second TV spot and has asked both Colgate and P&G to drop their fluoride-superiority claims (AA, April 27).

Colgate complied, saying it was busy on a more important toothpaste battlefront—tartar control. But P&G is not conceding so readily.

Cincinnati-based P&G unsuccessfully challenged Lever's Aim claims at the Food & Drug Administration, and now has filed complaints with the TV networks and the National Advertising Division of the Council of Better Business Bureaus, where the matter is still pending.

Lever Bros. received a new drug application last year from the FDA for Extra Strength Aim since, at 1,500 parts per million of fluoride, it contains higher than standard levels. Crest contains 1,100, and Colgate has 1,000.

P&G challenged Lever's superiority claims, questioning whether Lever's data showed increased cavity protection, said Gerald Rachanow, FDA deputy director of the division of over-the-counter drug evaluation.

But the FDA was satisfied with Lever's data.

A P&G spokeswoman said the

Carnation cuts commissions

By JENNIFER PENDLETON

Los Angeles—Carnation Co. cut the commission it pays its ad agencies by more than 10%, company sources report.

The Nestle S.A. unit acknowledged early this year it "adjusted the basis" of how it pays its agencies, but stressed the "total agency compensation pool" remains the same. Translation: Carnation wants more work for the same amount of money.

The company source said Carnation sliced the 15% commission to 12% to 13% in a cost-cutting move applying to all Carnation agencies that were being paid in that manner.

Those affected are believed to be Dailey & Associates and Foote, Cone & Belding here and SSC&B:Lintas Worldwide in New York.

Ogilvy & Mather's Los Angeles office, which has the assignment for Carnation's new Grand Gourmet dog food, is paid on a fee basis.

The company insider said the agencies "seem to be taking it in

(Continued on Page 110)

DeLaurentiis shops

Beverly Hills, Calif.—De Laurentiis Entertainment Group is talking to three agencies about its estimated $25 million media-buying account.

Bozell, Jacobs, Kenyon & Eckhardt/Pacific, Los Angeles, won the account a year ago (AA, March 17, 1986). Sources said the movie company is considering BBDO Worldwide and DMB&B Entertainment, runners-up to Bozell last year, as well as Western International Media.

At Bozell this week, Richard Jarc, former management supervisor at DDB Needham/West, takes over as management supervisor on the DEG account.

DDB Needham/West Exec VP-Creative Director Robert Kuperman denied reports he will move up to president, and president Alan Pando to chairman, following the anticipated retirement of chairman Montgomery McKinney. The Los Angeles unit oversees DDB Needham offices in the western U.S.

West Coast News

L&A Juice Co., Downey, Calif., begins a nine-week southern California TV campaign for Fifth Avenue Seltzer today with the theme "So good they named a street after it."

The campaign, the first from new agency Admarketing, Los Angeles, will expand nationally later.

Separately, L&A this month begins national rollout of Langers Sparkling Juices, a line of carbonated fruit juices, and California Splash, a mineral water flavored with fruit juice. Couponing, handled in-house, will support.

Dairy board may churn agencies

DMB&B, McCann head for review

By JANET MEYERS

The National Dairy Promotion and Research Board, facing a reduced ad budget, is reviewing work of two agencies that have handled the board since it was founded three years ago.

D'Arcy Masius Benton & Bowles, Chicago, and McCann-Erickson, San Francisco, could lose a total of $27 million in billings.

In a surprise move, the dairy directors at their recent monthly meeting decided in a closed session to review two accounts—the $20.9 million cheese account, now at DMB&B, and the $5.6 million milk account aimed at children, now at McCann.

The Arlington, Va.-based board says it is reviewing agencies because of budget problems, not dissatisfaction with its shops. However, sources last week said some board members are particularly unhappy with DMB&B's "Cheese, glorious cheese" campaign.

In another blow to DMB&B's dairy billings, the board also decided that, at this point, it will not renew its $5 million ice cream campaign next year.

The dairy board faces a 15% budget cut for fiscal 1988, which starts Sept. 1, and will have only $56 million for advertising.

This year it had a $65 million budget, which was split among three agencies.

The board's budget is dropping because milk production, on which assessments are based, has declined.

DMB&B has handled dairy advertising since 1974 for the Chicago-based United Dairy Industries Association, the group that represents regional and local dairy promotion groups.

The agency currently has close to $50 million in billings from national and UDIA dairy advertising.

The California Milk Advisory Board, Modesto, has used McCann since 1981. The agency handles more than $25 million in dairy advertising from the California and national groups.

The two separate reviews will pit the board's existing agencies against one another.

Grey Advertising, New York, which handles the board's $7 million butter campaign; DMB&B; McCann; and several outside agencies will be invited to recommend new strategy for the two campaigns, said George deJager, VP-market evaluation and research for the dairy board.

"This doesn't speak badly of the existing agencies," Mr. deJager said. "It's a matter of good business sense. With less money to work with, we're reviewing everything we're doing."

However, Mr. deJager added that the board is eager to see new creative strategies, including ways to stretch the board's more limited dollars.

The review will start in late May and be completed by late summer. Mr. deJager said the accounts probably will not be consolidated at one agency.

DMB&B's adult-oriented milk advertising, themed "America's health kick," won't be put in review because UDIA funds the creative costs on that advertising.

Shell Oil pitching for plastic

By JENNIFER LAWRENCE

HOUSTON—Shell Oil Co., the nation's leading gasoline marketer, today challenges its four closest competitors in a $10 million ad campaign designed to boost credit-card sales.

For the next six weeks, Shell will honor credit cards from Amoco, Chevron, Exxon and Mobil. Holders of those credit cards are being urged to apply for a Shell card.

The campaign, which represents about one-third of Shell's total annual ad spending, makes the point that those rival gasoline marketers charge credit-card users more for gas, while Shell charges the same price to cash and credit-card customers.

Shell decided in 1982 not to offer discounts for cash purchases, and today it has 8 million active credit-card accounts, which Shell says is the largest credit-card base of any oil company.

The company expects the six-week "honor select" program to increase its credit-card base by 5% to 10%. The program is similar to the 1982 "honor all" approach launched in response to the industry's move toward cash discounts. Shell says that effort yielded about 2 million new credit-card holders for the company.

A 30-second TV spot from Ogilvy & Mather will air in 40 markets. Print and point-of-pur-

(Continued from Page 1)

(32.2%) of their base salary. This year, however, less than half (48.0%) of the top executives in these positions were awarded bonuses averaging 33.8% of base pay.

- For some executives, bonuses made all the difference. One ceo whose agency bills less than $25 million saw his modest salary of $52,000 blasted into the total cash stratosphere with a $285,000 bonus —548% of base salary! While his base salary ranked 128th among chief executives in independent agencies, his total cash of $337,000 earned him a respectable 11th-place finish among his peers.
- Last year we reported that of the 10 highest-paid ceos (all of them heads of independent agencies or conglomerates), eight received a cash bonus and two didn't. This year was a repeat—once again, eight of the 10 highest-paid ceos, with total pay ranging from $404,800 to $600,000, received an incentive. These eight ceo bonuses alone averaged $136,525 and totaled more than $1 million: $1,092,200, to be precise, or 22.6% of the ceos' combined base salary of $4,824,700.
- Creative directors drew bonuses at a clip that rivaled the ceos. Sixty-six of 157 creative directors (42.0%) got bonuses averaging 26.7% of base salary. The rewards for the best creative talents were especially evident in the larger agencies billing over $100 million, where more than half of the creative heads (52.2%) received bonus checks that averaged 25.9% of base salary, or $48,000 each. Average total take-home pay for creative directors in the big agencies: $221,600.
- Although performance-related incentives can be found in agencies of all sizes, the percentage of top managers who actually get one rises in a remarkably consistent, stair-step pattern based on agency size. In the agencies that bill up to $5 million, one in four executives (24.5%) got one. This figure rises to 30.6% in agencies billing $5 million to $10 million; to 34.8% in agencies billing $10 million to $25 million; and to 44.7% in agencies billing $25 million to $100 million. In agencies with billings in excess of $100 million, one in two executives (49.9%) received bonus pay on top of their base salaries.
- In contrast to the size group pattern that governs bonus distribution, the average bonus-to-base ratio is reasonably consistent across all size groups. The average incentive for those who received one stands at about 22% of base salary, regardless of agency size. Only in agencies with billings of $5 million to $10 million, where the average bonus edges up to just over 30% of base, is there any significant deviation from the 22% standard. (See Table 4.)

The bottom line on bonuses: A total of 990 of the 2,667 executives, or 37.1%, received a cash bonus in 1986, a slightly smaller percentage than the 40.9% who received one in the previous year. Bonuses for those who got one averaged 22.1% of base salary, or $16,200—virtually identical to 1985's average bonus of 21.7% of base, or $16,500. Twenty-eight executives received a bonus of $100,000 or more, up from 16 six-figure incentives reported in 1985.

Base-salary increases: From one extreme to the other

To get the most precise reading of top-management salary increases, we tracked the average base-salary increase from Oct. 1, 1985, to Oct. 1, 1986, for each "matched" employee in the sample (those reported in both last year's survey and this year's study, identified by individual employee number).

The average 1986 base-salary increase for all matched executives was 8.2%; those who received an increase did considerably better, averaging 13.6%. Ad execs who received a pay hike made enormous gains on the cost of living: The 13.6% average increase was more than *nine times* higher than the 1.5% increase in inflation over the same period, and compares favorably with top-management increases in most other industries.

With inflation at a virtual standstill, most executives who got any increase at all made some progress on the cost of living.

Nevertheless, the averages don't tell the full salary-increase story:

- Although 26% of the executives got no salary increase, another 16% received a pay hike of between 1% and 5%, which means that 42% of those reported received increases of 5% or less. This large proportion of small increases pulled down the average salary raise for all execs, offsetting the large number of good-size increases that were also awarded.
- The biggest increases were distributed by the largest agencies. Agencies billing more than $100 million (Group E) gave an average base salary increase of 9.4% to 76% of their top executives; the average raise for those who received one was a very healthy 16.6%.
- In the midsize agencies, those with billings of $10 million to $100 million, the average raise was more modest: 7.5% in Group D ($25 million to $100 million) and 6.1% in Group C ($10 million to $25 million). In both size groups, the average pay hike for executives who received one was 11.1%. While nearly four of every five execs (78%) in Group D got an increase, only three of five (62%) were so favored in Group C.
- Similar raises were awarded in the smaller shops with billings up to $10 million: 7.0% in Group A (up to $5 million) and 6.4% in Group B ($5 million to $10 million). The discrepancy in salary-hike distribution—how many actually got raises —is especially stark in the smallest agencies. In Group A, little more than half of the executives (57%) received a raise; 43% got zilch. Those who got an increase averaged 12.9%.

Table 4

1986 Incentives

Percent receiving and incentives as a percent of base salary

Billing size group	% receiving	% of base
A: up to $5 mil.	24.5	24.7
B: $5 mil. to $10 mil.	30.6	30.4
C: $10 mil. to $25 mil.	34.8	23.7
D: $25 mil. to $100 mil.	44.7	19.2
E: over $100 mil.	49.9	22.2
All agencies	**37.1**	**22.1**

Total cash increases: Bonuses mark the trend

Even more than the base salary raises, the 1986 total cash (base salary plus bonus) increase results were remarkably varied. While hundreds of executives were awarded huge cash bonuses, boosting their base salaries by thousands, tens of thousands and even hundreds of thousands of dollars, others saw their incentives reduced or eliminated altogether.

As with the base-salary increases, we tracked the average total cash increase for each "matched" executive (reported in both the 1985 and 1986 surveys). We calculated these bonuses, which in most cases were paid in early 1986 for calendar-year 1985 performance, as a percentage of the October 1986 base salary.

- For matched executives, the average total cash increase was only 7.1%, *lower* than the 8.2% increase in base salary alone—a clear sign that agencies across the country sharply reduced their bonuses from the 1985 levels. Seventy percent of all ad executives reported in both the 1985 and 1986 studies received *no increase* or took cuts in their bonus pay.
- Bearing the brunt of the bonus *cutbacks* were executives in the smaller agencies, those with under $10 million in billings. In the $5 million-to-$10 million group, one in three (32%) had their bonuses cut or eliminated. In the smallest agencies, those billing up to $5 million, the cuts were even deeper: One in two (52%) of those who got a bonus in 1985 had their bonuses slashed or eliminated.
- The average base-plus-incentive increase in the smallest agencies was only 1.6%, just about even with the 1.5% rise in inflation. Only 49% of these execs got an increase in total cash; most got no raise or took a pay cut. Executives in the $5 million-to-$10 million group fared no better: The total cash increases for the 81% who got one were almost entirely offset by the 19% who took a pay cut, resulting in an overall increase of just 0.2%.
- The severe cutbacks in the two smallest-size groups pulled the overall average total cash increase down to 7.1%. The larger agencies, those billing more than $10 million, gave somewhat larger total cash increases, about 7.7% on average. Although only three of four executives in the larger companies received an increase in total pay,

(Continued on Page 48)

Participation higher in 2nd annual survey

Participation in the annual Cole/Advertising Age survey more than doubled in the past year: 221 agencies participated, up 140% from 92 in our initial study. The agency sample includes 21 multi-unit headquarters, 173 independent agencies, 23 subsidiaries and four branches.

Smaller agencies, those billing up to $10 million, are the fastest-growing part of the sample: 117 participated, more than triple the 35 that submitted data last year. In the $10 million-to-$100 million class, the number of participants more than doubled, to 86 from 42. Also participating were 18 agencies with billings of more than $100 million (including three of the top 10), up from 15; the larger agencies each billed an average of $751 million, up 36% from $553 million last year.

Because the smaller agencies are a larger percentage of the sample, the average total cash figure for all executives fell 5%. However, the average total earnings of "matched" executives, those reported in both last year's survey and this year's, is a far more accurate way to size up the year-to-year change. Their total cash pay rose 7.1% from $89,800 to $96,200.

For more information about the sample and the survey methodology, see Page 52.

(Continued from Page 46)
those who did all cracked double digits, averaging 12.1% in agencies billing $10 million to $25 million, 12.2% in agencies billing $25 million to $100 million and 17.5% in agencies billing over $100 million. (See Table 5.)

- Independent-agency ceos were on the bottom of the bonus pile in 1986, and their results exemplified the larger trend: Those who got, got big, and were offset by those who got nothing.

The independent ceos' average total cash increase was only 0.5%—50% of them received an increase averaging 17%, but the other 50% got no increase or took a pay cut.

- Other executives who received total cash increases averaging 5% or less included chief financial officers (5%) and exec VPs (4.0%). Presidents/chief operating officers also exemplified the broader trend: In agencies billing up to $10 million, none got a raise and their average cash pay was chopped 14%; in the agencies billing more than $10 million, 89% of the presidents received an increase that averaged 16%.

And that's why we call this year's results a mixed bag!

Highest paid by position: Up, up and away

No discussion of the survey results by position would be complete without a visit to the "Hall of Fame"—our list of the highest total cash paid to each of the 20 survey positions. (See Table 6.)

It's important to note that the Hall of Fame features a revolving door—the highest-paid in any one position in any given year is often not the same person who occupied the position during the previous year.

Besides documenting how much agencies are actually willing to pay the best and the brightest in each position, the Hall of Fame indicates how ad agencies value these 20 top management positions in relation to one another.

Four of last year's five highest-paid positions made the top five list again: ceo II (independent), president/chief operating officer, creative director and chief financial officer.

The ceo I (subsidiary) position now occupies the No. 2 slot, up from No. 6 last year; this year the highest-paid ceo I's total earnings were $530,400, 65% more than the $322,300 earned by last year's highest-paid ceo I. Dropping out of the top five to 10th place was the exec VP position.

The creative director position also moved up a couple of notches; the highest-paid earned total cash of $500,000, nearly 50% more than last year's high of $335,000. The highest-paid chief financial officer on this year's list earned total cash compensation of $415,200, underscoring the importance of the fiscal and control function in the advertising world.

Total cash for the five highest-paid positions ranges from the chief financial officers's $415,200 to the ceo II's $600,000.

The second five (the sixth-through-10th-highest-paid) includes three repeaters from last year—branch office manager, director of account management and media director—along with business-development manager (a position new to this year's survey) and the exec VP position.

Only $41,000 separates the sixth-highest-paid position (branch office manager, at $340,000) from the 10th highest-paid (exec VP, at $299,000).

Although the remaining 10 positions show little movement from last year's rankings, generally up or down a notch, there was real movement in some of the total cash figures.

For example, the highest-paid traffic manager's total cash was $100,000 this year, a 78% advance from last year's high of $56,200; the top-paid senior account executive earned $198,000, up 55% from $127,500 last year and the highest-paid associate creative director made $239,000, up 44% from $167,500 a year ago.

Whereas last year the highest-paid in five positions earned less than $100,000, this year only two of the top-paid—the senior art director ($93,500) and the print production manager ($88,000)—failed to reach six figures.

Table 7

1986 Summary of CEO perquisites

Billing size group	Company car	Supplemental medical insurance	Pension	Supplemental retirement	Stock option
A: up to $5 mil.	78%	49%	29%	6%	9%
B: $5 mil. to $10 mil.	83	43	17	13	20
C: $10 mil. to $25 mil.	84	51	36	7	13
D: $25 mil. to $100 mil.	82	59	51	13	23
E: over $100 mil.	86	64	50	29	50
All agencies	81	52	34	10	17

Source: ©1987 by Cole Surveys, Inc.

The highest cash pay reported in the survey, $613,600, was received by an executive whose responsibilities did not fit into one of the 20 defined positions.

Position results: Billing size remains key factor

Note: Differences in figures in text and charts (Table 8, and ceo arrays in Table 13) are caused by exclusion of some unrepresentative data from chart calculations.

Although geography (particularly an agency's proximity to major ad centers like New York or Los Angeles), organizational structure, corporate "culture" and a host of other variables can influence compensation, agency size remains the primary determinant of salary and bonus levels in the ad industry. Here's an overview of who made what in each of the 20 benchmark positions (See Table 8).

Overall agency management

Chief executive officers (II and I): For agency heads, there's more to the pay picture than meets the billfold: Cash may be only a part of the chief executive's total compensation pa kage.

Other perquisites, such as a set of company-paid wheels, often come with the territory. (See Table 7.)

For example, four of every five ceos (81%) drive a company car, and a majority of chief executives (52%) receive supplemental medical insurance.

Other "perks" received by advertising's chief executives include pension (34%), stock options (17%) and supplemental retirement benefits (10%).

For perks as well as pay, agency size makes a real difference. In the largest companies, for example, half of the ceos (50%) receive pensions and 50% get stock options; in the smallest agencies, 29% of the ceos receive pensions and fewer than one in 10 (9%) gets stock options.

Ceo pay levels rise steadily, and then sharply, as agency billings increase.

Independent-agency heads (ceo IIs) average total cash of $78,900 in the smallest-size group, $113,400 in the $5 million-to-$10 million group, $131,600 in the $10 million-to-$25 million group and $192,600 in the $25 million-to-$100 million group.

But the ceo II's total take-home pay really takes off in the largest agencies, soaring to $425,200—which is more than twice the average in the next-smallest-size group. (See Table 8.)

Averages don't tell the whole story, however; exceptions can be found at both ends of the pay spectrum.

For example, the $10 million-to-$25 million group includes a ceo II who made $464,500 last year—about two and one-half times more than the size group average, and nearly $40,000 more than the average for chief executives in the largest agencies.

A similar size-group pattern can be discerned in the compensation of subsidiary-company ceos.

The 11 ceo I's in the $25 million-to-$100 million group averaged total cash of $227,300, while those in the largest agencies averaged $354,400.

The $227,300 total cash for subsidiary ceos in agencies billing $25 million to $100 million is nearly $35,000 more than the average for independent ceos in the same size group.

This is a phenomenon often observed in industries where large organizations merge with or acquire smaller companies.

The larger companies extend their higher pay structures to the subsidiary ceo's, thus pushing their average pay beyond that earned by the ceos of independent organizations. We are just beginning to see this trend in the advertising industry and, as the trend develops, we can expect to see steadily increasing base salaries, bonuses, benefits and perks for ceos of independent

(Continued from Page 48)

and subsidiary agencies alike.

Independent and subsidiary heads drew comparable bonuses in comparable numbers this year. Subsidiary ceos, who tend to work for the larger agencies, had a slight advantage: 50% received incentives averaging 46.2% of their base pay, while 43.6% of the independent chiefs got bonuses averaging 39.3% of base.

President/chief operating officers, exec VPs: Although presidents/chief operating officers and exec VPs have somewhat similar responsibilities, the survey results indicate a distinct difference in their compensation—one that becomes especially pronounced in the largest agencies.

For the 83 presidents/chief operating officers in the survey, total cash compensation ranges all the way from $23,500 in one of the smallest agencies to $476,000 in one of the largest. Total pay for presidents/chief operating officers rises on a curve similar to the ceo curve, moving up gradually in the three smallest-size groups ($62,800 in Group A, $91,500 in Group B, $118,700 in Group C, then jumping to an average of $174,700 in Group D ($25 million to $100 million) and $328,900 in the Group E (over $100 million) agencies.

The 144 exec VPs received total cash of $94,000 on average, 31% below the $136,100 figure for presidents. The cash gulf separating exec VPs and presidents/chief operating officers is narrow in the smaller agencies, but widens considerably in the biggest companies—average total cash for exec VPs is 13% less than presidents' pay in the smallest agencies, but is 31% less in Group C, 38% less in Group D and 49% (or more than $160,000) less in the Group E agencies.

Forty-one percent of the presidents/chief operating officers received a bonus averaging 39.6% of base, equal to the independent ceos' average of 39.3% of base. In agencies billing more than $100 million, two-thirds (66.7%) of the presidents/chief operating officers got bonuses averaging one-third (33.6%) of base.

More than half (52.1%) of the exec VPs got bonuses, though their average 26.8% of base was considerably smaller than the average bonus amounts for ceos and presidents.

Branch office managers: The 62 branch office managers reported in this year's survey averaged $105,000 in total cash, $180,200 in agencies billing more than $100 million. The highest-paid branch head, who manages an office in the $25 million-to-$100 million group, earned a total of $340,000.

Thirty-six of the 62 (58.1%) received an incentive in 1986, a higher proportion than in any other survey position; their average incentive was 21.6% of base salary.

Financial management

Chief financial officers: As we noted earlier, the highest-paid chief financial officer made $415,200 in 1986. In agencies that bill over $100 million, the chief financial officer's average total cash of $176,000 tops the exec VP's average of $168,700 and nearly equals the branch head's total of $180,200; most chief financial officers in agencies billing less than $100 million earn quite a bit less than most exec VPs and branch heads. The average total cash for all 126 chief financial officers in this year's study was $64,200.

Nearly four of every 10 chief financial officers (38.9%) earned a bonus that averaged 24.3% of their base pay.

Creative management

Creative directors and associate creative directors: Like chief financial officers, the top creative heads can earn compensation that rivals the highest-paid in any position. Forty-five of the 157 creative directors (28.6%) earned more than $100,000 in 1985, eight made over $250,000 and four topped $400,000.

Although the highest-paid creative director in agencies billing less than $5 million earned $100,000, the average total cash for creative heads in the smallest agencies is $39,400, a figure that rises to $66,400 in Group B, $75,500 in Group C and $114,100 in Group D. In agencies with over $100 million in billings, creative heads earn an average of $221,600—second only to ceos.

Bonuses for creative directors averaged 26.7% of base salary and were distributed to 42.0% of those reported.

Total cash compensation for the 144 associate creative directors in this year's survey averaged $78,400; associate creative heads in Group E agencies earned $118,700 on average. Although a slightly higher proportion of associates (43.1%) received bonuses than their bosses, their average incentive of 11.8% was less than half the 26.7% awarded to the top creative person.

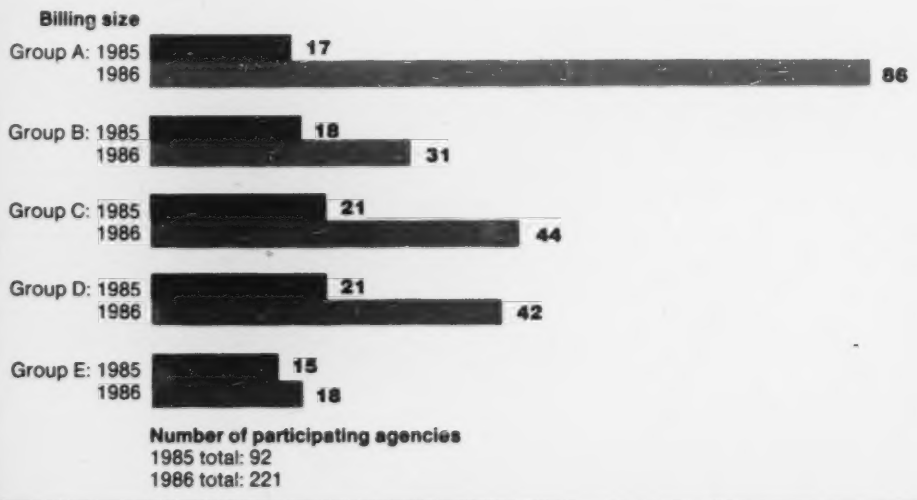
Senior art directors and senior copywriters: If the pay figures for these positions are any indication, advertising agencies put equal emphasis on design and copy—only

(Continued on Page 54)

Table 11

1985-86 Survey participation

By billing size group



How salary data were gathered for this survey

This second annual Survey of Top Management Compensation was conducted by Cole Surveys in cooperation with Advertising Age. The survey is designed to provide a timely, accurate analysis of the industry's top-management compensation while maintaining the confidentiality of participants.

A total of 221 agencies participated in this year's survey, more than double the 92 agencies that submitted data last year. The sample includes 21 independent and subsidiary headquarters, 173 independent agencies, 23 subsidiaries and four branch offices. (See Table 11.)

This year's sample runs the gamut of agency size, from small shops to some of the country's largest agencies. The largest agency in the survey reported billings of $3.5 billion, while the smallest reported just under $1 million. The 86 agencies that bill less than $5 million average $2.1 million; the 18 that bill over $100 million average about $750 million. We used total billings as the indicator of agency size, and divided the survey participants into five billing-size groups: Group A (up to $5 million); Group B ($5 million to $10 million); Group C ($10 million to $25 million; Group D ($25 million to $100 million); and Group E (more than $100 million).

Survey participants also were divided into the four regions used by Advertising Age. All four regions showed an increase in participants this year (See Table 12).

A total of 2,667 executives were reported this year, up 61% from last year's total of 1,654. Of the 2,667, 2,510 (or 94%) were slotted in one of the 20 defined "benchmark" positions. The remaining 157 executives were judged by their agencies to have duties other than those described for the 20 defined positions.

Each agency submitted the following data: Base salary as of Oct. 1, 1986, and incentive paid in 1986 for 1985 performance.

The arrays for Position 013-001, CEO II-Independent, and Position 013-002, CEO I-Subsidiary, present detailed agency results in a visual display. Cole has sent each company that submitted data a code sheet with its own confidential code. This allows each participating agency to see its CEO's pay ranking in relation to its billing ranking.

The position arrays are presented by billing size groups. At the top of each size-group display is summary information, such as weighted and agency averages, the median, the first and third quartiles and the number of agencies and incumbents. Total cash compensation data, as of Oct. 1, 1986, are shown from highest to lowest in each size group. The arrays display *all* figures reported, including the highest and lowest; to avoid distortion of the database, unusually high or low figures have been "lopped," or excluded, from the averages shown in the summary information.

Each agency that submitted data will receive total compensation arrays for several top-management positions.

Complete survey results, including base salary and total cash pay arrays for all 20 positions, are available in a comprehensive report prepared by Cole Surveys. Participating agencies can receive complete, individualized survey results in a "Confidential Report" that features displays comparing its own data to that of two peer groups, or "clusters," of other participating agencies.

Agencies that did not participate in this year's survey but would like to obtain the complete results of the study may order a non-individualized, off-the-shelf "Cole Edition" that contains detailed salary and incentive information (including arrays) on all 20 positions. This version is available for $245.

The entire staff at Cole Surveys worked on the design, data diagnosis and production of this study. Computer programs were prepared for the Advertising Age study by Ann Oppenheimer and Connie Gay. Justina Larson and Ed Reilly were responsible for project management. Mary Twomey assisted with data management and diagnosis. Suzanne Mancuso provided editorial support.

To order the "Confidential Report" or "Cole Edition," or for information on participating in future compensation surveys, call Ed Reilly at (617) 542-3341.

SALARY SURVEY

(Continued from Page 52)

$3,100 separates the average earnings of our 222 senior art directors ($42,100) and 162 senior copywriters ($45,200).

Although the artists have a slight edge in the four size groups with billings up to $100 million, the writers have the advantage in agencies that are billing more than $100 million, earning total cash averaging $67,300, compared to $62,200 that is paid to the art directors.

The art directors and senior writers also compete head-to-head for bonus pay—25.7% of the design chiefs earned an incentive averaging 6.3% of base salary, while 22.2% of the writers earned a bonus averaging 5.8% of base.

Business development, account management

Business-development officers: The business-development officer position is new to this year's survey.

In a hotly competitive industry like advertising, the person who can land new accounts plays a pivotal role, and these officers' earnings prove it.

The highest-paid new-business head took home a total of $335,000 in 1986.

The total cash earnings of business-development officers rose from an average of $34,600 in the smallest agencies to $83,700 in agencies billing $25 million to $100 million.

In the largest agencies, the new-business officer's average total cash of $178,400 puts him on a par with chief financial officer's $176,000.

Nearly one of every two development officers (47.7%) received a cash incentive averaging 20.9% of base salary; in agencies billing over $100 million, four of the five business-development heads reported got substantial cash bonuses—$33,800, or 20.3% of base.

Directors of account management and senior account executives: In agencies billing up to $10 million, the average earnings for directors of account management are within several thousand dollars of the creative directors' total compensation; above $10 million, however, the creative heads have a considerable advantage over the account directors, earning 19% more on average in agencies billing $10 million to $25 million, 37% more in agencies billing $25 million to $100 million and 47% more in agencies billing more than $100 million.

The 144 directors of account management averaged total cash of $84,000 in 1986; in the largest agencies, the average take-home was $150,700.

The highest-paid account director earned $330,000.

Fifty-six of the 144 account managers (38.9%) earned a bonus averaging 22.7%.

The 415 senior account executives averaged $54,600, and 41.9% received bonuses of 12.2% of base salary.

Total cash earnings for senior account execs don't vary by the extreme amounts common to other positions.

For example, senior account execs and directors of account management make about the same amount of money in the smallest agencies—account execs and account directors earn total cash of $35,000 and $36,900, respectively, in agencies billing less than $5 million; in agencies billing more than $100 million, however, the account directors' average total pay is $150,700, nearly twice the senior account exec's average of $80,800.

Media

Media directors and associate media directors: Media directors and their associates can make big bucks, but for these specialists—more so than for other ad execs—the really big bucks are in the big agencies.

While the average earnings of media directors range from $26,000 in agencies billing up to $5 million to $61,000 in agencies billing $25 million to $100 million, the average pay for directors shoots up to $154,500 in agencies billing more than $100 million, where the highest-paid media head collected total cash of $330,000 in 1986.

Associate media directors in the largest agencies earn a total of $72,700 on average, which is nearly two-thirds more than associate directors in the next-smallest size group.

The average earnings of the 139 media directors reported in the survey were $52,600; 32.4% were awarded incentive pay averaging 15.7% of base salary (in the largest agencies, three-quarters of the directors got an average bonus of over 20%).

The 83 associate media directors averaged $41,700 in total cash, and 28.9% received bonuses of 9.9% of base.

Production

Broadcast production managers and print production managers: Total earnings for broadcast production managers are closely bunched in the three size groups with billings up to $25 million (averaging $27,800 in Group A, $29,800 in Group B and $35,900 in Group C), and then rise to $61,500 in agencies billing $25 million to $100 million.

In agencies billing more than $100 million, a total-cash "chasm" separates the highest-paid broadcast chiefs; who earn at least $134,000 each, from the remaining group, none of whom earns more than $63,600.

The average pay of the 120 print production managers ranged moderately by agency size, from $22,700 in Group A to $55,100 in Group E.

The highest-paid print production head earned $88,000.

The broadcast production and print production chiefs had similar bonus results: 31.3% of the broadcast managers earned an average incentive of 14.7%, and 30.0% of the print managers earned an incentive of 9.2% of base.

Market research

Market research managers: The average total cash for market research heads starts at a relatively high $44,000 in agencies billing up to $5 million and rises to $92,500 in the largest agencies, where the highest-paid research chief earned $210,000.

Agencies in the two size groups billing more than $25 million account for most of the incumbents in this position (42 of 56) and virtually all of the bonuses (20 of 21, averaging 9.5% of base in Group D and 15.2% in Group E).

Public relations

Public relations managers: Average total compensation for PR heads starts at $25,700 in the smallest agencies, ranges from $39,800 to $54,400 in the three size groups with billings of $10 million to $100 million, and peaks at $83,800 in the largest agencies.

Five PR chiefs earned more than $100,000 in 1986. Thirty-eight of the 91 PR managers earned bonuses averaging 10.3%.

Traffic

Traffic managers: Average pay for traffic managers varies little by size group, averaging $20,600, $22,900 and $26,500, respectively, in Groups A, B and C, and $36,400 and $37,800, respectively, in Groups D and E.

About one of four traffic managers received a bonus averaging 8.1% of base salary.

For traffic managers, like other advertising professionals, anything's possible—the highest-paid traffic manager earned $100,000 in 1986.

Measuring competitiveness; Top 10 total comp in aggregate

How much does an agency's top management team cost?

In our first study we looked at the aggregate total cash compensation paid to the 10 highest-paid executives in each agency size group.

Organizational structures and reporting relationships can vary significantly from one agency to the next, and the top 10 total provides a way to measure the overall competitiveness of an agency's executive pay structure without regard to the titles or functions of the individual executives.

Here, as in the position comparisons, billing size has the greatest impact on executive pay. The average top 10 total compensation ranges from $333,200 (or $33,320 per executive) in the smallest-size group (agencies billing up to $5 million) to $1,991,900 (or $199,190 per executive) in the largest group (agencies billing more than $100 million). (See Table 9.)

Of course, what an agency actually pays its top 10 is often much more (or less) than the size group average.

For example, although the average top 10 cash pool in the largest agencies is $1,991,900, some of these agencies pay a lot more than that.

Of the 18 agencies reported in Group E, three pay their top 10 executives more than $3,000,000; the highest top 10 total reported, $4,620,000, is 132% higher than the Group E average.

Variation from the size-group average is just as evident in the smaller size groups.

In Group A, the highest top 10 total reported is $710,500, or 113% more than the $333,200 average; in Group B, the highest is $1,041,000, or 93% more than the $538,700 average; in Group C, the highest is $1,255,000, or 91% higher than the $656,800 average; and in Group D, the highest is $2,381,200, or 131% higher than the $1,031,100 average.

Top management: Relative to billings, still a good buy

Another way to look at the cost of top management is top 10 total cash in relation to agency billings. In the past year, the top 10 total as a percent of billings has changed very little, rising by 0.3 percentage points or less in the four smallest size groups and declining by 0.1 percentage points in the largest size group.

In the four largest size groups, the top 10 price tag ranges from 0.3% of billings in the largest agencies to 7.4% of billings in the $5 million-to-$10 million size group. Even the company carrying the highest top 10 aggregate ($4,620,200) pays a mere 2.7% of its billings to the top 10.

In the smallest size group, top 10 total cash averages 15.9% of billings, up from 15.6% last year and a considerably bigger chunk of billings than in the four larger size groups.

The recent wave of mergers involving the smaller agencies may well reflect efforts to trim these proportionately higher management costs. But even in the smallest companies, top management is still a good buy.

The highest-paid executive in the Group A agencies, usually the ceo, receives an average of $70,400 in total cash, a mere 3.3% of Group A average billings ($2,131,000).

As we noted last year, executive compensation in advertising doesn't increase in direct proportion to agency size.

For example, in 1986 it cost $1,031,100 to pay the top 10 in an agency billing $48.9 million (Group D) and $1,991,900, less than double, to pay the top 10 in an agency that's about 15 times larger—one billing $750.9 million (Group E). While the difference in average billings between the two groups is $702 million, the difference in their top 10 cash outlay is $960,800; in other words, for every million dollars of additional billings, the top 10 total increases by only $1,369 ($960,800 divided by 702) or an average of $137 per executive.

Highest-paid executive gets 17% to 21% of top 10 total

One constant in the annual survey results is the relationship of each top 10 executive's pay to the top 10 total.

The highest-paid executive receives about 17% to 21% of the total, regardless of agency size; the fifth-highest-paid executive gets 8% to 9% of the top 10 total; the 10th-highest paid receives 6% to 7%. This remarkable consistency extends to every type of agency in every size group. (See Table 10.)#

Back Pages

From past issues of Advertising Age

50 Years Ago This Week—1937

New York—Dominant newspaper and magazine advertising had been started for French's mustard, popularizing a new advertising character, Hot Dan the mustard man. The campaign was the biggest ever for a mustard.

A Hot Dan mustard spoon was given free with each purchase of a jar of the mustard.

The spoon, made of beetleware and molded in Hot Dan's image, was offered to avoid the annoyance of wiping mustard from the handles of spoons or paddles that frequently fall into the mustard and also to avoid mustard on tablecloths and napkins.

40 Years Ago—1947

New York—Regional councils and chapters of the American Association of Advertising Agencies sponsored the first annual examinations to screen young people for advertising careers.

The two-part examination consisted of an aptitude test and a knowledge test.

If the candidate was willing, his test results were circulated to member agencies in the area. The candidates were not told that success on the examination would result in their getting jobs, but it was expected that many would be helped by the plan.

30 Years Ago—1957

New York—Lovers of that rare ambrosial distillate known as Jack Daniel's Tennesse sour mash whiskey, which was so hard to get, were happy to learn that production had been stepped up 50% over 1955.

Consumers also were told that perhaps by 1961 supply would begin to catch up with demand.

Advertising was intended to take the "heat off the retailer," who couldn't meet consumer demand, and to prevent consumers from getting distorted ideas because of the shortage.

Window cards, counter cards and handouts for customers explained the shortage and were headlined "We'd rather ask your patience than lose your respect for Jack Daniel's."

20 Years Ago—1967

New York—Creative Playthings, a CBS Toy subsidiary, marketed a Little Brother doll, which came without clothes and was anatomically correct.

The company stated that after test-marketing overseas, "Children in Europe are apparently undisturbed by the whole affair."

10 Years Ago—1977

Washington—The Food & Drug Administration ordered warning labels to appear on dozens of aerosol products containing chloroflourocarbon propellants. The order said that warning labels must tell consumers that the spray product "contains a chloroflourocarbon that may harm the public health and environment by reducing ozone in the upper atmosphere."

Certain drug products, including over-the-counter sprays for asthma, were exempted because the use of chloroflourocarbons in them was deemed essential.

Compiled by Kevin Brown, Sandra Davis and Julie Doherty.

Special Report

Ted Carr

From piano to sushi bars, grocers jazz up service

By Denise Frenner

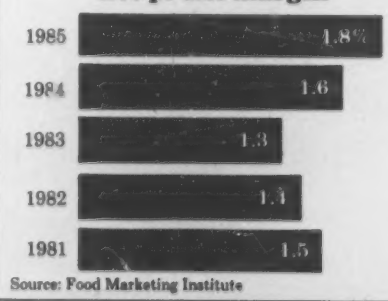
It used to be simple. Grocery marketers, like all retailers, held fast to the notion that success meant being "all things to all people." This weary axiom also implied that consumers' needs were basic and predictable, and could be easily satisfied without much imagination on the retailers' part.

No longer. While good prices, a convenient location and speedy checkout service always will be important, today's increasingly sophisticated consumers want a little more from their supermarkets than just the basics.

"They want to be pampered," says Larry Schaeffer, editor and executive producer of Stamford, Conn.-based "Supermarket Insights," an industry video magazine. "And they don't have to be rich to have these desires."

Frank Panyko, VP of The Food Institute, Fairlawn, N.J., says this change is partly because of consumers' pent-up desire for quality. "In the 1970s and early 1980s, with high inflation and a sluggish economy, many people couldn't afford quality items," he says. "Now that the economy is healthier, we can afford to talk upscale. The timing is right. The trend may have started years ago in affluent areas, but now it's moving more into the mainstream."

U.S. supermarket industry's net profit margin



Source: Food Marketing Institute

In response to more quality-conscious consumers and amid media proclamations of a dwindling middle class, grocery stores of all formats—from superwarehouses to upscale superstores—are moving up with the market.

Retailers are adding drama and sizzle to their operations with such amenities as full-service seafood departments, "from-scratch" bakeries, gourmet prepared foods and catering departments, specialty foods, and in-store restaurants complete with sushi bars, jazz pianists and wine stewards.

While the trend toward upgrading and upscaling isn't new, such activities appear to be on the

(Continued on Page S-2)

Grocers jazz up service

(Continued from Page S-1)

rise. Simultaneously, generic products and the spartan, limited-assortment warehouse stores selling fewer than 1,500 items are stepping down.

There are no statistics on how many of the nation's supermarkets practice high-style retailing, largely because "upscale" isn't a studied format, but a concept that can be applied to any store.

However, 55% of chain-store executives surveyed by *Progressive Grocer*, a Stamford, Conn.-based trade publication, say they anticipate abnormally fast proliferation of upscale stores in the near future, compared with 48% who said the same last year.

"There definitely are more upscale formats every year," says David Litwak, research director for New York-based *Supermarket Business*, an industry trade publication. "The industry follows whatever trends society is going through. If a segment of society is upscaling, so will supermarkets to serve that segment."

Mr. Litwak adds that competition in most market areas is fierce, and that retailers are doing anything they can to differentiate themselves and secure a niche.

"In the average community," says Mr. Schaeffer, "a retailer successfully can operate an upgraded store, with increased services and specialty foods, as long as the shopper perceives value for his dollar."

Progressive Grocer also reveals that only 11% of the surveyed chain-store executives were likely to stress generics in 1987, compared with 14% in 1986 and 28% in 1985. Further, the publication reports that limited-assortment warehouse stores started off with a bang that is now a whimper.

The format currently comprises 0.2% of all supermarkets in the U.S., the smallest percentage of any format operating today.

Perhaps the study's most dramatic, if not staggering, statistic concerns supermarket services. Fully 82% of the executives say they plan to add or expand service departments in 1987, compared with 75% in 1986 and 68% in 1985.

This comes as little surprise. As a recent cover story in *Time* pointed out, personal service has become an endangered commodity in the U.S. marketplace; consumer frustration is at an all-time high.

"Service has deteriorated here. Outside of the U.S., it's much better," says Jeanne Maraz, executive director, National Association for the Specialty Food Trade, New York. "Lots of stores are beefing up their services now; the marketplace requires it."

Mr. Schaeffer, in fact, says there is a retransfer of labor from the shopper back to the retailer. "Often, these things are cyclical. Everyone talks about the origins of the first self-service supermarket—with shoppers pushing carts and helping themselves to items on the shelves—started by Piggly Wiggly in 1928. Now, 60 years later, retailers are bringing service back."

> ***"One of the ways [grocers] are trying to make shopping more exciting and fun is by upgrading stores."***
>
> **Larry Schaeffer**
> **"Supermarket Insights"**

A parallel push toward the high end is coming from food manufacturers, many of whom are introducing upscale line extensions and entering the prepared foods arena with fresh, premium products.

"This business is consumer driven," says Mr. Schaeffer. "Grocery marketers don't put products in stores hoping consumers will buy them. They make products available because consumers have asked for them. Most research has shown that the purchase of specialty, gourmet products isn't done just by the affluent. People like to eat well."

Upgraded and upscaled operations are one of the grocery industry's major niches today, adds Mr. Schaeffer. He says it's likely the trend will continue.

"Like it or not, most shoppers find the shopping experience boring. Many retailers are realizing that price alone isn't enough to be successful. You have to have a lot more. One of the ways they're trying to make shopping more exciting and fun is by upgrading stores, providing services and catering to the community.

He streases that as supermarkets add services, their operating costs rise. Labor, grocery retailers' largest operating expense—62.8%, according to a 1984-85 Cornell University study—becomes even more intensive with additional services. Mr. Schaeffer says the challenge, which most upscale retailers are successfully meeting, is to balance the added labor costs against the returns.

Such extras, however, are designed to broaden the customer base, keep shoppers in the store for a longer time period, and get them to spend more money.

"It's all part of the fine-tuning of grocery retailing," he says.

The only marketing magazine for today's grocery buyer.

With 81% of consumer purchase decisions being made in the store, the battle in the aisles for consumer brand loyalty is causing brand-to-brand combat. Operator headquarter executives, headquarters buyers/merchandisers, members of headquarters buying committees, store managers and store owners must be kept tuned in to the evolutionary marketing changes and trends happening on a national scale and those evolutionary marketing changes and happening in the regional marketing trading areas they operate; based on population shifts, regional preferences and local idiosyncrasies of taste.

Grocery Marketing, the national marketing magazine for today's grocery professionals, with reach to more than 65,000 key executives/buyers at today's supermarket headquarters, store level and wholesale headquarters; the men and women who decide which grocery products get in, stay in or get left out of the stores, are tuned in to the marketing editorial environment of the only grocery industry magazine devoted to marketing with exclusive benefits:

- An exclusive network of experienced national food marketing editorial writers.
- Marty Friedman's exclusive New Products column, plus the industry's only New Product Update section with reader service reply numbers.
- Exclusive High Quality Reader Response Sales Leads for trade ads.
- Buying Patterns Studies for buyers, analyzing what factors they rate most important when selecting new products.

In a fragmented market, grocers cover the niches

By Cynthia Valentino

Ask any tracker of consumer buying patterns and he'll tell you: There's no longer a creature called "the typical consumer." The buying public has become segmented, splintering into various groups and subgroups, each with its own needs and preferences.

In response, many large supermarket chains, as well as some small ones, operate a variety of formats ranging from price-driven warehouse stores to upscale specialty stores.

"Existing formats weren't accomplishing retailers' sales objectives," says Willard Bishop, head of the Barrington, Ill.-based food-industry consultancy bearing his name. Further, he says, "The industry interpreted that problem in view of the fragmentation of the marketplace. Retailers recognized the need to differentiate themselves from other stores in their trading area." By shifting up or down, many supermarkets are now specialized, rather than being "just plain vanilla," he says.

Cynthia Valentino, a Westwood, N.J.-based free-lance writer, is a former special sections editor for Supermarket News.

The "upscale" concept—whether it is applied to a large, lavish superstore or a small specialty store—has become increasingly popular with retailers looking for a new niche. In fact, several companies, notably Kings Super Markets, West Caldwell, N.J., and Byerly's, Edina, Minn., have had solely upscale stores for years.

> ***"At this time, [Plano, Texas] is overstored, so we knew when we opened, we'd have to offer something different."***
>
> **Jack Evans Jr.**
> **Tom Thumb-Page stores**

Such units also are growing in popularity with conventional-store chains. Companies that have launched upscale stores within the past decade or so include A&P, Bruno's Inc., The Cullum Cos., Giant Food, Grand Union, Vons Grocery and Safeway Stores. These companies also operate conventional supermarkets or superstores; many have warehouse or superwarehouse operations as well.

The reasons for the trend toward upscaling are numerous. But one important factor is the high profit margin carried by prepared, specialty and gourmet foods, which helps increase overall store profitability while boosting store sales and sales per transaction.

A&P's Futurestores, one of the company's two upscale banners, helped boost overall profits 20% to 50%, according to analysts. William Vitulli, Montvale, N.J.-based A&P's VP-government and community relations, says the company's average per-store sales have gone up significantly in the past few years, and overall sales volume increased 18.4% in the fiscal year ending Feb. 28, 1987, compared with the previous year.

Both the Futurestores, with their dramatic black-and-white decor, and the upscale Food Emporiums acquired through A&P's 1986 purchase of the New York-based Shopwell chain, emphasize perishables and specialty products, and boast numerous service departments.

The 27 smaller Food Emporiums are a more viable format for urban locations where rents are high and space is at a premium. A&P now operates 20 Futurestores in suburban locations throughout its trading area, and will open 20 more this year, according to Mr. Vitulli.

Multi-format operators take varying approaches in advertising. A&P, for instance, uses one ad to cover three different formats—A&P conventional stores, Futurestores and Sav-A-Centers. (Advertising for A&P's Food Emporium is handled separately.)

According to Anthony Gasparro, VP-advertising for A&P, using this strategy was a "difficult decision to make, but you can only do so much because of costs." He says that general or informative ads, such as newspaper ads, which represent about 60% of the budget, cover all three formats. A&P's institutional TV advertising, using the theme introduced in May 1986, "We've built a proud, new feeling at A&P," also covers the three formats by including interior scenes of each type of store. Individual formats occasionally are given supplementary coverage via direct mail in their immediate trading areas, Mr. Gasparro says.

Birmingham, Ala.-based Bruno's operates 10 upscale combination stores called Bruno's Food and Pharmacy. Four were built from scratch; six were conversions of stores acquired from Boise-based Albertson's when that chain left Alabama in 1985. Filling about 54,000 sq. ft. each, these stores are the largest in Bruno's roster.

Despite their upscale slant, Bruno's stores are "competitively priced on regular items," says Beth Dunnaway, director-consumer affairs. Bruno's sometimes incorporates features of one format into another if the location calls for it.

When scouting for new spots, the company's store development department determines which format would work best. "A real estate coordinator searches out potential sites, then

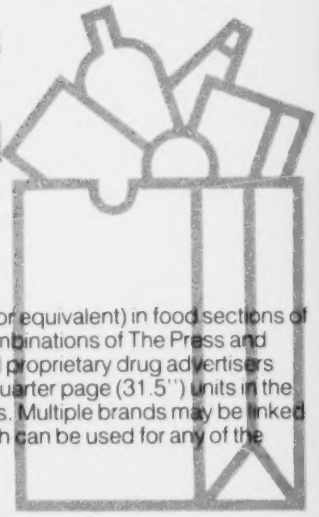
Package goods advertisers can earn retail rate parity in Pittsburgh



With each page of space (or equivalent) in food sections of the Sunday Press or daily combinations of The Press and Post-Gazette, food, HBA and proprietary drug advertisers can earn a bonus of two (2) quarter page (31.5") units in the daily combination food pages. Multiple brands may be linked to earn bonus space — which can be used for any of the advertiser's brands.

Store upgrade boosts sales by 72%

By W. Franklyn Joseph

Oprah Winfrey hates grocery stores, so the TV host confessed on her nationally syndicated talk show recently.

Her disdain was fully realized when, on an unspecified occasion, she experienced an I-can't-take-it-anymore-or-I'll-scream feeling at a supermarket checkout counter, and promptly proceeded to abandon a shopping cart filled with groceries.

Undoubtedly, some supermarket environments can drive shoppers senseless. But Bill Michas contends his Super Foodtown in Cedar Knolls, N.J., isn't one of them.

"People don't rush to get out," says Mr. Michas, the owner-president. "They like it here." The recently upgraded store's average sale per transaction is $18, $1.67 more than the industry's 1985 national average, according to the Washington-based Food Marketing Institute.

To entice his clientele, Mr. Michas spent $1.7 million on a remodeling project completed last June. Market research predicted a store upgrade would boost sales by 25%. The findings confirmed his perception that the Morris County suburb, whose residents have an average household income of $46,000-plus, would welcome the change.

Because 22% growth was his break-even point, Mr. Michas, not unlike other supermarket owners who rely on increasing volume to compensate for the industry's low margins, went ahead. The result was astounding: Instead of the projected 25% sales increase on the store's previous average weekly take of $185,000, Super Foodtown rings up a whopping $325,000-plus weekly.

"On average, sales are up by about 72%," says Mr. Michas. The return also betters by more than 50% the national, weekly gross average take of $206,543 in 1985, the most recent figures available from FMI.

Mr. Michas' phenomenal gains don't reflect the industry standard. "Generally, you anticipate a remodel, without expansion, will increase sales about 10%," says Barbara Barker, president and co-owner of Off The Wall, the Sellersville, Pa.-based retail interior-design company that worked on the Foodtown project. Ms. Barker says a 25%-to-30% sales increase typically is reached in cases where overall expansion occurs as a result of remodeling.

What couldn't be measured is the contribution word of mouth played in increasing customers. Mr. Michas also surmises that the seven-mile distance between his store and the nearest competitor, as well as the fact that Super Foodtown is located in a shopping mall, plays a part in the store's hefty sales increase.

"The frequency of major remodelings is going up," says Tim Hammonds, senior VP at FMI. "Customer lifestyles and demographics are changing. In order for supermarket owners to keep up with their customer base and the competition, they have to bring new services and a new look into the store more often than they would have had to 10 or 15 years ago," Mr. Hammonds says.

By reorganizing existing space, the store's selling area was increased by 1,500 square feet to 19,500 square feet, says Mr. Michas. Now, its average weekly sales per square foot are $16.66, compared with $10.28 before the upgrade and with an industry average of $8.43, according to FMI.

Foodtown's customers are greeted by the produce section, including a salad bar, followed by the service seafood department—offering up to 65 varieties of fresh fish—and service meat department. The new produce section, complete with mirrored ceilings and automatic misting devices to keep perishables fresh, was given 20% more space and returns $32,500 weekly, about "40% more than pre-upgrade sales," Mr. Michas says.

Dropped ceilings, muted lighting and customized wood display cases add to the store's unconventional ambiance. Another novel feature is cocktail jazz, piped through the store daily as a pianist entertains lunch patrons in the on-site restaurant.

The store's improvements garnered it the right to use "Super" in front of the Foodtown name. Mr. Michas' store is part of a Edison-N.J.-based, 135-member cooperative that his family bought into during the 1950s.

Mr. Michas says consumers first were suspicious that price increases would follow the renovation. However, he has won the doubters over by keeping his promise to not raise prices.

In fact, he says, "it's even easier to keep my word now because we've experienced such a dramatic volume increase, and volume overcomes everything."

Mr. Michas' staff increased significantly after the upgrade as well—71%. He relies on his 120 employees, who are knowledgeable about every area of the store, to perform customer-relations duties, with charm.

"More supermarket owners need to actively court consumers," says Off The Wall's Ms. Barker. They can realize higher profit margins, she says, by providing the additional services.

W. Franklyn Joseph is a freelance writer based in New York.

Niches

(Continued from Page S-8)

an analyst goes to the area and does research. Among other things, he plots out boundaries such as rivers and railroad tracks, which people are reluctant to cross, to see how broad a draw the store will have," she says. Extensive demographic studies also are done, and the final decision is based on "the culmination of a lot of data," says Ms. Dunnaway.

Cullum Cos., parent of Tom Thumb Super Markets and Page Drug Stores, has operated successful Tom Thumb-Page Food & Drug Centers stores for years. In May 1986, the company opened its first upscale Tom Thumb-Page unit in the Dallas suburb of Plano, Texas.

Jack Evans, Jr., president of Tom Thumb-Page stores, describes Plano as a still-developing affluent area. "At this time, the area is overstored, so we knew when we opened up there, we'd have to offer something different." Cullum is no stranger to the upscale concept: The company also operates a Simon David specialty store in Inwood, Texas, and plans to open two more.

The Plano store already had been half-built when Cullum decided to make it more upscale, Mr. Evans explains, and "therefore we had to make some compromises. The store is 55,000 square feet—about the same as the other Tom Thumb-Page stores. So to make room for the expanded service departments and gourmet products, we had to cut back on grocery and general merchandise."

Those compromises may have advantages. Bishop Allen, the VP and general manager of Simon David who also is responsible for the Plano store, says, "The fact that we were limited in space made us very selective in

ON THE GO!

Supermarkets nosh on gourmet foods to go

By Laurie Werner

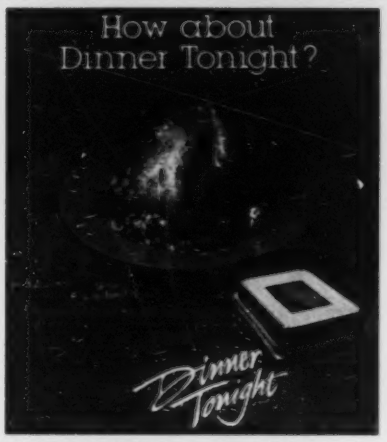
The next time you hit the supermarket deli counter you may notice a big difference. It might be larger, have dozens of freshly made, luscious-looking salads and entrees, and behind it all, in white jacket and toque, a Culinary Institute of America-trained chef.

What's happening here? Supermarket gourmet foods to go are clearly on the rise. One reason, according to industry consultant Michael Wahl, chairman of the Howard/Marlboro Group, a New York-based sales promotion company, is the competitive edge they give stores that offer them.

Laurie Werner is a New York-based free-lance writer.

"If you walk into the average supermarket, you don't know where you are," he explains. "These places all look the same. But the prepared foods department gives a store a chance to enhance its image, to create a strong, individual identity."

The primary reason grocery retailers are entering the gourmet takeout segment, however, is to capture a greater share of the food-service dollar. According to "The Lempert Report," a Belleville, N.J.-based industry newsletter, eating and drinking establishments posted a 7.9% sales increase in 1986, compared with food stores' 4.2% rise.



Finast uses FSIs to promote Dinner Tonight, its alternative to fast food.

Prepared foods, extending considerably beyond traditional deli offerings, have been termed the industry's "new frontier." Food fadism has been unfolding in America for years, as has the growing desire for convenience fueled by working women with neither the time nor desire to cook. The more recent gourmet offerings are yet another weapon in the battle for takeout business.

According to a National Restaurant Association study of 1,000 consumers, 56% bought takeout food more than twice a week; 45% relied on takeout for dinner more than twice a month. Meanwhile, a 1986 Food Marketing Institute study reveals that only 10% of consumers who regularly bought takeout food did so from the carryout section of supermarkets.

Fast-food stores and restaurants' carryout sections accounted for 81% of the business, spurring supermarkets to react. But they are wielding their new weapon in different ways.

Cleveland-based First National Supermarkets' East Coast Finast stores, for example, are

(Continued on Page S-14)

Niches

(Continued from Page S-10)

general merchandise: we pared the selection down to the best, fastest-moving items. General merchandise does very well."

Cullum officials are pleased with the sales performance of the Plano Tom Thumb-Page store thus far. "In terms of volume," Mr. Evans says, "we're doing better than we anticipated we'd be doing in our first year."

Mr. Allen adds that the Plano store is in the top 10 of the company's stores in total sales. He expects 1988 sales to be around $25 million.

"Upscale stores can work very well in a variety of areas," he says. "Maybe not in strictly low or low-to-middle income areas, but in mixed areas. This type of store appeals to a broad base of the population."

He notes, however, that large, upscale superstores must be situated in areas with large populations. They also must draw a broad customer base from a wide geographic radius to ensure they'll generate the necessary sales volume to support them.

"Volume is key in our industry," he says. "If you didn't have volume, you'd get murdered on labor costs." The supermarket business becomes even more labor intensive when a store has many service departments.

"As volume goes up," he continues, "the differential in labor between this type of store and a more conventional store narrows, and you're still achieving your gross profit."

The two new Simon David stores will open in Austin by December 1987 and in north Dallas by March 1988 at 56,000 and 78,000 square feet, respectively, significantly larger than the existing Simon David at 33,000 square feet.

Simon David does not advertise, according to Mr. Allen, who says the store relies on word of mouth to attract customers. However, he notes that the store honors "Tom Thumb ads on items we carry. The advertised items are identified in-store through shelf signs."

The Simon David store should do around $28 million in 1987 sales, surpassing the company's original expectations, says Mr. Allen, who hopes the 78,000-square-foot store planned for Dallas will top $35 million in annual volume.

El Monte, Calif.-based Vons Grocery, which introduced its version of the upscale superstore, Pavilions, in October 1985, now operates five such stores ranging from 50,000 to 75,000 square feet.

The stores are in demographically mixed areas, but all with a large population base to ensure good customer draw, according to a Vons spokeswoman.

Originally, the stores were called Vons Pavilions. "We thought using the Vons name was a good way of getting recognition initially," she explains. "Now, we feel Pavilions has grown strong enough to stand on its own."

Vons also has another upscale format called Pantry, acquired from Cullum Cos. in June 1986. Sized about 20,000 square feet, these 10 stores are considerably smaller than the Pavilions.

Vons has separate business units for each of its formats, including it's new Tianguis store

Gourmet foods to go

(Continued from Page S-12)
emphasizing convenience with Dinner Tonight: dinners assembled and packaged in microwaveable containers.

Beginning last November, Dinner Tonight has featured such specials as stuffed cornish hen, beef tenderloin and quartered roast duck—foods that are gourmet but familiar, according to Public Relations Manager Gail Shelton—with two side dishes like rice pilaf or ratatouille for approximately $6.

Finast promotes Dinner Tonight in newspaper inserts featuring $1-off coupons and in direct-mail circulars. Since its introduction, the product has shown a slow, continual increase, says Ms. Shelton, growing 30% in six months. She adds that the test has been deemed a success, and Finast plans to move the concept into other markets.

Kroger Co.'s Buckhead-area store in Atlanta features sushi. Kroger hired two local restaurant sushi chefs, set up a 64-square-foot, sit-down sushi bar and began to offer what Bob DeVoe, meat merchandising representative, calls a competitive product at competitive prices. Mr. DeVoe says Kroger's sushi prices average around 50¢ less than in area restaurants. He also notes that the product has a higher profit margin than other prepared foods. Eight pieces of assorted sushi-to-go retail for $4.99, and 10 prepackaged assortments are available in the takeout case 24 hours a day.

Customers obviously have responded: 70% to 75% of the sushi bar's business is takeout, and the case has been mobbed since the department opened in November, reports Mr. DeVoe. He estimates that Kroger's sushi business has witnessed a 20% to 25% growth rate since its inception last November. The store is now mailing 13,000 direct-mail pieces to explain and promote its sushi; it routinely offers in-store sampling. Cincinnati-based Kroger also is considering sushi for other Atlanta stores and opened a sushi bar in one Cincinnati store in March. "It could expand into other markets as well," says Mr. DeVoe.

Source: Food Marketing Institute

Other supermarkets are going after their share in a more spiashy way—hiring Culinary Institute graduates as chefs, building huge, in-store kitchens and turning prepared-food departments into extravaganzas set in the middle of a storewide gourmet bazaar.

A prototype is Kings Super Markets' Short Hills, N.J., store. Kings Kitchen —surrounded by shelves filled with 13,000 specialty items—is situated near the store's deluxe meat, seafood, cheese, bakery and produce departments. Its 60-foot-long counter generally holds 60 to 70 offerings. Items like rosemary roasted potatoes, tortellini pesto and honey-glazed roast duck are standard fare.

Adding to the drama is the partly exposed kitchen. "It's more exciting for shoppers to see their food being prepared," explains Rob Bildner, VP and director of Kings Super Markets, West Caldwell, N.J. Kings promotes Kings Kitchen with in-store sampling, brochures and weekly run-of-press newspaper ads, handled in-house.

As might be expected, supermarket gourmet-to-go departments, or even the more elaborate prepared foods departments, don't open in neighborhoods with 18% unemployment, Mr. Wahl points out. Store owners prefer the kind of affluent, professional neighborhood that Kroger chose for its sushi experiment and chains usually choose for their larger stores, in which these departments usually are located.

The reason: Big stores such as Kings' 40,000-square-foot Short Hills store, a new upscale 55,000-square-foot Tom Thumb in Plano, Texas and the seven Finast supercenters—between 35,000 and 50,000 square feet—in New York and Connecticut are designed as one-stop shopping marts for busy, often freer-spending professionals.

The only problem with this logic is that these consumers aren't the only ones buying prepared food, as consultants have recently observed. "This trend is

WARM CAKE

"She makes her rounds with baskets and trays as a simple extension of her natural hospitality. In good weather but especially in bad, splashing forth in raincoat and tennis shoes, carrying a warm cake straight from her oven, she sympathizes with you or celebrates with you by sharing her table with you."

—*Eudora Welty, from a preface to the* SOUTHERN HOSPITALITY COOKBOOK

More women in The South bake their own breads, cook their own foods, and exchange their own recipes than in any other section of the country. And every year, another three-quarter million of them move down South to join them. They come, grocery lists and recipes in hand, to add their food allowances to the $98.5 billion in retail food sales that represents 34% of the money spent on groceries in the U.S. of A. (And since one never has enough cookbooks, Southern Living keeps the supply growing with each passing year!)

Southern Living®

Put your money where The South is.

AKRON BAG LADIES

They're everywhere. Toting bags. Pushing shopping carts filled to the brim...with groceries.

In the four county area surrounding Akron, shoppers spent nearly $1.4 billion on food purchases. That's no small potatoes. The problem is, these shoppers may not be buying your brand if you're not advertising in their brand of newspaper – The Beacon Journal.

Considering 30% of the Cleveland ADI is in the Akron Newspaper Designated Market, you may be missing a lot of coupon clippers who shop at the large regional chains as well as locally owned and operated supermarkets. With daily readership totalling 312,000, The Beacon Journal provides a large audience hungry for your products.

Put Akron on your media shopping list.
Advertise in the city's appetizing newspaper.

spreading and changing: from high income [groups] to average. No one wants to cook anymore," says Richard Winger, manager of Boston Consulting Group, New York.

Whether the trend continues to flourish depends on several factors, primarily whether stores can keep costs under control. According to Mr. Bildner, "It's very expensive to start up something like this—to recruit, train, produce the foods, promote it. Some stores just won't be able to do it."

While Mr. Bildner won't divulge Kings Kitchen's start-up costs or its Culinary Institute-trained chefs' salaries, the institute reports that graduates' starting salaries range from $16,000 for kitchen assistants to $28,000 for an executive chef.

Because of high start-up costs, store executives have to take a hard look at the type of operations they install. At Someplace Special, the Landover, Md.-based Giant Foods' gourmet store in McLean, Va., they do cost-accounting instantly. The in-store computer and on-premise cost accountant figure out a proposed dish's pricing and profitability. If it's profitable and sells, the computer then prints out the recipe and sends it to Giant's other 17 area stores with kitchens.

At the Tom Thumb gourmet-oriented store in Plano, on the other hand, limitations were set before the department opened. Hot entrees were ruled out; chicken, pasta, and potato salads were emphasized instead. The kitchen staff didn't think it could adequately control the quality of hot entrees, says store Manager Burton Hubbard. "If it's a matter of throwing out $13.95-a-pound Swedish meatballs because they dried out in the case, we'd rather not even try it," he says.

Some supermarkets, in view of the high costs of food preparation, have chosen to steer clear. Finast, for example, decided to go to an established food company, Culinary Foods, Chicago, to produce Dinner Tonight instead of staffing a kitchen and producing it in-house.

> ***"If you walk into the average supermarket, you don't know where you are."***
>
> **Michael Wahl**
> **Howard/Marlboro Group**

"We wanted to offer our customers an alternative," explains Ms. Shelton. "But we're a supermarket; we didn't want to become a restaurant."

Gourmet shops that specialize in prepared foods don't seem to be particularly worried about competition posed by supermarkets. As Deirdre Rockmaker, assistant director-PR for the New York-based gourmet emporium, Balducci's, sees it: "I doubt that a supermarket can come close to the quality."

But even so, supermarkets are determined to fight for their share. "When you ask supermarket owners what changes they've planned for the future; they all mention expanding the prepared food-deli department," Mr. Winger says.

"I think this trend will definitely continue to grow."

Niches

(Continued from Page S-12)

aimed at the hispanic market. Each is run differently in terms of merchandising and operations, says Robert Kelly, group VP-Pavilions and Pantry. Advertising also is handled separately.

"We have a different story to tell with each format," he says, adding that the Pavilions ads highlight specialty items as well as everyday commodities.

There are many pluses to upscale formats, but also potential pitfalls. Consultant Mr. Bishop notes that "when the format is congruent with consumer demographics, it'll work. But a retailer has to be truly selective."

Mr. Evans of Cullum Cos. also issues a word of caution. "This industry is notorious for copying each other without doing enough research," he says. "For instance, when generic products became so popular 10 or 12 years ago, everybody had to get into it, and it wasn't the best thing for everyone. Now, it's cycled out. Everyone can build an upscale store, but running it well is something else."

Also, many retailers originally upscaled to differentiate themselves in a highly competitive industry. However, Mr. Bishop notes that "If everybody is going in that direction, it won't be long before there's overstoring in that format."

For the time being, however, the concept is accomplishing a lot of things for a lot of retailers. It's helping them broaden their appeal among different consumer segments while boosting store volume and profits.

Supermarket chains see value in nutritional shelf labeling

By Janice Steinberg

Lima Beans. High Fiber. Low Fat/Cholesterol." "Sugar Free Dr Pepper. Calorie Controlled."

Shoppers throughout the country are finding more than just prices on brand-specific labels on supermarket shelves.

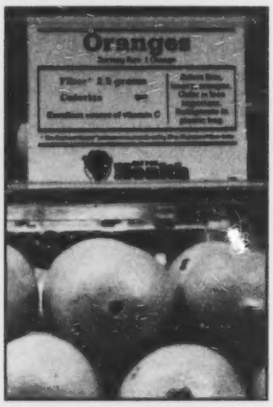
More than 20 chains, responding to consumers' increasing health consciousness, are putting nutritional information on shelf labels. The chains say nutritional shelf labeling is a valuable customer service that enhances their stores' image.

Seven of the 20 largest supermarket chains (based on U.S. supermarket sales, according to the Fairlawn, N.J.-based Food Institute's 1986 Food Retailing Review) are displaying nutritional shelf tags. They are A&P, First National Supermarkets, Giant Food, Grand Union Co., H.E. Butt Grocery Co., Lucky Stores and Vons Grocery Co.

Two others in the top 20 are testing labeling programs: Oakland, Calif.-based Safeway Stores is testing a pilot program in 10 northern California stores; North Quincy, Mass.-based Stop & Shop is testing in 15 stores.

Almost every labeling program includes foods low in calories, fat and sodium. Information about a product's nutritional content is gathered from manufacturers. More than 2,500 different items, including packaged goods, produce, dairy and bakery products, are labeled in some programs.

Janice Steinberg, a San Diego-based free-lance writer, is a frequent contributor to Special Report.



Giant Food is one of the supermarket chains using a labeling program providing information about a product's content.

The criteria for labeling generally match those established by the Food & Drug Administration. As defined in the food guide sold by Washington-based Giant Food in conjunction with its "Eat for Health" program:

- To qualify as being low calorie, an item must have 40 or fewer calories per serving and 0.4 or fewer calories per gram, or it must have at least ⅓ less calories than the food it replaces.
- A low-fat item must have 2 or fewer grams of fat per serving and less than 10% of dry weight derived from fat, or it must have at least 50% less fat than the product it replaces.
- A low-sodium item must have 140 or fewer milligrams of sodium per serving or contain 75% less sodium than the food it replaces.

Giant, with 140 stores in Washington, D.C., Virginia and Maryland, was one of the first companies to use nutritional shelf labeling, and its program has been the most carefully studied. From 1981 to 1983 Giant conducted a test, in conjunction with the FDA, comparing product movement in 10 Washington stores with shelf labeling to movement in 10 Baltimore stores without it.

"Giant's brand-specific labeling program did produce some shifts in buying behavior," says Raymond Schucker, FDA staff adviser. Mr. Schucker says that labeling made a difference when the label carried information most consumers hadn't known before. "For example, it wasn't generally known that tomato sauce and paste products are low in sodium. For those labeled that way, there was a significant shift in buying behavior. On the other hand, low-sodium crackers have been available for some time; that wasn't new information. Brand-specific flags for low-sodium crackers didn't seem to cause shifts."

The Giant/FDA program continued for two more years; it currently is being evaluated. "It appears that the effects were sustained for the next two years," Mr. Schucker says.

In March, Giant launched a new, two-year program, "Eat for Health," in conjunction with the National Cancer Institute. It includes shelf tags identifying foods as low in calories, low in fat/cholesterol, low in sodium, and/or high in fiber.

"Eat for Life" is in Giant's 105 Washington stores. Product movement in 20 stores will be compared with 20 demographically matched Baltimore stores that don't have the program.

Giant kicked off the program with a three-week advertising blitz that included 30-second TV spots, 60-second radio spots, and three full-page ads in the *Washington Post*, says Odonna Mathews, VP-consumer affairs.

"Eat for Life" is aimed at all nutrition-conscious consumers, rather than focusing on those who need special diets, she says.

Similarly, Sandy Bouzoukis, manager-media relations, Stop & Shop, says, "We're not just targeting people with special dietary concerns. It's for everyone who is health conscious."

The opposite approach is taken by Creative Data Services,

Europe's hypermarkets making waves here

By Claire Wilson

Despite lifestyle changes in Europe over the past two decades, there's a great deal about retailing in these parts that has been left behind.

Stores all over Germany close early during the week and at noon on Saturday, leaving working women little time for shopping. In Italy, the majority of shops still close for lunch. Some stores break for lunch in France as well, and evening retail hours are unknown, even in Paris.

For food purchases, many French consumers still set out daily—quaint little baskets in hand—for baguettes, cheese, fish, poultry and vegetables that they buy from neighborhood specialty shops or from outdoor market vendors.

In contrast to the baguette-and-beret mode, France also is the home of two of the most progressive grocery marketing innovations in decades: generic grocery products and hypermarkets—the massive, giant retailers that spawned them.

Claire Wilson is an Advertising Age correspondent based in Paris.

While generics may have run their course since they first appeared on France's shelves 10 years ago, the 25-year-old hypermarkets are considered the wave of the future. The high-volume, low-price retailing concept, which accounts for roughly 12% of France's total retail sales volume, also has made its way into the U.S. market and seems destined for a much longer life than generics.

Bigg's, owned by Cincinnati, Ohio-based HyperShoppes, a Franco-American partnership, opened in Cincinnati two years ago. The chain will add several new U.S. units over the next few years. Carrefour, France's leading hypermarket merchant headquartered in Evry, will open its first U.S. outlet in Philadelphia in October, with a second opening scheduled for Long Island, N.Y., in 1988.

While mixing general merchandise with low-profit grocery items is nothing new in the U.S., hypermarkets take the concept one step further. The key is convenience, with everything imaginable under one roof.

"We sell just about anything," says Marie-France Laisne, development director for the Carrefour chain, which has 64 units in France and more than 30 in Argentina, Brazil and Spain.

Didier Aubrac

Hypermarkets, such as this Carrefour store located in a Paris suburb, sell everything from fresh fish to general merchandise.

Hypermarkets sell everything from fresh shrimp to stereos, clothing, domestics and car repairs. Carrefour even has added insurance to its roster of services through a subsidiary, and is considering adding financial services as well. By offering such a wide product range, the company has pushed the average annual return per square foot to almost $500. Bigg's in Cincinnati is said to claim an annual return of $700 per square foot, compared with the U.S. supermarket industry's 1985 annual average of $438, according to the Washington-based Food Marketing Institute's most recent statistics.

To offer such variety for such a return, hypermarkets have to be spacious. Industry sources consider size the basic difference between hypermarkets and basic U.S. retail supermarkets, which have been increasing their assortment of non-food items as a tool to boost profits.

The average French Carrefour has 80,000 square feet of selling space, according to Ms. Laisne. Some have up to 250,000 square feet, which is why the stores, which first appeared in 1963, are outside urban areas and conspiciously absent from Paris.

"The price of real estate is just too high," explains Ms. Laisne. "It's also impossible to find a piece of land large enough to accommodate selling space and the requisite parking area."

Besides the merchandise assortment, which runs the gamut from low-priced and higher-priced private label stock to the branded leaders in all categories, one of the most striking elements of hypermarkets is the number of cashiers. During Sat-

Loss is gain

colnwood, Ill.-based promotion company specializing in supermarkets. For a $1,600-per-store fee, chains receive diet guidelines and shopping lists for customers, scales for weekly weigh-ins, and promotional materials.

Interested shoppers register at weigh-in centers, manned by store representatives and/or local health and fitness officials whose institutions co-sponsor the program. Each week, they receive a pamphlet that includes menus, recipes and a shopping list. The suggested foods often are marked by stickers of the diet's logo.

"It's always had a very positive effect on sales," says Mr. Schnitzer. Although many store officials are tight-lipped about exact figures, he says some have reported sales increases of 15% overall, 30% in produce. Naturally, he adds, stores also report dramatic declines in sales of snack foods, like cookies and potato chips. But the increases in produce sales, which have a higher margin than packaged

Don't let another year slip by doing business the same old way.

Let PLMA help you put things into perspective. Come to PLMA's 1987 STORE BRANDS SUPERSHOW and get a world's eye view of the *whole* private label market. See all the vendors you don't have time to see. See the *complete* lines of the vendors you do see. See *everything* that is available in private label today. urday's peak hours, there can be as many as 75 along the front of the store.

The average Frenchman who passes through a cashier's line spends roughly $34 per transaction, compared with the $15.50 he may spend at a French supermarket.

Such figures helped Carrefour amass net earnings of about $74 million in 1985, an increase of 21% over 1984. Further helping profitability is Carrefour's lean operation: A staff of 150 in the national headquarters oversees roughly 20,000 employees nationwide.

None of France's hypermarkets have manufacturing or packaging capabilities, according to Ms. Laisne. Their high volume, however, gives them all the advantages of having such capacities, with none of the costs. They have flexibility and muscle with their suppliers that allows them to develop such things as the signature, private-label programs for which Carrefour and chief competitor Euromarche have developed reputations.

Carrefour's stores are undergoing a trade-up effort, spawned by changes in consumers' attitudes. Such changes also encouraged Carrefour and Euromarche to start phasing out the generic products launched in 1976.

"Back then, the idea was to give the customer the lowest price for the best quality, and in 1976 people wanted conformity," recalls Ms. Laisne. "In 1986, they are more conscious of individuality in addition to being a bit more sophisticated in their tastes and better informed customers in general."

Carrefour's trade-up line—food products, liquor, domestics and clothing—with its spiffy new packaging and upscale look, eventually will replace the no-frills generics line on store shelves. Ms. Laisne is quick to point out that this doesn't necessarily mean prices will be higher. It's the consumer's awareness that is more developed, she says, not necessarily his pocketbook.

> ***"In 1986, [people are] a bit more sophisticated in their tastes."***
>
> **Marie-France Laisne**
> **Carrefour**

Just how well-developed the U.S. consumer's awareness of hypermarkets will be in the next few years remains to be seen. HyperShoppe's Bigg's, a joint venture between Euromarche, based in Athis Mons, a Paris suburb; Paris-based Lazard Freres; and Eden Praire, Minn.-based Super Valu Stores, suffered first-year operating losses of roughly $7 million, but has announced plans to go ahead with its second store in the Cincinnati area and another in Denver.

Carrefour, which will open a U.S. unit this year, already has a U.S. market presence as 18% owner of the Seattle, Wash.-based Costco Wholesale Corp., a chain of membership warehouses it purchased two years ago as an experiment in U.S. retailing.

A former Carrefour employee who helped launch the U.S. ventures is confident the timing is right to bring hypermarkets to the U.S. in an aggressive but well-planned way. "Everyone in the U.S. is talking about one-stop shopping; the trend is definitely toward larger-size supermarkets," he said in an earlier interview. "Now, we think [the trend] is strong enough for us to take a chance in a large market like the U.S." ■

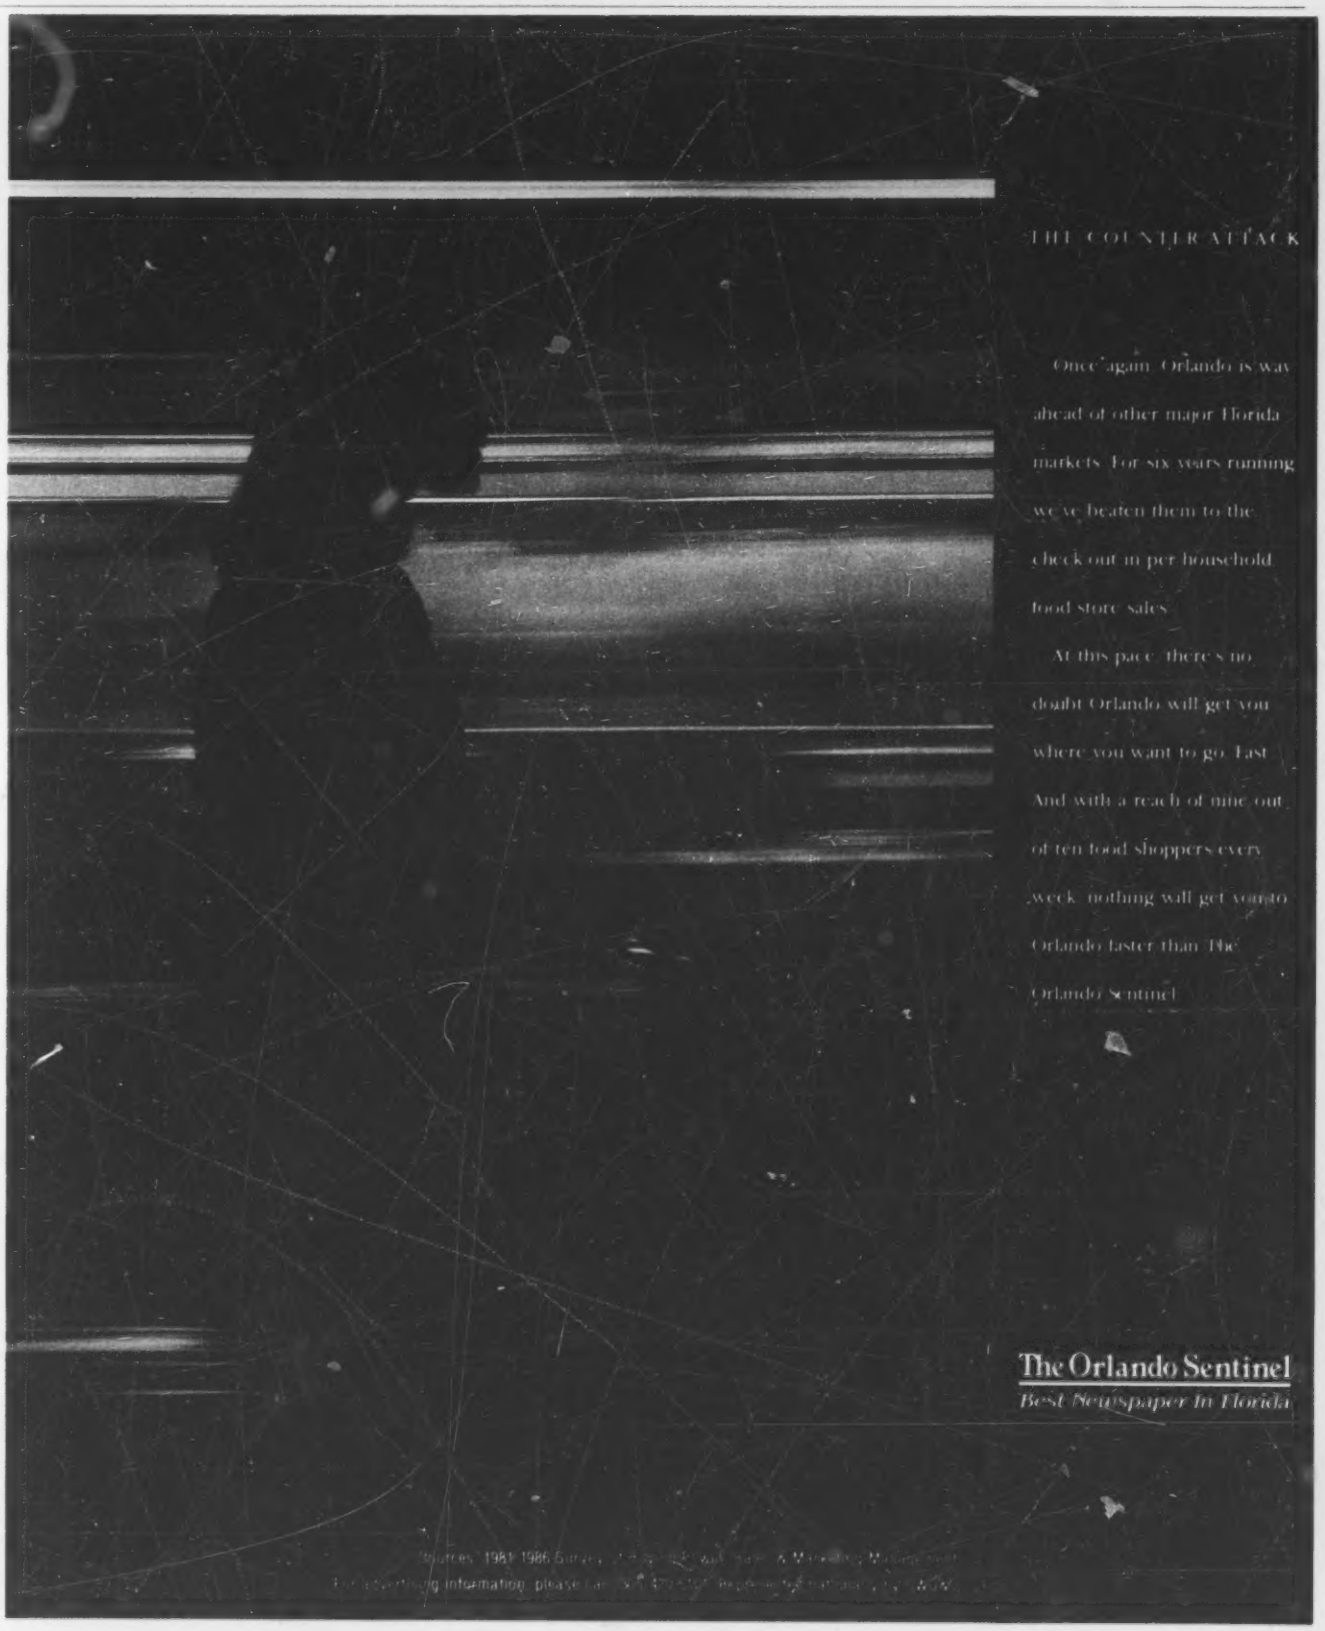
goods, more than compensates for the loss.

Publix Super Markets, which ran the promotion in almost 200 of its northern and central Florida stores last summer, saw "very good increases" in sales of produce, fresh seafood, lean meats and poultry, says Clayton Hollis, director of public affairs for the Lakeland, Fla.-based chain.

In the 34 Waldbaum's Food-Mart stores in Connecticut and western Massachusetts where the diet was offered last spring, sales of some items increased roughly 25%, says Daniel Lescoe, VP-sales and marketing.

Detroit's Great Scott Supermarkets had trouble keeping recommended foods on shelves. "We were scrambling for quite a few items," says Paul Coleman, advertising manager for Great Scott, which ran the program in 22 supermarkets last summer.

Supermarket officials also say the plan has gained new customers. "After getting people into the store for the diet," says Mr. Hollis, "we were able to show them that they needed to be shopping at a Publix, and they have continued to do so." ■



THE COUNTERATTACK
Once again, Orlando is way ahead of other major Florida markets. For six years running we've beaten them to the check out in per household food store sales.
At this pace, there's no doubt Orlando will get you where you want to go. Fast. And with a reach of nine out of ten food shoppers every week, nothing will get you to Orlando faster than The Orlando Sentinel.

Redesign puts old packages in a new light

By Phyllis Furman

Marketers seeking a classier image for their products are turning to package design as an economical but powerful means of communicating value.

In general, package design is becoming increasingly significant, as evidenced by the recent acquisition of the San Francisco-based design company Sidjakov Berman Gomez & Partners by London-based WPP Group, Britain's second largest design company.

Phyllis Furman is an Advertising Age correspondent covering New York and New Jersey.

WPP owner Martin Sorrell says the purchase is an effort to gain a bigger slice of the $9.5 billion U.S. market in below-the-line marketing services, of which package design is a major element. According to Mr. Sorrell, the increasing number of working women, the declining influence of TV as an ad medium and the proliferation of new products all have contributed to package design's increased importance.

"Marketers have finally woke up to the fact that people want to be sold, and well-designed packages stacked on a supermarket shelf make a beautiful billboard," says Phil Lempert, president of Belleville, N.J.-based The Lempert Co., an ad agency and publisher of "The Lempert Report," a food-marketing newsletter.

"Consumers are spending more and they want more for their money," claims Fred Mittleman, founder and creative director of New York-based Mittleman/Robinson Design Associates. "Because of the high cost of media, marketers are focusing on the element that is most controllable and least expensive: packaging."

The frequency of package redesigns has increased over the last few years. "Twenty years ago, a package would change about every seven years. Now we're seeing changes every four years," says Herbert Meyers, managing partner of the New York-based design company Gerstman & Meyers.

Traditionally, refining a package's image has meant introducing design elements that signify quality. The use of fine detail such as ruled lines, borders and crests, finely patterned backgrounds, and colors such as black, gold and burgundy contribute to a product's premium image.

But most package designers reject the constraints of what is typically considered upscale and define the term in its broadest sense: Upgrading an existing brand means giving it a fresh look that communicates value.

Rarely are package designers asked to completely transform the look of a firmly entrenched brand. More often, they're asked to work on a product whose packaging doesn't reflect the premium position the product already occupies.

"We frequently find that brand image is better than the image projected by the package," says Gerron Vartan, senior VP, S&O Consultants, a design company based in San Francisco. "Our goal is to bring the package up."

S&O was asked to do just that in 1985 for Casino, Kraft's premium line of cheeses. At the time, Casino's position was being eroded at both ends by European gourmet imports and mass-market cheeses, whose packaging was virtually indistinguishable from Casino's dowdy country look.

Reviving Casino's image and differentiating it from the general Kraft milieu involved introducing packaging elements that weren't strictly upscale. Casino's original country look was rendered in pale, nondescript colors and featured an illustrated pitcher of milk. A large Kraft logo appearing at the top of the package diminished the scripted Casino name.

Streamlining the package was key to establishing Casino's premium image. The most signifi-

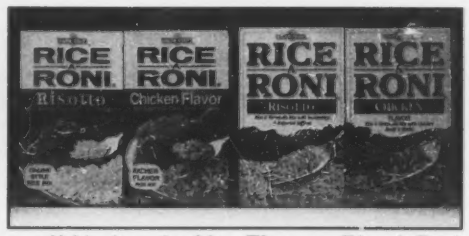
cant feature added was a series of three strips, with different colors signifying different Casino flavors.

The top strip features the Casino logo printed in white letters. The Kraft logo now appearing at the bottom of the package is smaller, the pitcher of milk gone.

Sidjakov Berman & Gomez was offered a similiar task last year when it was asked to upgrade packaging for Rice-A-Roni, a premium side dish from Quaker Oats slated for a national relaunch this month. The company was charged with revitalizing Rice-A-Roni's strong image without disenfranchising its loyal consumer base.

Achieving this goal meant introducing subtle design elements to signify that Rice-A-Roni is a value-added product. Photography played a large role in the redesign. The new product photograph richly details the food, and unlike in the old shot, an elegant silver fork appears in the foreground.

Gold outlines the package's lettering, and a blue band with white lettering identifying individual flavors appears in the center. Quaker Oats reports that in focus groups, the new Rice-A-Roni logo was preferred by consumers by a 25-to-2 margin over the old one.



Redesigned packaging for Breyers' ice cream plays off black and white. The new Rice-A-Roni package uses larger type and more artful photography for a cleaner look. (old: left; new: right.)

> ***"When you design a package that's too upscale, you might be designing yourself into a corner."***
>
> **Flavio Gomez, Sidjakov, Berman & Gomez**

A more blatant example of an upscale redesign is Gerstman & Meyers' award-winning work (1986 Clio for U.S. Packaging Design-Best Dairy Products Category) on Breyers' ice cream, whose packaging literally went from white to black. Breyers, originally a premium regional brand distributed in the East, was redesigned for national distribution in late 1985. Like Casino, Breyers, also a Kraft product, was being challenged from both ends of the market. The influx of both superpremium and store brands had Breyers lost in the freezer section.

Gerstman & Meyers chose a strategy that would not only differentiate Breyers, but also give the product a premium look. Black—a first in this category, according to G&M—was used as a background to highlight the color and texture of the ice cream featured in the package's photograph.

"Black makes the ice cream the hero of the package," says Dick Gerstman, G&M managing partner. The new, streamlined package also features an elegant white logo. The old package relied on the signature Breyer leaf motif, which cluttered the package, says Mr. Gerstman.

While she won't divulge sales figures, Kathy Rhyne, associate product manager, says "The product has been well accepted, and the brand is doing better."

When Gerstman & Meyers introduced the package in the freezer section, black was just beginning to typify upscale—a sign of the problems such packaging causes when it is employed indiscriminately.

"Everything is beginning to look alike, and products are losing character," says Mr. Mittleman, who also cautions against formula upscaling. "Black and gold have to be used the right way, otherwise the package will confuse consumers."

Flavio Gomez, a principal at Sidjakov, Berman & Gomez, warns that upscale design can sometimes be too extreme. "When you design a package that's too upscale, you might be designing yourself into a corner, not leaving any room for an even more premium brand that a marketer might be planning to add to the line," Mr. Gomez says.

The problem of upscale overkill becomes even more apparent with the advent of new design innovations such as holograms—three-dimensional pictures with which package designers are now experimenting.

"These innovations can undermine the upscale trend," says John Lister, exec VP of New York-based design company Lister Butler. "Prestige equals tradition, not high-tech," he says. "If a designer indulges in this kind of overkill, he could come up with something very gauche." -VS

Quick! She's about to make a decision.

What do you want to tell her about your product?

You know it's just a short time until she's at the checkout. You know over 80% of all purchase decisions are made in the store. Does she know about your new improved formula? Will she remember your $200,000 TV commercial?

It's more likely she will if you use SHELFVISION. It's in-store advertising that makes your other advertising work. It has a proven track record of building sales by as much as + 24% over control stores.

You preempt your competitors by getting complete category exclusivity for the periods you select in over 6,000 supermarkets. We'll even show you how to get your message up in more than 12,000 stores.

Use our category hotline, now!

Source: Media Records

This data has been provided by Media Records for exclusive publication in Advertising Age and may not be reprinted or published in any form without explicit permission from Media Records. All newspapers represented are subscribers to Media Records. For those newspapers that subscribe to Media Records National Advertising Reporting Service. Total Advertising data shown has been supplied by the publisher to Media Records and included in this compilation. All publisher supplied figures are converted to MRCS SAU inches by Media Records. These newspapers are indicated with an asterisk (*).

REPORTING METHODOLOGY

Media Records continues to measure in linage but due to the introduction of the SAU 6 column format Media Records has designed and developed a methodology with the approval of our subscribers, the INAME Measurements Committee, The ANPA, NAB Working Committee, The AAAA Newspaper Committee, and other industry groups.

The approved methodology is titled The Media Records Conversion System (MRCS) and is based upon the printed page area of each product of the newspaper and is a five step approach as follows:

1. Measure Printed Page
   Width and Depth in Inches
2. Determine Square Inches of Page
   Multiply Width by Depth Inches
3. Determine the Number of SAU Inches of Page
   Divide the Square Inches by 2.0625 (SAU Inches)
4. Measure the Total Lines of the Page
   Multiply Column Depth Agate Lines by the Number of Columns on the Page
5. Determine the Factor for Converting Measured Lines to Reported SAU Inches
   Divide the Total Lines of Page by the Number of MRCS SAU Inches of the Page

SAU* is the registered trademark of the American Newspaper Publishers Association

CONSUMER WATCH

Urge to spend satisifed

Leftover cash causes splurge; rising rates may end the surge

By LEO J. SHAPIRO and DWIGHT BOHMBACH

Seven in 10 U.S. households reported during the first quarter that they were spending without restraint for consumables—as high a percent as our Advertising Age National Consumer Poll has found in two years.

At the same time, consumers' plans to buy big-ticket items, from houses to air travel, also warmed up.

Higher percentages than in the previous two or more quarters were planning purchases of housing, furniture, major appliances, carpeting, color TVs, air travel and overnight hotel/motel stays.

Encouraged by mortgage rates, which were down around 9% in March, 15% of the households thought they might buy new housing in the coming year.

Then came news of the rising prime rate, and mortgage rates have jumped upward. Now, what looked like the makings of a rally in housing and other major goods buying could wilt again.

It's not that consumers are in bad financial shape. During the first quarter, nearly eight in 10 households (76%) reported being either as well off (36%) or better off (40%) than a year ago.

Nine in 10 (89%) expected to be as well off (32%) or better off (57%) next year.

That's the result of a lot of people working and more expecting to get jobs in the future. More than 700,000 new jobs were added nationally in the non-agricultural sector during the first quarter of 1987.

Even so, 24% of all households say someone in the family was laid off or had hours or income cut during the past year.

Also, average hourly earnings in real terms declined. So, more people have to get jobs to maintain their families' existing standards of living.

During the first quarter of 1987, the lowest percent since first quarter 1986 (43%) reported having had money left over after paying bills at the end of the month.

> When months go by with little or no cash left over at month's end, Americans can suddenly switch off their Spending Imperative and turn on the Cutback Imperative.

The net decline since the first quarter of 1986 was only four points, but even a modest drop in the number of homes with money to spend at the end of the month can have costly consequences for the nation's retailers and manufacturers.

The Spending Imperative

Americans today govern their household spending according to how much cash they have left over at the end of the month.

Finding cash left over is one of the most powerful spurs to spending in American households. It triggers our "Spending Imperative"—the urge to put loose money to work by spending it.

When we have a little money left over, we spend a little more day to day on consumables. More cash on hand encourages bigger purchases.

And after a quarter or so with leftover dollars, the American Spending Imperative practically drives us into house-hunting or car-shopping.

The Spending Imperative can be seen at work during first quarter '87 among consumers who reported having money left over at the end of the previous month.

Among consumers who had this kind of money, 84% said they were spending without restraint for food, compared with 55% among those who were tapped out at month's end.

They also were much more likely to be planning major purchases during the months ahead; 23% were considering buying a new car, compared with just 14% of these with no cash left.

So the Spending Imperative, which is unleashed in Americans by having loose cash in their pockets, is a powerful driving force in our economy.

Any continuing decline in the percentages of households with money left over at the end of the month is likely to cut the Spending Imperative and perhaps even drive consumers back into the Cutback Imperative.

The Cutback Imperative

When months go by with little or no cash left over at month's end, Americans across the country can suddenly simultaneousy switch off their Spending Imperative and turn on the Cutback Imperative—canceling major buying plans and slicing back on day-to-day spending for consumables.

This possibility makes the fact worrisome that the percentage of Americans who say, "Things are getting worse for the country generally," has risen steadily since first quarter 1986 to 49% currently.

In the same period, the percentage who feel "the economic picture for the U.S. is getting worse" also has risen from 27% last year to 33% now.

In that sort of mood, people are inclined to be cautious about committing themselves to major purchases with extended payment programs.

When we asked consumers during the first quarter how they felt about making major purchases, 42% told us, "It's not a good time to make major purchases," the highest percent in five quarters.

Just 21% said they were considering buying something immediately "to take advantage of current prices," the lowest percentage in five quarters.

Much as they want and need major goods, consumers may wait until they see what happens next in the economy, how well their own income and outgo balance each month, and whether they have cash left over to feed their Spending Imperative.

Until more families find more in their pockets *before* payday in months ahead, retailers also are likely to be left waiting, in spite of the fact that more consumers are working than ever before.#

Messrs. Shapiro and Bohmbach are with Leo J. Shapiro & Associates, Chicago.

The spending imperative

	People with cash at end of month	People w/o cash at end of month
Spend freely for consumables:

Burger King threat puts heat on JWT

An Advertising Age roundup

Burger King Corp. is expected to tell J. Walter Thompson USA this week that its $200 million-plus account is "on notice" and likely up for review.

The possible loss of one of the agency's key accounts, coupled with ongoing internal turmoil, could put further pressure on JWT's stock price, industry analysts report.

The agency is not yet "in play," or a takeover target, partly because unfriendly takeovers are unusual in the agency business.

Adding to the agency's problems is concern over the $260 million Ford Motor Co. account, the agency's largest.

D. JOHNSTON

Sources close to Miami-based BK said the fast-food giant has not solicited presentations from other agencies but likely will do so in the "very near future."

Sources gave conflicting reports on whether a review is inevitable or if JWT will be given one more chance to save the fast-food chain's business.

Burger King, one of JWT's largest accounts, spent $167 million last year in measured media, according to Leading National Advertisers. BK puts its total ad spending at about $200 million.

A BK spokeswoman said the marketer has made "no final decision yet" on JWT or on the concept of developing a network of regional agencies.

She said BK has been evaluating its marketing program and its relationship with JWT as well as with "other vendors," and hopes to make a decision on all the matters by the end of this week.

BK's fiscal year ends May 31, she noted, adding that an agency review is not inevitable.

Asked whether JWT could save the account, she said, "Yes, it's possible."

The reports of a BK review hit Madison Avenue just days after Pillsbury Corp. officially announced a long-rumored organizational change that moves J. Jeffrey Campbell, the 42-year-old BK chairman-ceo, from Miami to headquarters in Minneapolis.

Mr. Campbell was named chairman of a newly formed and expanded Pillsbury Restaurant Group. In the new post, he oversees all Pillsbury restaurants, including Burger King, S&A group, Quick Wok and others. His Miami post remains unfilled.

JWT's latest BK campaign is themed "Best

Mojo MDA's Alan "Mo" Morris (l.) and Allan "Jo" Johnston: Their "go for the heart" advertising philosophy wins Advertising Age's International Agency of the Year award for 1986.

Mojo MDA wins top AA honors

By GEOFFREY LEE MARTIN

Sydney—Young people swarm out of a high school here at the same time that a white Mojo MDA delivery van, boldly marked with the ad agency's blood-red logo, stops at a traffic light in front of the building.

Within seconds, the van is surrounded by youngsters chanting, "Come on, Aussie, come on, come on," an advertising jingle written by the agency to promote a cricket series and now virtually accepted as Australia's unofficial sporting anthem.

Some of the older boys change to "How 'ya feel" (from Tooheys beer commercials), and the kids start laughing.

"Hey, do you know Paul Hogan?" the van's driver is asked. He says he's met him, and the kids cheer.

Ad agencies that are as well-known to the public as the products they promote must be few and far between. Yet inci-

Buick sets major shift in ad plans

By RAYMOND SERAFIN

Flint Mich.—Buick is restructuring its marketing and advertising departments, and will change ad direction this fall to reverse an alarming sales slump.

The new ad campaign coincides with—and could affect the perception of—the scheduled Oct. 1 launch of the new Buick Regal coupe, the first car to come out of parent General Motors Corp.'s so-called GM-10 program.

That $5 billion GM-10 program is important because it represents the No. 1 automaker's attempt to return to dominance in the lucrative midsize market.

McCann-Erickson, which has handled Buick since 1958, is believed to be secure for the 1988 model year, but could be in jeopardy

Last Minute News

JWT juggles execs

New York—J. Walter Thompson Co. reconstructed its Office of the Chief Executive after the dismissal in the last few weeks of half its members. John Cronin remains vice chairman and a member of the Office but adds the title of chief advertising officer. Michael Cooper-Evans, president of JWT/Europe, is no longer a member of the Office but becomes one of eight executives on a new Management Committee. The two new members of the Office of the Chief Executive are Terence Martin, exec VP-chief financial officer, and Stephen Salorio, exec VP-general counsel. Don Johnston, JWT Group chairman-ceo, remains an Office member.

Luvs gets $20M effort

P&G helps develop 'promotion' scanner

By JUDANN DAGNOLI

Chicago—Procter & Gamble Co. is aiding in the development of a new supermarket system that includes an interactive video screen and automatic dispensing of cents-off coupons and other customer rewards at checkout.

The Video Square system was unveiled at the Food Marketing Institute's annual convention here last week. It is a joint venture of Deerfield Beach, Fla.-based CheckRobot Inc. and Stamford, Conn.-based Donnelley Marketing, and was designed in conjunction with the CheckRobot supermarket scanning system.

Video Square is an optional promotional device that can be used with CheckRobot and some other supermarket scanning systems.

The machine itself involves an interactive video screen over a scanning belt, which allows consumers to scan the Universal Product Code bar codes on grocery packaging.

A video image of a woman speaks to them and guides them in the scanning.

CheckRobot's special promotional device, developed "in cooperation with" Cincinnati-based P&G, provides a variety of in-store promotional opportunities. A participating marketer can offer consumers coupons or price incentives, at checkout, for its brands rather than a competitor's.

In a demonstration at the convention, a person self-scanned a jar of Hunt-Wesson Foods' Peter Pan peanut butter. The video display rang up the purchase price, thanked the "customer" for the order, but reminded her that "Choosy mothers choose Jif" (P&G's brand).

It then ran a 10 or 15-second clip from a Jif commercial and dispensed a 30¢-off coupon for Jif to be used on the next purchase.

Video Square also has the capability of offering "rewards" for buying selected brand-name items, such as a coupon for a free cake

Highlights

Tall order at Nissan 4

The agency that wins the Nissan Motor Corp. USA account will take home much more than the company's $150 million-plus in billings. It will take on a business under severe pressure to reverse a slipping market share. Simply put: Nissan, which will be reviewing ad agencies to take over for a fired William Esty Co., is losing its grip on the U.S. market.

Business books rebound 6

Business publishers are starting to see an upturn in ad pages in 1987 after suffering through several years of no growth or losses in volume. Following what for many was a dismal 1986, some business magazines have rebounded, though none posted huge business gains.

Sears spans out 30

Sears, Roebuck & Co. intends to strengthen its position as the nation's leading retailer through an aggressive diversification program implemented by Chairman-CEO Edward Brennan. That diversification effort includes the continued expansion of the Discover credit/financial services card and an $8 million-to-$10 million ad campaign backing the July introduction of new McKids children's apparel.

Western agency outlook dim 32

Western agency executives aren't optimistic that their billings will grow much the remainder of the year. Executives attending the 37th annual Western States Advertising Agencies Association meeting April 30 through May 3 predicted any growth will be single-digit, with most gains coming from existing clients.

Endorsement pitch 34

Dwight Gooden's endorsement career remains in limbo following the baseball star's release April 29 from a drug rehabilitation clinic. Nike Inc., which has a lucrative contract with the New York Mets' pitcher that expires May 31, says it has had a "standing offer" for several months to renew the relationship. However, the new pact is said to include expanded morality and reimbursement clauses.

'Daily News' woes 38

As if the *Daily News* didn't have enough problems, its star columnist, Jimmy Breslin, has decided to jump ship at one of the most critical times in the paper's history. The *Daily News* is in serious financial trouble.

Early Babbitt 39

Bruce Babbitt, though never renowned as a gambler while governor of Arizona, is taking an early and big chance in his bid for the 1988 Democratic presidential nomination. Mr. Babbitt's first TV campaign, which broke last month in Cedar Rapids, Iowa, is believed to be the earliest in presidential campaign history.

McKinney's reflections 44

When it comes to building a solid, enduring relationship with clients, nothing can replace truth, honesty and integrity, says Monty McKinney, chairman of DDB Needham/West.

INTERNATIONAL

Dentsu tops agency incomes 60

This week Advertising Age presents the 25th annual Foreign Agency Income survey, covering 970 agencies in 72 countries. After a 2-year hold on the No. 1 spot as the world's largest advertising agency, Young & Rubicam was overtaken by Dentsu Inc., which reported gross income of $681.0 million on billings of $5.31 billion for 1986.

OTHER NEWS

U.S. advertising expenditures rose 7.8% in 1986 to $102.14 billion, according to final industry tabulations. The pace of total ad growth appeared relatively good on the surface, but many of the largest major media sectors experienced a second year of disappointing results as their ad revenues failed to keep pace with the economy. Page 12.

As the guard changes in the chief executive suite at DYR Worldwide, with Young & Rubicam Exec VP Tim Pollak replacing DYR founder Alexander Brody as CEO, the agency appears at a crossroads. What is unclear is the commitment of the agency's parents, Y&R and Dentsu, to their unique, 50-50 joint venture—now 5 years old. Page 32.

Pepsi-Cola USA bottlers are teaming up with Chuck Yeager and Samsung Electronics America in a national sweepstakes centered around Paramount Pictures' "Top Gun" videocassette. Page 44.

When Bozell, Jacobs, Kenyon & Eckhardt decided against pursuing a $1 million public relations assignment for conservative fund-raiser Carl Channell in 1986, VP Jim McAvoy had little reason to suspect the assignment was part of Lt. Col. Oliver North's surreptitious plan to arm Nicaraguan Contras. Page 48.

A national study, sponsored by Advertising Age, will be conducted this year to find out how consumers feel about product packaging, trademarks and corporate logos. Page 56.

P&G's Vicks consolidates global shops

By DENNIS CHASE

NEWS ANALYSIS

Procter & Gamble Co. is "Procterizing" its Richardson-Vicks acquisition of two years ago by changing R-V's culture, organization and approach to marketing outside the U.S.

P&G last week consolidated an estimated $75 million-to-$100 million in R-V advertising overseas with agencies long favored by P&G.

The move causes R-V's global agency roster to more closely resemble P&G's.

The biggest winner was D'Arcy Masius Benton & Bowles, which took over an estimated $35 million in new business and replaces Saatchi & Saatchi Compton Worldwide as the No. 1 P&G agency.

Also among the winners: Leo Burnett Co., which picked up an estimated $20 million; S&SC, with an estimated $15 million; and Grey Advertising, with an estimated $10 million. All of these are P&G's top domestic agencies.

Wells, Rich, Greene, which ranks No. 4 domestically, has a

New York's concern about AIDS prompted Saatchi & Saatchi Compton to develop this TV spot featuring a woman who leaves a hot embrace after her lover refuses to use a condom.

New York City tries AIDS ads

By PATRICIA WINTERS

New York is unveiling a controversial AIDS-prevention campaign today that already has been rejected by an ABC-owned TV station.

The series of three TV spots, four radio commercials and five print ads are themed "AIDS: If you think you can't get it, you're dead wrong." The ads carry an 800 information number and target 20-to-35-year-olds.

One spot shows a woman getting dressed for the evening, while James Taylor's song "Don't Let Me Be Lonesome Tonight" plays in the background. In addition to putting on her earrings and brushing her hair, she takes a condom from her drawer and puts it in her purse.

WABC-TV refused to air the spots because they show condoms, according to Saatchi & Saatchi Compton Worldwide, New York, which created the campaign gratis for the city's Department of Health. The station, which does not accept condom ads, could not be

Fed to Pearlman

City Of Commerce, Calif.—The Federated Group hired Pearlman/Wohl/Olshever/Marchese, Los Angeles, to handle its estimated $25 million account after a monthlong review.

Shadoevision, the agency/production house owned by longtime Federated spokesman Shadoe "Fred Rated" Stevens, previously handled creative for the consumer-electronics retailer.

Mr. Stevens will continue as spokesman.

West Coast News

Geoff Meredith, 44, has been named senior VP-general manager, DJMC, San Francisco, a new post, from senior VP-director of new business. Mr. Meredith joined DJMC in December after three years as senior VP-director of strategic planning and new-business development at Hal Riney & Partners.#

Nissan faces tough road

Agency must aid skidding client

By CLEVELAND HORTON

The agency that wins the Nissan Motor Corp. USA account will take home more than the company's $150 million-plus in billings. It will take on a business under severe pressure to reverse a slipping market share.

Simply put: Nissan, which will be reviewing ad agencies to take over for a fired William Esty Co. (AA, May 4), could be losing its grip on the U.S. market.

Following a record sales year in 1985, Nissan, the No. 2 Japanese automaker in the U.S., watched its share of the U.S. car market drop to 4.8% last year from 5.2% the previous year. Over the same period, Japanese import leader Toyota Motor Sales held its 5.6% share while American Honda Motor Co. surged ahead, boosting its share to 6.1%, up from 5.0% in 1985.

Nissan's truck sales proved even more disappointing last year, especially after the introduction of the U.S.-designed Hardbody pickup in January 1986.

Unlike Japanese cars, imported trucks aren't restricted by Japanese government quotas. Nevertheless, Nissan's share of the light-duty truck market dropped to 4.9% last year, from 5.8% in 1985.

Other Japanese truck marketers didn't experience similar declines. Toyota added one full share point—to 8.4%—during that same period. Likewise, Mazda Motors of America increased its share to 3.4%, up from 2.6% in 1985. The total truck market gained 4.6%, to 4.6 million vehicles.

Perhaps more telling is Nissan's performance in California, a bellwether state and long a bastion of the imports.

Nissan's share of the Golden State car market fell 1.7%, to 7.8%, in 1986. During the same period, Toyota held almost steady at 9.4%, while Honda (excluding sales of its upscale Acura division) gained almost a full share point, to 9.5%.

> *"We're going in with wide parameters. We have no predetermined ideas about the size of our next agency."*
>
> **—Nissan Senior VP-Marketing and Sales C.P. "Chuck" King**

An influx of new-car models enabled Nissan to brake its sales decline during the first four months of 1987. Sales of U.S.-built and imported Nissan car models combined were up 13.2%, compared to the same period in '86. Truck sales were up 6.2%, compared to the same period in 1986, when the new Hardbody pickup struggled in its launch.

Some of the pressure on Nissan's U.S. marketing arm to perform better comes from Japanese parent Nissan Motor Co., whose share of its home market has declined from 30% to 24% over a six-year period. The company posted its first non-consolidated operating loss in 37 years in the first half of its operating year (ending September 1986).

Nissan plans—optimistically—to name a new agency by early July. The Carson, Calif.-based company then will ask its new agency to produce advertising using a whole new approach to marketing Nissan.

This "blockbuster" effort must be developed in time for the 1988 model year, which starts in October.

Nissan believes the deadline is feasible. Senior VP-Marketing and Sales C.P. "Chuck" King said Esty faced similar time demands when the agency originally snared what was then known as the Datsun account in 1977. (At the time, it was a $35 million piece of business handled, until then, by the now-defunct Parker Advertising, Los Angeles.)

"It was the same thing with Esty," Mr. King said, "They developed the 'We are driven' theme for [original] presentation. I expect to see the same thing happening this time."

The 2-year-old "The name is Nissan" message has run its cycle; all but 70 of its 1,100 dealers have replaced their Datsun signs with the new name, a long name-change process instituted to bring the U.S. nameplate into line with what the company and its cars were known as around the world.

Nissan is completing extensive market research to guide the new agency in boosting awareness of the company. The research will be shared among all the finalists in the review. Nissan already has incorporated some of the preliminary results of that research into its current Esty-produced ads.

The company added to its corporate-identity "Name is Nissan" campaign the new slogan "We make you feel like driving" in several upbeat TV commercials that began airing earlier this year.

Likewise, it altered spending levels between car and truck lines to more closely mirror sales. Instead of devoting about 60% of its budget to trucks, Nissan is currently spending about 70% of its dollars to promote cars.

In addition, it is purchasing a larger percentage of network TV time, in a bid to increase its profile nationally.

Canter, Achenbaum Associates, New York, is organizing the

RESEARCH BUSINESS REVIEW

THE NATION'S TOP MARKETING ADVERTISING RESEARCH COMPANIES

Jeffrey Toth

Top 46 companies' growth is partly illusion

By Jack J. Honomichl

The year 1986 had some good news and not-so-good news for the marketing/advertising/public opinion research industry, according to the 13th annual review of industry performance prepared exclusively for ADVERTISING AGE.

The good news first. According to the financial records of 46 leading U.S. research companies, their total worldwide revenues of $1,911,200,000 were up 16.2% over 1985, and after adjustment for inflation (1.9% according to the U.S. Department of Labor Consumer Price Index-U, monthly average), the "real growth" rate was 14.3%, the highest ever enjoyed since this compilation started in 1975.

Jack J. Honomichl writes a regular column on research in ADVERTISING AGE.

However, to a large degree, this extraordinary growth is illusory. For one thing, the Top 46 list is heavily weighted by four organizations that have a large percentage of their volume coming from outside the U.S.: A. C. Nielsen, IMS International, MRB Group and Louis Harris and Associates.

Total worldwide revenues of the top 46 U.S. research companies had a "real" growth of 14.3% in 1986 over 1985 . . . but this extraordinary growth is illusory.

Together, these account for nearly one-half of the list's $1.9 billion total. Because so much of their revenue came from outside the U.S., their gains over 1985 were very significantly inflated by the weakening of the U.S. dollar vis-a-vis most foreign currencies. Or, the flip side: Ironically, to a large degree, the 1986 industry growth was because of the weakening U.S. dollar.

Also, 1986 was an election year, and its impact shows vividly for the two top companies that are heavily involved in political polling, Decision/Making/Information and Market Opinion Research; both enjoyed extraordinary gains in 1986.

Another sobering concern comes from the supplementary data furnished by CASRO (Council of American Survey Research Organi-

(Continued on Page S-2)

The nation's top 46 research companies profiled

1 **A.C. Nielsen Co.,** Northbrook, Ill. Founded in 1923; since 1984 a wholly owned subsidiary of Dun & Bradstreet Corp. Research revenues in 1986 are estimated at $615 million, up about 19% from 1985.

There are two units: the Marketing Research Group, with estimated revenues of $500 million in 1986, up about 20.7% from 1985, with client service offices in 12 U.S. cities and subsidiaries in 27 countries, and the Media Research Group, with estimated revenues of $115 million in 1986, about 11.7% over 1985, with eight U.S. offices and operations in five countries.

In 1985, an estimated 52% of ACN revenues came from operations overseas; that is believed to have increased to about 60% in 1986 because of shifts in the relationship of the U.S. dollar vis-a-vis foreign currencies, which tended to inflate ACN's total revenue growth (as it did for other research organizations with large overseas operations). Because ACN parent Dun & Bradstreet does not release precise performance figures, it is impossible to calculate the exact impact this currency reevaluation has had.

During 1986, ACN's Marketing Research Group in the U.S. expanded its Scantrack service, based on universal product code data captured at the supermarket level, which provides weekly information on product movement both nationally and, if desired, individually for each of 26 major markets. Also in 1986, ACN introduced Scantrack for retailers, which produces an expanded trading area report for their use.

The single-source test marketing system, ERIM, recently received financial approval to add four additional markets in 1987 and early 1988, and a comparable system, TELERIM, is underway in West Germany.

In the U.K., ACN recently acquired two rival store movement measurement organizations: Penarvon Plc. (Gwent, Wales) and STATS MR. Together, these add about $7.25 million to ACN U.K. revenues. During 1986, ACN acquired a Finnish store audit company, Marketindex, thereby adding another country to the worldwide network. In the U.S., ACN acquired MAJERS Corp., Omaha, Neb., a company specializing in the evaluation of trade advertising and sales promotions (no MAJERS revenues are in the annual ACN revenues listed above).

John C. Holt
A.C. Nielsen Co.

Also, ACN is planning the addition of Scantrack-like market measurement systems in both Canada and the U.K.

During 1986, the Media Research Group in the U.S. continued its shift to peoplemeter technology and away from the long-established household diary method of data collection for the national Nielsen Television Index. Approximately 1,000

*Total revenues that include non-research activities, for some companies, are significantly higher. This information is given in the individual company profiles in the main article.

**Rate of growth from year to year has been adjusted so as not to include revenue gains from acquisition. See main article for explanation.

***Rounded to nearest hundred thousand.

****Total revenues of 90 survey research firms—over and beyond those listed in top 46 list—that provide financial information, on a confidential basis, to CASRO.

Illusion

(Continued from Page S-1)

zations). The $207.5 million in revenues reported by 90 CASRO member firms not included in the Top 46 listing represented a gain of 6.6% from 1985. So, the smaller firms did not share the boom of their big brothers in 1986.

Adding the CASRO figures gives us a base of 136 research companies with total revenues of $2,118,700,000 in 1986, or a 15.1% increase from 1985. After adjustment for inflation, this nets a "real growth" rate of 13.2%.

This year's list expanded to 46 companies despite the loss of three—Burke Marketing Services, Simmons Market Research Bureau and Winona Research—that had line identity last year but now are included via merger in new listings, namely SAMI/Burke and MRB Group, No. 6 on this year's list, which represents the merging of JWT Group research organizations around the world into one division under one manager. The other newcomers were Total Research Corp., Field Research Corp., Newman-Stein and Birch Research.

Of the list's $1,911,200,000 total, more than $1.6 billion—or 84%—comes from research organizations that either are public companies or subsidiaries of publicly listed companies. The corporate owners of the research industry today include Time Inc., Control Data Corp., JWT Group, Dun & Bradstreet, Saatchi & Saatchi, Capital Cities/ABC, Gannett Co., IDC Services and Arthur D. Little, to name a few.

Of the 10 largest companies, only one—the NPD Group—is still privately held.

Another sign of the times: Of the 46 organizations listed, four—NFO Research, YSW/Clancy Shulman, Birch Research and Ad Factors/Millward Brown—are owned wholly or in part by European companies. The second largest, IMS International, while a U.S. registered corporation, is run by a top management staff in London.

Eight of the Top 46 had revenues from outside the U.S., and this totals about $518 million, or 27% of the list's total. This is up from $369.8 million and about 22% in 1985.

Eight of the top executives in the 1985 listing are no longer there, mostly because of retirement *(see sidebar on Page S-8)*. And, as in previous years, the research industry growth exceeded that of America's largest advertising agencies *(see sidebar on Page S-14)*.

The company-by-company profiles that follow detail the operations of each of 1986's Top 46, major changes that took place during 1986 and companies' plans for the balance of 1987.

Top research companies

households had peoplemeters installed in 1986, and this is expected to increase to 2,000 households by September and to at least 4,000 by September, 1988.

Atlanta became the 13th local meter market panel in 1986. The U.S. group introduced Spotbuyer, a software system for TV prebuy estimations; Audience Analyst, a PC software package; and Cable Audience profiles. In Canada, ACN recently completed agreement for a national metered TV audience measurement system.

Chairman-CEO of A.C. Nielsen Company is John C. Holt, 48, who has a B.S. from Southern Illinois University. He is also an executive vp and board member of Dun & Bradstreet. Richard W. Vipond, 59, is president of the Marketing Research Group, and James D. Lyons, 52, is president of the Media Research Group.

2 **IMS**, New York. Founded in 1954; public company traded over the counter. Research-only revenues in 1986 were $245.4 million, up 41.8% from 1985.

IMS revenues in 1986 were $375.5 million, of which $266 million were attributable to its Market Research Division. Some MRD revenues from computer-based mailing and marketing activities have been subtracted; these amounted to $14.0 million in 1985 and $20.6 million in 1986. Further, IMS made several acquisitions in 1985 and 1986, namely Healthcare Information Programs, Luning Prak Associates, LP Audits, Fisher-Stevens and Clark-O'Neill.

While these new revenues are included in the $245.4 million shown above, adjustments have been made, inasmuch as is possible, so that they do not impact the 41.8% growth rate, which in turn was greatly influenced in 1986 by the weakening of the U.S. dollar vis-a-vis foreign currencies; 45.6% of IMS MRD revenues come from operations in 63 countries outside the U.S.

The U.S. subsidiary, IMS America, is headquartered in Ambler, Pa. There are about 3,600 IMS employees in the market research operation, approximately 1,700 of whom are in the U.S.

IMS has a battery of market research services and syndicated reports, most of them related to the worldwide pharmaceutical industry. Data series pertain, for instance, to ethical pharmaceuticals, over-the-counter pharmaceuticals, medical diagnoses and treatments, medical promotion efforts, hospital and laboratory suppliers, animal health products and personal care products. Most of these data are collected via audits and/or panels, and the resulting data bases are available on-line via Inbase, a text retrieval system. The company also does custom research.

Robert Louis-Dreyfus
IMS

Although IMS is a U.S.-registered corporation, all its top officers are located in London.

President-CEO is Robert Louis-Dreyfus, 40, who has an M.B.A. from Harvard University. Andrew L. Clark, 61, is chairman. Christian Tourres, a senior vp, heads the Market Research Division.

3 **SAMI/Burke**, Cincinnati. Founded in 1966, a wholly owned subsidiary of Time Inc. Revenues in 1986 are estimated at $174.5 million, up 7.7% from 1985.

This organization is the result of the merger of Selling Areas-Marketing Inc. (SAMI) and Burke Marketing Services Inc., which it acquired in 1986.

SAMI/Burke now is organized into three divisions: Data Base Services, SAMI, Samscan and DecisionMaster SM; Market Testing and Modeling Services, TMG AND BASES; and Custom Services, Burke Marketing Research.

Jack E. Brown
SAMI/Burke

The Data Bases Services Division provides product movement data through its SAMI and Samscan syndicated services. SAMI reports on the movement of more than 180,000 consumer products in more than 500 categories from warehouse withdrawal to supermarket, drug and mass merchandiser outlets. The food and drug service provides data on each of 54 SAMI-defined market areas. The mass merchandiser service will be provided nationally by the end of 1987.

Samscan provides product movement, volume, share of market, distribution and price data, based on a sample of UPC scanner-equipped supermarkets, with data reported on 20 markets separately (to be expanded to 54 SAMI market areas by the end of 1989).

Later this year, SAMI/Burke

Looking For Low Incidence Respondents Sometimes Feels Like Kissing A Lot Of Frogs Before Finding The Prince.

It Doesn't Have To Be!!!

FLIP™

Finding Low Incidence People

A new state of the art computer driven system identifying users of low incidence products and services. Conduct your market research faster and for less money than with conventional methods.

FLIP'S scope is nationwide. It's fast. It's flexible. And provides fresh respondents—not panels.

Once identified in malls respondents can be interviewed by telephone, in their home, by mail or invited back to the mall. Usage of any type of stimuli (television commercials, print ads, concepts, products, etc.) is possible.

FLIP. If you're tired of kissing frogs!

FLIP. Another advanced market research tool from Guideline Research Corporation, the creative *custom* market research company.

plans introduction of DecisionMaster SM, a system that will deliver electronically, via a standard PC in conjunction with a high-capacity optical disk storage device, access to the SAMI/Samscan data bases. Advanced analytical and decision support software packages and models also are available through DecisionMaster.

The Market Testing and Modeling Division includes Bases, the market leader in predictive modeling for new product testing and forecasting, Bases LX for line extensions and Restager for product restages and the Test Marketing Group, which offers a wide range of market testing services, including electronic test marketing in its AdTel markets. TMG recently introduced two new market models, Projector and Sourcerer, to enhance the learning experience from test marketing.

The Custom Services Division (Burke Marketing Research) provides survey field and tab and full-service survey services, including TV commercial testing (Selector) and print, billboard and package testing with eye movement technologies.

The Burke Institute markets an extensive curriculum of courses related to professional training.

Jack E. Brown, 43, formerly chairman of Burke Marketing Services, became president of SAMI/Burke in September, 1986. He attended the University of Cincinnati.

4 Arbitron Ratings Co., New York. Founded in 1949 and since 1967 a wholly owned subsidiary of Control Data Corp. Revenues in 1986 are estimated at $137.2 million, up 12.3% from 1985.

Arbitron produces radio, TV and cable audience studies at the local-market level using mail diaries or panels of meter—or peoplemeter—equipped households. Surveys in 214 TV markets (ADIs), 12 of which are measured by a combination of meters and diaries and one of which (Denver) is measured by a peoplemeter service, account for 51.5% of Arbitron revenues; the balance comes from measurement of 260 radio markets.

In 1986, Arbitron expanded radio audience measurements in 75 markets year-round by conducting four 12-week-long surveys each year; this is expected to be expanded to 79 markets by the end of 1987. Also, starting with the spring survey results of 1987, Arbitron redesigned its local market reports to contain data on listening locations and audience composition.

Arbitron reports are available to radio and TV stations, advertisers and ad agencies via printed reports, computer-based applications such as Arbitrends and Product Target AID, which deliver updated data from the company's mainframe in Laurel, Md., for custom tabulation and analysis and an on-line database called Arbitron Information on Demand (AID).

A.J. Aurichio
Arbitron Ratings Co.

Recently, Arbitron introduced a variety of new analytical services designed to help clients to better use research as a sales tool. For instance, Broadcast Negotiator is a pre-buy and post-buy software system that enables easy analysis of Arbitron data in relation to specific media buys.

During 1986, Arbitron sold its interest in Burke Marketing Services Inc. to Selling-Areas Marketing Inc. and through its parent, Control Data, acquired Broadcast Advertiser Reports, the television commercial monitoring service, and Radio-TV Reports (RTV), its wholly owned subsidiary. BAR revenues are not included in the Arbitron research revenues.

Arbitron continues to develop its ScanAmerica service, which electronically measures TV viewing of individuals via peoplemeters and tracks products purchased in panel households via an in-home portable scanner that "reads" UPC bars on package goods. This system, now operative in Denver, will be expanded nationally for the 1988-89 TV season.

Arbitron has 1,235 full-time employees in 23 U.S. locations. A telephone-interviewing facility in Laurel, Md., has 55 stations.

President of Arbitron is A.J. "Rick" Aurichio, 50. He has an M.B.A. degree from Fairleigh Dickinson University. He also is a VP of Control Data Corp.

5 Information Resources Inc. Chicago. Public company traded over the counter; founded in 1977. Revenues in 1986 were $93.6 million, up 21.2% from 1985.

This expansion-minded firm made several major moves in 1986:

1. The BehaviorScan test market system, used for advertising and promotion testing and new product test marketing, opened two new markets (Salem, Ore., and Cedar Rapids, Iowa) in 1986, bringing the total to 10. IRI, through a joint venture with GfK-Nuremberg, has established a similar BehaviorScan market in West Germany and recently announced plans to set up a similar system in the U.K. on its own.

2. IRI introduced a new service, InfoScan, a national scanning service that tracks consumer purchasing (from a base

Announcing The Beginning And The End Of "The Research Department Blues."

Nobody knows the trouble you've seen? Maybe we do and maybe we've done something about it. We're Walker Research & Analysis. And for the cost of a few minutes of your time we'd like to entertain you with Side A of our latest release, "The Research Department Blues." And if you'll take another moment to listen to Side B, you'll find we may very well have solutions to many of the problems facing research management today.

We did our homework and talked to management in research departments all over the country. We found, in many instances, you're being asked to perform more with less in-house staff than ever. So, what we're bringing to the table is a research and analysis partnership. It's this partnership philosophy that will expand your capacity to meet any challenge . . . on time, on target and on budget. We offer you knowledgeable account representatives backed by the full resources of one of the nation's largest research companies.

What's next? Fill out the coupon, send us your business card, or call us toll free at 1-800-334-3939. We'll send you a cassette of our latest release, "The Research Department Blues," and some information on how Walker Research & Analysis can chase the blues away.

Top research industry management sees change

The past year has seen numerous changes in top management of America's leading research companies.

The following have retired from their positions:

Henry Burk, chairman, A. C. Nielsen Co.; **Carlyle C. Daniel,** chairman-CEO, SAMI/Burke; **Theodore F. Shaker,** chairman-CEO, Arbitron Ratings Co.; **Robert J. Lavidge,** president, Elrick and Lavidge; **Irwin Miller,** chairman-CEO, Opinion Research Corp.

Other changes:

Henry Brenner, founder and chairman, NPD Group, sold his interest to partner Tod Johnson.

Donald B. Chapman, founder, chairman and CEO, Ad Factors Marketing Research, sold his interest in the company, relocated to California.

Gilbert Barrish, director, Chilton Research Services, left to join Opinion Research Corp.

—Jack J. Honomichl

Top research companies

of 60,000 households) of all UPC-coded products sold in supermarkets. It also provides data on promotion activities affecting sales, through newspaper ads, in-store displays, coupon redemption, etc. IRI plans during 1987 to complete the expansion of the InfoScan system to 2,400 stores and 80,000 panel households. Also, IRI plans to install peoplemeters in scanner panel households to measure TV viewership and audience composition.

3. IRI acquired the Data Group, a custom survey research organization, Marketing Advancements, a company specializing in coupon distribution measurements, and ABA Groups, a provider of computerized systems for retailers and manufacturer sales forces for shelf management studies. (While revenues from these acquisitions are reflected in the IRI 1986 revenues above, the rate of growth has been adjusted so that it is not artificially inflated by acquisition-gained revenue.)

4. IRI introduced PromotionScan, a syndicated service for tracking the sales impact of promotions in all UPC-coded product categories.

5. The firm also introduced a PC Workstation based on proprietary IRI software with brand, sales promotion and retailer management applications.

Gian Fulgoni
Information Resources

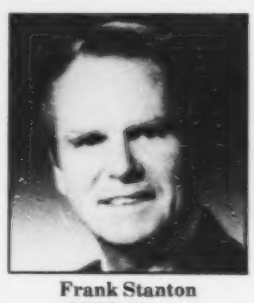
In addition, IRI markets the Marketing Fact Book service, an ongoing report on UPC-coded product movement collected at the household level, an expanded ASSESSOR simulated test market system to predict sales volume and market share of a new product at any point in the product development cycle, and a library of software for the maintenance and analysis of marketing information data bases.

There are 900 salaried, exempt employees in seven U.S. branch offices, and about 4% of revenues come from activities outside the U.S.

President-CEO of IRI is Gian Fulgoni, 39, who holds a master's degree from the University of Lancaster (England).

6 **MRB Group**, New York. Wholly owned subsidiary of JWT Group. Revenues in 1986 were $52 million, up 8.7% from 1985.

In 1986, JWT consolidated its research units into a single division. In the U.S., included are Simmons Market Research Bureau (founded in 1978) and Winona Research. The international group, headquartered in London, has 14 offices in Europe,



Frank Stanton
MRB Group

the Middle East, South Asia and Japan, and accounts for about 37% of total MRB revenues.

The SMRB annual "Study of Media & Markets," based on a sample of 19,000 adults covering exposure to all media, brand usage, leisure activities and financial services, is MRB's single largest product. In 1986, SMRB introduced Choices, a microcomputer system that makes the "Media & Markets" data base available on PCs.

In 1986, SMRB announced its plan to conduct the 56-market National Study of Local Newspaper Ratings, with field work starting last October. Approxi-

Limobus

THE ROPER ORGANIZATION'S OMNIBUS:

YOUR SOURCE FOR QUALITY SURVEY RESEARCH AT A COST OF UNDER $1.00 PER RESPONDENT PER QUESTION

FAST

Limobus™ interviews 2000 adult Americans in their homes, face-to-face, every month, and gives you results just four weeks after the interview.

FLEXIBLE

Sample size, and composition are tailored to your needs.

ECONOMICAL

A simple question asked of 2000 respondents costs 90¢ per interview, asked of 1000 respondents, it's $1.10; asked of other partial samples (men or women only, for example), it's $1.40 per interview.

RELIABLE

Limobus™ is a service of the Roper organization so you know your data are credible.

USE *Limobus*™ TO:

- Check Advertising and/or Brand Awareness
- Conduct Pre and Post Campaign Measurements
- Check Impact, Recall, and Communication
- Assess Penetration of Your Product/Brand
- Test New or Altered Packaging
- Evaluate New Product Performance

...And Almost Any Other Research Problems You Have.

Top research companies

mately 120,000 telephone interviews are being conducted with 65,000 adults. Results will be released this summer.

The Winona CATI facility in Phoenix, with 210 stations all equipped with four-color CRT screens, relocated in new quarters in 1986. Telephone interviewing accounts for about one-half of the Winona revenues, with the balance coming from product research mall studies and custom store audits through an office in Minneapolis. MRB Group has 642 full-time, salaried employees.

Chairman-CEO Frank Stanton, 57, has an M.A. from the University of Pennsylvania.

7 **M/A/R/C Inc.**, Irving, Texas. Founded in 1965; public corporation traded NASDAQ. Research revenues for the fiscal year ending March 31, 1987, were $47.5 million, up 2.6% from 1985. Revenues do not include $6.5 million from data base management for promotional purposes, a fast-growing segment of the total M/A/R/C operation.

M/A/R/C, primarily a survey research company, reduced its central telephone interviewing capacity to 260 stations during 1986; however, an additional 215 CRT-equipped stations for WATS interviewing are available through its Local Market Network (LMN), a system that electronically ties independent mall or central location facilities around the country to M/A/R/C's central computer system. The LMN on-line network provides two-way electronic communications with 30 markets and 52 sites. The National Neighborhood Panel Service is based on 72,000 households clustered around these sites.

During 1986, M/A/R/C continued expansion of its National Panel, about 300,000 households. Also during 1986, M/A/R/C relocated into a new six-story headquarters building near Dallas-Ft. Worth airport; underwent a management reorganization; closed less-efficient operations in Atlanta, New York and Chicago; entered the test marketing modeling business with a new product evaluation system, ENTRO; and entered into a joint venture with InterView NV, Amsterdam, to develop a PC version of M/A/R/C's automated interviewing and tabulation system. (The two companies collaborated on a public opinion telephone study

Sharon Munger
M/A/R/C

spanning the U.S. and several European countries, delivering 1,200 interviews within 62 hours after the questionnarie on the Iranian-Contra arms controversy was written.)

M/A/R/C has a full-time staff of 385 in 13 offices, plus an hourly staff of 184 and an hourly payroll of 1,080.

New president-chief operating officer of M/A/R/C, Sharon Munger, 40, has a B.A. from Vanderbilt University. Cecil B. (Bud) Phillips, 62, is chairman-CEO; he is graduate of Southern Methodist University.

8 **NFO Research**, Toledo, Ohio. Founded in 1946 and since 1982 a wholly owned subsidiary of AGB Research. Revenues in 1986 were $36.7 million, up 7% from 1985.

NFO operates a fixed mail panel of 350,000 households (including 900,000 individuals), catalogued by demographic and product ownership characteristics, which are used for either telephone or mail surveys. There are two central telephone interviewing facilities (Toledo and Greensboro, N.C.), which have 200 stations, including CATI interviewing.

NFO conducts concept and product tests and tracking, attitude, usage/awareness, and segmentation studies. Standard segmentation systems, including Vision, Acorn, Cluster Plus, Prism and VALS, are used for analysis.

Syndicated services include tracking studies for the beverage industry (SIP), mail-order monitoring (MOMS), toys (Toy-Track), carpeting and men's and women's apparel.

NFO maintains marketing offices in Chicago, St. Louis, Toledo, San Francisco and Greenwich, Conn. There are 336 full-

William E. Lipner
NFO Research

time and 326 regular part-time employees.

NFO recently introduced the following new services: Screen-Test and Kids' Screen Test for presenting products and concepts to panel members for viewing at home via video tape; Analycor, an advanced segmentation model; Converge, a trade-off analysis technique; Confirm, a joint venture with Yankelovich

Top research companies

Clancy Shi·lman to produce estimates of consumer acceptance of new products and services; 50+ Panel, a panel of people 50 and older; Multicall, a monthly omnibus telephone survey; and City Panel, pre-identified panels of 1,500 households in each of 40 markets that are eligible for in-home product placement studies.

NFO/SRG International, White Plains, N.Y., provides access to the AGB Research worldwide group of market research companies and conducts surveys in 35 countries worldwide.

President-CEO William E. Lipner, 39, holds degrees in electrical engineering and business administration from the University of Toledo.

9 **Market Facts,** Chicago. Public corporation traded over the counter; founded in 1946. Revenues in 1986 were $36 million, down 4.6% from 1985.

These figures do not include revenues from Market Facts of Canada (annual volume estimated at $4.8 million), which is 50% owned by MF.

Most of MF revenues come from custom-designed research studies conducted for marketers of consumer goods and services, industrial marketers, and government agencies and associations. However, more attention is being given to syndicated studies developed by the company's Financial Services Group and Healthcare Information Group.

The company conducts studies through numerous data collection facilities—a network of shopping mall interviewing centers (three of which are company owned); a controlled mail panel of 235,000 households; three national telephone interviewing centers with a total of 125 stations (102 CATI-equipped); and the Marketest controlled store auditing facility for new product test marketing and other forms of in-store experimentation.

In 1986, MF launched a weekly telephone omnibus survey called TeleNation, opened a new client service office in St. Louis, and formed a Marketing Models Group to develop sales projection models, trend analyses and other services not already offered through its Decision Systems Group.

Verne B. Churchill
Market Facts

MF employs 487 full-time, salaried employees within its six client service offices and six other operational facilities in the U.S.

President-CEO is Verne B. Churchill, 54, who received his M.B.A. from Indiana University. Greg Spanga, 50, the company's chief operating officer, received his M.B.A from Bernard Baruch College.

10 **NPD Group,** Port Washington, N.Y. Privately held corporation founded in 1953. Revenues in 1986 were $35.5 million, up 7.3% from 1985.

The NPD package Goods Di-

Research growth outpaces advertising agencies

The top 46 research company compilation makes possible a comparison of the growth in worldwide expenditures for marketing/advertising/public opinion research and that of advertising agencies, as compiled in the Advertising Age U.S. Advertising Agency Profiles (March 26).

Agencies vs. research companies	1986 worldwide revenues (millions)	% growth over 1985
Top 46 U.S. advertising agencies	$7,263.0	10.8%
Top 46 U.S. research organizations	1,911.2	16.2

The difference between the two industry growth rates is even more extreme when you consider first that the growth rate of research companies has been adjusted to negate the impact of acquisition as much as possible; if one organization acquired another during 1986, the revenues for both 1985 and 1986 were included before calculating growth rate, or they were eliminated from both years. This is not true of the advertising agency revenues, which are to some degree inflated by acquisition gains.

Second, for research companies, revenues from non-research activities have been subtracted out inasmuch as is possible, so the growth rate is calculated on research revenues alone. This is not true of advertising agencies, where non-advertising activities, including public relations and research subsidiaries, are included.

Third, 27% of the top 46 research companies' revenues came from outside the U.S., compared with 37% of the top 46 advertising agency revenues. Therefore, the agency growth rate was helped more by the weakening of the U.S. dollar in 1986 than was the research rate.

No wonder, then, that in 1986 some very large, worldwide advertising agencies were aggressively acquiring research companies both in the U.S. and abroad. —*Jack J. Honomichl*

There's more to marketing research than meets the eye.

After all, consumers are only human—complex, unpredictable, senders of mixed and often misleading signals to the unwary marketer.

At Elrick & Lavidge, we never lose sight of this fact. Over 35 years' experience in marketing research has given us real understanding of client needs and consumer behavior. So we provide information. And insight.

Our nationwide offices offer state-of-the-art facilities for information gathering. And with their expert analysis and interpretation of data, the professionals of Elrick & Lavidge set the industry standard for marketing intelligence. Our clients include most of the top corporations in America. To give your company the same advantage they enjoy, write or call us. When you discover what our marketing research can do for you, we have no doubt you'll want to see things our way.

vision operates a 14,500-household national purchase diary panel, plus more than 20 local market test panels with approximately 30,000 additional households. Its NET service provides detailed meal usage information from 2,000 households, and its Marketrax service provides consumer UPC scanner panels and controlled store testing capabilities in three markets. In early 1987, this division placed handheld UPC scanner devices in 500 New York area households as part of a program to replace national mail diaries with electronic UPC-based data collection.

The NPD Special Industry Services Division uses a combination of mail purchase diaries, mail panels and computerized point-of-sale audits to develop syndicated tracking services for non-packaged goods industries, including toys/games, apparel/textiles, petroleum/automotive, sporting goods, jewelry and electronic products.

Currently, the Point-of-Sale Audit program is being expanded to nearly 3,000 department, discount and specialty stores. A similar auto parts program will start later this year. NPD electronic product and sporting goods data bases are part of an international data base available through joint ventures with GfK of West Germany and Tokyo Research Co. of Japan.

Tod Johnson
NPD Research

NPD's Crest Division operates a 13,000-member diary panel reporting on prepared meals purchased away from home. Starting this year, Crest's Market Development Program is being extended to include trade area and site evaluations for restaurant operators.

The NPD Marketing Models Division has proprietary models, such as ESP, for pre-test marketing and new product evaluations. This year, the division added BrandStar, a joint venture with Hendry Corp.

Home Testing Institute, the custom research division of NPD, operates a 200,000-household fixed mail panel and related CRT central telephone interviewing facility.

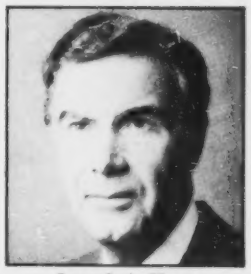
NPD has 455 full-time employees in five U.S. office locations. About $500,000 of its annual revenue comes from outside the U.S.

President-CEO is Tod Johnson, 42, who holds an M.S.I.A. degree from Carnegie-Mellon University. During 1986, founder Henry Brenner, 72, sold his remaining holdings to the corporation.

11 **Westat**, Rockville, Md. An employee-owned corporation founded in 1961. Research revenues in 1986 were $35.2 million, up 39.9% from 1985.

Revenues include those of Crossley Surveys, a subsidiary of Westat since 1983, but do not include those of computing time unrelated to research activities. Westat specializes in large-scale survey research, about 90% of which comes from projects funded by federal agencies.

The staff includes 284 exempt, salaried professionals (up 11% from 1985), a non-exempt, salaried staff of 70, and about 500 part-timers for telephone interviewing. The Crossley Division is located in New York, and during 1986 Westat opened a second telephone interviewing facility in Frederick, Md., and relocated its Rockville facility to new quarters.



Joseph A. Hunt
Westat

President-CEO is Joseph A. Hunt, 51, who has an M.S. from Massachusetts Institute of Technology. During 1986 Edward C. Bryant, 71, founder of Westat, became chairman emeritus; he has a Ph.D. from Iowa State University.

12 **Maritz Marketing Research Inc.**, St. Louis. Wholly owned subsidiary of Maritz Inc., founded in 1973. Revenues in 1986 were $32.9 million, up 9.6% from 1985.

MMRI is primarily involved in custom survey research, but is also well known for syndicated studies in the automotive and agricultural industries. There are nine full-service offices in eight cities: Atlanta, Dallas, Detroit, Los Angeles, Minneapolis, New York, St. Louis and Toledo.

William H. Lewellen

Top research companies

Ohio, and a WATS survey center in Toledo. Nationwide, MMRI operates 18 field service branches and four WATS survey centers. Data collection resources include 34 focus group suites, 476 central phone lines, 21 mall interviewing locations and 25 test kitchens. The company's 189-station CATI telephone and mall interviewing system now spans 17 cities.

Product introductions last year included Explorer, decision support software for marketers and researchers, which makes research data bases available on a PC in an easy-to-use format producing custom cross tabulations, graphs and statistical tests. A market segmentation technique based on Vision geodemographic analysis also was introduced.

MMRI plans this year to introduce two new syndicated studies—one related to recent home buyers and another related to the financial industry. Improvements to MIVIS (Maritz Interactive Videodisc Interviewing System) also will be announced soon. Plans for expansion during 1987 include a full-service division in Chicago and a field service branch in Florida.

MMRI has 304 full-time employees, 211 of whom are salaried exempt. Approximately 2,000 part-time interviewers and supervisors are also employed.

President William H. Lewellen, 56, holds an M.S. degree in commerce from St. Louis University.

13 Elrick & Lavidge, Chicago. Founded in 1951 and since 1980 a wholly owned subsidiary of Equifax Inc. Revenues in 1986 were $26.7 million, up 8.5% from 1985.

Figures include revenues from a subsidiary, Quick Test Opinion Centers, a national network of 19 mall-interviewing sites, which account for about one-half of total E&L volume.

E&L specializes in survey research for consumer and business-to-business clients. There are full-service offices in Atlanta, Chicago, Cincinnati, Downers Grove, Ill., Los Angeles, Paramus, N.J., and San Francisco. These offices, together with the company's field facilities, employ a salaried staff of about 237, of whom 180 are exempt, plus 750 part-time employees.

During 1986 E&L opened its seventh full-service office in Los Angeles. The Philadelphia-based Quick Test subsidiary opened a new facility in the Atlanta area and plans to open a telephone interviewing operation during 1987.

E&L continued to expand its data-processing capabilities through upgrades in computer equipment that have increased computer capacity by about 40% so far in 1987.

J. Edward Shrawder
Elrick & Lavidge

President J. Edward Shrawder, 50, received an M.B.A. from the University of Chicago. Robert J. Lavidge, co-founder and former president, is now president emeritus.

14 Yankelovich, Skelly & White/-Clancy, Shulman, Westport, Conn. Wholly owned subsidiary of Saatchi & Saatchi, Plc., London. Research revenues in 1986 were $21.2 million, up 13.6% from 1985.

This organization was formed in January, 1986, when Saatchi & Saatchi merged Clancy, Shulman & Associates (founded in 1982, acquired by Saatchi in 1985) and Yankelovich, Skelly & White (founded in 1958, acquired by Saatchi in 1984). The firm trades under Yankelovich Clancy Shulman (YCS) and is a unit within Saatchi & Saatchi Consulting, a subsidiary of Saatchi & Saatchi Plc.

Robert S. Shulman
Yankelovich

The merged organization now has three business units:

1. Consumer Research. Has syndicated surveys including Monitor, Youth Monitor, and—new in 1987—Pacific Basin Monitor, a shared-cost survey covering Japan, South Korea, Taiwan, Hong Kong, Singapore, Malaysia and Australia. The consumer research unit also offers "market response" assessment research services for every stage of a product's life cycle.

2. Consumer Marketing Consulting. Specializes in product positioning and relaunch, market structure analysis, new product and services development, concept screening and prioritization, acquisition studies and new business analysis, and marketing plan development and optimization.

3. Business-to-Business Research and Consulting. Includes corporate and product position analysis, corporate communications studies, industry segmen-

Introducing The Earliest Forecasting System On The Market

Yankelovich Predictor Series℠

The Daniel Yankelovich Group and Moran & Tucker have jointly developed a new forecasting system called the Yankelovich Predictor Series℠.

This new system combines Moran & Tucker's advanced computer modeling with the experience of seasoned new product marketing consultants at the Daniel Yankelovich Group. It also combines the power of the behavioral buying measure of a simulated test market with the speed and economy of a concept test. The result is a series of computer models and a forecasting system that:

- Identifies the right category for your new product development effort.
- Helps you develop new product and line extension concepts within a category.
- Forecasts trial and sales at the concept stage.
- Forecasts market share and volume in a simulated test market environment.
- Speeds up market test of rollout tracking with early forecasts.
- Provides guidance on your overall new product development plan.

The Yankelovich Predictor Series™

Predictor 1: Category Potential Analysis℠
Predictor 2: Concept Generation℠
Predictor 3: Estimates and Critical Diagnostics at the Concept Stage℠
Predictor 4: Estimates and Critical Diagnostics via STM Technology℠
Predictor 5: Tracking Estimates℠
Predictor 6: New Product Coordination System℠

tation studies, etc. There are multi-sponsored corporate image surveys of media, brokers, individual investors, portfolio managers, and public opinion surveys, such as the studies published by *Time* magazine.

YCS has 103 full-time employees and, in addition to the Westport headquarters, a research and development staff in Chestnut Hill, Mass., and a sales-service office in Newport Beach, Cal.

President-CEO Robert S. Shulman, 35, is a graduate of Eisenhower College. Chairman Kevin J. Clancy, 44, received his Ph.D. from New York University.

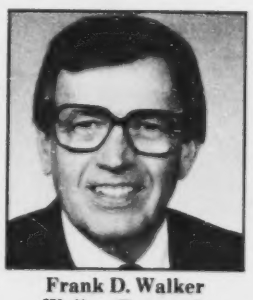
15 **Walker Research**, Indianapolis. Privately held corporation founded in 1964 (succeeding a local interviewing agency, Walker Research Service, founded in 1939). The company's revenues in 1986 were $21.3 million, up 2.6% from 1985.

During 1986, this survey research company reorganized into three strategic business units:

1. Research & Analysis. Provides full-service custom ad hoc research services nationally through client service offices in New York, Winston-Salem, N.C. Cincinnati, Indianapolis and San Francisco.

2. DataSource. Provides data collection, tabulation, data base mangement and computer services through a network of data collection offices in New Jersey, Florida, Indiana, Kentucky and Arizona. Included are more than 240 telephone interviewing stations, most of which are CATI-equipped.

3. Customer Satisfaction Measurements. Specializes in



Frank D. Walker
Walker Research

designing and administering customer satisfaction measurement programs.

An affiliate, Walker Clinical Evaluations, conducts Phase Three clinical investigations and trials of drugs, cosmetics, foods, animal products, medical devices and electronic products.

Walker employs 147 full-time salaried, 153 full-time hourly and 565 part-time workers.

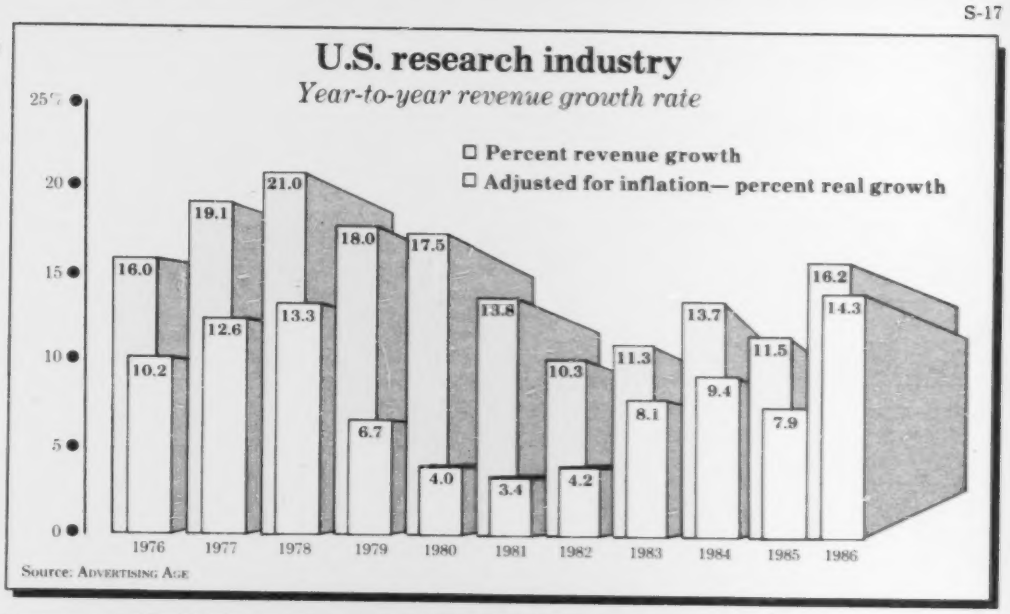
During 1986, Walker sponsored a three-day symposium, RE:2000, for senior marketing information executives.

Chairman-CEO is Frank D. Walker, 52, a graduate of DePaul University. President-chief operating officer is James E. Sammer, 48, who received an M.B.A. from Michigan State University.

16 **Chilton Research Services**, Radnor, Pa. Founded in 1957; a wholly owned subsidiary of Capital Cities/ABC since 1979. Revenues in 1986 were $19.5 million, up 2.1% from 1985.

Chilton, whose core business is ad hoc custom marketing research, maintains business specialty groups in telecommunications, computers, healthcare, financial institutions, consumer package goods, utilities and retailing. There are in-house capabilities for modeling/forecasting and complex statistical analysis. Chilton has 181 full-time, salaried employees.

Chilton's polling unit conducts the ABC election polls as well as monthly opinion polls for



Good research can produce a mountain of data. But Chilton won't make you climb it to get the results.

More than sheer volume, it's how the numbers are put together that makes them valuable to you.

We'll provide you with all the data you want, but we'll also refine it so you can find what you need to know. We'll design and implement your project from sampling through data collection and analysis.

Your data will be organized. Drawing on all the analytical tools available, our people can perform any type of analysis from simple calculations to complex multivariate data reduction procedures. And we can translate the results into an understandable report.

Let us conduct your next research study. Your account executive will head a multi-talented team of researchers with the specific experience, techniques and technology necessary to give you the most accurate and meaningful answers obtainable.

For decisions you can rely on, start with information you can trust.

Give us a call.

broadcast on ABC News. In 1986, as part of the November congressional elections, Chilton processed 68,000 exit interviews through Radnor and transmitted the data to ABC News in New York in a single day. Its large-scale data collection is further reflected in the management of 20,000 personal interviews annually for Mediamark Research for their reports on advertising media exposure and purchases of products and services.

Chilton operates dedicated telephone-interviewing centers for customer-service measurement on behalf of the Bell regional operating companies of Ameritech, NYNEX, Bell Atlantic and SNET.

The Chilton field department conducts more than 30,000 personal interviews annually through a national network of more than 1,000 field personnel. Telephone-interviewing facilities for custom research are in Radnor (110 stations) and Havertown, Pa. (72 stations). Its CATI system incorporates on-line sample control, interactive cross tabulations and a flexible software system for computerized questionnaires developed by Chilton and known as the Survey Research Processor.

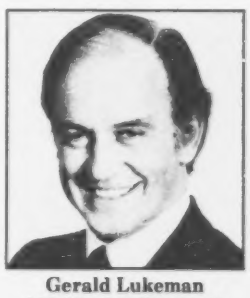
Ronald Hoxter
Chilton Research

A programming development group is dedicated to ongoing innovation in computerized interviewing techniques including auto-dialing and computerized sample dispositioning. There are three 4,300 series IBM mainframes in the Chilton system.

In 1987 Chilton will issue a syndicated research report detailing operating costs and fleet characteristics for private truck fleets.

Ronald Hoxter, 39, vp, general manager and director, has an M.B.A. from Columbia University.

17 **ASI Market Research,** New York. Founded in 1962; since 1983 a wholly owned division of IDC Services, Inc. Revenues in 1986 were $17.1 million, up 8.6% from 1985.



Gerald Lukeman
ASI Market Research

ASI activities are concentrated in two areas: advertising research, which specializes in controlled audience pretesting and on-air testing of TV commercials and testing of print ads, and entertainment research, which specializes in evaluating entertainment projects, including pilots for TV and movie films.

In 1986, ASI continued to expand Tru-Share, a multicity persuasion methodology. Another methodology, Recall Plus, a CATV-based system, is available in 11 cities.

During 1987, ASI plans expansion of its theater operation, presently centered at the Preview House facility in Los Angeles, to include multiple city representation with automated data retrieval and transmission capabilities. It also plans to introduce new syndicated services in the entertainment research area of its business. There are 125 full-time, exempt employees plus an additional 600 part-time staffers.

President-CEO of ASI is Gerald Lukeman, 55, a graduate of Dartmouth College. He is also executive vp of IDC Services.

18 **Decisions Center Inc.,** New York. Privately held corporation founded in 1965. Revenues in 1986 were $15.6 million, up 13% from 1985.

DCI, with 160 full-time salaried employees, includes Decisions Center, Murray Hill Center (three focus-group conference rooms), Express Data Center and Facts Center, a 94-station telephone-interviewing facility. All divisions are in one Manhattan building.

DCI specializes in custom-survey research: large-scale market structure and strategy studies, print and TV copy testing, tracking studies, legal studies and concept and product testing.

DCI's growth in 1986 came from a combination of the expansion of Express Data Center and a newly developed system of copy testing aimed at highly specific and difficult-to-interview target audiences. Express Data Center, providing virtually instant computerized transmission of survey data from a network of mall locations to DCI's VAX 750 computer, expanded from 10 to 16 locations in 1986 and is planning additional expansion in 1987. Further plans include the introduction of a new market-simulation model.

Bernard Ruderman
Decisions Center

DCI is managed by three partners: Bernard Ruderman, 55, who has an M.S. from Pennsylvania State University; Bernard Levine, 61, and Steven Roth, 41, both with M.B.A.s from New York University.

19 **Louis Harris and Associates,** New York. Founded in 1956 and since 1975 a wholly owned subsidiary of Gannett Co. Revenues in 1986 were $15.5 million, down 2% from 1985.

Forty-three percent of Harris revenues come from non-U.S. subsidiaries: Louis Harris International (London), Louis Harris France (Paris) and Louis Harris Medical Surveys (London).

Founded by Louis Harris, the well-known pollster whose column is syndicated in 150 newspapers, the U.S. operation consists of the following divisions:

Louis Harris
Louis Harris and Associates

telecommunications, computers, healthcare, banking and financial services, automobiles, and public policy and corporate affairs. Multiclient surveys track corporate, financial, public and leadership opinions and behavior. About 40% of the company's U.S. work and 20% of the international work is for foundations, governmental agencies and other non-profit entities.

20 **Opinion Research Corp.**, Princeton, N.J. Founded in 1938; since 1975 a wholly owned subsidiary of Arthur D. Little Inc. Revenues in 1986 were $15.2 million, up 4.8% from 1985.

Andrew Brown
Opinion Research Corp.

ORC provides full-service survey research and analytical and design services, emphasizing market research, data collection, awareness, trial and usage studies, corporate reputation and product image, media studies, financial industry, telecommunications, government research, employee relations and public issue research.

ORC is organized into Financial Services Group, Healthcare Research Center, Telecommunications Section and Organizational Research Group. ORC also specializes in multivariate data analysis and market modeling techniques. Several shared-cost surveys are available, including the every-other-weekly General Public Caravan and the quarterly Executive Caravan.

ORC operates a CATI-based system with 125 interviewing stations. Its technical center is a computer-based network that coordinates sample preparation and control, telephone interviewing, data processing and quality assurance. There are 190 full-time salaried employees in Princeton, with branch offices in New York, Washington, Chicago and San Francisco.

ORC this year is planning an expansion of its field and tab business to supplement its full-service research capabilities.

President-CEO Andrew Brown, 42, has an M.B.A. from Temple University and a B.S. from Iowa State University.

21 **Ehrhart-Babic Group**, Englewood Cliffs, N.J. Privately held corporation founded in 1959. Revenues in 1986 were $14.5 million, up 5.1% from 1985.

Louis Babic Jr.
Ehrhart-Babic Group

Ehrhart-Babic Group, with a full-time salaried staff of 97, specializes in custom and syndicated "in-store" research via two divisions: Ehrhart-Babic Custom Research, which uses scanner and traditional audit data to conduct sales measurement studies, including trend audits, controlled store tests and mini-markets across all major classes of retail trade; and National Retail Tracking Index, a syndicated database of regularly scheduled retail-observation audits in more than 8,000 stores nationally, including food, drug, mass merchandise, convenience and hardware/home center outlets. Ancillary services introduced in 1986 were the Annual Comprehensive Survey of 18,000 stores blanketing the U.S. and the Toy Store Observation Index in more than 1,100 stores in 20 metropolitan areas.

In 1987, the National Alcoholic Beverage Index (NABEX) will be spun off as an independent division of EBG. It will provide retail observation data quarterly in more than 2,800 off-premise outlets and semiannually in 3,100 on-premise accounts. The Ehrhart-Babic On-Line System will be expanded to support observation and movement data for both NRTI and NABEX.

Group president is Louis J. Babic Jr., 54, a graduate of Boston University, and chairman is Thomas A. Ehrhart, 62, a Pace University alumnus.

22 **National Analysts**, Philadelphia, founded in 1943 and since 1970 the survey research division of Booz Allen & Hamilton. Revenues in 1986 were $13.3 million, up 38.5% from 1985.

NA conducts custom studies, primarily strategic in nature, for both commercial clients and not-for-profit institutions, including federal, state and local governments. Most of the growth in 1986 was derived from assignments for commercial clients that accounted for approximately 65% of the revenue.

NA's commercial business is organized along industry practice lines, with professional staff specialists in each of the following areas: financial services, information/telecommunications,

Marshall G. Greenberg
National Analysts

pharmaceuticals and medical equipment, utilities, automotive and litigation support. In addition to basic survey research, the company offers group and individual depth interviewing, market segmentation and tradeoff analyses and multivariate modeling.

In 1986, NA expanded its capabilities for collecting survey data interactively on microcomputers and is now using portable laptops to interview respondents in their homes and offices.

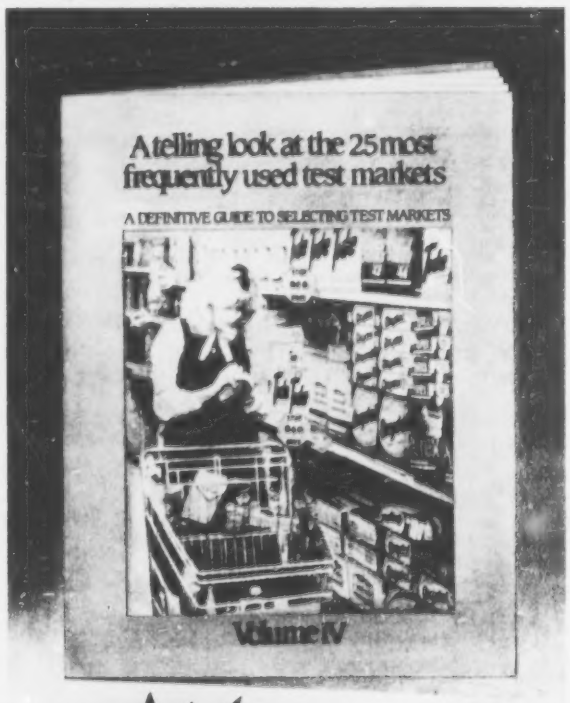
WHERE WILL YOU TEST YOUR PRODUCT...
and how much will it cost?



NEW EDITION!

If you have been confused by conflicting reports on the "best" test markets, and dreading the paperwork and research necessary to select your own test market, we may have the solution.

A TELLING LOOK AT THE 25 MOST FREQUENTLY USED TEST MARKETS, VOLUME IV is an expanded 36 page guide to selecting test markets. This newly updated study contains the research data and documented statistics you will want to review before selecting your test market. Such topics include:

- Why, when, where, and how to conduct a test.
- Basic questions with answers from the experts.
- How to evaluate and select a test market based on:
  1) Population
  2) Demographics
  3) Effective Buying Incomes
  4) Purchasing Patterns and how all of these compare to the national norm.
- Media Coverage, Cost and Control comparisons using a media mix with specific reach and frequency goals.

This free brochure also analyzes matched markets using demographic and geographic profiles, media coverage, market isolation and more. To receive your copy, send in the coupon below.

Please send me a free copy of your test marketing brochure.

cians, predicts market share and volume for new health care products. The underlying choice model is currently being extended in the development of forecasting models for other industries including financial services, utilities, telecommunications and transportation.

This year, NA plans to test and introduce a new PC-based interactive data analysis software package. The company has 52 full-time salaried employees and 70 full-time non-exempt employees in its Philadelphia and New York offices.

President is Marshall G. Greenberg, 51, who received his Ph.D. in mathematical psychology from the University of Michigan.

23 **Harte-Hanks Marketing Services Group,** River Edge, N.J. A unit within Harte-Hanks Direct Marketing, which in turn is one of five divisions of Harte-Hanks Communications. Founded in 1975. Research revenues in 1986 were $12.2 million, up 4.6% from 1985.

Included within this group are: RMH Research Inc., a full-service survey company specializing in communications and media research; National WATS Service, a telephone interviewing facility with 75 stations, some CRT-equipped; and Urban Data Processing, a Burlington, Mass.-based EDP service bureau that specializes in custom processing of U.S. Census data for marketing applications.

Richard Hochhauser
Harte-Hanks

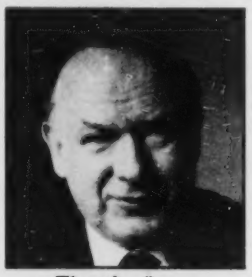
The Marketing Services Group is specializing more in direct marketing research applications, banking and communications/media research. There are 120 full-time salaried employees.

President of the Marketing Services Group is Richard Hochhauser, 42, with an M.B.A from Columbia University. He also is president of Harte-Hanks Direct Marketing.

24 **Mediamark Research,** New York. Founded in 1979; 80% owned by MAI plc., London. Revenues in 1986 were $12.1 million, up 26.6% from 1985.

MRI operates a syndicated/-product research service based on personal interviews with 20,000 adults each year regarding their exposure to advertising media and, via leave-behind questionnaires, purchase data on a broad line of products and services.

Clients—including agencies, advertisers, magazines, newspapers, broadcasters and cable networks—can have on-line access to 25 MRI reports. Also, data are linked to the PRIZM, ACORN and VISION geodemographic systems and the VALS psychographic system.



Timothy Joyce
Mediamark Research

MRI also produces special reports each year based on a two-year data base: a business-to-business report, the Upper Deck (affluent market), plus reports related to the top 10 local markets, including audience data on newspapers and broadcast stations.

In 1986, MRI announced the availability of a new microcomputer system called MEMRI (Micro Evaluation by Mediamark Research Inc.), which enables subscribers to process MRI and other data bases with the respondent data being held on site.

Early this year, MRI announced that its custom studies would be handled by a new division, the Custom House, specializing in studies of special markets, including the recontacting of MRI's existing annual sample to collect additional data.

NabScan Inc. (National Brand Scanning), acquired by MRI in 1985, announced in 1986 a new on-line service providing marketers with sales and price data for UPC-marked items on a weekly basis from a panel of 1,100 scanner-equipped supermarkets. Data are available on a national, regional or local basis.

MRI revenues include those of NabScan; together these organizations have 64 full-time, salaried employees in New York, Chicago and San Francisco offices. Chairman-CEO Timothy Joyce, 53, has a Ph.D. from Cambridge University. President-chief operating officer Alain J. Tessier, 53, has an M.A. from the University of Notre Dame.

25 **Data Development Corp.,** New York. Privately held corporation founded in 1960. Revenues for 1986 were $10.5 million, down 2.7% from 1985.

DDC is a full-service custom-survey organization with 84 full-time salaried employed in two offices: New York (DDC and New York Conference Center) and New Rochelle, N.Y. (the Conference of New Rochelle and the Telephone Center—70 stations, 60 CRT-equipped.)

DDC emphasizes custom research where design and analysis are critical components, such as strategy and market studies, attitude and usage, tracking studies, concept/product and copy testing. Proprietary services include COMBO (product testing), COPY II (copy strategy) and ADOPTER (pre-test market measurement system), a joint venture with Edward Tauber, University of Southern California. Launched in 1986 was "Total Brand Equity," a multivariate approach identify-

Call About Our Free PEMS Seminar

FINALLY.
A Price Elasticity Measurement System That Really Works...PEMS®

Pricing is a major concern among marketing executives who often depend on marketing research to provide the answers. Total Research Corporation's **PEMS®** (Price Elasticity Measurement System) accurately predicts the effect that price has on "real life" buying behavior.

PEMS uses a unique combination of state-of-the-art interviewing, experimental design theory, and analytical software to provide timely, accurate answers to such questions as:

- **How will my brand's sales change as its price changes?**
- **How will the prices of my competitors' brands affect my brand's sales?**
- **How will changing my brand's price affect my competitors' sales?**
- **How can I price new products/line extensions to maximize revenue?**
- **How can I maximize my brand's profitability through pricing strategy?**

Total Research Corporation, a full-service marketing research and consulting firm, has conducted **PEMS** studies for such major corporations as: CooperVision, Hallmark Cards, ICI Americas, Johnson & Johnson Cardiovascular, S.C. Johnson and Reynolds Metals.

YES, I'm interested in maximizing profitability through improved pricing strategies!

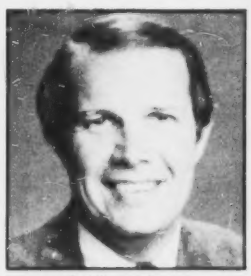
ing corporate equity.

DDC's newest division, Foodservice Research & Marketing, which specializes in institutional foodservice research, features a syndicated service, "MarketScore."

Jerry Rosenkranz is chairman and Joseph Goldstein is president CEO; both are 50 and graduates of City College of New York.

26 **Custom Research Inc.**, Minneapolis. Privately held corporation founded in 1974. Revenues in 1986 were $10.4 million, up 7.2% from 1985.

This custom-survey company with 75 full-time salaried employees (plus 175 part-timers) is organized by divisions: Consumer Research, Medical Research Bureau, Custom Research Telephone (central telephone WATS interviewing, CRT-equipped, with 50 stations), Corporate Services, Custom Research International, and —new in '86—Services, specializing in marketing research for financial institutions, the travel/leisure industry and telecommunications. CRI has four offices, including San Francisco, which opened in 1986.



Jeffery Pope
Custom Research

During 1986, CRI introduced CRT interviewing in 58 mall locations to conduct personal interviews. A regularly scheduled omnibus survey, CRITERION, is used for concept testing.

CRI is managed by two partners, Jeffery L. Pope, 46, who graduated from the Kellogg School of Management at Northwestern University, and Judith S. Corson, 44, a graduate of the University of Minnesota.

27 **Decision/Making/Information**, McLean, Va. Privately held corporation founded in 1969. Revenues in 1986 were $10.4 million, up 55.2% from 1985.

This survey company, with 64 full-time employees (43 of whom are salaried exempt) and 235 part-time employees, is organized around five Strategic Business Units: marketing research, political research, public affairs research (new in 1986), field and data processing.

In addition to the McLean facility, D/M/I has client-service offices in Chicago (new in 1986), Princeton, N.J. and Santa Ana, Cal. The company has a permanent telephone-interviewing facility in Provo, Utah (110 stations, 130 during the political election season).

In 1986, D/M/I had a record level of political research volume. In addition to major work for the White House and Republican National Committee, D/M/I was pollster of record for 65 GOP political campaigns including senatorial, gubernatorial, congressional and state legislative races. Marketing research volume also increased in 1986 and has become a major growth area.

In 1987, D/M/I will introduce two new services: Meccas, a personal values research system for developing and testing advertising strategy, and a research symposium for top corporate leaders called "The Presidents' Quorum."

Founder-chairman Richard B. Wirthlin, 56, has a Ph.D. from

Richard Wirthlin
D/M/I

the University of California at Berkeley. He is best known as President Reagan's political strategist. Thomas B. Hughes, 42, president-chief operating officer, has an M.S. from Wichita State University.

28 **Decision Research Corp.**, Lexington, Mass. Wholly owned subsidiary of Temple, Barker & Sloane founded in 1971. Revenues in 1986 were $9.8 million, up 16.7% from 1985.

This full-service marketing-research company specializes in custom ad hoc survey work for consumer goods and business-to-business marketers. Industry specialization includes computer, telecommunications, professional service companies (including advertising agencies), financial, healthcare, travel and leisure, package goods, utilities and media and direct marketing.

Robert Duboff
Decision Research Corp.

DRC also conducts market-research training seminars emphasizing the interaction between qualitative and quantitative techniques. In addition, DRC

ON-AIR LAB

The Closer You Look, The More You Find To Like.

Other on-air commercial testing services are just now starting to offer some of the advanced features that have been available from Westgate Research's ON-AIR LAB for years. But ON-AIR LAB continues to offer you the state-of-the-art product. Look closely and see why.

A Bigger Share of Each Respondent
Instead of sharing your test with as many as five other clients, as you might with other services, you'll be one of only three clients with ON-AIR LAB. This means respondents have twice the time and twice the attention span to answer questions about your commercial. And, you have a greater opportunity to customize your test and add special questions.

WATS Interviewing Consistency And Control
Callback interviews are conducted from our WATS center by a single, trained interviewing staff. You are assured of the same high quality and consistency of interviewing in your on-air commercial tests that you demand in your other telephone studies.

"Smart" Diagnostics
One of our diagnostic measures tells you how well a commercial performs the critical task of linking the impressions it projects with the sponsor's name. Another tells clients with strong, on-going campaigns whether people are recalling their campaign or the specific test commercial. Still others provide information about main point interpretation, overall viewer opinion of the commercial and specific likes and dislikes.

A Persuasion Measure That Doesn't Compromise Your Recall Test
Our unique, post-exposure persuasion measure doesn't require respondents to express brand preferences prior to viewing, eliminating the risk of viewers becoming brand sensitized and influencing commercial recall.

Confidential Markets For Top-Secret Testing
Sometimes you don't want the whole world to know you're testing a commercial for a new product or a new campaign. ON-AIR LAB makes available confidential markets where your commercial test is unlikely to be monitored and reported.

ON-AIR LAB continues to advance the state-of-the-art in commercial testing while maintaining the best absolute dollar value, as well. You'll be pleasantly surprised at how much lower our cost is than that of other services. To take an even closer look at ON-AIR LAB, just write or phone for our free brochure.

ON-AIR LAB

State-Of-The-Art On-Air Testing.

Top research companies

conducts jury-simulation work for legal clients, running mock trails during which arguments and appeals are evaluated.

DRC has 52 full-time employees in three offices: Lexington, Mass., Palo Alto, Cal., and New York (through the acquisition of Lieber Attitude Research). The company has a 36-station WATS central telephone facility.

This year the company plans a shared-cost survey service based on chief financial officers and one, The Week-End, pertaining to leisure-time activities.

General manager is Robert Duboff, 38, who received his J.D. from Harvard Law School.

29 Gallup Organization, Princeton, N.J. Privately held corporation founded in 1935. Revenues in 1986 were $9.7 million, up 13.1% from 1985.

This company, best known for the syndicated (100 newspapers) Gallup Poll column, has 140 full-time employees, some located in a WATS telephone facility with 72 stations near Princeton, N.J.

George H. Gallup Jr.
Gallup Organization

Gallup also specializes in quantitative studies and public opinion research. About half of this work is custom ad hoc; the rest comes from syndicated or shared-cost surveys in the areas of financial services, packaged goods, video products, health care, public policy and book publishing.

The company collects data through face-to-face interviewing (national sample, 360 PSUs and about 50,000 interviews a year) and telephone interviewing.

During 1986, Gallup entered a partnership with Applied Science Group, Waltham, Mass., to market EYE-TRAC RESEARCH, an eye-movement measurement technology analying readership of print materials and TV commercials.

Co-chairmen are George H. Gallup Jr., 58, a graduate of Princeton University, and Alec M. Gallup, 56, a graduate of the University of Iowa. Both are sons of the founder. Joint executive officers are Andrew Kohut, 44, a graduate of Seton Hall University, and Leonard A. Wood, 47, who has an M.B.A. from Rider College.

30 Market Opinion Research, Detroit. Privately held corporation founded in 1941. The company's revenues in 1986 were $9.4 million, up 45% from 1985.

This survey research company is organized by divisions: consumer and industrial marketing research; media (especially newspaper) studies; social and public policy research; health care; public utilities; and political.

Because Market Opinion Research president Robert N. Teeter is a prominent Republican political pollster/consultant (Vice President Bush is a client), there is a considerable bump in MOR survey volume during election years, as was the case in 1986.

Frederick P. Currier
Market Opinion Research

MOR has 80 full-time employ-ees, 55 of whom are salaried exempt, plus 150 part-timers. During 1986, MOR opened a fourth central location telephone interviewing facility in Indiana; in total, there are 100 stations, 80 CATI-equipped.

The company has a client service office in Washington.

Chairman-CEO Frederick P. Currier, 63, received his M.A. from the University of Illinois. President Robert N. Teeter, 48, received his M.A. from Michigan State University.

31 Admar Research, New York. Founded in 1960 and since 1985 a wholly owned subsidiary of Sprigg Lane Investment Corp. Revenues in 1986 were $9.4 million, up 5.6% from 1985.

Revenues include those from Market Trends, New York, an affiliated field and tabulating house using a central WATS facility with 28 stations.

Henry Ostberg
Admar Research

Admar specializes in tracking surveys, product testing and advertising studies employing copyrighted methodologies. Including Market Trends, there are 52 full-time employees.

Chairman-president Henry D. Ostberg received his Ph.D. from Ohio State University.

32 Starch INRA Hooper, Mamaroneck, N.Y. Public corporation traded over the counter; founded in 1923. Revenues in 1986 were $9.1 million, up 2.8% from 1985.

Jay Wilson
Starch INRA Hooper

Revenues for Starch, best known for print ad and print media audience studies, include those of the Roper Organization, New York, the Hooper Telephone Interviewing Service, being expanded to 55 stations, and participation in the INRA network of affiliated survey research companies in 24 countries.

SIH has 59 salaried, full-time exempt employees and a total staff of about 150.

During 1986, SIH occupied its completely renovated headquarters building in Mamaroneck and launched an international omnibus service, INRABUS, in eight European countries plus the U.S. During 1987, INRABUS will be expanded to additional countries.

President-CEO of SIH is William J. (Jay) Wilson, 50, a graduate of Yale University. He also heads the INRA organization.

33 National Research Group, Los Angeles. Privately held corporation founded in 1978. Revenues in 1986 were $8.9 million, up 9.9%.

This survey research company, which works almost entirely for the movie industry, specializes in appraising entertainment properties (to audiences of from 100 to 400 moviegoers), studies to develop advertising strategy, and tracking for awareness, imagery and interest.

Catherine Paura
National Research Group

Through offices in London and Tokyo, NRG conducts studies in 12 market countries, with

"VERBATIM"

these overseas activities accounting for 11% of the company's revenues.

There are 200 full-time employees, and in Los Angeles NRG maintains a central telephone interviewing facility with 80 stations, 60 WATS lines.

Co-founder Joseph Farrell, 51, is a graduate of Harvard Law School; he serves as chairman-CEO. Co-founder Catherine Paura, 36, has a B.A. from Brooklyn College; she serves as president-chief operating officer.

34 **McCollum/Spielman Research,** Great Neck, N.Y. Privately held corporation founded in 1968. Revenues in 1986 were $8.4 million, down 2.3% from 1985.

MSR activities are organized by division:

1. AC-T TRIAD—MSR's multi-region, central location advertising research methodology, which to date has been used to study more than 14,000 TV commercials and to develop on-air normative data for clutter awareness, communication, attitude shifts and diagnostics for 1,738 brands in 249 product categories. There are two evaluation models: PAMS (Potential Attitude Motivation Shift), which provides a perspective of how a brand's advertising performs relative to its position in the category, and AD-SIM (Advertising Weight Simulation Model) which addresses this question: "How will brand share and volume be affected as a function of specific advertising and media weight?"

2. PROLOG is MSR's mall research methodology, designed for evaluating advertising, which

Harold M. Spielman
McCollum/Spielman

provides frame-to-frame, real-time reaction to TV commercials, followed by delayed playback of a respondent's non-verbal response to the advertising stimulus.

3. Child Research Services (CRS), which specializes in one-on-one, focus group and large sample studies among children, teens and parents. Studies include communications research, product/taste tests, concept evaluation tracking and parent-child interaction analysis.

Various MSR services now are available in Japan (through International Creative Marketing) and in the German Federal Republic (through GfK-Nuremberg).

The company has 90 full-time salaried employees in four cities.

Chairman of MSR is Donald H. McCollum, 64, who received an M.A. from the University of Denver. CEO Harold M. Spielman, 60, received a B.S.S. degree from City University of New York.

35 **Guideline Research Corp.** New York, privately held corporation founded in 1969. Revenues in 1986 were $7.5 million, up 15.4% from 1985.

GRC, with more than 50 full-time, salaried employees in New York and Los Angeles, includes Guideline Research, Topline Research, Guideline-West and Tabline Tabulating Services. The latter two were started in 1985.

Norman Passman
Guideline Research

GRC specializes in custom market research: concept/product tests, tracking and trade studies, copy research, strategic and image (product and corporate) studies, trademark litigation and advertising claim substantiation studies, as well as the use of magnitude estimation for product development and optimization.

This year, GRC will introduce FLIP (Finding Low Incidence People), a service for conducting research in low incidence categories at a significantly lower cost and in less time than presently available conventional methods.

GRC is jointly headed by president Norman Passman, 54, who has an M.B.A. from Long Island University; Jay Friedland, 47, who has an M.S. from Purdue University; and Leonard Resnicoff, 41, who received his M.B.A. from City University of New York.

First in a series of discussions in the M/A/R/C Symposium.

A Candid Discussion About Database Marketing.

Q: What is the difference between database marketing and traditional direct marketing?

A: Database marketing is the next evolution of direct marketing. The primary difference is the ability to communicate more precisely with different market segments and incorporate the consumer response back into the database. Once the response information becomes part of the file it can be used for segmentation purposes in creating the next direct marketing program. The advances in the data processing industry over the last 10 years have made storing of large amounts of information about prospects and customers much more affordable. The real magic is in the analysis of the data and its application to a particular marketing problem.

Q: I currently employ targeting tactics in my media buys. How will this be different in a database marketing environment?

A: It'll give you the ability to communicate more precisely with identified market segments. Analysis of promotion responders can yield strategic marketing direction.

So, the collective intelligence of the database improves with use. By appending the database with additional information from previous promotions or database overlays, targeting can be refined to much higher levels. Each new promotion or database overlay added to your consumer database provides more marketing variables to segment market niches that have a higher propensity to respond to your offer.

Q: What kind of marketing applications should be considered for database marketing?

A: Categories which have a high degree of switching, are mature, or have well-defined niches are excellent candidates. Examples of programs which work well in a database strategy are competitive and continuity promotion programs, frequent traveler and shopper programs, sales lead generation and business-to-business direct marketing programs.

Q: If you had to describe the biggest difference between M/A/R/C Database Marketing and others, what would it be?

A: There is a big difference between just collecting information and knowing what to do with it. The most important difference is our ability to leverage over 25 years of marketing and consumer research experience to design, develop and implement marketing programs that best suit your needs. It becomes a matter of knowing what to ask, and then knowing what to do with the answers. Database marketing allows you to communicate with each customer on an individual basis and create a dialogue that will continually enrich your market intelligence. As an example, we very often uncover information that points to needed changes in the marketing mix. So, the results of the interpretation of the information can optimize strategic marketing programs. M/A/R/C can also identify cross-selling opportunities, either for existing products and services or for new introductions. And, you can use it as a tool to outmaneuver your competition's marketing strategy in as many or as few markets as you choose. With M/A/R/C Database Marketing, pre-emptive planning will become the norm because you will have quantified knowledge of the category consumer base.

Q: Isn't database marketing going to make an already expensive advertising vehicle even more so?

A: The true benefit of database marketing is that it optimizes each marketing program that you run. As mass media costs rise and response to these programs gets harder to quantify, the need for measurable marketing solutions increases. The ability to fine tune your targeting, so you only reach those prospects which have a high probability of responding, can dramatically reduce your costs while improving your volume. M/A/R/C can provide a turnkey test of database marketing with your brand or service for less than $100,000.

Q: I know M/A/R/C has a great reputation in custom research, but I imagine you use a service bureau for database management. Don't you?

A: No. Most direct marketing agencies do use a service bureau. M/A/R/C is unique. Information has long been our business and our state-of-the-art computer capabilities enable us to do everything in-house. We think it is the only way to offer clients a formula for success where one plus one equals four.

M/A/R/C has a long history of proactive client service. We have been dedicated for the past two decades to working with clients to understand and create the best product or service mix to sell in changing market conditions. This expertise and dedication to service are carried forward into our newest service, database marketing. When you think about it, an integrated system customized to meet your individual needs – a system that's capable of revolutionizing your marketing strategy – is a powerful concept.

Q: OK. You've got my attention. How do I find out more about M/A/R/C Database Marketing?

A: Call Ken Orton at 1-800-527-2680 or return the coupon.

☐ *Yes, I want to arrange an interview to find out how effective M/A/R/C Database Marketing can be for my company.*
☐ *I'm interested, but before we meet, call me at my office.*

The Artistry of Marketing. It Works.

Top research companies

36 **Response Analysis Corp.**, Princeton, N.J. Privately held corporation founded in 1969. Research revenues in 1986 were $6.9 million, down 9.3% from 1985.

Revenues do not include RAC's ARRO Division in Bethesda, Md., specializing in human factors and performance evaluation/skill testing procedures.

RAC concentrates on commercial research (especially multisponsor and custom studies in financial services, healthcare and telecommunications), in litigation support, in large-scale survey research projects for government agencies, and, with its Washington Division, in studies of organizational effectiveness for companies and government agencies. During 1986, RAC was awarded a $14.2 million contract by the Energy Information Administration of the U.S. Department of Energy.

Herbert I. Abelson
Response Analysts

RAC maintains a telephone interviewing facility in Princeton and in 1986 opened a second telephone facility in Hamilton Township, N.J. There are more than 100 full-time employees.

CEO Herbert I. Abelson, 61, received his Ph.D. from the University of Maryland.

37 **J.D. Power & Associates**, Westlake Village, Calif. Privately held corporation founded in 1968. Revenues in 1986 were $6.1 million, up 5.2% from 1985.

J.D. Power
J.D. Power & Associates

Power is a full-service marketing information/research and consulting company specializing in the domestic and international automotive market. It conducts single-client proprietary research as well as independently funded subscriber surveys.

Besides consultancies, other activities include annual owner-satisfaction surveys of passenger cars and light trucks; sponsorship of the Super Dealer Roundtable, consisting of the top U.S. new car dealers; and professional conferences for allied industries.

Two publications—Power Report and the Power California Market Report—are widely read in the automotive industry. Their content, based on survey data, is quoted in trade and mass market media.

In 1986, Power conducted its first light truck media study and announced plans to link with Data Resources Inc. (DRI) in some joint venture forecasting projects. There are 33 salaried, exempt employees and 14 salaried, non-exempt employees.

President is J. David Power III, 55, who holds an M.B.A. from the Wharton School, University of Pennsylvania.

38 **Ad Factors/Millward Brown**, Glen Ellyn, Ill. Founded in 1975; since 1986 a wholly owned subsidiary of Millward Brown Plc., Warwickshire, England. Revenues in 1986 were $5.9 million, unchanged from 1985.

Ad Factors specializes in custom consumer and industrial

Robert Meyers
Ad Factors

survey research through three client service offices: Glen Ellyn, Monroe, Conn. and Riverside, N.J. There is a central telephone interviewing operation in each of these offices plus a fourth in Rockford, Ill. Ad Factors has more than 200 WATS dialing stations, 110 of them CRT-equipped. Ad Factors also conducts mall intercept studies. There are 300 employees, 42 of whom are full-time, salaried.

Ad Factors conducts continuous tracking studies, large-scale category profile studies, test market evaluations, in-home new product testing and custom opinion/attitude/viewership studies. In 1986, before being acquired by Millward Brown, Ad Factors divested its Telefactors Marketing Services Division, which specialized in telemarketing.

This year, Ad Factors began U.S. marketing of a continuous tracking system originally developed by Millward Brown for use in the U.K.

President-CEO of Ad Factors/Millward Brown is Robert D. Meyers, 38, who has a B.S. degree from Loyola University, Chicago.

39 **Marketing Research Services Inc.**, Cincinnati. Privately held corporation founded in 1973. Revenues in 1986 were $5.8 million, up 13.7% from 1985.

This full-service marketing research company provides custom research studies to consumer packaged goods/industrial manufacturers and service organizations. MRSI recently formed a unit specializing in research for service industries including grocery/drug retail, fast food, travel and energy.

Edward Horgan
MRSI

MRSI data collection capabilities include a 125-station, all CRT-equipped WATS center, a high-traffic mall facility in Cincinnati and a staff of traveling supervisors for auditing subcontracted studies across the U.S. Plans call for expansion of this data collection network during 1987.

In-house Digital VAX computers drive Quantime software for CRT interviewing and tabulation/statistical testing. During 1986, MRSI introduced two new applications of technology: Access, an interactive tabulation package that allows clients to dial into the company's computers for real-time topline information and cross-tabs and Autodial, a computerized sample management and mechanized telephone dialing system that enhances productivity by as much as 50%.

MRSI employs more than 90 salaried, full-time personnel (50 exempt) and 200 part-time employees in the company's recently expanded and remodeled 26,000 square foot headquarters in Cincinnati.

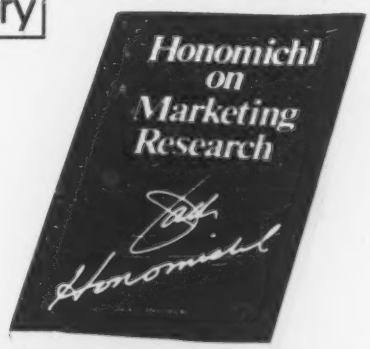
Founder Edward D. Horgan,

Advertising Age Library

Honomichl on Marketing Research

By Jack Honomichl

The definitive volume to put you ahead of the marketing game



You know Jack Honomichl. He's president of Marketing Aid Center, Inc., Advertising Age's lead marketing research writer and author of MARKETING/RESEARCH PEOPLE: THEIR BEHIND THE SCENES STORIES.

Now, his new book HONOMICHL ON MARKETING RESEARCH is hot off the press—bringing to life important case histories with personal insights of the people who made them happen. Alfred Politz, A.C. Nielsen, Sr., the Princeton Research Community. Case histories on Ore-Ida, Arm & Hammer, ERIM Information Services, and the first look at the behind-the-scenes strategies of the Reagan/Mondale campaigns. Plus there are tables and statistics, portraying the major U.S. and world research companies, levels of research spending and illustrations of the research functions in top U.S. agencies.

You'll want copies of HONOMICHL ON MARKETING RESEARCH for yourself, your staff, your clients, prospects—for an in-depth look at how well-conceived, well-executed, well-heeded marketing research contributes to product success. 6" × 9", 352 pages.

Code #3096-0 Hardbound $29.95
Code #3092-8 Paperback $19.95

"Jack Honomichl has the gift to write a real 'page turner.' If there ever was to be a story of the world of market research, it would have to have been written by Jack—and here it is."
David K. Hardin
Chairman of the Board, Market Facts, Inc.
Past president, American Marketing Assn.

"I find most valuable how Mr. Honomichl has captured the spirit of the marketing research business . . . contains information which we can get nowhere else."
Michael J. Naples
President, The Advertising Research Foundation
Former Director of Marketing Research, Lever Bros. Co.

"Nobody but Jack Honomichl could have written this book . . . Jack has covered marketing and reasearch aggressively for many years."
David Berger
Senior Vice President, Corporate Director of Research, Foote, Cone & Belding

Top research companies

44, is president/CEO; he did graduate work at Xavier University.

40 **Oxtoby-Smith,** New York. Privately held corporation founded in 1956. Revenues in 1986 were $5.8 million, up 16% from 1985.

This survey research company, with 65 full-time, salaried employees, is distinctive in that about 60% of its revenues come

Joseph Smith
Oxtoby-Smith

from clients for whom O-S assumes major responsibility for the consumer research function, both as consultant and research supplier. Among such clients currently are American Motors, Block Drug, MCI Telecommunications and Seagram.

The balance of O-S revenues comes from custom ad hoc survey projects, consultation, and research and testimony relating to legal matters, including trademark litigation and advertising claim substantiation.

On-site facilities include a central telephone interviewing facility with 20 stations, all CRT-equipped, and a focus group operation.

President-CEO Joseph Smith, 60, received his Ph.D. from the University of Iowa.

41 **Birch Research Corp.,** Coral Springs, Fla. Founded in 1978; a privately held corporation but, effective last June, minority interest in Birch was acquired by VNU/Amvest, the U.S. subsidiary of United Dutch Publishing Companies (VNU). Revenues in 1986 were $5.8 million, up 25.4%

Thomas C. Birch
Birch Research

from 1985.

Birch's main activity, through Birch Radio Ratings, New York, is the development of telephone interview-derived radio audience ratings; 96 markets are measured on a continuous, year-round basis, with another 134 measured periodically.

All interviewing is conducted through three centralized WATS centers (Coral Springs and Sarasota, Fla., and new in 1987, San Antonio), which have more than 200 stations. There are about 150 salaried employees, plus about 450 part-time staffers.

Regional sales offices are located in Los Angeles, Chicago, Dallas and Atlanta. In September 1986, Birch moved into a $1.5 million corporate headquarters in Coral Springs.

During 1986, Birch Radio started 28-day measurement in major markets, changed to a seasonal quarter reporting cycle and beefed up weekend sample sizes. Also, Birch started to use Nielsen's NSI Total Telephone Frame samples in all measured markets.

This year, Birch plans to put all data collection on CATI systems.

Founder, chairman and CEO of Birch is Thomas C. Birch, 34, a graduate of Cornell University. President-chief operating officer is William P. Livek, 33, a graduate of Southern Illinois University.

42 **Newman-Stein,** New York. Privately held corporation founded in 1974. The company's revenues in 1986 were $5.3 million, up 4.9% from 1985.

Newman-Stein consists of the main offices in New York, the newly formed Newman-Stein, Inc., a California company located in San Francisco, and

Lawrence Newman
Newman-Stein

Shelf Power, a standardized package design testing company co-founded in 1986 with DGM Inc.

The company has 50 full-time salaried employees.

NSI specializes in providing consumer research services in the areas of concept, product, package and advertising testing, tracking studies, and all elements of strategic research—attitude, image and market segmentation studies. The company also offers complete qualitative research services, including focus groups and one-on-ones.

NSI is jointly headed by president Lawrence Newman, 47, a graduate of City College of New York, and William Stein, 48, who holds an M.S. degree from Yeshiva University.

The extraordinary growth is illusory because the list is heavily weighted by four organizations that have a large percentage of their volume coming from outside the U.S.

43 **Field Research Corp.** San Francisco. Privately held corporation founded in 1946. Revenues in 1986 were $5.2 million, up 28% from 1985.

This full-service custom survey company has 50 full-time salaried employees in two offices —San Francisco and Los Angeles—of whom 18 comprise the professional staff.

Most FRC clients come from

Aaron Levy
Field Research Corp.

these fields: public utilities, oil companies, financial services, health services, consumer products and services, print and broadcast media, retail chains, high-tech companies, state government agencies and law firms.

FRC uses all systematic data gathering methods. It maintains central location telephone centers in San Francisco and Los Angeles with 75 interviewing stations, the majority CATI-equipped. Its state-of-the-art data processing installation is centered on two VAX 11/750 computers, the UNIX operating system and a variety of multivariate and other software programs.

During 1986 Field Research enlarged its senior and intermediate professional staff, added a second VAX 11/750 computer to accommodate greatly increased data processing and CRT interviewing volume, and significantly expanded its graphics and word processing capabilities. The San Francisco headquarters will be enlarged this year.

The Field Institute operates the California Poll, a nationally respected public opinion news service in continuous operation since 1947. The institute's activities account for about 10% of FRC's annual billings.

Marvin Field, 65, is founder and chairman of FRC, and Aaron Levy, 52, a graduate of San Jose State University, is president-CEO.

44 **Lieberman Research West,** Los Angeles. Privately held corporation founded in 1973. Research revenues in 1986 were $5.2 million, down 12.7% from 1985.

Included this year are LRW revenues from a subsidiary, Interviewing Service of America. Revenues from telemarketing operations are not included.

A full-service, custom re-

Michael Liebergall
Lieberman Research West

search organization with 40 full-time salaried employees, LRW conducts copy, concept and product testing, tracking and strategic market studies. It specializes in package goods, fast food, healthcare and the entertainment industry (pre-testing movie and TV pilots).

ISA, a 50-station WATS interviewing organization, will expand its capabilities to become a full-service field and tab operation; CRTs are now being installed. There are plans to add a focus group facility in Los Angeles this year.

LRW is managed by two partners: Chairman Arnold Fishman, 42, a graduate of Brooklyn College, and President Michael Liebergall, 40, who attended New York University. Seymour Lieberman is a consulting partner; he received his Ph.D. from the University of Michigan.

45 **Kapuler Marketing Research,** Arlington Heights, Ill. Privately held corporation founded in 1974. Revenues in 1986 were $5.1 million, up 6% from 1985.

Kapuler's full-time salaried staff of 35 (plus 250 part-timers)

Stanley Kapuler
Kapuler

provides a broad range of quantitative and qualitative custom marketing research services. UniFocus, a one-on-one, in-depth interviewing and analytical system, is used for advertising and campaign development and analysis.

Later this year, Kapuler plans to introduce TelePanel, a national probability telephone-generated base of households screened for demographics, category usage and willingness to participate in telephone marketing research.

The Kapuler Survey Center has 120 WATS stations; there is also extensive use of mall intercept interviewing. Kapuler also has an office in Los Angeles.

President Stanley J. Kapuler, 46, received his M.B.A. from the University of Chicago.

46 **Total Research Corp.,** Princeton, N.J. Founded in 1975; since March, 1987, a public company listed NASDAQ. Revenues in 1986 were $5.0 million, up 48.4% from 1985.

This custom ad hoc survey research company with 64 full-time salaried employees began in 1986 to emphasize proprietary, standardized packages of advanced statistical research and analysis techniques, specifically:

PEMS (Price Elasticity Measurement System), to evaluate pricing strategies.

AD/OPT (Advertising Optimization), the modeling of various complex advertising platforms.

Lorin Zissman
Total Research Corp.

CSM (Competitive Share Model), to predict the effect of product line extension or product elimination on a client's own market shares and those of competitors.

COMPASS (Components Assessment), to analyze the structure of a competitive market and determine the effect product attributes have on purchase decisions.

TRC operates two central telephone interviewing facilities (Princeton and Tampa, Fla.), which total 76 CATI-equipped stations. There are focus group facilities in both offices.

Founder and president Lorin Zissman, 56, is a graduate of Temple University. AA

Executive editor Robert Goldsborough coordinated this Research Business Review.

1987 EDITION

FOREIGN AGENCY REPORT

Dentsu regains top ranking

An Advertising Age roundup

Riding the yen's surge against the dollar, Dentsu Inc. has overtaken Young & Rubicam as the world's largest advertising agency.

Dentsu reported 1986 gross income of $681 million on billings of $5.31 billion. Y&R came in second after two consecutive years in the No. 1 spot, reporting $628.4 million gross income on billings of $4.19 billion in the 25th annual Advertising Age Foreign Agency Income survey. The survey includes 970 agencies in 72 countries.

Saatchi & Saatchi Compton Worldwide moved from sixth place to third, with gross income of $490.5 million on billings of $3.32 billion. S&SC figures include McCaffrey & McCall and other U.S. shops acquired by parent Saatchi & Saatchi Co. PLC.

In the race for billings leadership among agency holding companies, Saatchi & Saatchi PLC, comprising S&SC, Ted Bates Worldwide, Backer & Spielvogel, DFS Dorland Worldwide and U.K.-based KHBB (formerly KMP Humphreys Bull Barker), supplanted Interpublic Group of Cos. as the leader with gross income of $1.21 billion on billings of $8.26 billion.

Interpublic comprises McCann-Erickson, SSC&B:Lintas Worldwide, Campbell-Ewald Worldwide, Dailey & Associates and 70% of Lowe Marschalk (30% is held by Lowe Howard-Spink & Bell PLC). It had gross income of $822.4 million on billings of $5.55 billion.

From 1973 to 1983, Dentsu ranked as the world's biggest agency, measured in dollars. It lost the ranking to Y&R in 1984 by a slim margin of $11.6 million in gross income and fell to No. 3 in 1985 as the dollar strengthened compared with other currencies.

In 1986, Ted Bates Worldwide held onto its No. 4 ranking with gross income of $486 million on billings of $3.26 billion.

Fifth place again belonged to J. Walter Thompson Co., which had gross income of $471 million on $3.14 billion in billings.

Ogilvy & Mather Worldwide's 1986 ranking of sixth place, down from second in 1985, was due to a change in O&M's reporting procedure. The 1985 ranking was actually for the Ogilvy Group, a holding company that includes Scali, McCabe, Sloves and Cole & Weber. O&M Worldwide, on a year-to-year basis, had a healthy 14.2% growth in gross income and a 14.6% increase in billings.

BBDO Worldwide and McCann-Erickson held onto their No. 7 and No. 8 rankings, respectively. BBDO's gross income was $445.1 million on $3.26 billion in billings; McCann-Erickson had $427.7 million in gross income and billings of $2.85 billion.

Doyle Dane Bernbach and Needham Harper Worldwide, which last year as separate companies appeared in 13th and 19th places, respectively, joined forces as DDB Needham Worldwide and landed in the No. 9 spot, showing gross income of $375 million on $2.56 billion in billings. DDB Needham edged out last year's ninth-largest agency, D'Arcy Masius Benton & Bowles, which rounded out the top 10 with gross income of $336.3 million on $2.26 billion in billings.

U.S. agencies with a large percentage of billings generated by overseas units did well last year. For example, HCM (49% owned by Y&R and 51% by French group Eurocom), with 75.4% of its billings abroad, moved to No. 20 from No. 25.

As was the case in 1985, TBWA Advertising had the largest percentage of billings abroad in 1986, 76.9%, compared with 73.4% a year earlier. It advanced in the rankings one step, from No. 34 to No. 33.

Agencies breaking into the top 50 this year included Asahi Advertising, Tokyo, at No. 45; Hill, Holliday, Connors, Cosmopulos, Boston, at No. 48; and W.B. Doner & Co., Southfield, Mich., at No. 50.

Among agency holding companies, Omnicom Group—which includes BBDO and DDB Needham—ranked No. 3 in 1986 with $820.1 million in gross income on $5.82 billion in billings. JWT Group (which, besides the Thompson agency, owns Lord Geller Federico Einstein) was the fourth-largest, and Ogilvy Group was No. 5.

Rounding out the top 10 agency holding groups were Eurocom, Lowe Howard-Spink & Bell, WCRS Group, Alliance International and Mojo MDA. Advertising Age's International Agency of the Year *(see story, Page 1)*.

WCRS Group, based in the U.K., began its rapid international growth last year with the purchase of Della Femina, Travisano & Partners and HBM/Creamer in the U.S. Della Femina, No. 43 in 1985, fell out of the top 50 this year and HBM/Creamer dropped from No. 36 to No. 46.

Next year's rankings will reflect the February purchase by WCRS of The Ball Partnership in the Asia/Pacific region from O&M for $11 million (AA, Feb. 16).#

AGENCY INCOME REPORT

This year Advertising Age has added a column in the country charts indicating equity holdings by multinational agencies. The abbreviations used in this column translate as follows:

MJ—majority owned, 51% to 100%
MN—minority owned, 1% to 50%
NE—no equity—affiliation or association
NA—not applicable—locally owned
JV—joint venture—50/50

World's top 50 ad agency groups in 1986

Included in figures:

[1]**Young & Rubicam**: HCM (49%), DYR (50%), Wunderman Ricotta & Kline, Sudler & Hennessey, Stone & Adler, Creswell, Munsell, Fultz & Zirbel.

[2]**Saatchi & Saatchi Compton Worldwide**: McCaffrey & McCall, Rumrill-Hoyt, Klemtner Advertising, Fairfax Advertising, Cochrane Chase Livingston. The holding company, Saatchi & Saatchi plc, reported world gross income of $1.21 billion on billings of $8.26 billion for 1986.

[3]**Ted Bates Worldwide**: William Esty, Campbell-Mithun, AC&R Advertising, Diener/Hauser/Bates, Kobs & Brady Advertising, Sawdon & Bess Advertising, Stern Walter/Earle Ludgin.

[4]**J. Walter Thompson Co.**: Brouillard Communications.

[5]**Ogilvy & Mather Worldwide**: Ogilvy & Mather Direct Response, Rolf Werner Rosenthal.

[6]**BBDO Worldwide**: Tracy-Locke, Doremus Porter Novelli, Ingalls Quinn & Johnson, MARCOA DR Group, Lavey/Wolff/Swift, Frank J. Corbett Inc., Blair/BBDO, Franklin Spier Inc., Caravetta Allen Kimbrough/BBDO.

[7]**McCann-Erickson Worldwide**: Part of the Interpublic Group of Cos., New York, which reported world gross income of $822.4 million on billings of $5.55 billion.

[8]**DDB/Needham Worldwide**: Cargill Wilson & Acree, Baxter, Gurian & Mazzei, Kallir, Philips, Ross.

[9]**D'Arcy Masius Benton & Bowles**: Medicus Intercon International.

[10]**Foote, Cone & Belding Communications**: Albert Frank-Guenther Law, Vicom/FCB.

[11]**Grey Advertising**: Gross Townsend Frank Hoffman.

[12]**SSC&B:Lintas Worldwide**: Part of Interpublic Group of Cos. (see footnote 7)

[13]**DFS Dorland Worldwide**, fully owned by Saatchi & Saatchi plc.

[14]**Campbell-Ewald Worldwide**'s operations are completely U.S.-oriented after having divested themselves of overseas operations to Lowe Marschalk last year. Both agencies are part of the Interpublic Group of Cos.

[15]**Roux, Seguela, Cayzac & Goudard**: includes offices in Austria, Belgium, France (Paris and regional offices), Germany, Netherlands, Italy, Spain, Sweden, Switzerland, the U.K. Also, RSCG Export, which does business in Africa, the Middle East and French Caribbean) and Creative Business International.

[16]**Scali, McCabe, Sloves**: Martin Agency, Fallon McElligott.

[17]**Lowe Marschalk Worldwide** Interpublic New York, holds 70% equity; Lowe Howard-Spink & Bell PLC, London, has the other 30%. Included: Lowe Howard-Spink U.K., and offices in Australia, Austria, Belgium, Canada, France, Germany, Italy and Netherlands.

[18]**I&S Corp.**: Formerly Dai-Ichi Advertising, Tokyo, which merged Oct. last year with SPN Co., a communications and sales promotion company of the Seibu Saison Group.

[19]**GGK Holding**: offices in Switzerland (headquarters in Basel), Austria, Germany, France, Netherlands, Spain, Italy and Brazil.

Parentheses indicate 1985 ranking. Figures are in millions of dollars.

With Argentinian agencies, AA altered its procedure of determing an agency's "real growth" (applying 1986 exchange rates to 1985 returns) because it primarily shows the impact of inflation in that economy. Dollar figures for 1985 are based on the average annual exchange rate (1.602) for that year.

With Brazilian agencies, AA altered its procedure of determining an agency's "real growth" (applying 1986 exchange rates to 1985 returns) because it primarily shows the impact of inflation in that economy. Dollar figures for 1985 are based on the average annual exchange rate (.000218) for that year.

Agency	City		Gross income 1986	Gross income 1985 ($000)	Percent change income	Billings 1986	Billings 1985 ($000)	Gross income 1986	Billings 1986 ($000; national currency)	Employes 1986	Employes 1985	Employes Percent change	Number offices

With Mexican agencies, AA altered its procedure in determing an agency's "real growth" (applying 1986 exchange rates to 1985 returns) because it primarily shows the impact of inflation in that economy. Dollar figures for 1985 are based on the average annual exchange rate (.00372) for that year.

Notes to individual listings

GENERAL NOTES
Young & Rubicam does not report billings. Figures listed for Y&R billings throughout the charts are AA estimates.
The Ball Partnership with offices in Australia, Hong Kong, Malaysia, Singapore and Thailand, acquired by WCRS Group PLC, London, in February, formerly was part of Ogilvy & Mather Worldwide. Figures arrived too late for inclusion in the charts and are listed in the respective country footnotes.

ARGENTINA
David Ratto minority owned by BBDO **Ortiz Scopesi y Cia.** minority owned by Ogilvy & Mather **Gowland Publicidad** Gross income for 1986 AA estimate **Lautrec S.A.** Affiliated with DFS Dorland **Pragma/FCB** 20% owned by FCB Communications **Cicero/Ted Bates Publicidad** Since agency did not submit figures, data are AA estimates **Johnson/B&B** 5% owned by DMB&B **Colonnese y Asociados** Gross income for 1986 AA estimate

SOLID FOUNDATIONS.

A superior product. Excellent creative. And a substantial budget. As an advertiser, what more could you ask for?

Except, perhaps, some reassurance that the foundation of your strategy is not built on sand.

Constructing a media strategy is in many ways like building a modern office tower. Both stand or fall on the quality of their foundations.

Without this one simple assurance, all your efforts are wasted building castles in the air.

In Asia only one publication guarantees you the solid bedrock you need; The Far Eastern Economic Review.

Quite simply the Review is unique. As Asia's most highly regarded publication, the Review is read by the greatest single concentration of the regions' most influential people.

Week after week it commands their attention and helps guide their decisions.

If this audience matters to your business, the Review is, without doubt, the solid foundation you need.

That's the kind of strength you can build on.

Far Eastern Economic REVIEW
